V. FINANCIAL RISK MANAGEMENT:

Financial risk factors:

- The Company assesses the following risks from its use of financial instruments:
 - Market risk
 - Liquidity risk
 - Credit risk
- The Board of Management has overall responsibility for the establishment and oversight of the risk management principles. The Board of Management has established policies to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities.

1. Market risk

- Market risk is the risk that fair value or future cash flows of a financial instrument will be affected by the volatility of market price. Market risk includes 3 types of risk: currency risk, interest rate risk and other market price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

a. Currency risk

- The Company is exposed to currency risk on sales and purchases that are denominated in a currency other than VND. These currencies are mainly USD and EUR (other currencies have insignificant transactions).
- The Company's exposure to currency risk is managed by keeping the exposure to an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term over-exposures and planning a payment schedule in foreign currencies with the highest possible accuracy. The Board of Management does not use currency risk hedging transactions after considering that the cost of these risk hedging financial instruments may exceed the potential risk of fluctuations in exchange rates.

FINANCIAL STATEMENTS

For the fiscal year ended 31 December 2014

b. Price risk

- The Company invests in equity investments of listed and unlisted companies and is exposed to risks of price fluctuation of these investments. The risk factors affecting the performance of these investments include business performance and financial position of invested companies and market conditions. The Board manages risks related to business financial performance and financial position by selecting industries and entities to invest in. The risk factors related to market conditions are itself affected by general economic condition of Vietnam and behaviours of investors, which are all out of the Board's control. These factors have caused conditions to be volatile in recent years.
- For investments in listed securities, if the share prices had increased/decreased by 10% with all other variables including tax rate being constant, the Company's net profit after tax would have been 8,546,285,358 VND higher/lower corresponding to the tendency price changes.

c. Interest rate risk

The changes of interest rates would not have significant impact on the net profit after tax of the Company.

2. Credit risk

- Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables and investments in debt securities.

• Exposure to credit risk:

The total of carrying amounts of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was as follows:

FINANCIAL STATEMENTS

For the fiscal year ended 31 December 2014

• *Trade and other receivables*

- The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer.
- The Company's management has established a credit policy under which each new customer is analysed individually for creditworthiness before the Group's standard payment and delivery terms and conditions are offered. Credit purchase limit is established for each customer, which represents the maximum amount without requiring approval from the Board of Management. Customers that fail to meet the Company's benchmark creditworthiness may transact with the Company only on a prepayment basis.
- The Company makes allowance for diminution in value to represent estimated losses from trade and other receivables and investments. The main components of the allowance are specified losses relevant to the specific major losses to each customer and the overall losses of similar financial assets, which are determined when these risks could have been incurred but not identified. The overall losses are determined on statistic data of historical payment of the similar financial assets.

• *Short-term and long-term investments – Debt instruments*

- The Company's exposure to credit risk by investing in bonds is influenced by individual characteristics of the instrument issuer. In managing this risk, the Company's management analyses the creditworthiness of the issuer before acquiring the instruments. The Board of Management assessed that the issuers had good track records and believe that credit risk on those instruments is low.
- There was no allowance for diminution in value of investments in debt instrument during the period.
 - a. Financial assets neither past due nor impaired:
- Cash in banks and investments in bonds that are neither past due nor impaired is bank deposits and bond investments with high credit rating in Vietnam. Trade and other receivables that are neither past due nor impaired are mainly from companies with good collection history with the Company.
- Trade and other receivables of the Company that are neither past due nor impaired amount to 2,050,993,758,009 VND (2013: 1,992,271,479,406 VND).
 - b. Financial assets overdue and/or impaired:
- There are no other financial assets which are overdue and/or dilutive but receivables.
