5 MARKET PROSPECTS

Vietnam is trying to maintain its main growth factors, but statistics for the first 6 months of 2019 shows a decline in growth from these factors, which leads to a gradual decrease in GDP growth rate. Particularly, GDP growth rate figures illustrated that there is a declining trend since 4Q2018 and 2Q2019's growth rate is the lowest rate in the last 8 quarters since 3Q2017. Manufacturing sector, one of the key drivers for GDP growth, had a decrease year-over-year growth rate, from 14.4% as at November 2017 to 11.18% at June 2019 which caused a negative impact to GDP growth rate. Moreover, the current state of the world's business cycle also affect Vietnam economy. From our perspective, Vietnam will withstand and unlikely be affected from the slowdown cycle of the world's economy.

**NOTES TO THE INTERIM FINANCIAL STATEMENTS
FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2019****10 FINANCIAL RISK MANAGEMENT AND FAIR VALUE**

On 6 November 2009, the Vietnamese Ministry of Finance issued Circular 210/2009/TT-BTC providing guidance on the application of International Accounting Standards regarding the presentation and disclosure of financial instruments ("Circular 210/2009/TT-BTC"), which is applicable for financial statements whose year ends at or after 1 January 2011. Circular 210/2009/TT-BTC provides definitions of financial instruments, classification, presentation and disclosure including financial risk management policies and fair value of financial instruments.

The Fund has exposure to the following risks from financial instruments:

Credit risk
Liquidity risk
Market risk

The Fund's investment portfolio comprises listed securities, transferable certificates of deposit, cash at bank and term deposits at bank. Management of the Fund Management Company has been given a discretionary authority to manage the Fund's assets in compliance with the Fund's investment objectives. Compliance with the investment restrictions is monitored by the Supervising Bank on a daily basis. If any breach to the investment restrictions is found, the investment portfolio shall be adjusted by the Fund Management Company to comply with the established restrictions.

(a) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund, resulting in a financial loss to the Fund. It arises principally from cash at banks, investments in securities and receivables from investment activities.

All current cash at bank, term deposits and transferable certificates of deposit were placed with financial institutions where the Fund did not expect any losses.

The Fund's securities will only be traded on the Ho Chi Minh City Stock Exchange and the Hanoi Stock Exchange or with counterparties which have a specified credit rating. All securities transactions are settled or paid for upon receipt/ delivery of securities via approved brokers. The risk of default is considered minimal since the delivery of securities for sales transaction is only made once payment has been received and delivery of funds for purchase transaction is only made once the securities have been received. If either party fails to meet their obligations, the trade will fail.

Receivables from investment activities include receivables from securities trading, interest receivables from term deposits, interest from transferable certificates of deposit and dividend receivables. Receivables from securities trading represent receivables from investments sold but not yet settled. Credit risk relating to unsettled transactions is considered minimal due to the good credit rating of the counterparties and short securities settlement period. The maximum exposure to credit risk faced by the Fund is equal to the carrying amounts of cash at bank and receivables from investment activities.

**NOTES TO THE INTERIM FINANCIAL STATEMENTS
FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2019****10 FINANCIAL RISK MANAGEMENT AND FAIR VALUE (continued)****(b) Liquidity risk**

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. Open-ended funds face high risk of liquidity due to obligation to redeem its Fund Certificates from unitholders.

The Fund's approach to managing liquidity risk is to maintain a highly liquid investment portfolio which comprises listed securities and bank deposits to meet its liquidity requirements in the short and long term.

As at 30 June 2019, all of the Fund's liabilities were due within 1 year.

As at 30 June 2019, there was no obligation relating to derivative financial instruments.

(c) Market risk

Market risk is the risk that changes in market prices, such as interest rates, foreign exchange rates and market prices will affect the Fund's income or the value of its investment portfolio.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of the Fund's financial instruments will fluctuate as a result of changes in market interest rates. This risk arises when the market interest rate increases, the value of fixed income instruments held by the Fund such as corporate bonds, government bonds, decrease, especially for long-term investments.

As at 30 June 2019, the Fund's exposure to market risk due to change in interest rates is minimal since all term deposits and certificates of deposit have fixed interest rates.

Currency risk

Currency risk is the risk that the value of the Fund's financial instruments will be affected by changes in exchange rates. The Fund is not exposed to currency risk as the Fund's assets and liabilities are denominated in Vietnamese Dong, which is the Fund's functional currency.

Market price risk

Market price risk is the risk that the value of the financial instruments will decrease as a result of change in securities indices and the values of individual securities.

The Fund has invested in securities that are affected by market price risk arising from the uncertainty in the fluctuation of the future market value of these securities. Market price risk is managed by the Fund Management Company by diversifying the investment portfolio and prudent selection of securities within investment restrictions.

As at 30 June 2019, if market price of securities had increased/decreased by 10% with all other variables (including tax rate) being held constant, the net asset value of the Fund would have been higher/lower by VND72,795,350,100 (as at 31 December 2018: VND86,056,613,400).

**NOTES TO THE INTERIM FINANCIAL STATEMENTS
FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2019****10 FINANCIAL RISK MANAGEMENT AND FAIR VALUE (continued)****(d) Fair value of financial assets and liabilities**

Financial assets of the Fund comprise:

- Cash;
- Equities of other entities;
- A contractual right:
 - To receive cash or other financial assets from other entities; or
 - To exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the Fund;
- A contract that will or may be settled in the Fund's own equity instruments.

Financial liabilities are contractual obligations to deliver cash or another financial asset to another entity or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the Fund or contracts that will or may be settled in the Fund's own equity instruments.

Fair value is the amount for which an asset could be exchanged, or a liability settled between knowledgeable, willing parties in an arm's length transaction.

Fair value measurement approach has not been stipulated in neither Circular 210/2009/TT-BTC nor Vietnamese Accounting Standards, Circular 198/2012/TT-BTC, Circular 181/2015/TT-BTC, Circular 183/2011/TT-BTC and Circular 15/2016/TT-BTC and prevailing regulations on the preparation and presentation of financial statements applicable to open-ended investment funds.

Therefore, the Fund applies method of NAV valuation in accordance with Circular 183/2011/TT-BTC, Circular 15/2016/TT-BTC, the Fund's Charter and Valuation Manual approved by the Board of Representative to determine fair value of the Fund's financial assets including cash and cash equivalents and investments. Fair value of the Fund's other financial assets and financial liabilities approximate their carrying value due to short-term maturity of these financial instruments.
