Monetary assets and liabilities denominated in currencies other than the reporting currency are translated at the exchange rates in effect at the consolidated balance sheet date. Translation gains and losses and expenses relating to foreign exchange transactions arising thereafter are recorded in the consolidated statement of income.

## 3 Basis of preparation of consolidated financial statements

## 3.1 Basis of preparation

The consolidated financial statements have been prepared in accordance with Vietnamese Accounting Standards, the Vietnamese Accounting System, and relevant statutory requirements of the Ministry of Finance, which may differ in some material respects from International Financial Reporting Standards and the generally accepted accounting principles and standards of the country of the reader.

Accordingly, the consolidated financial statements are not intended to present the financial position and results of operations and cash flows in accordance with generally accepted accounting principles and practices in countries or jurisdictions other than The Socialist Republic of Vietnam and furthermore their use is not designed for those who are not informed about Vietnam's principles, procedures and practices.

#### 3.2 Basis of consolidation

The consolidated financial statements are composed of the accounts of the Company and its subsidiary, hereinafter collectively referred to as the "Group".

#### Subsidiaries

Subsidiaries are those companies over which the Group has the power to govern the financial and operating policies. Subsidiaries are consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date on which control ceases. When the Parent company loses control of a subsidiary, it derecognises the assets (including any goodwill) and liabilities of the subsidiary at their carrying amounts at the date when control is lost; and derecognises the carrying amount of any minority interest in the former subsidiary at the same time.

The purchase method of accounting is used to account for the acquisition of subsidiary by the Group. The cost of an acquisition is measured at the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities assumed in a business combination are measured initially at their fair value at the acquisition date, irrespective of the extent of the minority interest. The excess of cost of acquisition over the fair value of the Group's share of identifiable assets acquired is recorded as goodwill. Goodwill is recognised in expenses (if it is of small value) and otherwise amortised in a uniform manner during its estimated useful life (if it is material). The useful life of goodwill is estimated as the time during which economic benefits are recovered by the Group. Such useful life is not beyond 10 years from the date of recognition. Negative goodwill represents the excess of the Group's interest in the fair value of identifiable net assets and liabilities, and contingent liabilities over costs of acquisition. It is recognised directly in the statement of income at the date of acquisition.

For a business combination involving entities under common control, identifiable assets acquired and liabilities and contingent liabilities assumed in the business combination are recognised at the acquirer's carrying value at the acquisition date, irrespective of the extent of any minority interest. The difference between the consideration given and the aggregate value of the assets and liabilities of the acquired entity is recorded as other reserve under shareholders' entity. No goodwill is created from a business combination of entities under common control.

Inter-company balances, transactions and unrealised gains on transactions between those companies and the Group are eliminated. Unrealised losses are also eliminated unless they provide evidence of an impairment of the asset transferred. The accounting policies of subsidiary have been changed where necessary to ensure the consistency with the policies adopted by the Group.

## Minority interest

Minority interest is the portion of the profit or loss and net assets of a subsidiary attributable to equity interests that are not owned, directly or indirectly through a subsidiary, by the parent.

The losses applicable to the minority in the subsidiary may exceed the minority interest in the equity of the subsidiary. In such cases, the excess, and any further losses applicable to the minority, are charged against the majority interest except to the extent that the minority has a binding obligation to, and is able to, make good the losses. If the subsidiary subsequently reports profits, the majority interest is allocated all such profits until the minority's share of losses previously absorbed by the majority has been recovered.

#### 3.3 Accounting system and form of records

Transaction costs relating to different transactions shall be amortized for such transactions on a pro-rata basis. Transaction costs shall be accounted for as a deduction from equity in the reporting period. *Financial liabilities* 

For presentation and disclosure purpose in accordance with Circular 210/2009/TT-BTC, financial liabilities are classified as either financial liabilities at FVTPL or other financial liabilities at amortized cost.

Effective interest method is a method of calculating the amortized cost of one or a group of financial liabilities and allocating the interest income or expense over the relevant period.
