OTHER INFORMATION

MESSAGE FROM THE CHAIRMAN

Dear Shareholders,

We have just exceedingly achieved the targets set out at the Company's Annual General Meeting (AGM) for the fiscal year 2016. In the context of unpredictable changes in the world, prompted from the political instability in Ukraine and Syria, creating tension between Russia and the West, led by the United State, and leading to mutual embargo sanctions that seriously affected the economy of Europe in general and Russia in particular. China, with its ambitions in the East Sea, has generated instability and friction in the region, the unity and consensus in the ASEAN community were also affected as each country member, beside the overall goal of the bloc, had its own political and economic agenda in the relationship with China. According to experts' views, China's economy was always in an alarming state that a crisis could happen at any time, resulted from an extended period of rapid but unsustainable development. The Brexit phenomenon and the wining of Donald Trump's Presidency in the United States, in stark contrast to previous predictions of most of the world's leaders, have pushed national development strategies away from integration. Vietnam's economy failed to meet the 6.7% growth target set by the National Assembly due to slow growth in the Agricultural sector. The Mining Industry came in below expectations due to drops in oil prices and mineral prices as well as ineffective investment from the previous Administration. Inflation was 4.74%, export turnover of goods reached over USD 176.63 billion, up 9%, and import turnover reached USD 174.11, up 5.2% compared to last year. FDI disbursement reached USD 15.8 billion, up 9% over the same period. The stock market closed the last session of the year at 664.87 points, up 15% from the beginning of 2016.

These figures presented rather positive results compared to the current state of the economy. However, the growth of the Index did not correspond to performance of the listed companies on the stock market, partly due to the fact that in a number of big cap companies, stock price increases were incompatible with growth, pushing the market's overall P/E upward, distorting indicators, causing difficulties for index funds, and deteriorating market confidence.

In the face of such a challenging situation, we have managed to exceed all objectives set out as we maintained the goal of sustainable development, taking safety as business principle, and transparency and mutual benefits, reflected in the vision "The Business of Success". Securities Services continued to hold the number one position in both Exchanges, with the market shares of 13.69% on Ho Chi Minh Stock Exchange (HOSE) and 11.03% on Hanoi Stock Exchange (HNX), widening the gap from the runner-ups. Investment Banking reclaimed its leading position by a series of successful deals worth hundreds of millions of dollars, such as advisory service for offering 78.38 million shares of Vietnam Dairy Products Joint Stock Company (VNM – HOSE); advisory service for the sale of shares of Hau Giang Pharmaceutical JSC (DHG - HOSE); private placement advisory service for No Va Land Investment Group Corporation (NVL - HOSE) under the book building method - serving as a reliable service provider to both local and foreign clients. SSI Asset Management (SSIAM) increased its total asset under management to USD 350 million,

being the only Vietnamese company to successfully raise funds in overseas markets, promising a new and effective channel to access capital for the economy. Treasury successfully completed its mission with SSI's total assets reaching VND 13,228 billion, of which VND 7,152.5 billion was owners' equity, effectively and safely managed the capital of both the Company and investors. The Company also obtained high credit rating in the financial market through the successful issuance of corporate bonds at interest rates equivalent to those of the commercial banks in the same period. Such achievements of the Business Units must also be credited to contributions of Supporting Units. Human Resources has recruited new staff, provided training, and proposed the Company to issue policies covering the interests of over 700 employees, ensuring a healthy working environment and healthy competition, continuing to attract talents to join the team. Information Technology kept on maintaining the well-establish technology environment ensuring smooth and fast solutions for business operations; on the other hand, spent effort on rolling out solutions to enable the business for new challenges in the market. Corporate Communications has done well to bridge the Company with the media as well as investors so that all activities of the Company are accurately reflected to the public. In 2016, SSI received many awards from reputable organizations such as "Best Local Brokerage in Vietnam" by AsiaMoney, "Best Broker in Vietnam" by FinanceAsia and Merits from the State Securities Commission and the Ministry of Finance, etc.

2017 is anticipated to be a challenging year for the domestic economy, requiring a comprehensive reform not only to cope with existing problems, including public debts, investment efficiency, inflation, budget deficit, settlement of banks' bad debts, exchange rates, etc., but also to adapt to the global situation where globalization is being challenged due to initiatives of leading countries to encourage businesses to invest domestically through tax policies. We believe in the Prime Minister's commitment to develop an enabling government, we see the potential for internal-based development as the State focuses on policy making to allocate resources, while economic sectors will leverage the resources for development as outlined in the five-year economic development plan that the government has recently submitted to the National Assembly.

We hope that the recent statement made by the Chairman of the State Securities Commission on efforts to control the stock market for transparency and restoring investors' confidence is to be implemented strongly and firmly. Then we can overcome all difficulties and challenges in 2017, establishing premises for sustainable development for the next years. 2017 for SSI is a year to find success in difficult times of the economy, but also a period of great opportunity to reaffirm its pioneering position as the leading financial institution. SSI will continue to accompany sustainably developing companies, opening up access to funding through both domestic and international capital resources. We always understand that only when the number of Businesses that are transparent, efficient and sustainable increases, do Investors have more secure options, internal drive of the economy is strengthened, and the stock market can grow strongly, really becoming the most important capital channel for the economy.

I would like to express my sincere thanks to all Shareholders who have accompanied me personally and the Board of Directors (BOD) throughout the years, whereby all proposals of the BOD have been supported and approved. Thanks to the members of the BOD who have worked with me in finding solutions to implement resolutions of the AGM, thanks to the Board of Management and Directors for completing our plan, thanks to all Staff and Employees of the Company, you are the living cells of SSI today. We are also indebted to our Clients who are using SSI's services. We are always mindful that we must do our best to keep our Clients - our patrons satisfied.

We wish You good health and success!

Ho Chi Minh City, March 28th, 2017

VISION

The Business of Success

SSI operates based on the vision “The Business of Success”.

At the heart of all our products and services is a drive for achieving success. We help unlock opportunities in financial markets, and turn these into prosperity and growth.

We put all our resources and ideas behind bringing success to our clients, our people, our shareholders and the communities we operate in.

MISSION

Connecting Capital to Opportunities

SSI's mission is to connect capital to opportunities.

This mission unifies all the businesses under the SSI brand and will guide any future opportunities, which the brand may take on.

CORE VALUES

Solutions-Led

We are focused on the outcome of making our customers successful, and we prioritize their individual needs over existing products or processes.

Skilled

We are experts in our industry and in our markets, and will continually enhance our professional skills to provide the highest standards of service to our customers.

Inventive

We empower and encourage our people to find creative new ways to bring success to SSI and its customers.

CORPORATE INFORMATION

Saigon Securities Inc. (SSI – HOSE) was found in December 1999 as the first privately licensed securities firm and the smallest one in the market at that time. With 17 years of experience in Vietnam financial market, the Company has become a leading financial institution, which has the fastest growth rate in term of charter capital. With strong financial capability, high standard corporate governance, and professional human resource, SSI provides clients a comprehensive range of financial products and services, maximizing shareholders' value. The Company has a wide network in big cities in Vietnam, such as Hanoi, Ho Chi Minh City, Hai Phong, Nha Trang, Vung Tau.

BUSINESS ENVIRONMENT

2016 Macro Review
2017 Macro Outlook

2016 MACRO REVIEW

2016, the first year in the 5-year plan, was indeed a tumultuous year for Vietnam. It headlined by Brexit, a Trump presidency, a tempering Yuan, and the US Fed rate hike which collectively triggered outflows from emerging markets. No one expected Vietnam would fluidly transition in an election year. There is a multitude of unforeseen factors, among which included El Nino, the environmental scandal at the Formosa steel factory in Central Vietnam and the Samsung Note 7 recall. That is the main reason for the economic growth is only 6.21% YoY, lower than the target set at the beginning of the year (6.7% YoY). However, the bright spot in 2016 lies in the fact that the new government has quickly built up confidence, taking concrete and clear steps in stabilizing the macro economy and helping it to gradually recover in the second half of the year. In particular, a number of pro-growth measures were instituted, including:

- i. lowering interest rates (both deposit and lending rates) in the second half of 2016 (especially from the 4th quarter);
- ii. accelerating SOEs reform by effectively relaxing foreign ownership limit, shortening the IPO and listing gap, and completing divestments of a multitude of businesses, even if they were profitable, and;
- iii. implementing administrative measure reforms to bring the business environment of Vietnam closer to ASEAN-4.

In 2016, **many positive factors have been in line with our expectation**, including i) impressive manufacturing growth (at 11.9% YoY), ii) rising FDI disbursement and iii) tamed inflation (CPI averaged 2.66% YoY, of which core inflation remained below 2%).

However **there are still many unforeseeable negative factors in 2016**. Dormant mining and agriculture sectors inhibited GDP growth. If we were to exclude the mining sector, the rest of the economy grew at 7.14% YoY (much higher than last year's level of 6.7%). In the context of lower commodity prices, a dormant mining sector would not have overburden the economy.

Consumption growth has been lower than expected, especially in rural areas. Final consumption growth totaled 7.32% YoY as compared with 2015's level of 9.12% while real retail sales increased 7.8% as compared with 2015 level of 8.5%.

Last but not least, the banking reform progress fell short of expectation. In fact, most of the focus of the reform goal has not progressed. Specifically, bank recapitalization, Basel II implementation, the 5-year roadmap to reform the sector, the sale of purchased debts by VAMC, the solution on Zero-bill banks, the search for strategic partners and FOL extension in banking sector, all saw no new developments in 2016. That may be the reason for the banking sector was the worst performer in the stock market.

2016 STOCK MARKET

Sector performance 2016

Source: SSI Research

Average daily turnover

Source: SSI Research

In 4Q2016, the VNIndex plateaued to an 8-year high at 688.89 but closed the year at 664.87, 15% higher than 2015. 2016 marked the listing of many big caps. While the total number of stock listed on HOSE increased by 14 stocks, the total market cap of HOSE increased by 30% YoY. Notably, out of the 85 points increase of the VNIndex, ROS and SAB accounted for 48 points. If we were to exclude the newly listed ROS and SAB, the VNIndex would only have increased by 6% in 2016.

Average daily turnover (ADT) climbed 21% YoY to VND 3,100 billion in FY16 after it had retreated 14% YoY in FY15. The improvement of ADT might be primarily explained by (i) stronger indices (i.e. VNIndex: +15.33% in FY16 vs. +6.35% in FY15) on the back of a healthy economy and listed companies' improved business performances (i.e. 2016E net profit growth of 11.49% YoY vs. 2015 net profit growth of 1.79% - SSI estimates), (ii) extension of foreign ownership limit (FOL) at several listed companies, and (iii) expansion of brokers' margin loans with diminished interest rates. According to the National Financial Supervisory Commission (NFSC), total margin financing balances climbed by 19% YoY.

In a year with repetitive volatility in the global markets, foreign investors shifted more focus to Vietnam. The weight of Vietnam in the MSCI Frontier Index increased from 3.69% in May 2016 to 7.42% as of Jan 2017 with the foreign room extension of VNM. Although the reported data from the Ho Chi Minh Stock Exchange (HOSE) and the Hanoi Stock Exchange (HNX) revealed a net outflow of USD 0.3 billion, the data does not accurately reflect transactions related to convertible bonds and issuances (both to existing shareholders and private placement).

According to our calculations for foreign investor's ownership on the HOSE and the HNX in 2016 increased by USD 3 billion (increased 22.9% YoY, much higher compared to the VNIndex augmentation), the absolute foreign holding reached USD 16.1 billion.

HOSE + HNX	2015	2016
Foreign holding (in USD billion)	13.1	16.1
Foreign ownership (% of total market cap)	22.8%	22.3%
Total market cap (USD billion)	57.4	72.3

2017 MACRO OUTLOOK

The National Assembly convened in October 2016 with an aim to achieve the following economic plans for 2017: 2017 GDP growth at 6.7%, CPI (average) of roughly 4% YoY, budget deficit at lower than 3.5% of GDP. Among these targets, GDP growth is attainable by given the obvious growth catalysts while other targets could be more difficult to achieve. The following catalysts are needed to stimulate growth:

Domestic consumption continues to grow strongly, thanks to stable interest rate environment and rising trend of the middle income class. This is the most basic internal force of growth, in the context of the world situation is more turbulent with the rise of trade protectionism.

Development investment (mainly infrastructure investment), could return to old growth momentum after one year of slow growth in 2016. The government's development investment plan to increase by 36.7% YoY. In addition, ODA disbursement will recover after falling nearly 20% YoY in 2016, before Vietnam officially graduates from a low-income to middle-income country in Sep17 (after this deadline, development loans from global donors might be subject to higher interest rate).

Regarding FDI, although committed FDI decreased in 2016, most likely it will not compromise FDI disbursement in 2017, as many projects might be licensed and disbursed in the year, including large thermal power projects (Vung Ang 2, Nghi Son 2).

Two underperformed sectors in 2016, are likely to recover due to better weather (agriculture sector) and commodity prices are on the upward trend (mining sector).

Inflation taming is likely to be challenging for government in 2017. With new calculation method, CPI in the first months of 2017 will exceed the full year target level right away, and it is a major challenge for the government to ensure macroeconomic stability. On contrary, inflation at the beginning of 2016 was quite low, so there was room for monetary policy expansion then. Regarding monetary policy, in addition to pressure from rising inflation, banking sector' undercapitalization also negatively impacted the possibility of high credit growth to support economic growth:

- **Credit growth at 17% - 18%** in recent years has led credit-to-GDP ratio reached 10-year high, which implies higher risk for the banking system.
- **The pressure of bank recapitalization** extended as their CAR fell from ~14.0% in FY14 to ~12.7% at end-Sep 16. SOCBs are the group with lower CAR in the system and if their goal is to achieve high credit growth, they will need to recapitalize soon.

Banks' robust loan growth in 2016 was mostly fueled by retail loans, in which mortgage loans were estimated to account for 54% of retail loans. Both the government and the State Bank of Vietnam (SBV) are aware of the risks of mortgage loans for banks and the property sector is unlikely to grow rapidly from 2017, so credit growth comes from mortgage loans might be peaked and slowed down in the coming years.

For monetary policy, the exchange rate is also a major concern of market participants. As export growth softened in the wake of increasing protectionism, and import growth accelerated on the back of higher growth with capex expansion; the trade deficit is likely to resurface, coupled with expected lower remittances due to the US Fed rate hikes, while interest rates on deposits for USD in Vietnam remained at 0%. These factors can exert further pressure on Vietnam's balance of payment. However, foreign indirect investment and SOE divestment could help to balance the pressures on the exchange rate. As a result, the SBV could be continue to take the initiative in managing the exchange rate. In regards to interest rates, accelerated inflation could push deposit rate higher, while the same might not be applicable for lending rate, as the government will try to maintain it at a stable level for the sake of higher growth.

For a lower budget deficit target, although there is great expectation for innovation in managing budget spending for 2017, the sharp reduction of the budget deficit to 3.5% of GDP will also be a challenge and the budget deficit continues to limit the ability to use fiscal policy to support economic growth.

In 2017, the revised Law on State Budget will take effect, which changes the budget deficit calculation (mainly removing debt repayments from the expenditure). For simplicity, the 2016 budget deficit is estimated at 5.64% of GDP in the old calculation (target 2016: 4.95% of GDP), converted to a new calculation of about 4.33% GDP. This means that even in a new way of calculating, a budget deficit of 3.5% of GDP is not just a change of calculation, but also a strong balance of payments effort. More strongly in the context of public debt has reached (and may have exceeded) the 65% of GDP.

On the spending side, the government targets to curb the current expenditure by 5% YoY. As the current expenditure normally accounts for over 70% of total spending, this reduction will constitute for the expansion of development investment. On the revenue side, the structure of budget collection revealed diminished contribution from foreign trade activities (due to FTAs implementation), crude oil (revenue from crude oil only reached 69% of the year plan) and SOEs.

Looking at the whole, the emphasis on agricultural restructuring (climate change adaptation, high-tech agriculture, enhance the value chain, land accumulation), and the service sector (especially tourism) will create new impetus for economic growth. In the context of increased trade protectionism, focusing on internal development, focusing on domestic consumption, taking advantage of the opportunities of the young populations and the rise of the middle class is the major directions to sustain growth for Vietnam.

Credit to GDP ratio

2017 STOCK MARKET OUTLOOK

According to SSI Research & Investment Advisory, the main trends of Vietnam's stock market in 2017 include:

Revenue Growth (%)			Net Profit Growth (%)			Dividend Yield (%)		
2015	2016E	2017E	2015	2016E	2017E	2015	2016E	2017E
8.7%	10.9%	16.4%	1.79%	11.49%	11.45%	6.8%	4.6%	4.3%

Estimated revenue, profit and dividend growth of listed firms by 2015-2017

Source: SSI Research estimates

MORE SOE DIVESTMENT

Equitization and divestment of SOEs will continue to create investment opportunities to change the face of the Vietnamese stock market. We expect that at least 50% of the Top 30 market cap will be replaced by newcomers in 2017. Consumer, industrials and energy sectors will grow the most in terms of market cap, therefore, the VN30 will become more representational of the overall market. In Decision 58/2016 on SOE classification for 2016-2020 issued by the Prime Minister, many SOEs do not need state-owned dominance, this will create more investment opportunities in the coming years.

MORE BANKING REFORMS

Banking reform is expected to improve in 2017. However, a down year might be followed by an up tempo year. In 2017, although we still see a lot of risks facing the sector, any progress in M&A or FOL extension will strengthen investors' confidence

IMPACT FROM EXTERNAL FACTORS

Besides the impacts from the US Fed rate hike, increasing protectionism and a softening RMB, we believe that Vietnam will continue to be an attractive frontier market destination, given the progress in FOL extension and market cap expansion. We expect that in May-June Review, the weight of Vietnam might increase significantly in the MSCI Frontier Index (MSCI Frontier will upgrade Pakistan to emerging market status and might exclude Nigeria and consider upgrading Argentina to emerging market as well).

COMMODITIES OUTLOOK

In our opinion, commodities (Oil, natural gas and coal) uptrend is beneficial for fiscal balance and the energy & material sectors. On the other hand, high input price is negative for the consumer and industrial sectors as margin could contract.

THE BOARD OF MANAGEMENT'S REPORT ON BUSINESS RESULTS

2016 BUSINESS PERFORMANCE

In 2016, SSI’s consolidated revenue exceeded the revenue target set out in the business plan by 60%, reaching VND 2,312 billion, or a growth of 28% compared to 2015. 2016 consolidated profit before tax reached VND 1,056.8 billion, exceeding the target by 11.24%.

Positive business performance was achieved in all business sectors.

Revenue from **Securities Services** accounted for 37.5% of the total revenue, achieving approximately VND 868 billion, 42.3% higher than 2015. This mainly resulted from a remarkable growth of brokerage fees and revenue from financial products. The two groups made up more than 90% of total revenue of the Securities Services in 2016. In 2016, SSI continued to maintain the No. 1 position on both exchanges of HOSE and HNX, with the brokerage market shares of 13.69% and 11.03% respectively, increasing the gap with the second rank compared to 2015. This result shows SSI’s serious investment in improving product & service quality and diversifying investment analysis and recommendation reports, as well as the development of human resources with high qualifications and good professional ethics. Margin lending activity also experienced a significant growth with average margin balance of over VND 3,890 billion in 2016, maintaining the highest level in the market and with updated and appropriate margin stock list. By late 2016, SSI managed more than 100,000 client accounts.

Principal Investment revenue was VND 934 billion, accounting for 40.4% of the total revenue of the Company, a rise of 8.4% compared to 2015. With total 2016 market value of investment up to VND 4,176 billion, at the end of 2016, SSI continued its effective value investment strategy, accompanying companies in their endeavors. At the year-end, SSI had 3 associates, namely The PAN Group JSC. (PAN - HOSE), Dong Nai Port JSC. (PDN - HOSE), and Vietnam Fumigation JSC. (VFG - HOSE), all of which achieved positive business performance for the last year.

Investment Banking regained its leading position by a series of successful deals in 2016 totaling up to hundreds of millions of US dollars, such as advisory service for offering of 78.38 million share of Vietnam Dairy Products Joint Stock Company (VNM – HOSE), advisory service on the sale of shares of Hau Giang Pharmaceutical Joint Stock Company (DHG – HOSE) and private offering advisory service for No Va Land Investment Group Corporation (NVL – HOSE) under the book building method. Revenue from these services hit its highest level in recent years, reaching VND 106.6 billion, an increase of 145% compared to 2015.

2016 continued to witness a successful year of **SSI Asset Management Company Limited (SSIAM)** in raising capital from foreign investors, increasing the total assets under SSIAM’s management to over VND 7,913 billion, up 27.4% against 2015. On the other hand, all of the funds under SSIAM’s management achieved superior rates of returns compared to the VN Index. The Company’s 2016 revenue rose by 137% compared to 2015, reaching VND 32.5 billion.

Treasury successfully completed its assigned tasks in 2016 in terms of revenue, increasing the total assets to more than VND 13,000 billion, 9% higher than 2015, ensuring the highest level of liquidity for customers and effectively supporting the capital needs of other Business Units, successfully issuing corporate bonds with interest rates equivalent to those of commercial banks in the same period, enhancing the image and reputation of SSI as one of the most prestigious intermediary financial institutions in the securities market in particular and in the financial market in general. Revenue from the Treasury in 2016 reached VND 366 billion, contributing approximately 16% to the Company’s total revenue and growing by 37,3% compared to the previous corresponding period.

Details of business performance by sector will be presented in later sections of the report.

2016 FINANCIAL PERFORMANCE

In 2016, SSI's total consolidated assets saw a 9% increase to approximately VND 13,228 billion compared to 2015 and its owners' equity reached VND 7,152.6 billion. Total assets increased thanks to the increase in bank loans in order to support two business activities: Margin lending and Treasury

BUSINESS SECTORS

SECURITIES SERVICES

2016 HIGHLIGHTS

100,845

Total client accounts

13.69%

Brokerage market share at HOSE

11.03%

Brokerage market share at HNX

SSI continued to reaffirm the No. 1 brokerage position on both Ho Chi Minh City Securities Exchange (HOSE) and Hanoi Securities Exchange (HNX) with 2016 market share at SSI’s market share in the former reached 13.69%, up 4.7% compared to 2015; and 11.03%, up 15.3% compared to 2015 in the latter.

The number of new retail accounts rose by 98% compared to 2015, totaling over 100,000 accounts at the end of 2016.

Retail Brokers continued to grow in both quantity and quality. In 2016, SSI had 353 full-time brokers working at 10 branches and transaction offices nationwide, an increase of nearly 30% compared to 2015.

Margin lending services also experienced a significant growth with 2016 average margin balance of over VND 3,890 billion, maintaining the highest level in the market and with updated and appropriate margin stocks list.

Products from Institutional Research and Investment Advisory are introduced to a great number of domestic and foreign investors, receiving a lot of positive feedback in the context of Vietnamese market likely to be upgraded to the MSCI Emerging Market.

Direct Market Access (DMA) Services were successfully introduced, providing direct order placement tools for Institutional Customers. Moreover, in the past year, SSI has successfully organized hundreds of corporate access events to obtain the understanding of companies, exchanging information and introducing investment opportunities to foreign and foreign institutions, and has been awarded “Best for events and/or conferences in Vietnam” by Asiamoney.

SSI Securities Services continued to receive a great number of prestigious awards from regional reputable institutions such as: “Best Broker in Vietnam” by Finance Asia, “Best Local Brokerage” by Asiamoney, and several awards for excellent individuals from Research and Investment Advisory, Institutional Sales and and Institutional Broker Departments.

2016 PERFORMANCE

In 2016, the market was remarkably impacted by international events such as the fall of crude oil prices, the United Kingdom’s withdrawal from the European Union (Brexit) on June 24, and the results of the United States presidential election on November 9. A series of regulations have been issued in Vietnam such as: Circular No. 115/2016/TT-BTC has contributed to enhancing publicity and transparency of companies subject to equitization and protecting the interest of investors; Decision of HOSE on trading units and order types applied on HOSE has provided investors with more utilities, contributing to the market liquidity enhancement. Room expansion was performed on a large scale; State capital divestments from large companies such as Vietnam Dairy Products Joint Stock Company (VNM - HOSE) and listings of companies having the market capitalization of more than USD 1 billion became more positive. The market scale was extended, leading to much more choices for domestic and foreign investors than before, especially more opportunities for foreign investors to invest in their favorite shares of which rooms had been full earlier. Excess liquidity in the banking system caused low interest rates. Easy capital mobilization for securities investments pushed up domestic cash flows, offsetting the overall deficits from foreign cash flows. Revenue from margin lending became a new growth motivation thanks to mobilization of margin lending capital with low interest rates and highly-increased margin needs in the market. Workloads to deal with margin requirements and risk management, therefore, also witnessed a sudden leap. Investors have been more professional so far, diverting more attention to fundamental analysis and needing more information from securities companies. This results in fiercer competition among securities companies in the provision of investment analysis and recommendation reports, services to support investors in meeting companies, financial products to support investors.

In 2016, SSI Securities Services continued to succeed in increasing the number of customers; developing retail customer brokers; growing the brokerage market share; diversifying investment analysis and recommendation reports; expanding margin stocks list and rising margin loan balances; supporting customers by organizing events where investors could meet listed companies and find an investment opportunity. Also, Securities Services received many prestigious awards for brokerage and investment analysis from reputable institutions in the region such as FinanceAsia and Asiamoney. However, institutional customer activities experienced a decline in the face of other securities companies’ competition for market share by reducing fees, and a small number of institutional sales staff led to a lot of limitations on caring existing customers and developing new customers.

Market share growth

The brokerage market share continued to reaffirm its highest position in both stock exchanges, reaching 13.22%, up 7.4% compared to 2015, in which the market share on HOSE reached 13.69%, up 4.7% compared to 2015 while that on HNX reached 11.03%, up 15.3% compared to 2015. The market share growth resulted from the extension and development of new customers, increased outstanding balances of financial products, improvement of customer care services, and enhancement of the quality of investment analysis and recommendation reports.

Top 3 market share of stock/ETF on HOSE

Revenue growth

2016 revenue from the Securities Services reached more than VND 868 billion, a rise of 42.3% compared to 2015, resulting from a remarkable growth of brokerage fees and revenue from financial products. The two revenue groups made up more than 90% of total revenue.

Revenue from Securities Services

Growth in customers

By late 2016, SSI managed more than 100,000 accounts, accounting for 5.9% of total investor accounts of the whole market, of which 156 accounts were of new foreign institutions mainly from the US, Hong Kong, Singapore and Europe. The impressive growth in the number of customer accounts shows a great concentration on investment advisory services, financial products, as well as the development of well-trained and professional brokers.

Number of accounts

Source: SSI

Growth in Retail Brokers

With the targets of share market growth and scale expansion, SSI continued to implement a large number of programs and policies on recruitment of brokers who were highly qualified and suitable with the working environment and corporate culture of the Company. Not only the increase in quantity, SSI also attached importance to broker training programs so that its brokerage personnel could become financial consultants with high expertise, good professional ethics, consulting capability and customer care skills.

At the end of 2016, SSI had 353 full-time Retail Customer Brokers working at 10 branches and transaction offices nationwide with net average fees of over VND 60 million/person/month.

Improving the quality of products and services & Developing new products

With endless efforts to improve the quality of products and services, in 2016, the SSI Securities Services successfully deployed new products and increased the utility of existing products, meeting customers' increasing demands.

SSI investment advisory and recommendation products for retail customers were closely aligned with the market with the combination of fundamental and technical analyses to provide appropriate recommendations for customers, enhancing their investment returns and minimizing risks. In 2016, SSI Retail Research and Investment Advisory launched two breakthrough new products, namely Monthly Macro Report “Vietnam Chartbook” and Semi-annual Strategy Report “2016 Stories”. In addition, reports in Japanese language were developed into a specialized section including 3 types of reports, providing sufficient investment information and recommendations for Japanese customers.

Institutional investment advisory and recommendation products have been one of SSI's strengths in recent years and highly appreciated for the trust built with domestic and international customers. SSI has been providing specialized reports for 29 industries and 70 listed companies, accounting for 90% of total market capitalization value.

Online trading products have also been improved with more features and utilities for customers such as online securities transfer, which helps customers trade and manage their portfolios more easily, and online order confirmation, which helps customers actively track and manage orders placed on their accounts without signing an order voucher in person.

The Institutional Sales, in cooperation with the IT Department, successfully provided Direct Market Access (DMA) services for domestic and foreign institutional customers. Also, Institutional Brokerage launched Good Morning Vietnam products, receiving high appreciation from customers.

TREASURY

2016 HIGHLIGHTS

Reached a striking growth in revenue (37.28% higher than 2015) and total assets (up approximately 9% compared to earlier 2016)

Absolutely ensured liquidity for customers and effectively supporting high fund demands from other Business Units within the Company, enhancing the image and reputation of SSI as one of the most prestige intermediary financial institutions in the securities market in particular and in the financial market in general.

Continued to create safe and effective structured products targeting potential customers.

37,28%

Growth in revenue compared to 2015

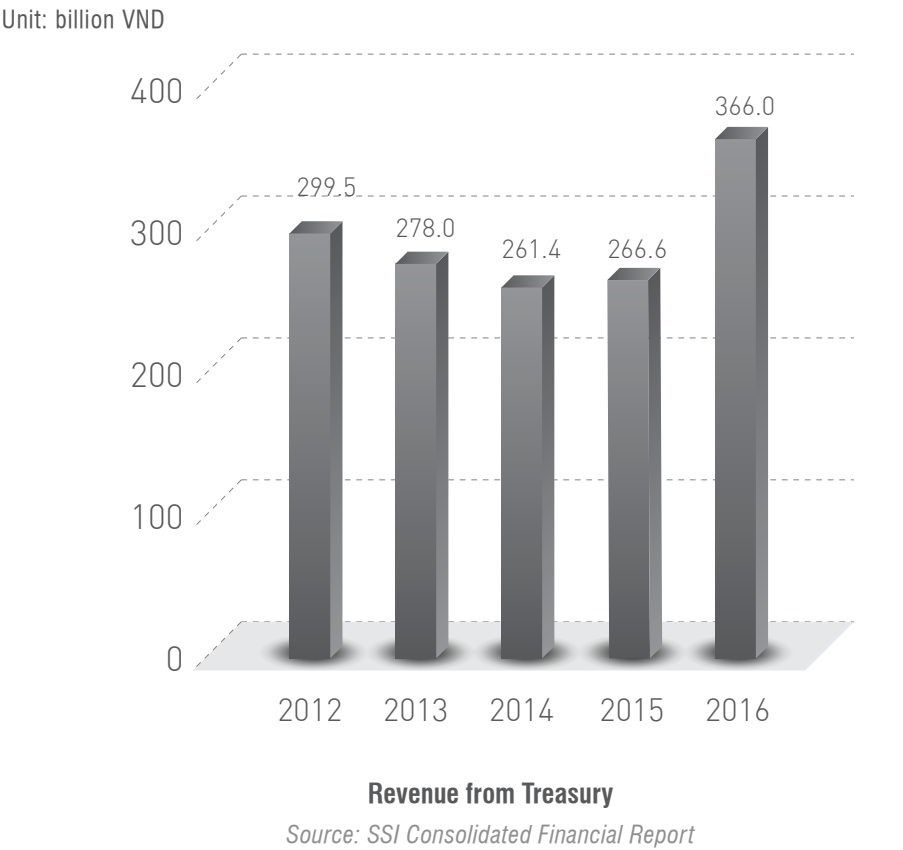

9%

Total assets increase 9% compared to earlier 2016

2016 PERFORMANCE

Treasury had an excellent performance in 2016 with increases in total assets by 9%, revenue by over 37.28% and profits by the same percentage compared to 2015. Treasury did not only meet high financial targets but also had remarkable achievements in other activities such as developing products, extending markets, partners and customers, and developing human resources.

High growth in core business activities

With the target of a strong growth in total assets to ensure the No.1 position in the market compared to competitors, in 2016, SSI had total assets of over VND 13,000 billion, a rise of approximately 9%. This is one of important competitive advances when SSI engages in complicatedly-structured and large-sized transactions.

Although interest rates in the market remained low due to the market supply and demand as well as the State Bank of Vietnam’s orientation towards stable interest rate policies, SSI Treasury continued its growth with a sharp increase in revenue and profits from the monetary trading activities, mainly from long-term deposits.

Besides, in the past year, SSI earned a large profit from the principal trading of Government bonds and Government-guaranteed bonds as it actively seized opportunities from interest rate fluctuations in the market. In addition to the principal trading of Government bonds, corporate bond investment and repo transactions also generated high profits based on appropriate risk levels, contributing to the 2016 highlights.

Profits from structured products

Along with the development of the financial market, there was an increasing demand for Derivatives and Structured Products, requiring the products designed appropriately with the characteristics of each group of investors and the market practices. Since 2015, new product investment, research and development have contributed to the effective operations of SSI Treasury in 2016, which was shown not only by a revenue increase but also by the development of new business sectors as well as new customers, creating development momentum for such products next year.

Ensuring the highest level of liquidity for the Company and Investors as well

Besides equity trading activities, ensuring the highest level of liquidity of the Company as well as investors, in any circumstances, was a very important mission of SSI Treasury in 2016. In the face of high fund demands from other Business Units, especially those for margin loan balances from the Securities Services, at certain times exceeding VND 4,200 billion, SSI Treasury must ensure demand satisfaction in a timely manner. It was committed to supporting and providing the funds through issue of various debt instruments with interest rates at a record low, enhancing the image and reputation of SSI as one of the most prestige intermediary financial institutions in the securities market in particular and in the financial market.

Broadening and strengthening relations with financial institutions in the market

2016 also marked the efforts of the Treasury and Finance Trading Department to strengthen, foster and build sustainable and close business relations with large financial institutions in the market such as: Joint Stock Commercial Bank for Foreign Trade of Vietnam (VCB), Joint Stock Commercial Bank for Investment and Development of Vietnam (BIDV), Vietnam Joint Stock Commercial Bank for Industry and Trade (Vietinbank), and Vietnam Bank for Agriculture and Rural Development (Agribank) as well as enhance further cooperation with such joint stock commercial banks as: Asia Commercial Joint Stock Bank (ACB), Military Commercial Joint Stock Bank (MBB), Orient Commercial Joint Stock Bank (OCB), Vietnam International Commercial Joint Stock Bank (VIB), and Petrolimex Group Commercial Joint Stock Bank (PGB). Moreover, SSI also broadened relations with other economic organizations such as groups, listed companies with a series of high-potential deals next year.

ASSET MANAGEMENT

2016 HIGHLIGHTS

Successfully launched SSIAM UCITS - Vietnam Value Income and Growth Fund from European individual and institutional investors. This is a UCITS open-ended fund registered in Luxembourg, and SSIAM is the fund manager.

Increasing the size of Andbanc Investments SIF – Vietnam Value and Income Portfolio (incorporated in December 2015) more than 3 times to USD 52.2 million

Officially ending the capital mobilizing period for Daiwa – SSIAM Vietnam Growth Fund II LP with total committed capital of USD 39.4 million from investors in Asia. This is a private equity fund managed by Daiwa Corporate Investment and SSIAM.

Strong increase in size: Total assets under SSIAM’s management reached more than VND 7,913 billion, a rise of 27.4% compared to 2015. AUM growth came from both newly mobilized capital and investment returns that SSIAM brought back to its customers.

High rates of returns for funds and portfolios under SSIAM’s management.

2016 prestigious awards

- “Best Fund House” awarded by Asia Asset Management for the 3rd time;
- “CEO of the Year” awarded to Ms. Le Thi Le Hang by Asia Asset Management for the 5th successive time.

VND

Total assets under SSIAM's management in 2016, a rise of 27.4% compared to 2015

2016 PERFORMANCE

Business Environment

Vietnam’s asset management industry witnessed many achievements in 2016. According to the SSC, at the end of 2016, total assets under management of the industry increased by 17% to VND 146,000 billion compared to 2015. By the end of 2016, a new fund was launched, increasing the total number of funds in the marketplace to 30 funds, including 17 open-ended funds with assets size of VND 3,400 billion. Domestic individual investors began to pay more attention to the products of asset management companies. By the end of 2016, total number of investors in open-ended funds was estimated to be more than 10,600, 65% higher than the previous year. This shows positive signs for the market and a motivation for asset management companies to diversify their products and services to better meet the needs of investors in future.

Many open-ended funds with impressive returns

Currently, there are 13 open-ended share and balanced funds, and 5 open-ended bond funds operating in the market. Several share funds had higher performance in 2016 in the market, building trust with investors in open-ended funds. Particularly, certain funds had rates of return from 16 to 24%, much higher than the VNIndex growth of 15%. The growth of open-ended bond funds was effected by low and less volatile interest rates; however, most funds showed their good performance with rates of return from 7% to 9%.

Strong increase in the size of open-ended funds

By the end of 2016, total assets of domestic open-ended funds reached VND 3,400 billion, an increase of 70% compared to 2015. This mainly resulted from the superior performance of many open-ended funds in recent years as well as great efforts of asset management companies in providing information about open-ended funds for investors. In addition, in 2016, many asset management companies actively expanded the open-ended fund certificate distribution channels through the banking system. Thanks to human resources and customers of banks, more and more individual investors were able to access open-ended fund products.

The increase in fund size made a great contribution to busy trading of fund certificates in 2016. According to the Vietnam Securities Depository, by late October 2016, there were more than 1,100 billion fund certificates traded after 818 periodic call auction sessions with total transaction value of over VND 1,667 billion (a rise of 76.29% in the number of sessions and 27.12% in total transaction value compared to 2015. The number of buy orders for fund certificates saw a sudden jump to 5,231 with the value of more than VND 1,000 billion, 258.24% higher than 2015.

Diversified fund sources with high quality listed stocks

The increase in fund size required fund diversification in the market and listed stocks with high liquidity and large capitalization value. The 2016 securities market saw the listings of many State-owned groups and corporations such as Saigon Beer Alcohol Beverage Joint Stock Corporation (SAB – HOSE), Hanoi Beer Alcohol Beverage Joint Stock Corporation (BHN – HOSE), Vietnam National Textile and Garment Group (VGT – UPCOM), and Airports Corporation of Vietnam (ACV – UPCOM). This resulted from the Government’s great efforts in speeding up the equitization and listings of stocks in the formal exchanges.

Legal documents facilitating the development of new products

Several legal documents were issued in 2016, aiming to create legal framework for the development of new products of the asset management industry.

In July 2016, Decree No. 88/2016/ND-CP on voluntary supplemental retirement program was officially issued. This is an attractive product that allows employees to prepare their retirement finance and provides employers with a tool to retain talents. The voluntary supplemental retirement program helps diversify the products of asset management companies.

In terms of derivatives, the Ministry of Finance issued Circular No. 11/2016/TT-BTC guiding Decree No. 42/2015/ND-C on derivatives and derivatives market, and Circular No. 107/2016/TT-BTC on guidelines for the offering and transaction of covered warrants. Such new products are expected to be launched in 2017. The introduction of Future Contracts and Warrants provided asset management companies with more risk-hedging tools for funds and investment portfolios.

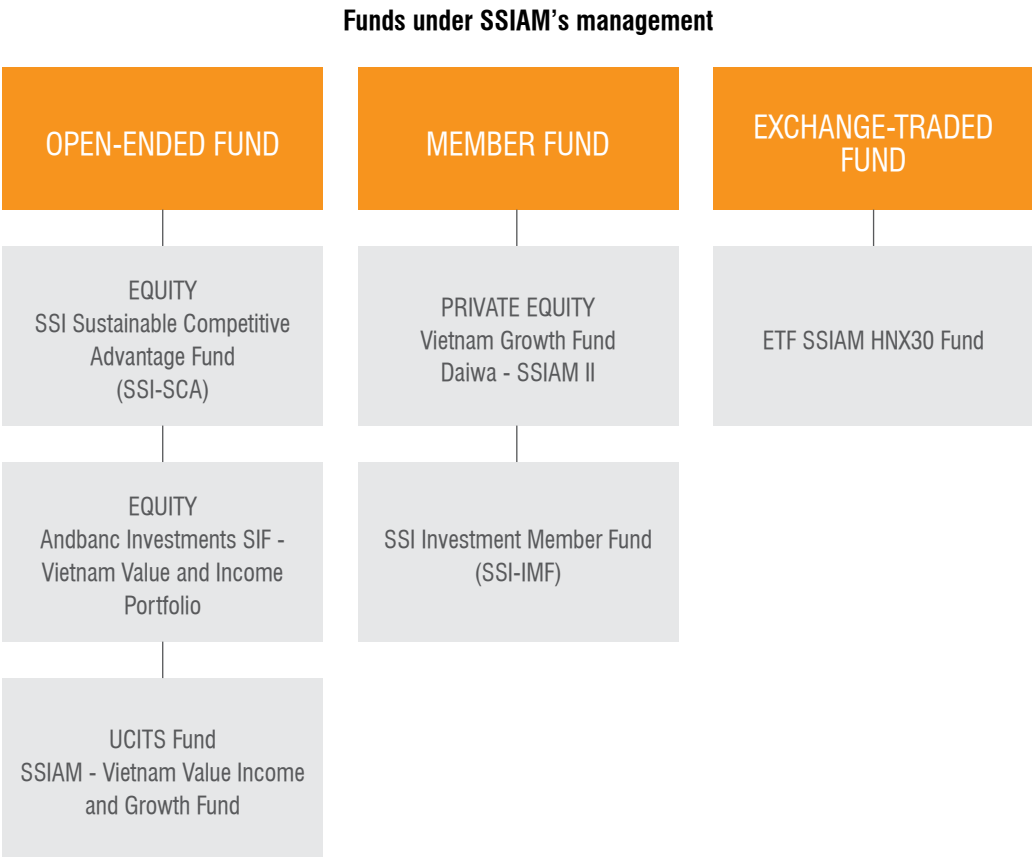

SSI AM reaffirms its position as a leading Asset Management Company

Capital raising

In 2016, SSIAM continued to successfully raise capital from foreign investors. After introducing Andbanc Investments SIF – Vietnam Value and Income Portfolio in late 2015 with the capital contribution of European institutional investors, SSIAM continued to successfully launch SSIAM UCITS - Vietnam Value Income and Growth Fund from European individual and institutional investors in November 2016. Total assets under management of SIF Fund increased 3 times, from USD 13.9 million in late 2015 to USD 52.2 million in late 2016. SSIAM UCITS Fund reached USD 15 million more than 1 month after its launch date. In the context of severe competition among asset management companies, SSIAM remains a reliable partner of foreign investors in Vietnam’s asset management industry.

In the year, SSIAM continued to strengthen and broaden portfolio management activities on behalf of individual customers with large asset values. In late 2016, total assets under SSIAM’s management reached VND 107 billion, a rise of 78.9% compared to 2015. This business sector is highly potential but challenging.

In order to meet capital raising targets set out, SSIAM exerted their non-stop efforts to improve the quality of entrusted capital management. Procedures for investment, risk management and internal control have been well-run and professional, not only meeting legal requirements but also ensuring the minimization of conflicts of interest that may have negative effects on benefits of investors. With the motto of sustainable development, SSIAM always aims to build trust, transparency and long-term asset value growth for investors.

Investment activities

In 2016, all of the funds under SSIAM’s management achieved superior rates of returns to the VNIndex. Meanwhile, ETF SSIAM HNX30 Fund was closely aligned with the fluctuation of this index.

• **SSI Sustainable Competitive Advantage Fund (SSI-SCA)** had the highest rate of returns in the domestic open-ended fund market, reaching 24.1%, much higher than the VNIndex of 14.8%.

• **ETF SSIAM HNX30 Fund** achieved its investment objective of replicating the performance of HNX30 Index and ensured its tracking error at a low of below 1.05%.

• **Andbanc Investments SIF - Vietnam Value And Income Portfolio** is a Special Investment Fund registered in Luxembourg and managed by SSIAM in terms of investment portfolios. In 2016, the Fund’s rate of returns (in USD) far exceeded the expected hurdle rate of 10%.

Improving the quality of human resources

SSIAM also yielded high returns on discretionary portfolio management services for institutional customers. Dividend portfolio is the largest institutional customer portfolio with the size of approximately VND 1.287 billion and the 2016 rate of returns of 48.4%.

Private wealth management services catering to high-net-worth individual also gained high returns when the average rate of returns of portfolios reached 30% in 2016.

With the successful launching of multiple new funds and high returns on its operating sectors, SSIAM continued a high growth in total assets under its management. By late 2016, SSI managed more than VND 7,913 billion, 27.4% higher than 2015.

High quality human resources are key to the success of the Company. SSIAM remained its focus on building and improving the human resource recruitment and training policies. Recruitment was conducted publicly and transparently to attract highly qualified and experienced candidates. Each employee was entitled to development opportunities through a policy of financial support for employees participating in training courses and certification exams both domestically and internationally. Also, the Company facilitated employees to attend intensive training sessions from the state authorities or internal training sessions of the Company. With competitive remuneration policies based on competence and contribution of employees, SSIAM followed a target of building a good working environment with a highly connected workforce towards a stable workforce. From the point of view of an open and creative corporate culture, we are always open to ideas from the staff and change in a way that is consistent with the development trend of society.

INVESTMENT BANKING

2016 HIGHLIGHTS

2016 revenue from the SSI Investment Banking at its highest level in recent years, reaching VND 106.6 billion, an increase of 145% compared to 2015.

Continuing to reaffirm the leading position in the Investment Banking sector in Vietnam with several successful large-scale deals, including advisory service for offering of 78.38 million share of Vietnam Dairy Products Joint Stock Company (VNM – HOSE), valued at VND 11,286 billion, to State Capital Investment Corporation (SCIC); advisory service on the sale of shares of Hau Giang Pharmaceutical Joint Stock Company (DHG – HOSE) to Japan’s Taisho with the transaction value of approximately USD 120 million, and private offering advisory service for No Va Land Investment Group Corporation (NVL – HOSE) under the book building method with the transaction value of over USD 100 million.

Receiving the awards “Best Domestic Investment Bank in 2016” and “Best Domestic Equity House in 2016” granted by Finance Asia.

106.6 BIL VND

Revenue from SSI Investment Banking increased of 145% compared to 2015

2016 PERFORMANCE

The 2016 M&A deals in Vietnam saw a dramatic growth in both quantity and value. According to the Institute for Mergers, Acquisitions & Alliances (IMAA), M&A value in Vietnam reached USD 5.6 billion with 640 deals in 2016, breaking the 2015 record of USD 5.2 billion. Some of the big and outstanding deals of 2016 included the acquisition of 78.38 million Vietnam Dairy Products Joint Stock Company (VNM – HOSE)’s shares worth VND 11,286 billion by Singapore’s Fraser & Neave Ltd (F&N) of Thai billionaire Charoen Sirivadhanabhakdi; Big C Vietnam stake sale to Central Group; Thailand’s Singa entering into a strategic partnership agreement with Vietnam’s Masan Group; Vingroup’s Maximark takeover deal; Japan’s Taisho’s strategic partnership with DHG Pharmaceutical Joint Stock Company, etc. If in the past few years, most M&A deals had been advised by international investment banks, in 2016, SSI Investment Banking was engaged in several large-scale M&A deals as an advisor.

Moreover, the 2016 securities market witnessed the stock listings of large companies such as Hanoi Beer Alcohol Beverage Joint Stock Corporation (BHN - HOSE), Saigon Beer Alcohol Beverage Joint Stock Corporation (SAB - HOSE), No Va Land Investment Group Corporation (NVL - HOSE), Vietnam National Petroleum Group (PLX), Airports Corporation of Vietnam (ACV - UPCOM), and Quang Ngai Sugar Joint Stock Company (QNS - UPCOM), which led to a remarkable increase in the capitalization value of the Vietnam securities market and created more investment opportunities, attracting both domestic and foreign capital sources.

Revenue from the SSI Investment Banking in 2016 reached VND 106.6 billion, an increase of 145% compared to 2015. This showed the highest revenue level of the SSI Investment Banking in recent years. To achieve such performance, the SSI Investment Banking used its best endeavors to approach customers and offered successful consultancy on several large-scale trade deals in 2016 as follows:

Advisory service for offering 78.38 million shares of Vietnam Dairy Products Joint Stock Company (VNM – HOSE) valued at VND 11,286 billion to SCIC. This deal had the highest value in Southeast Asia in 2016 and also illustrated the determination of state-owned capital divestment from the large-scale and highly influential company in the Vietnam securities market. SSI was engaged in the deal as one member of the consultant group, including Morgan Stanley Asia (Singapore) Pte. and VinaCapital Corporate Finance Vietnam, which signed a consulting contract with SCIC.

Advisory service on the sale of shares of Hau Giang Pharmaceutical Joint Stock Company (DHG - HOSE) to Japan's Taisho - a leading pharmaceutical company in Japan - with the transaction value of over USD 100 billion. This was one of the largest M&A deals in Vietnam in 2016 in which 34 sellers were domestic and foreign prestige institutional investors.

Private offering advisory service for Nova Land Investment Group Corporation (NVL - HOSE) under the book building method with the successfully mobilized capital of over USD 120 million. This was the first large-scale private offering of shares under the book building method in which about 85% of the purchasers were big and reputable foreign financial institutions from Hong Kong and Singapore.

Advisory service on the sale of total shares of PAN Group JSC. (PAN – HOSE) in two subsidiaries operating in sanitary services to its Japanese strategic partner Nihon Housing Company Limited.

Advisory service on controlling rights for large shareholders of Domesco Medical Import-Export Joint-Stock Corporation (DMC – HOSE) with total transaction value of VND 240 billion.

Advisory service for issuance and distribution of bond for National Citizen Commercial Joint Stock Bank and Kido Group Corporation (KDC - HOSE), An Duong Thao Dien Real Estate Trade Joint Stock Company (HAR - HOSE), National Phytopharma Joint-Stock Company, and Transimex Joint Stock Company (TMS - HOSE) with total mobilized capital of over VND 2,394 billion.

Advisory service for issuance and distribution of bond and certificate of deposit (CD) for several consumer loans companies such as Home Credit Vietnam Finance Company Limited, HD Saigon Finance Company Limited, VPBank Finance Company Limited, and Orient Commercial Joint Stock Bank with total mobilized capital of VND 2,231 billion.

2016 BUSINESS RESULTS

SSi’s principal investment is managed by SSI Asset Management Ltd. (SSIAM)

SSi Investment approach is value investment. SSI seeks opportunities in sectors benefiting the most from the economy such as Agriculture, Fishery, Logistics, etc. and hold significant position in these companies in order to employ active post-investment management strategy. Accordingly, our team members will join the company’s Board of Directors and/or Board of Supervisors and work closely with the company management to enhance the company’s value towards sustainable development. Investment companies benefit from this while SSI can also create capital appreciation of its investments.

SSi’s screening criteria is based on company’s fundamentals combined with attractive valuation of the stock compared to company’s growth potential and environmental, social and corporate governance (ESG) factors. SSI also focuses on mid-cap stocks, as mid-cap companies have more growth potential than large-cap companies.

Having employed this active investment strategy for a number of years, in 2016, SSI decided to exit several investments that met the targeted return. The Company also continued the whole investment cycle by identifying other suitable investment candidates, gradually increasing shareholding in these companies in order to join the company’s Board of Directors and working to enhance the company’s value. As a result, SSI active portfolio returned 35.4% in 2015, outperforming return of market index of 15%.

In passive investment strategy, SSI does not have representation in companies’ BOD but employs a rational asset allocation strategy and increases shareholding ratio in the sectors benefiting from movements of domestic and world economy, including low-priced raw materials (due to falling commodity prices), and sectors benefiting from free trade agreements, etc. Rate of return from these investments reached 32.8% in 2016.

ASSOCIATED COMPANIES

THE STRATEGY “ACCOMPANYING AND DEVELOPING WITH ASSOCIATED COMPANIES”

By the end of 2016, SSI has 3 associated companies: These are industry-leading companies which have maintained stable revenue, profit and high dividend payout ratios with highly competitive products. All 3 of SSI's associated companies are included in the value chain of Agriculture - Food, Transportation and Warehousing.

In 2016, SSI continued to work closely with associated companies to restructure operating cost and enhance operating efficiency. Profit margins in most of these companies were higher than last year's figures. These companies also focused more in looking for partners to build value chain and enhance company's value. In particular, one of the 3 associated companies, PAN Group JSC. (PAN - HOSE), has been ranked 6th among the top 50 businesses with the most impressive growth in 2016.

SSI identified Agriculture as the core pillar of Vietnam's economy so far. Although the share of agriculture in the national economic structure has fallen recently but still contributed 18% of total export turnover in 2016 (equivalent to USD 31.2 billion). Moreover, the total agricultural production value has tripled from USD 11.8 billion in 2006 to USD 38.6 billion in 2016. SSI believes current economic integration offers tremendous opportunities for Vietnam's agriculture with labor abundance, experience built over generations, fertile land, and favorable climate in numerous areas. However, like other sectors, Agriculture's competitiveness also poses certain challenges.

In recent years, Vietnam's logistics industry has maintained a growth rate of 10% - 15%/ year and contributed 20% to the country's GDP. Around 1,200 enterprises are currently operating in the sector and Vietnam's Logistics Performance Index (LPI) has been enhanced thanks to improved legal institutions and efforts of logistics enterprises. However, as reported by the World Bank in 2014, Vietnam's LPI is relatively low compared to Thailand (35), China (28), Malaysia (25), etc. Domestic enterprises only assume a small market share and focus only on transport services and operating related assets such as port and handling service, customs clearance procedures. This is mainly attributed to the scattered and weak infrastructure facilities and business scale among domestic enterprises. In addition, about 85% of the businesses are still in the early stages of the industry value chain, i.e. mainly operating as the first-party logistics provider (1PL) and second-party logistics provider (2PL) handling export permit, warehousing and charter services. Forth-party logistics providers (4PL) offering supply chain logistics services are still underdeveloped due to incomplete infrastructure and weak demands. Currently, the largest component in the logistics cost structure is freight, which is mainly focused on consumer goods.

Over the course of supporting associated companies with cost restructuring, SSI found that logistics is a potential sector and can obtain high growth speed if integrated into the value chain of consumer goods, agriculture, forestry and fisheries. The value chains such as warehousing operations, particularly refrigerated warehouse with highly sophisticated technical specifications and in high demand by businesses operating in the consumer goods, agriculture, forestry and fisheries have somewhat been neglected by domestic logistics enterprises.

SSI has been and will continue to seek opportunities in agriculture and logistics sectors in the coming years.

KEY SUCCESS DRIVERS

INFORMATION TECHNOLOGY

2016 is an excited and busy year for SSI Information Technology (IT). On one hand, SSI kept on maintaining the well-established technology environment ensuring smooth and fast solutions for the business operations. On the other hand, SSI spent most effort on rolling out solutions to enable the business for new challenges in the market.

IT OPERATIONS

With the strengthened system redundancy and the enforcement on Software Development Life Cycle (SDLC), SSI minimized the technology incidents happened in the company with significant amount of deduction on time for incident recovery.

With the enforcement of our policy and procedures, SSI IT achieved in average 96% of over 12,000 service requests within the Service Level Agreement (SLA).

The Company further enriched its Business Analyst team by adding more business analysts with solid experiences on securities trading industry. This team of experts significantly improves our turn-around time on handling new business requests increased our competence level in the market.

This enabled SSI putting most of our efforts on the implementation of new technology and new business solutions.

STABILITY & AVAILABILITY

A stable environment for business operations is always our top of the line in technology operations. Therefore, SSI spent most of the time to improve and/or maintain the stability of its system environment.

In 2016, the Company improved its data center to Tier 3 industrial standard with proper redundancy on server and storage facilities, dual UPS, dual data path, redundant air conditioners (Data Center grade) and dual power generator. SSI kept on maintaining and ensuring the solution without any single point of failure, with proper capacity sufficient for all planned or unplanned situations required for the business operations.

SSI also enhanced the backup/restoration procedures and facilities ensured full data protection without any single bit of data lost.

Our Disaster Recovery Plan (DRP) is maintained to review quarterly. This year, SSI covered 5 more DRP scenarios by automated recovery with total 44 out of 48 scenarios. The solution for the remaining 4 scenarios has been planted in our new core systems going to roll out in early 2017. The Company also performed the yearly rehearsal of the DRP on November.

INFORMATION SECURITY

Information Security is the other area that we put full attention. SSI is fully aware that a simple attack can damage the business dramatically. The Company also understood that security threat in technology world changing so fast. SSI has proper experts taking care all matters related to technology security.

We worked on technology security by 3 different categories, end-users devices, data center facilities, and external environment. We have proper protection in each of these categories such as anti-virus and Data Lost Protection for end-users; firewall, server level anti-virus, anti-spam on email facilities for data center protection; facility for cyber-attack prevention, and vulnerability scanning facility for the prevention and protection of external intruders and attack;

SSI also has policies and procedures on governing our technology operations running in proper secured manner.

Besides, the Company kept on refining, improving, and maintaining our security protection to cope with the latest development of security threat found in technology world.

INNOVATIVE

“Standing in advance to prepare the challenges” becomes the slogan of technical section of the Company.

In 2016, SSI ran an intensive process to select solution to replace the trading core system for cash market and implementing a new trading solution for derivative market. Both selected vendors are well-known in the field. Their solutions are highly configurable to meet the Company’s business needs coping with the rapid and new challenges in securities trading industry. With these solutions, the Company is well equipped for the trading on stock, fund, index and bond future, covered warrant and other known derivatives instruments going to launch in Vietnam market.

Business Intelligent is maintained as one of the key technology improvement. In 2016, SSI did an in-depth analysis for what it need from this area. A road-map has been made. Information analysis has been done. In 2017, it will be implemented as planned.

On technology or process improvement, agile has been adapted in certain areas of technical section of the organization. SSI will further promote this methodology to the whole section or even to other departments.

In 2017, The Company will focus on the roll-out of 2 trading platforms as well as further automation on business automation. Solution for customer loyalty and retention is also our focus.

HUMAN RESOURCES MANAGEMENT

HUMAN RESOURCE DEVELOPMENT STRATEGY

Saigon Securities Inc. (SSI) always believes that, by optimizing each employee’s morale, the Company can increase customer satisfaction and continually enhance shareholders’ value. SSI has implemented several measures in order to ensure that all members of the Company are satisfied with their jobs and self-motivated to continue further development along with the Company. Throughout over 17 years of development, SSI has built and continued to nourish the SSI Culture - a unique characteristic of SSI - promoting unity, collaborative spirit and innovation to overcome all difficulties and challenges.

To develop a human resources that are well trained, highly qualified and able to adapt to the constantly changing environment of fierce competition. Every individual in the Company is fostered and provided with opportunities to try and develop their talent in a team spirit and close knit environment, sharing the same goal. In particular, developing a team of excellent experts in key areas and combining international knowledge with long experiences in Vietnam are emphasized. SSI has always striven to provide its team with a candid and open working environment, where talents are nurtured, innovations are encouraged, pride is passed on and company ownership is shared.

SELECTING AND NURTURING TALENTS

SSI always aims to foster motivation for employees from the first step of the recruitment process in order to promote long-term commitment of each member with the Company. Recruitment process is always strictly conducted to ensure transparency and fairness, bringing about equal opportunities for candidates and continuing to reaffirm to new members confidence and pride in the Company. We focus on recruiting suitable employees of all races, nationalities, gender and ages Opportunities are open to all candidates from all over Vietnam and other countries. SSI always welcomes active, enthusiastic and aspiring candidates who are ready to take on new opportunities and challenges at work and in the SSI business environment.

In 2016, SSI welcomed 206 new members throughout the system to strengthen its human resources as well as make replacement of resigned personnel to meet the Company’s development strategy, an increase of 15% compared with that of 2015. In particular, new employees are mainly under 30 years of age who are well-trained with 90% having university qualification and 10% having post-graduate qualification. All of them are dynamic, enthusiastic and full of creativity.

In an environment of increasing competition, SSI has continued to develop highly interactive recruitment channels to improve the effectiveness of recruitment information communication as well as maximizing recruiting efficiency. Through these information channels, SSI wants to establish two-way and frequent communication with candidates during the recruitment process. Enhancing information exchange will also increase SSI’s brand awareness of human resources, helping to access better selection of qualified personnel for the Company. In 2016 SSI has developed professional recruitment channels via LinkedIn, proactively and effectively expanding its pool of candidates and increasing connectivity to meets human resource expansion demand of the Company. SSI will continue to utilize different media channels to promote SSI’s work opportunities and working environment.

Beside working with our staff, we position ourselves as a cradle to nurture and train young talents in the securities industry, offering them the opportunities to gain exposure to the professional working environment, assisting them to identify career path, and connecting them to SSI via SSI’s Internship and Apprentice Broker programs. The SSI Internship Program has been conducted in three consecutive years. The rigorous selection process and internship program offered fresh graduates with an opportunity to gain a better understanding of SSI’s environment, as well as helping SSI to select qualified candidates for full-time positions. The SSI Apprentice Program implemented in 2016 targets fresh graduates with a major in Economics/Finance/Banking, or candidates who are inexperienced yet have want to work in securities - brokerage sector. The program aims at developing young, enthusiastic and high-quality human resource who are willing to make long-term commitment with the Company. Under this program, candidates will be trained and guided from the most basic steps to become a broker at SSI through hands-on tasks and customized training sessions. By this approach, SSI wants to provide the candidates with an insight into the working environment of a securities company, and also contributes to SSI’s long-term sustainable human resource development.

SSI believes that its employees are the ones to have the highest commitment and the best understanding of the work; therefore, we offer internal recruitment opportunities. In other words, we reserve open and suitable positions for our employees to try and develop in a position that is best suited for their ability and the needs of the Company. Internal recruitment also follows professional and transparent procedures to ensure fairness in employment opportunities at SSI.

To maintain quality human resources and strong SSI’s culture, we always focus on creating a working environment in which every individual can explore and develop all potential capabilities to best contribute to the Company. We facilitate innovation, encourage new ways of thinking and doing, and are willing to offer opportunities for experiment and development for all SSI’s members. This is our approach to preserve and nurture a human resource of high standard and flexibility, meeting market demand not only domestically but also internationally.

HUMAN RESOURCE DEVELOPMENT HAS MADE CONTINUOUS PROGRESS IN TERMS OF PROFESSIONAL KNOWLEDGE AND SKILLS

In our field of operations, SSI always faces great challenges from competitors, macroeconomic volatility as well as changes in domestic and international financial markets. Recruiting right people is the key to SSI's competitiveness. We focus on developing quality human resources to meet the increasingly strict requirements of the market. In addition to careful input selection, SSI encourages and creates the best conditions for all employees to develop comprehensively in terms of both professional qualifications and soft skills, appropriately to each job position and level via training courses under the Company's Training Program:

- Compulsory Training
- External training according to approved proposal of individuals/ department
- External training according to proposal of Human Resources Department and approval of the Management Board.
- Optional training

SSi has developed a series of position-specific training and development programs for employees at all levels to ensure that they have the skills and knowledge needed to perform their duties, as well as encourage them to continue to develop and embark on their career at SSi. The Company aims to become a “learning organization” where training activity is the right and responsibility of each individual in the company. In 2016, the Company has developed a detailed plans and allocated VND5 billion budget for formal and informal training through physical classes, distance learning, and on-the-job trainings.

At the beginning of employment, all SSi employees shall attend Orientation Training, and during employment term, on the job training is provided to ensure fulfillment of job requirements. With mechanism to encourage participation in professional training, as well as strict implementation of mandatory training regulated by the State Securities Commission, SSi constantly increases the percentage of employees having Securities License, and other professional certificates such as CFA, ACCA, etc.

In 2016, the Company has organized and co-organized many professional training courses and sent employees to participate in compulsory training for a total number of 18,000 training hours (professional training) and 13,586 compulsory training hours. Internal training courses for Professional Competence division throughout the system via in-house training sessions, seminars, and consultations receive positive feedback. Favorable policy for internal trainers to promote sharing of knowledge and experience in the organization continues to prove its effectiveness. Internal trainers gradually improve their training capacity and have organized useful and practical courses. With experienced and enthusiastic internal trainers that always pro-actively update their knowledge, the internal training program held consecutively over weekends has received support and exerted a positive impact on the staffs.

Following the Company’ training roadmap, more training programs on soft skills targeting at different groups, such as courses on Leadership, Presentation, or Sales skills, also help inspire, motivate and provide new tools for employees to boost their performance at work. These training courses provide fundamental knowledge and skills to provide employees with a positive and scientific perspective of their work in particular and life in general, and help them develop their communication and problem-solving skills. In addition, these training programs are great team building opportunities where employees can share their working experience and understand their colleagues better.

Professional training courses receive much interest not only from business units, but also from governance units and support units. Training courses on Corporate Governance, Project Management (PMP), Advanced Accounting; Corporate Finance Analysis, Marketing courses, Advanced Human Resource Management organized by professional and reputable training partners have contributed to improve overall performance of the Company.

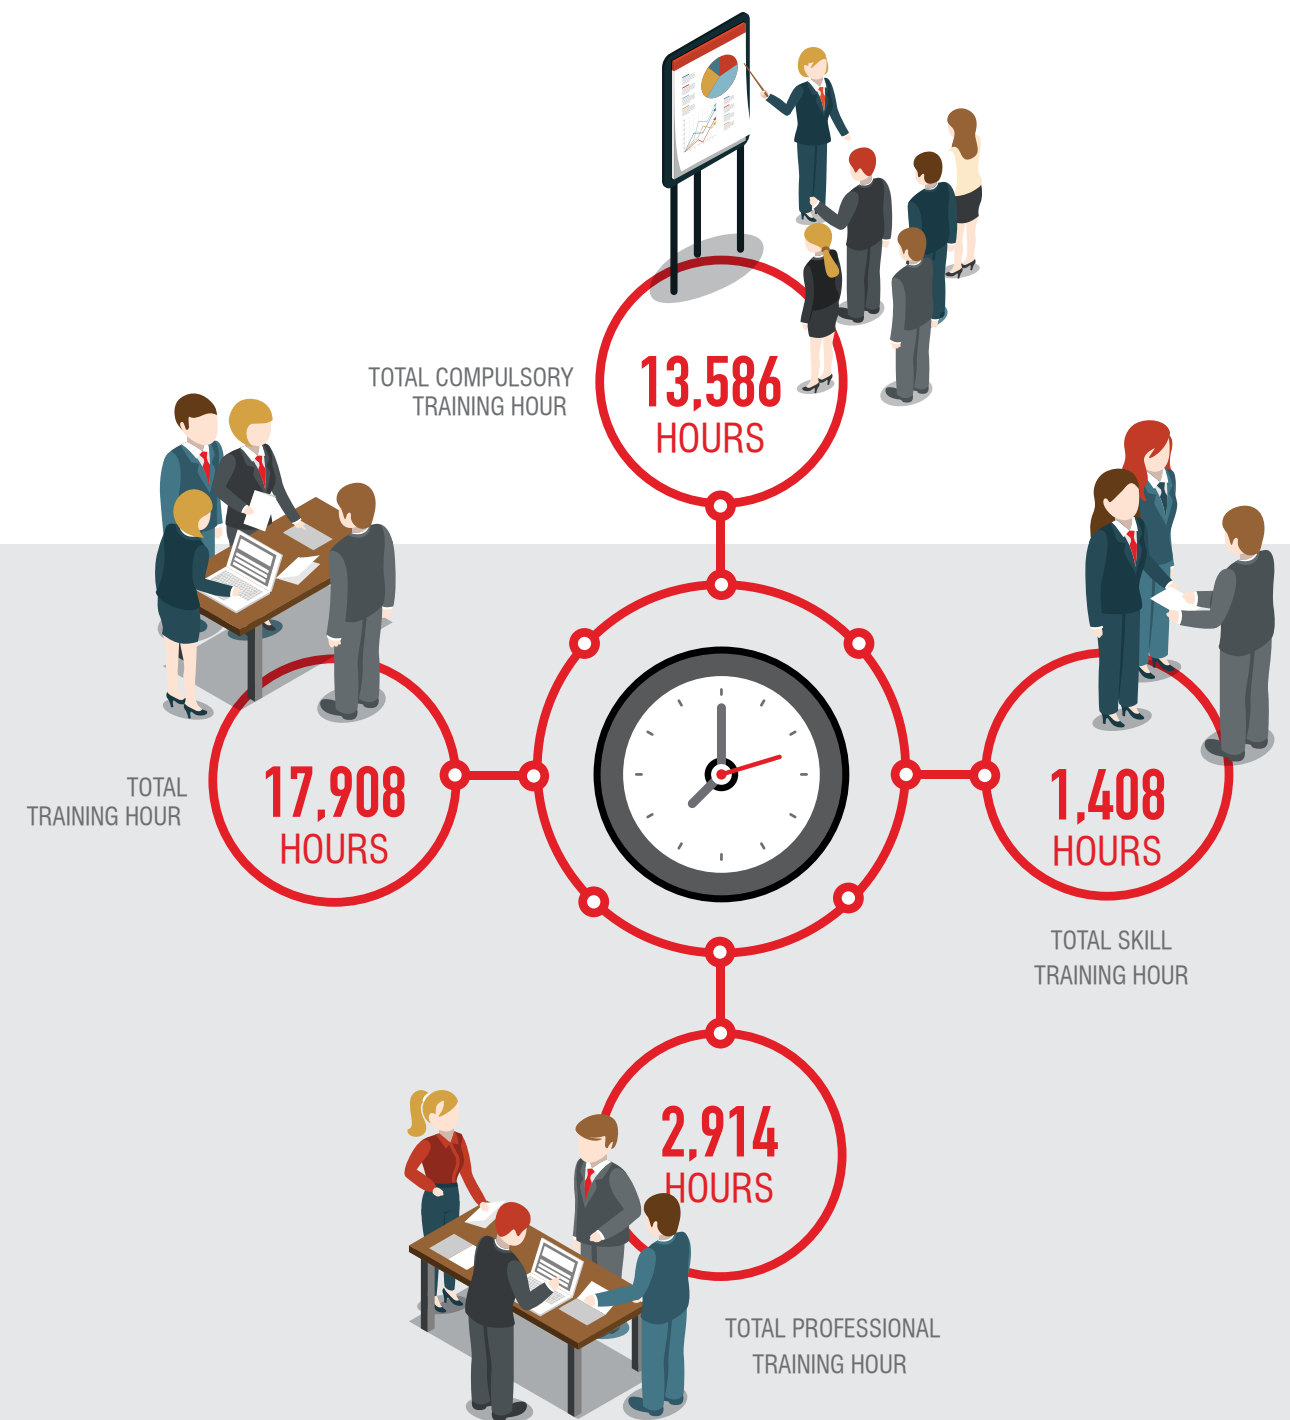

SSi believes that its employees should have a solid understanding of core values and adhere to the ethical rules of the organization, so that SSi can continue to develop sustainably, overcome challenges and mitigate risks. Therefore, every year, SSi organizes periodic training on Code of Conducts chaired by the Legal & Internal Control with the participation of all employees. At these training sessions, employees not only are informed of and updated with information but also can share and discuss actual cases encountered in order to minimize potential risks for each individual and the Company.

Besides conventional training methods, SSi also employs innovative internal training models such as Gala 2015, year-end parties of departments, business luncheon and some other internal activities to facilitate information updates, promoting corporate culture and bridge the management with the staff and among staff in the pursuit of common goals namely a more prosperous company, better working environment and personal and organizational development.

All these factors, ranging from professional competence, soft skills, code of conduct to corporate culture altogether shall be incorporated in staff’s thinking and behavior. This also constitutes SSi’s human resource brand, which is dynamic, competent, aspiring and compliant. SSi values continuous human resource development and upholds our human resource brand towards greater professionalism.

DEVELOP TALENTS AND NURTURE THE NEXT GENERATION OF LEADERS

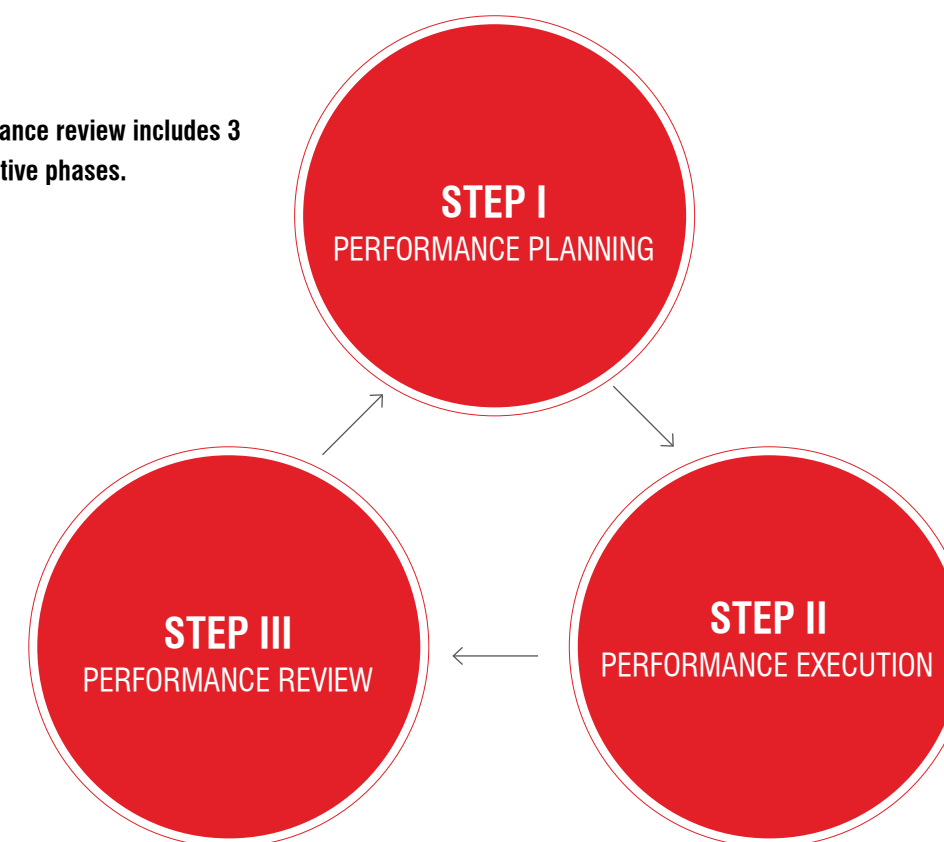

In 2016, the number of middle managers (Heads of department or higher) of the Company is 123/720, accounting for 17% of the total number of SSI staff. In order to develop human resources ready for key positions when needed, leaders pay close attention to seeking and developing next generation managers through human resource planning, job placement and management skills training.

In 2016, the Company has appointed 44 new middle or higher managers; newly appointed employees are provided with training courses to supplement skills, knowledge and tools for the work, including leadership skills, corporate governance skills, business strategy development and professional updates... At the same time, direct support and on-the-job training are conducted regularly to facilitate newly appointed employees accomplished the assigned tasks and continue to develop.

FAIR PERFORMANCE EVALUATION SYSTEM AND MERIT-BASED INCOME POLICY

SSI continues to develop a Performance Management System (PMS) to ensure equity and accessibility to employees at all positions. The evaluation system was developed to improve accuracy of the evaluation and ranking of employees based on actual annual performance, which is directly linked to personal rewards; and more importantly, each employee are developed an orientation for improvement and development of professional knowledge and skills through the establishment of goals for the review period. The online performance evaluation process allows for interaction and two-way exchange between evaluators and evaluatees, enabling employees' clear understanding of management expectations, as well as managers to know key aspects in staffs' work. This factor enhances job management skills, team management, and time and goal management for each individual, and also improves the efficiency of the whole organization. With a comprehensive and interactive assessment system, the Company also aims to motivate and encourage employees, both newly recruited, senior staffs or management levels, to measure personal performance effectiveness and continue striving to conquer the next level of career goals. Maintaining growth and economic stability of SSI helps ensure employees' vested interests through a market competitive compensation and benefit policy, reaffirming staff confidence and attachment to the Company, contributing to the goal of corporate sustainable development.

Performance review includes 3 consecutive phases.

Objectives of Performance review

REMUNERATION POLICIES

- Identify positions for promotion
- Identify benefit packages
- Motivate individuals with outstanding performance

ORGANIZATIONAL DEVELOPMENT

- Provide guidance to individuals with under-performance
- Identify objectives and implementation results
- Assess training needs of employees
- Improve employees' work performance
- Improve the company's operational efficiency

Inheriting human resource management philosophy over the past years, SSI has maintained and developed the 3 Ps income model (Position, Person and Performance) in order to link income to contribution and work performance of each individual as well as ensure internal fairness, market competitiveness and employees' motivation. For 6 successive years from 2010 to 2016, SSI continues to participate in Vietnam's most prestigious Salary Survey conducted by Mercer, and connect and communicate regularly with renown consultants to receive proposals and policies to optimize HR efficiency. Based on the wage survey results of the whole market and non-bank financial sector in particular, during the year, the Company has made adjustments to the salary bracket to increase competitiveness in the market. The company continues to provide supplemental health and accident insurance so that employees feel secured, sharing financial burdens in cases where employees experience health care risks.

In addition to insurance benefits under the normal policy of the Company, in 2015 and 2016, SSI as a team also shared financial burdens with 4 employees suffering from chronic diseases. When employees are faced with hardship, the Board of Management also joins hands with the contributions from other members of the Company to share the cost burden and facilitate the treatment process.

In 2016, SSI has successfully issued 10 million shares under the Employee Stock Ownership Plan (ESOP), which aims to align the interests of employees and the Company's; attract, retain and motivate talents to engage with the company for a long-term horizon through: (i) generate other benefits for the employees apart from salaries and bonuses, (ii) Attach employees' efficiency with interests and the development of the whole company, and (iii) share the benefits when the company achieves success in the future. In addition, the Program also raised additional working capital for the Company.

Furthermore, the overall benefit scheme of the Company also considers allowances such as per diem; gas allowance; telephone allowance, etc. to provide maximal support for staffs to fulfill their tasks. Additionally, during annual holidays, the Company always has appropriate welfare programs to celebrate and encourage employees, contributing to improve employee satisfaction and team spirit.

In 2016, SSI has spent approximately VND 260 billion on salaries, insurance premiums and other benefits, performance-based bonuses following year-end performance review; of which performance bonuses accounted for a relatively large proportion, reflecting a rational merit-based remuneration mechanism.

Total direct costs for human resource in 2016

Salaries (VND)	125,779,387,024
Social insurance - Health insurance - Unemployment insurance (VND)	14,323,694,755
Other benefits (VND)	34,378,492,099
Performance bonuses - Sales commission (VND)	85,175,994,741

The Company continued to pay keen attention to the staff's health. In addition to raising awareness of health care and disease updates for employees, internal activities also aim to build a healthy lifestyle to protect and enhance the health of employees and their families. On a quarterly basis, the Company held counseling programs with the participation of experts and doctors to enhance health care knowledge for employees. Health care newsletters are also prepared by experts and circulated in a timely manner to give alerts on seasonal disease outbreak and precautions while taking medicine to help employees maintain good health of themselves and family. Once every quarter and on a turn-taking basis, the Company held a health care seminar in Hanoi and Ho Chi Minh City with highly current topics such as cancer; emergency first-aid; liver diseases and how to avoid them; how to select food and maintain a healthy diet in the family, etc.

Sports and physical fitness activities are encouraged and facilitated by the Board of Management via financing and organization of clubs like yoga, rumba, soccer and table tennis tournaments among the company and with other companies, etc. The activities are well organized and help employees stay well, refresh and feel a stronger sense of bonding the team.

The Company has collaborated with clean food suppliers to provide employees with a safe and quality source of food supply such as Ban Mai rice, Ba Vi clean vegetables and Hadico, and more, ensuring adequate nutrition and health for employees. This model, which has been very received and trusted by staffs, will continue to grow stronger in the coming years.

Regular checkups are conducted by reliable and renowned health care facilities to monitor employees' health and detect any problem for early intervention. Health-related information is stored through years and used as input for additional health insurance schemes for employees.

TOWARDS WORK - LIFE BALANCE

In 2016, SSI continued the Great Workplace campaign whereby SSI Leadership continued to pay due attention to creating a balance between work and life of employees at all levels. SSI facilitates and encourages members to innovate work approach to ensure work-life balance. The Company continued to implement policies to encourage employees to take leaves for energy renewal after periods of intensive work, which is also a chance to test alternative staffing mechanism in each department. In terms of management system, we are make strong improvement efforts to reduce overtime hours to allow employees have more time for family and still achieve targeted results.

The Company also tries to create working environments and fair development opportunities between male and female staffs. SSI still maintains a gender balance between male and female employees. With female employees, the Company always complies with all regulations on female labors and creates favorable conditions for female employees returning to work post maternity. Understanding and sharing family responsibilities with employees, SSI believes that only when an employee rests assured of his/her family, the desirable performance can be achieved. Job sharing and backup personnels in cases of employees on sick leave, maternity, caring for sick family members are positively engaged by both leaders and employees.

SSI's Family day has become a well-expected annual event for all members, where families can have fun and connect. Such events have enhanced family bonds as well as the connection between staff's families and the Company. Through the event, each "extended" member of SSI somewhat becomes more understanding, sharing, and proud of SSI, and more willing to continue their "support role" for each SSI's employee.

SSI staff activities such as 2 regional soccer teams, photography club, yoga or zumba clubs are encouraged by the Board of Management and welcomed by the majority of employees. With these activities, each member of SSI can pursue their personal preferences to relax after stressful working hours. Internal events such as the annual Gala where talents, forte and collective strength of SSI are showcased, provides an opportunity to bring more laughters and joys for the entire staff.

2016 is also the 2nd year SSI participated in the "Happiness at Work" survey organized by Anphabe. The results of the survey can serve as an input for SSI's Management to take employees' comments into account in improving the company as a long-term workplace and enhance its competitiveness in the industry.

In addition, the Board of Management also value employees' work-life balance as evidenced by policies such as: The employees are entitled to 2 more days of sick leaves in the year, staff birthday gifts and occasions such as International Women's 8/3, the Vietnam Women's Day 20/10, Autumn Gifts Program and Children's Festival for children Kids staff, etc. Style gifts are frequently changed, updated in line with the needs and tastes of our employees, bringing joy, pride and more binding for every member of SSI.

We aim toward sustainable development for both individuals and the entire Company. And to achieve such sustainability, SSI commits its best efforts for the creation of a work-life balanced environment in many ways and will continue to study and develop policies and activities to achieve this balance.

CORPORATE CULTURE

During 16 years of development, besides achievements as recorded in numerous reports, statistics and awards, SSI's unique corporate culture represents one of the biggest prides of the company and the core value in the company's formation and development. It is these cultural distinctions of SSI that attract talents, inspire sense of pride and resilience to help the company overcome all difficulties and challenges, contributing to a strong "SSI Big Family" as today. SSI's unique culture is demonstrated not only in the 9 business principles, but also in the consistent communication, key person solidarity and shared vision of each individual within SSI.

These principles are the basis on which SSI design our business operations and create sustainable values. Recognizing core values as the most important elements in a business, SSI's 9 principles are reiterated in the media, events and internal training, and to every SSI member.

SSI's business principles are always placed in the most visible and accessible locations in SSI offices. This is a heritage and motivation for each employee to uphold SSI values.

09 SSI'S 9 BUSINESS PRINCIPLES

SSI's 9 business principles have consistently been exerted in every activity of the Company and a declaration of its identity and brand

SSI people always keep these 9 business principles, which are also core values of the Company and guiding principles of all SSI employees and activities.

1. The customer's success is at the center of all our efforts
2. We deliver the best of the firm to every client and take pride in the quality of our work.
3. Our shareholders and our staff are invested in us, and our aim is to maximize returns to them.
4. We recruit, reward and nurture the best talent in the industry.
5. We value and encourage initiative among our people.
6. We will uphold the highest standards of integrity in all aspects of our operation.
7. Teamwork is an integral part of our culture.
8. We are committed to strengthening and improving the financial market of Vietnam.
9. We strive to better the communities in which we work.

CONSISTENT INTERNAL COMMUNICATION IS THE KEY SUCCESS FACTOR IN SSI'S CORPORATE CULTURE

As the company expands, consistent and seamless internal communication is crucial to all activities. Therefore, SSI has paid due attention to establishing and frequently improving internal communication channels so that it is complete, accessible and connecting all members.

Internal communication is a common voice across the entire company which effectively communicates the leadership's messages to the members and vice versa and is crucial to the internal unity.

Given the importance of internal communication, any information from the leadership, events and activities of the company are communicated thoroughly to each SSI member. Internal newsletters, activities and events of SSI are sent to each employee twice / month in a well-presented manner. In this way, every individual truly becomes an integral part of the company, sharing the same vision, social activities and internal activities for a better connected team.

Realizing the employees' sharing needs, SSI even went extra miles by establishing SSI Insider Forum - a place for members to share not only information, events but also their own experience at work and in life, joys and laughters, and sadness. Against the backdrop of technological advancement and social network prominence, SSI's internal communication channels are also improved to responds to emerging needs and trends and deliver information to each SSI member more effectively.

In particular, interactive information sharing within SSI is increasingly advanced and effective. SSI's Management always wants to stay abreast of business situation and new policies to actively and promptly update the employees accordingly, ensuring consistent and precise communication. Moreover, employees' feedback on workplace environment is highly valued by the Board of Management. Through workplace surveys, e-mailing campaigns, online voting or direct comments on internal communication channels, employees at all levels can express their views and expectations to help SSI improve and develop more sustainably.

In addition, SSI's awards, achievements and charity/sponsoring activities are frequently updated in the media to uphold pride among SSI people.

NURTURE AND PROMOTE SSI'S UNIQUE CULTURE

SSI people are not only talents in the financial world with professionalism and expertise but also the people who know to work hard and play hard - a culture highly valued within the company.

GALA - Annual Meeting of SSI is held each financial year-end (April) to gather SSI members from all over the country to meet, interact and participate in team building and honoring activities. This is the chance for all SSI staff to relax and have a great time with team building activities. On this occasion, people can look back and reflect on the past year(s), their highs and lows, thereby gaining momentum to aim towards next year's goals.

In particular, the award "Employee of the Year" honors SSI individuals who have been and will continue to have the significant contributions to the development of the whole company. The honor helps to highlight SSI's core values and encourage further efforts of each SSI member.

In 2016, SSI staff had many after-work activities to help relieve stress after work and enhance team spirit. Clubs like soccer, yoga, zumba, photography, etc. are maintained on an ongoing basis. Besides, SSI people also enthusiastically participate in friendly football, table tennis, tennis etc. tournaments and performance activities with Government Agencies, Securities Companies, Banks and made high achievements. In addition, SSI people also enthusiastic participate in activities dedicated to team building and challenge overcoming.

SSI went regularly organizes contests and programs in celebration of major holidays such as International Women's Day 8/3, International Children's Day 1/6, and especially SSI Family Day - a big year-end program pay tribute too SSI people trying their best over the past year and gratitude to their families. These activities are usually expanded to include family members and accompanied by welfare policies to improve living quality of each employee so that SSI will truly be a "Big Family" of smaller nuclear families where they can meet and interact with one another.

COMBINATION OF UNIQUE PERSONALITIES, INNOVATION, PROFESSIONALISM AND SPECIFIC EXPERTISE IN EACH SSI INDIVIDUAL ALTOGETHER HAS MADE SSI'S UNITY AND HARMONIZATION

SSI people always strive to learn and improve knowledge, taking initiative at work for better performance. However, it takes more than a single talent to build a sustainable business. For this reason, SSI always uphold the unity across the entire company, team spirit, and team work, which are shown in the 9 business principles, internal communication and other activities.

Each individual is an indispensable chain which makes SSI "system" operate in a seamless and efficient manner. SSI members are complementary to each other and work closely together in sharing ideas, discussing, seeking initiatives, solutions and how to achieve the best results.

SSI perceives that a sustainable business must focus on internal resources, emphasizing personal development without overlooking harmonization so that every individual can maximize their strengths, minimize weaknesses and devote to the company's mission and vision. Professional, enthusiastic staff who always strive to become an active factor in the company's development is the greatest pride of SSI.

2017 DEVELOPMENT STRATEGY

Strategic Direction
Action plan for 2017

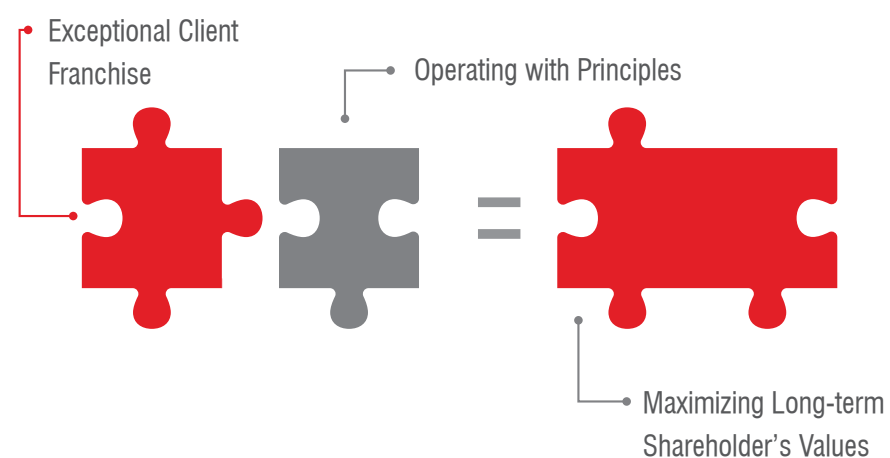

STRATEGIC DIRECTION

With the goal to maintain its position as the leading financial institution in Vietnam market and reach out to international markets, SSI will strive endlessly for operational innovation as well as product and service diversification. In the coming time, SSI will develop more derivative products and voluntary pension services to meet the needs of Investors. Customers are always placed at the center with the Company's commitment to a long term partnership and cooperation for mutual development. Many technological solutions need to be provided to increase the utility for customers and investors. SSI will also continue to focus on developing a high quality human resource team to meet the rigorous market demands; create a working environment in which each individual is given opportunities to explore and develop full potentials, contributing the highest value for the Company. SSI will continue to tightly control costs and manage risks in order to improve financial performance.

SSI believes that the combination of an exceptional client franchise and operating with principles will help maximize long term shareholders' value.

Objectives for each Business Units are set forth as follows:

Securities Services

- Boosting brokerage market share growth - continuing to maintain the No. 1 position by market share in the market
- Improving the quality of products and services - guaranteeing to meet customer needs as well as help customers improve the investment efficacy. Continuing to improve the quality of online trading products
- Expanding the retail distribution network
- Expanding network to international partners
- Coordinating closely with the Asset Management to provide financial solutions meeting the needs of customers.

Treasury

- Improving the quality of treasury management
- Diversifying products to minimize risks while growing the Company's assets
- Strengthening participation in and seeking for investment opportunities in the bond market
- Developing derivative products

Asset Management

- Continuing to grow the total assets under management
- Diversifying products to meet the various needs of investors
- Providing customized financial investment solutions to meet and improve performance for investors.

Investment Banking

Striving to maintain the leading position in the market through:

- Providing comprehensive financial solutions to clients
- Expanding the network of customers both in the country as well as abroad
- Extending cooperation with leading financial institutions in the world

Principal Investment

- Focusing more on value creation
- Strong performance across investment strategies
- Achieving strong risk-adjusted returns

ACTION PLAN FOR 2017

SECURITIES SERVICES

With strong growth of the stock market and increasing access to the global market, the entire system of products and services catered to both institutional and individual customers must reach regional standards using professional human resources and modern trading system. SSI Securities Services therefore shall focus on upgrading our trading system to meet the needs of both manual trading and algorithmic trading; developing a system of products and services customized for each customer; continuing to invest and expand network, branch network, transaction offices and retail brokerage services. In addition, in the context of integration, it is necessary to build a network closely linked with international financial intermediaries in order to expand the global customer network. The transition into emerging market of Vietnam is only a matter of time, involving the strong involvement of financial institutions and foreign investment funds in the country. Therefore, the two factors being systems and people at SSI need be ready to meet international standards, and establish and promote mutually beneficial cooperation with international brokers in search for new customers, especially investment funds mandated for emerging market index.

With a view toward sustainable development, competitiveness and profit maximization for clients, SSI Securities Services sets out the following action plan:

Continue to grow brokerage market share

SSI Securities Services will continue to hold the No. 1 position in brokerage market share in the market while simultaneously focusing on standardize investment advisory products, margin lending, and online trading products. In addition, new products will be developed continuously to diversify product portfolio, meeting the needs of each customer segment. The Division will also continue to expand its network of highly qualified personal brokers, recruit more brokers and expand its network to attract new customers.

Focus on servicing existing customers and acquiring new customers

In 2017, SSI will continue to develop transactional tools to develop online trading customers; take initiative in approaching joint stock companies that are getting ready for IPO or listing; strengthen relationships with reputable organizations at home and abroad to reach potential customers; and work closely with reputable partners to organize seminars to introduce investment opportunities to customers.

Develop specific products and services catered for each target customer group

In addition to seeking investment opportunities, the Securities Services Division undertake research and provide new products such as Open-ended Funds, Bonds, VN30 Index, ETFs, etc. to maximize the ability to meet investment needs of customers. Derivative products with superior technology and functionality will continue to be rolled out in 2017. Investment advisory products will be expanded and deepened according to market trends and specific to each customer group.

Promote corporate relations and investor relations

In addition to organizing meetings with listed companies at the request of institutional clients, in 2017, Corporate Access will take the initiative to hold monthly meetings with listed companies featured sectors including Consumer, Real Estate, Mining, Pharmaceutical, Aviation, Agriculture, Banking, etc., and at the same time, cooperate with reputable organizations to bring Vietnamese companies to Institutional Investment Funds abroad. In addition, seminars to introduce investment opportunities to individual customers at branches and transaction offices throughout the country will also be launched in 2017.

Recruit Personal Brokers and Institutional Brokers

SSI continues to expand and recruit qualified retail brokers from its market sources and develop internship programs to train talented, ethical, well-qualified students to become brokers. Institutional Brokerage department will be reorganized for lean operation, focusing on improving the quality of its human resources and parting insufficient personnel. This is an important move towards increasing the automation of order placement through the system as well as towards the introduction of more sophisticated new products such as derivative products. The Institutional Sales department plans to recruit more experienced personnel for customer development in key markets such as the US and Europe.

Collaborate with other Business Units

SSI Securities Services to actively coordinate with the Investment Banking to develop IPO and listed corporate clients, divestment transactions, large batch transactions; collaborate with SSIAM to sell open-end funds, ETF certificates, and portfolio management products; collaborate with Treasury to carry out bond brokerage transactions and raise funds to support financial products.

Continue to build a professional working environment

Policies that elicit passion, cooperation, coordination, competition and mutual development will be built into the entire network of Branches, Transaction Offices, and Departments within the Securities Services. SSI continues to further strengthen our professional training programs in professional areas, communication skills and new customer development skills for the retail and institutional brokerage teams, and always maintain a friendly, competitive and cohesive working environment for a strong SSI.

TREASURY

Accelerate the growth of total assets in a sustainable and stable approach. Improve asset quality and asset utilization of the Company.

2017 is considered by SSI Treasury to be a relatively challenging year with wide range variables from macroeconomic to industry expectations. The possibility of interest rate fluctuations in 2017 is expected to be higher than that in 2016. For the stock market, a large number of large state-owned corporations is scheduled to be listed, which will help them grow in size and provide more competitive products, drawing more domestic and foreign capital to the stock market. In addition, the introduction of derivative market also presents a challenge and a great opportunity for the market in general and SSI in particular.

In 2017, SSI Treasury sets out the work plan as follows:

Based on expected macro conditions as well as market assessments, SSI Treasury aims to continue growing their total assets by at least 10% per annum through expansion of treasury trading as well as capital raising products to bring about benefits and effective use of funds for both SSI and its customers. To achieve this goal, it will continue to strengthen cooperation and expand business co-operation with existing financial institutions and new partners, developing a system of quotas and services to ensure liquidity safety of the Company as well as to maximize profit in the market.

Improve and strengthen bond trading activities

2017 is expected to be a difficult year for government bond trading as the bond interest rate level has been near record low and cyclical interest rate fluctuations have been predicted. In order to continue the success of bond trading in 2016, the pressure on the 2017 plan is relatively high and requires careful monitoring of the market's volatility in order to make sound movements accordingly.

In addition, the corporate bond segment is expected to be active in 2017 due to credibility of the issuing companies and improving transparency, as well as increasingly internationalized bond terms. Continuing to maintain and accelerate the search for trading opportunities of corporate bonds issued by both listed and unlisted companies through proprietary trading as well as equity financing transactions is a priority in 2017.

Continue to conduct research and development of structured products and derivative products

In 2017, SSI will focus on structured products related to interest rates, exchange rates, and commodities, etc., to provide a diversified and comprehensive product range to customers. In addition, along with the advent of the derivative market in 2017, the Company will also continue to participate in policy development and derivative proprietary trading models, especially in government bond futures to seek profit as well as to hedge the holding position.

ASSET MANAGEMENT

SSIAM's long-term development strategy is to develop a strong local retail customer base. In the past few years, individual investors have tended to invest on their own instead of entrusting funds to professional fund managers. However, individual investors have limited time as well as access to companies and access to information leading to ineffective asset management outcome. Meanwhile, along with the development of the stock market, the Asset Management Company has made continuous efforts to improve its investment management, risk management, and professional skills in service provision. We believe that the number of individual investors choosing services from asset management company will increase over time. This trend will create tremendous growth potential for SSIAM in fund raising from local individual investors.

Maintain outstanding investment performance

In 2016, both investment funds and portfolio of institutional and individual clients managed by SSIAM yielded positive investment results. Entering 2017, we will continue to maintain and improve the investment efficiency of investment funds as well as the existing trust portfolio to better meet the needs of institutional and individual investors.

Continue boosting sales to increase total assets of products serviced to new investors

In 2017, SSIAM will continue to work closely with many partners to distribute fund products and portfolio management products. In addition, the quality of services provided to investors will be emphasized, ensuring that customers can trade more conveniently and receive information in a transparent and timely manner.

Benchmarking to overseas markets, the Vietnam's stock market is still considered fast-growing with many valuable investment opportunities at low valuations compared to other regional stock markets. Given this view, SSIAM will continue to raise more funds for the two European open-ended funds that are managed by SSIAM.

Develop new products

In 2017, we plan to introduce and offer SSI bonds open – ended fund for the first time to meet market demand. The fund will target both individual and institutional clients that have low risk appetite.

At the same time, we will focus on the legal framework for the Voluntary Supplementary Pension Fund and improvement of business model for this product. With this preparation, SSIAM expects to be ready to provide the product to customers when relevant regulations go into effect and market conditions are favorable.

INVESTMENT BANKING

Continuing to pursue the mission of “Connecting capital to opportunities”, affirming the leading position and promoting the development of investment banking, SSI will continue to carry out various solutions in 2017 to create many new and high quality products for customers.

Strive to maintain the leading position by diversifying products and services, while emphasizing professional services and high added value.

SSI Investment Banking strategically aims to provide high quality transaction arrangement advisory products of high quality, professionalism and customization to our clients. SSI has been researching and designing capital products, including both equity and debt to diversify products to meet the increasing demand of clients as well as the requirements of the market, connecting foreign investors with local firms and leveraging capital from international financial markets.

Continue to prioritize the development of M&A Advisory Service.

In 2017, SSI Investment Banking will continue to focus on Mergers & Acquisition (M&A) Advisory Service. In the context of the economy with many positive changes, coupled with the elimination of foreign ownership limits in listed companies, Vietnam has become an extremely attractive market for M&A deals. This presents a great opportunity for SSI Investment Banking, given a team of senior finance professionals with years of experience in M&A advisory and wide spreading networks of partners, financial institutions and large customers from large potential markets such as Thailand, Japan, and Hong Kong etc.

Focus on expanding client networks, emphasizing Corporations with the need to divest from public and listed companies.

In 2017, beside the core client base of private, large-scale, credible, potential and sustainable businesses, SSI will also focus on large Corporations and SOEs that are planning to divest from large cap public and listed companies. With experience in advising on SCIC’s divestment of Vietnam Dairy Products Joint Stock Company (VNM – HOSE), at the end of 2016, SSI has obtained hand-on experiences in the advisory process and is confident of having the capacity and experience to advise similar transactions in the future.

Expand cooperation with leading global financial institutions

to exchange experiences and seek for investment opportunities, thereby providing our clients with professional financial products of international standards. In 2016, SSI has successfully cooperated with Daiwa Capital Markets Hong Kong Limited (“Daiwa”) in No Va Land Investment Group Corporation (NVL - HOSE)’s private placement deal through book-building and Morgan Stanley Asia (Singapore) Pte. in SCIC’s divestment from Vietnam Dairy Products Joint Stock Company (VNM – HOSE), based on which open more opportunities for SSI to cooperate with other international financial institutions in future transactions.

Restructure the Investment Banking through the standardization of high quality human resource recruiting and training procedures, serving as a basis for enhancing the quality of SSI’s advisory services

People are one of the key determinants of organizational success. Recognizing this, SSI has consistently focused on developing, revising and refining the recruiting mechanisms as well as on personnel training aimed the development of advisors that are of international quality, highly proficient, knowledgeable about the market, and can always grasp and meet all the clients’ needs. With adequate recruiting and training policy, SSI expects to become one of the best investment banks in Vietnam, continuing to compete healthily and aiming to develop the image of an investment bank that is proficient and professional in servicing while adhering to professional ethics.

PRINCIPAL INVESTMENT

In 2017, SSI continues to implement value investment strategies and co-operate with investee companies. The stock market is predicted to remain difficult and challenging, although having increased significantly, P/E of the market still remains lower than that of stock markets in the region. SSI believes that the stock market in Vietnam is still attractive for value investors and that market corrections are a good opportunity to capture higher profits for the Company.

THE BOARD OF DIRECTORS' REPORT

MEMBERS OF THE BOARD OF DIRECTORS

In 2016, the SSI Board of Directors (BOD) has carried out activities in accordance with the Company’s Charter and Management Regulation.

The BOD consists of 6 members, two (02) of whom, Mr. Ngo Van Diem and Mr. Bui Quang Nghiem, are independent members. The structure of the BOD balances an appropriate ratio between members with experience and expertise in management, law, finance and securities, as well as their roles (executive members, non-executive members and independent members). Accordingly, at least 1/3 of the board members must be independent and non-executive members in order to ensure the objectivity and independence in BOD activities. The regulation on the number of independent non-executive board members is stated clearly in the Company’s Charter.

The list of board members, the ratio of share ownership with voting right at the Company as of 31 December 2016 is as follows:

MR. NGUYEN DUY HUNG
Chairman cum Chief Executive Officer (CEO)

Mr. Hung is the Founder of Saigon Securities Inc.
He is also the Founder and Chairman of The PAN Group - a leading company in agriculture and high quality packaged food industry.

MR. NGO VAN DIEM
Board Member

Mr. Diem has more than 30 years of experiences in foreign and domestic investments, state-owned enterprise reform, and industrial zone development and economic integration when holding middle and senior positions in Government agencies. He was the former Chairman of the State Committee for Cooperation and Investment, former Director of the State Council for Appraisal, former Director of Vietnam Industrial Zones Board of Management and former Vice Director of the Prime Minister’s Research Council. Mr. Diem graduated from Leipzig University and has a PhD in Economics from Martin Luther University from Germany.

MR. NGUYEN HONG NAM
Board Member

Mr. Nam has been a successful business executive in various areas. He holds a Master of Science from Lugansk University, Ukraine.

MR. BUI QUANG NGHIEM

Board Member

Mr. Nghiem is the Director of Nghiem & Chinh Lawyers and Vice Chairman of Ho Chi Minh Law Association. He graduated from Halle University, Germany.

MR. NGUYEN DUY KHANH

Board Member

Mr. Khanh holds a Bachelor of Finance, George Washington University, the United States.

Mr. Khanh used to work with SSI during the implementation of the Reforming Consultancy Project provided by McKinsey (2010). He also helped in the founding of SSI International Corp., and made significant contribution to its successes.

MR. HIRONORI OKA

Board Member

Mr. Hironori Oka has over 20 years of experiences in the finance and securities fields, holding various positions in Japan, Hong Kong, the United States, Singapore and Taiwan. He used to be in charge of many senior positions in Daiwa Group Inc. and started to assume the leading position since 1994. During the period, he gained in-depth knowledge and experience in management and supervision of a number of areas such as services, products, clients, and operations of Daiwa Group and its subsidiaries, branches, and affiliates - entities under management in relevant countries or areas within scope of powers.

Mr. Oka is currently the Executive Managing Director, Head of Asia and Oceania region, and Chairman and CEO of Daiwa Capital Markets Hong Kong Limited.

No.	Board Member	Year of Birth	Type of member			Share ownership	
			Independent Member	Non-executive Member	Executive Member	Number	Propotion
1	Mr. Nguyen Duy Hung - Chairman	1962			✓	3,012,400	0.61%
2	Mr. Nguyen Hong Nam	1967			✓	900,000	0.18%
3	Mr. Ngo Van Diem	1951	✓	✓		150,000	0.03%
4	Mr. Bui Quang Nghiem	1957	✓	✓		273,174	0.06%
5	Mr. Hironori Oka	1963		✓		0	0%
6	Mr. Nguyen Duy Khanh	1991		✓		300,000	0.06%

SSI did not make any changes to board members in 2016. Board members maintained their activities as usual during their terms without any abnormal events leading to member changes in 2016.

ROLES, RESPONSIBILITIES AND ACTIVITIES OF THE BOARD OF DIRECTORS

The BOD assumes the responsibility of orienting, guiding, managing and supervising the Company’s activities (including business activities), unless it falls under the authority of the Annual General Shareholder’s Meeting (GSM) and Investors.

BOD exercises its functions by issuing resolutions. The management policy of the Company is expressed via compliance with the law, the charter and management regulation of the company, and via resolutions of the GSM and of the BOD. These documents are kept at the Company’s head office and publicized to all shareholders. The shareholders have equal rights in viewing, copying and referencing these documents according to regulations.

When carrying out their functions and responsibilities, the BOD must comply with the law, the Company’s Charter, the Resolution of the GSM and the Management Regulation of the Company. In case the decision passed by the BOD is against the law or the Company’s Charter, causing loss for the Company, the members in favor of such decision must take joint responsibility and indemnify the Company; members who voted against such decision will be exempted.

In 2016, the BOD maintained business activities according to the Law, the Company’s Charter and Management Regulation. In addition, the BOD made several efforts to enhance the company’s managerial capacity in accordance with current laws and in line with regional as well as global practice. Specifically:

- The BOD ensures that the number of BOD meetings and the number of invited members meet legal requirements and effectiveness while specifying each member’s role, differentiating between independent and executive members in order to ensure maximum interest for shareholders.
- The BOD approves Resolutions which fit the Company’s vision and business strategy for each specific period, ensuring the interests of clients, shareholders and employees, respecting associates, contributing to the building of a strong business community which will provide social values and eventually fulfill the Company’s mission.

- The BOD monitors the implementation of resolutions issued by the GMS and the BOD while evaluating the effectiveness of these resolutions; regularly reviews policies and regulations of the Company and make timely adjustments in accordance with new situations and requirements.
- The BOD decides on the direction, leads and supervises on a regular basis all activities of the Management as well as supporting departments, ensuring that the Management’s leadership is in line with the company’s regulations and policies.

The BOD has carried out 05 meetings including 02 direct meetings on 25 April and 19 September 2016 and 03 meetings based on written surveys on 14 March, 28 July and 23 November 2016. All BOD meetings were attended by 100% of its members, who discussed and voted on every issue.

The contents of the meetings and Resolutions approved by the BOD are as follows:

No.	Resolution No.	Date	Content
1	01/2016/NQ-HĐQT Written opinions solicited	14/03/2016	Newly establishing the Nguyen Chi Thanh Transaction Office and changing the name and location of the Tran Binh Trong Transaction Office under Hanoi Branch
2	02/2016/NQ-HĐQT Voting at the meeting	23/03/2016	Agreeing on the 2016 GSM
3	03/2016/NQ-HĐQT Written opinions solicited	28/07/2016	Issuing SSIBOND012016 bond
4	04/2016/NQ-HĐQT Voting at the meeting	19/9/2016	2015 dividend payment and authorizing the Chairman to decide to recall ESOP shares and purchase SSI odd-lot shares
5	05/2016/NQ-HĐQT Voting at the meeting	9/19/2016	Issuing the Regulation on share issuance according to the Employee Stock Ownership Plan
6	06/2016/NQ-HĐQT Written opinions solicited	23/11/2016	Establishing the Nguyen Van Cu Transaction Office and authorizing the BOD chairman to establish new Transaction Offices in 2017

ACTIVITIES OF THE SUB-COMMITTEES UNDER THE BOARD OF DIRECTORS

The corporate governance model was designed to include the BOD’s independent subcommittees, taking responsibilities for risk management and internal auditing in order to assist the BOD in implementing these functions. Currently, the BOD has appointed its independent members to take charge of risk management and internal audit.

Activities of independent board members in charge of risk management

- Review and comment on risk policies and limits before submitting to the BOD for approval;
- Review the reports of the CEO, Risk Management Department and other related units on risk management;
- Evaluate the effectiveness of risk management of the Company as a whole.

Activities of independent board members in charge of internal audit

- Review and appraise issues related to organizational structure of internal audit, draft internal audit strategy and policy before submitting to the BOD for approval;
- Inspect and evaluate the compliance of accounting standards and procedures, and operating principles of internal audit;
- Report to the BOD on activities and performance of internal audit during the year; recommend proposals to resolve shortcomings and constraints in order to enhance business operation of the Company;
- Advise the BOD on the establishment of internal audit strategy and policy.

ACTIVITIES OF THE CHAIRMAN

The Chairman is responsible for overall guidance of BOD’s activities in accordance with the functions, tasks, and powers provided for in the Company Charter as well as the current provisions of the Law, particularly:

- Preparing action programs and plans of the BOD;
- Preparing programs, agenda, and documents for the meetings; convening and chairing BOD meetings;
- Organizing the adoption of BOD resolutions;
- Supervising the implementation of the BOD resolutions;
- Chairing GSM and BOD meetings.

The Chairman also acted as the CEO of SSI, leading the Board of Management and employees to effectively carry out the resolutions of the GSM and the BOD on business plans, investment plans and other activities. The plurality of offices was adopted by the annual GSM.

ACTIVITIES OF INDEPENDENT BOD MEMBERS

Independent BOD members are assigned to carry out responsibilities related to risk management and internal audit as presented in the section on activities of the subcommittees. In addition, these members also participate in the BOD’s meetings to critically comment on strategic orientation proposals, business plans; supervise and prepare monthly reports on activities of the BOD and the results of supervising the Board of Management, and send the reports to board members as prescribed by the Company’s Charter.

PERFORMANCE EVALUATION OF THE BOARD OF MANAGEMENT

The Board of Management ran the Company to efficiently implement the Resolution of GSM and of the BOD regarding business plan and investment plan, significantly contributing to the exceeding of 2016 business target, firmly maintaining the leading market share in HOSE and HNX. The Board of Management fully performed the assigned tasks related to organizing and running SSI's daily business in accordance with the good corporate governance practices, actively and timely proposing initiatives and measures to improve the business and management performance. Reports to GSM and BOD has been timely prepared and submitted with good quality. Information was disclosure in compliance with the law in transparent, adequate and honest manner.

PERFORMANCE EVALUATION OF THE COMPANY

In the context of decreased interest rate, more strictly managed monetary policy for investment in securities, SSI could still ensure our treasury trading activities fully and timely meet investors' demand for margin lending. SSI's funding sources did not only ensure liquidity but also significantly contribute to our profitability.

By mobilizing over VND 7,900 billion from institution and retail investors both inside and outside of Vietnam, SSI Asset Management (SSIAM) has proven its leading position in Vietnam's asset management industry. This is also the only Vietnamese company to successfully mobilize funds in a foreign market.

Investment Banking has also shown growth potentials via several successful deals worth hundreds of millions of dollars, such as advisory service for offering 78.38 million shares of Vietnam Dairy Products Joint Stock Company (VNM – HOSE); advisory service for the sale of shares of Hau Giang Pharmaceutical JSC (DHG - HOSE); private placement advisory service for No Va Land Investment Group Corporation (NVL - HOSE) under the book building method

By the end of 2016, SSI has had 3 associated companies which are the The PAN Group (PAN - HOSE), Vietnam Fumigation Joint Stock Company (VFG - HOSE) and Dong Nai Port Joint Stock Company (PDN - HOSE), with positive business results, contributing to the consolidated income of the entire company.

SSI continued to ensure security for liquidity management, without any risks occurring. Along with that, the support system, which was coordinated smoothly, with specific strategies and solid operations, well-invested technology infrastructure, also contributed to the achievements of 2016.

SSI has had a successful business year thanks to suitable business strategies based on accurate socio-economic predictions.

By the end of 2016, the Company recorded VND 2,312 billion in consolidated income, a 28% increase compared to 2015 and achieving 160% of the revenue target. The 2016 consolidated profit before tax was VND 1,056.8 billion, exceeding the profit target by 11.24%. The Company's consolidated asset was VND 13,228 billion, of which VND 7,152.6 billion was owners' equity.

In 2016, SSI continued to hold the number 1 position in brokerage market share on both HOSE and HNX, with 13.69% and 11.03% respectively.

BUSINESS PLANS AND ORIENTATION IN 2017

In 2017, there will be unpredictable events on a global scale. Macro-economic will face the challenges of inflation and exchange rates. The domestic market is not big enough due to weak purchasing power and the average income per capita of only USD 2,215. Even if more resources are directed towards the domestic market in 2017, it's still unlikely that we will see a breakthrough.

In 2017, the National Assembly has announced the GDP growth target of 6.7%, together with macro-economic stability and social security. In order to achieve this target, the Government is moving steadily towards building an enabling Government model. The business community believes that the decision to build an enabling, transparent Government which acts to serve the people and businesses will not only stop at the Government but also become the guideline for all other Central and local agencies, authorities. They will do as they say and make it as convenient as possible for businesses and people to operate legal businesses and contribute to the country's development.

The stock market will become more attractive for investors by enhancing the transparency of the market and the strictness of audit standards so that investors can properly consider and compare investment decisions. Raising market ranking is an important factor in attracting foreign investment in 2017, meeting all the requirements of an emerging market: free money flow transfer, easing the ownership ratio of foreign investors, minimum liquidity and market capitalization.

SSI steps into the year 2017 with innovative activities which enhance competitiveness, building a business plan suitable for the 4th scientific and technological revolution and global integration. SSI is also fulfilling the mission of "connecting capital to opportunities", focusing on improving the quality of human resource, building business culture, complying with the law and business management regulations in the best ways possible.

THE BOARD OF SUPERVISORS' REPORT

MEMBERS OF THE BOARD OF SUPERVISORS

MR. NGUYEN VAN KHAI

Mr Khai joined the Board of Supervisors (BOS) in 1999 and has been re-appointed Head of the BOS throughout tenures.

He possesses rich experience in corporate management and is currently BOD Member of The PAN Group JSC, operating in agriculture and high quality packaged food industry.

MR. DANG PHONG LUU

Mr. Luu has been appointed as Member of the BOS since 2005. He was former Tan Binh Branch Director of Vietnam International Bank (VIB). He has more than 20 years of experience in finance and banking and graduated from Banking University, Ho Chi Minh City.

He is now running his own business, An Bao Manufacturing Trading Ltd., Co, where he serves as Chairman.

MS. HO THI HUONG TRA

Ms. Tra has been appointed as Member of BOS since 2007. Ms. Tra has more than 14 years of experience in JSC Bank for Foreign Trade of Vietnam (Vietcombank). She used to work for Vietcombank accounting department and is now at a senior level in Loan Management. She held a bachelor degree at Accounting and Finance University.

Name	Position	Year of birth	Degree of Independence	Share ownership	
				Numbers	Proportion
Mr. Nguyen Van Khai	Head of BOS	1967	Non-employed by SSI Holding SSI stock	70,455	0.01%
Mr. Dang Phong Luu	Member of BOS	1967	Non-employed by SSI	89,668	0.02%
Ms. Ho Thi Huong Tra	Member of BOS	1975	Non-employed by SSI Holding SSI stock	30,661	0.01%

ACTIVITIES OF THE BOARD OF SUPERVISORS

The BOS consists of three members with specific duties as follows:

- Mr. Nguyen Van Khai, Head of BOS, is responsible for overall management. He carries out supervision of the activities of the Board of Directors (BOD), the Board of Management (BOM), and takes part in the Board of Directors' meetings;
- Mr. Dang Phong Luu, BOS member, is in charge of examining and supervising the Company's finance and preparation of financial statements;
- Ms. Ho Thi Huong Tra is in charge of regulatory and Charter compliance, the execution of resolutions of GSM, and handling claims of shareholders and related parties within the BOS's authority.

Summary of the BOS's activities in 2016

- Reported to shareholders on the supervision of the activities of the BOD and BOM in 2016, and the BOS's action plan for 2017.
- Mr. Nguyen Van Khai, Head of the BOS, represented the BOS to participate in all meetings of the BOD in 2016.
- Carried out the examination and supervision of the preparation of audited financial statements of 2015, financial statements of the 1st, 2nd, 3rd and 4th quarters of 2016, and the reviewed semi-annual statements of 2016.
- Carried out the examination and supervision of compliance to regulations and the Company's Charter as well as the implementation of the Shareholder's Meeting's resolutions by the BOD and BOM in 2016.
- On May 31st, 2016, a BOS meeting was held where the following were adopted:
 - i. Report on the implementation of the Company's internal control and risk management;
 - ii. Unanimous consent to recommend the BOD to select Ernst & Young Vietnam Limited the independent auditor of the Company's financial statements in 2016.
- On September 15th, 2016, a BOS meeting was held where the following were adopted:
 - i. Assessment of the BOS's activities in the first 9 months;
 - ii. A recommendation to the CEO to implement the capacity building project for internal control.
- The BOS worked with the internal control, internal audit and risk management and noted a number of noteworthy internal control and risk management operations of the Company as follows:
 - i. The Head of Legal & Internal Control was to work out a plan to provide training as well as professional competency and skills to internal control staff. Such a plan is to be implemented in tandem with the reality of market development as well as the State Securities Commission's schedule of launching new products to ensure that the staff would be sufficiently qualified for the dedicated job;
 - ii. Transfer of internal control staff to business divisions was carried out in order to provide them with exposure to practical experiences for later utilization in their job;
 - iii. The training and communication of professional ethics was strengthened for improved awareness of compliance among the staff;
 - iv. The risk management division improved its internal work-flow and implemented a well-engineered and professional risk management process
- The BOS noted that the Chief Financial Officer and the Chief Accountant properly complied with the new accounting principles applicable to securities companies under Circular NO.210/2014/TT-BTC dated December 30th, 2014 and Circular NO. 334/2016/TT-BTC dated December 27th, 2016 issued by the Ministry of Finance (MOF) and provided timely reports of any difficulties encountered to the CEO for subsequently seeking of instructions from MOF and the State Securities Commission (SSC).

Compliance to regulations and the Company's Charter, and execution of resolutions of GSM

The Company's operations in 2016 were in compliance with regulations of law as well as the Company's Charter. The Company properly complied with regulations on information disclosure applicable to securities companies listed on HOSE. The Company's managers and shareholders properly complied with information disclosure regulations when trading SSI stock.

The Company's Charter was amended in accordance with the provisions of the Enterprise Law as well as the form of corporate charter issued under MOF's Circular No. 07/2016/TT-BTC dated January 18th, 2016.

Quarterly and semi-annual statements were timely disclosed.

In December 2016, the Company completed the issuance of 10,000,000 shares under an employee stock options program under Resolution 01/2016/NQ-DHDCD dated April 25th, 2016 of the GSM. Dividends were paid to shareholders within 6 months of the end of the GSM.

Results of supervision over members of the BOD and CEO

So far, the BOS has found no violations of responsibilities and obligations of the Company's managers. Information on transactions with managers and related persons was fully disclosed as required.

The Board of Directors and CEO also facilitated the BOS's performance of its functions. The BOS received full materials for and invitations to meetings of the Board of Directors and attended all such meetings. Recommendations of the BOS to the BOD and the CEO have been replied in a timely and adequate manner.

Results of financial supervision

The Company prepared and disclosed periodical financial statements in accordance with regulations governed by SSC. Semi-annual financial statements, financial safety ratio report, and annual report of 2016 were reviewed and audited by an independent auditor, i.e. Ernst & Young Vietnam Limited, in accordance with existing regulations governed by SSC and MOF.

The financial statements of 2016 presented fairly and in all material aspects the Company's financial position as at December 31st, 2016, results of operations, and cash flows in conformity with Vietnam's existing enterprise accounting principles as well as relevant provisions of law. The creation of funds and remuneration for BOD and the BOS were performed in accordance with the resolution of the GSM in 2016. The Company's accounting and book keeping activities were performed on a conservative basis, as a result of which no sudden changes were found when comparing quarterly and semi-annual data with annual report data or when comparing pre-audit data with post-audit data.

Results of handling recommendations to the Company

In 2016, the BOS received no recommendations or claims from shareholders as to the Company's operations or governance.

REMUNERATION AND BENEFITS FOR BOARD OF DIRECTORS AND BOARD OF SUPERVISORS

2016 operation fund for BOD and BOS was VND 3 billion, which was approved by the GSM and in accordance with GSM Resolution 01/2016/NQ-ĐHĐCĐ dated 25 April 2016.

At 31/12/2016, the BOD comprises of 06 members, of which 02 are independent members. The BOS comprises 3 members, all of them are independent.

No.	Name	Position	Non-executive member	Executive Member	Salary	Remuneration	Performance bonus	Welfare

Periodic bonus and welfare of members of the BOD and BOS

The BOD executive members, BOD members who participated in Company’s operation, and BOS members received periodic bonus and welfare from the Company welfare fund, which was created from retained earnings and based on business performance approved by the GSM.

Other benefits for members of the Board of Directors and Board of Supervisors

Currently, the Company’ business expenses benefits (including those relating to the use of company cars, telephones, social, medical and other insurance, the annual health check) and other benefits in internal policies are only applicable to the executive member of BOD or the member who participated in Company’s operation activities. The Company only pays expense related to business trip (if any) to other members of BOD and member of BOS.

ESOP for Members of BOD and BOS

During the year, SSI has successfully issued shares under the Employee Stock Ownership Plan (ESOP), which aims to align the interests of employees and the Company; attract, maintain and motivate qualified staff to dedicate and make long-term commitment to the Company.

The number ESOP shares bought by BOD and BOS members are as follow:

NO.	Name	Position	Number of shares
1	Nguyen Duy Hung	Chairman cum CEO	1,223,000
2	Nguyen Hong Nam	Member of BOD/ Deputy CEO/ Spokesman	600,000
3	Ngo Van Diem	Member of BOD	100,000
4	Bui Quang Nghiem	Member of BOD	30,000
5	Nguyen Duy Khanh	Member of BOD	200,000
6	Nguyen Van Khai	Member of BOS	30,000
7	Dang Phong Luu	Member of BOS	15,000
8	Ho Thi Huong Tra	Member of BOS	15,000

Total income of members of BOD and BOS in 2016 was VND 12,097,800,000

RISK MANAGEMENT

OVERVIEW OF RISK MANAGEMENT SYSTEM

2016 was marked with many major economic and political events, both domestically and internationally, exerting observable effect on the global stock market in general and the Vietnam market in particular. Besides, a series of events related to notable listed companies, namely dishonesty in information disclosure to investors, unreasonable stock price hikes, followed by extended period of floor price dropping, loss of liquidity, has increased market risk as well as eroded investors' confidence. However, with sound and transparent development strategy and action plan, combined with a team of high-quality personnel, SSI has managed to steadily maintain the largest market share on both Stock Exchanges, and achieve continual strong growth in personnel, network, and clients, etc., while keeping risks at a minimal level, below the risk limit approved by the BOD.

SSI has completed the development of the Risk Management Systems (RM) as required by Circular No. 210/2012/TT-BTC, and guidance on setting up and operating RM system of securities companies in accordance with Decision No. 105/QĐ-UBCK dated February 26, 2013 of the SSC. The implementation of the RM system ensures conformity in both functions and personnel as required.

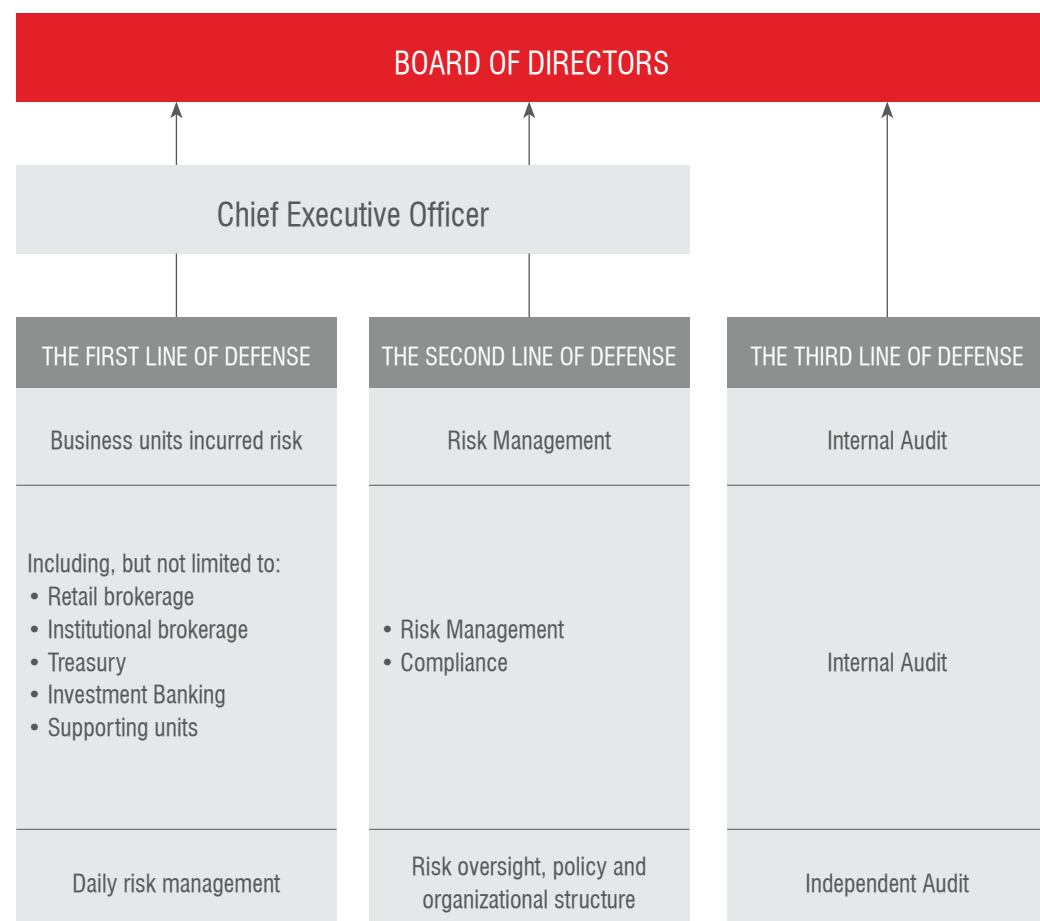

Realizing the potential risks facing the Company due to strong growth in the number of employees, branches and clients, and capital size, as well as getting prepared for the Company's growth in the coming years, the BOD has announced plans to improve the effectiveness of risk management activities through setting up a capacity building project for risk management capabilities in August of 2015. In 2016, the project was completed with a highly specialized risk management apparatus, carrying out risk management activities specific to each type of risks, and bringing on board additional high quality staff in knowledge and practical experiences.

Additionally, in 2016 the Company has conducted review, supplemented and updated RM policies and procedures to improve the efficiency of risk management supervision and risk warnings, as well as updates to keep up with actual operations. Such activities shall continue to be carried out in 2017. Moreover, in anticipation to the introduction of derivatives products, in 2016, the Company has fully prepared human resources as well as developed a system of policies and procedures for risk management of the products.

Risk management activities are carried out seamlessly from top to bottom, initiated by the BOD through the development of business strategy and risk tolerance limits for each type of risks and each specific Business Unit, as follows:

- To develop and align a culture of risk management to every employee whereby each individual to engage and contribute to risk management activities;
- To develop a strong and transparent corporate governance structure in order to determine accountability of each individual and department in the organizational structure;
- To develop a mechanism of control and oversight to keep risk within the limits allowed;
- To issue of documents under policy framework and methods to identify, measure, control and mitigate key risks.

The Company uses the three lines of defense model in risk management activities as follows:

The Risk Management is organized by types of risk in order to ensure a high level of specialization:

Risk management activities are conducted specifically according to the 5-step process as follows:

Risk identification

Risks are determined based on indicators or areas with exposure to potential risk in the Company’s business operations. Input data to determine risks includes:

- Database of risks occurred in business operations that have been identified, and have been reported and detected through Internal Control, Internal Audit, and Independent Audit activities. Based on this data, the Company can assess and predict the risks likely to occur in the future;
- Based on analysis of historical data on the risks occurred and the likelihood of future risks to identify areas with high risk exposure. This method contributes to improve risk management based on the inheritance of experiences and lessons from the past;
- Changes in business strategy, the operating procedures as well as the development of new products, new business activities or execution of business restructuring;
- Recommendations and feedbacks from Government Agencies, Independent Audit, Internal Audit, and Internal Control;
- Changes in business environment, policies and laws.

Risk measurement and assessment

SSI uses qualitative and/or quantitative methods of assessment to appropriately measure each specific type of risk.

Quantitative models are prioritized to quantify risks. These models could calculate and estimate exposure values of market risk, settlement risk, operational risk, liquidity risk, as well as others. These risk exposure values are quantified to a specific figure or a specific percentage. A number of typical models used by SSI to measure risk include:

- Standard models, as stipulated in Circular no. 226/2010/TT-BTC dated December 31, 2010 and Circular no. 165/2012/TT-BTC dated October 9, 2012 issued by the Ministry of Finance;
- Quantitative models VaR (Value-at-Risk) used to calculate the maximum level of volatility for a stock, or index to be used in derivative transactions with a predefined confidence level and time period;
- Stress testing model used to assess the maximum loss that may occur according to a predetermined scenario for the Company to take loss limiting measures when necessary;
- Quantitative scoring model and quantitative stock model based on historical data of price and volume volatility;
- Banks’ appraisal and rating models.

Risk limit identification

To ensure that risk is limited to the lowest level of tolerance, as well as to improve the effectiveness of risk oversight, the Company has established a set of risk indicators and limits for key risk exposure.

Risk limits are determined by both qualitative and quantitative methods. In particular, the latter has priority over the former.

Limits for each type of risk is determined based on:

- Data and historical events related to the risks being monitored;
- Risk appetite and targets of the BOD;
- Actual operating activities of trading and related business divisions based on views of the divisions’ heads.

The Risk Management Director proposes limits for each type of risk, with references to the characteristics of each business department for approval by the CEO.

The CEO proposes the total risk limit as well as specific risk limits for each business department for approval by the BOD.

Risk monitoring

Risk monitoring activities are carried out on a daily basis, mainly through risk indicators and limits of the indicators. A number of risk parameters are set and limited automatically on the system, and others based on daily risk management reports in accordance with predetermined forms, or both.

Risk monitoring activities are carried out firstly by the business departments where the risk incurring transactions take place, followed by supervision of independent departments including Risk Management, Internal Control and ultimately Internal Audit.

When risk positions approaching warning levels, the Risk Management will issue a warning and request specific measures from the risk-generating business departments, and at the same time, coordinate with them to develop action plan to bring the risk positions back to safety threshold.

Risk handling

Risk handling activities are based upon review and assessment of factors such as the severity of the risk to be handled, the frequency of risk occurrences, costs of risk mitigation, risk characteristics, etc. The company implements a number of measures of basic risk handling as follows:

- i. Risk tolerance:* When the cost of risk handling is a significantly higher than that of the losses incurred due to risk exposure, no handling measure is necessary;
- ii. Risk avoidance:* Any activity that could lead to the risk exposure that the BOD has a zero or very low risk tolerance, or that exerts potentially serious impact on the image and activities of the Company shall not be carried out;
- iii. Risk mitigation:* Applying measures to mitigate potential impact on the Company or to minimize the probability of risk occurrences, or both;
- iv. Risk sharing:* Transferring all or part of the identified risks to another party, such as purchasing insurance (if comparable services are applicable) for operating activities;
- v. Developing a monitoring and risk warning system* for timely detection of potential risks and marginal risks for prompt risk handling.

General risk handling process:

- i. Identifying causes of increased risk positions, and causes of risk generating events;
- ii. Selecting and developing handling plan, including specifications of responsible units for implementation, implementation schedule, expected results, resource assessment and planning, and required procedures;
- iii. Performing risk handling in accordance with selected plan;
- iv. Reviewing and updating relevant policies and procedures to avoid similar incidents;
- v. Adjusting relevant limits if necessary to align with reality.

MARKET RISK

SSI's core business activities exposed to market risks include investments in bonds, shares, deposits, margin lending, and derivative products which will be launched in 2017.

Revenues from these activities are affected by fluctuations in interest rates, stock prices, derivative indexes, possibly due to market conditions or changes in monetary policies or macro policies of the government of Vietnam or other countries concerned, possibly due to geopolitical turmoils such as unrest in the South China Sea, as well as other legal regulations. When interest rate and stock price fluctuations are unexpected, there exists the risk that revenue and profit of the Company would move in adverse direction.

To mitigate these risks, SSI ensures that risk management is carried out in a specialized manner and separated by risk types and that there is close coordination among related department with Risk Management from monitoring, assessment, market view and prediction, and investment strategy, to the limit system, risk diversification strategy, risk warning and handling process.

Investments in Deposits/ Bills/ Bonds/ Margin Lending

Over the past several years, the Treasury and Finance Trading Division has actively grown business operations, managing cash-in-hand in a large scale. Such activities in 2016 even exceeded previous years with owners' equity, reaching over VND 7,152 billion, total assets over VND 13,228 billion, average cash-in-hand of VND 5,000 billion, including over VND 1,200 billion from investors. In addition, investment activities in Government bonds also received special attention in 2016 with average portfolio value of VND 2000 billion. Cash flow movements were executed according to payment activities, clients' borrowings/repayments, and investment disbursements, occurring daily without a specified time frame. Such operations require SSI to balance short-term and long-term capital and corresponding interest rate across different maturities to optimize returns and realize predictions on interest rates. Even with modest interest rate fluctuations in 2016, SSI Treasury still managed to optimize interest rates trading, contributing a significant part to the Company's revenue while ensuring the highest level of safety.

To anticipate the risk of stock price volatility that affects margin lending, the Company conducts assessment of macro-economic conditions and geopolitical issues that may impact the overall market or a specific sector either periodically or unexpectedly upon occurrences of events for appropriate adjustments in margin lending activities.

Investment in Stocks

Stock investment portfolio is directly affected by internal factors of the economy as well as international events; unanticipated changes of macro factors can cause stock prices to fall, creating adverse impact on the business results of securities companies. However, in 2016, SSI managed to capture market opportunities to divest and invest in companies in the basic and staples sectors of the economy that underwent little impact from market fluctuations while possessed potential for stable development. SSI remained consistent with long term investment strategy, avoiding risks arising from short term speculations, in which, the Company expanded support for our associated companies in maximum capital mobilization, establishing a solid financial foundation for manufacturing and business expansion, raising intrinsic value of their stocks and maintaining a positive momentum for their stock prices to grow.

Investments in Stock Derivatives

In preparation for the opening of the Stock Derivative Market, SSI has been actively involved in the process to complete the legal framework for the product with regulatory authorities. At the same time, SSI also set up a project team dedicated to derivative products to conduct product research and development of the company's trading and risk management systems.

SSI has implemented continuous internal training for employees. In addition, the Company also organized for staff to take classes held by the SSC on Derivative Securities so that the Staff can understand the products as well as related risks to provide the best advices to clients while minimizing risk exposure for both the clients and the Company.

The Risk Management has basically completed the development of risk management procedures for derivative products to actively identify, measure, assess, prevent and handle risks when the derivatives market is officially put into operation.

CREDIT RISK

The Company’s credit risk arises mainly from margin lending activities, and investments in bank deposits and bonds. The risks arise when a partner fails to pay a part or all of its debt obligations to SSI when due.

Investments in deposits at commercial banks are considered to have the lowest level of credit risk; However, if occurring, such risk can cause great damages. Therefore, SSI always reviews carefully before conducting transactions with Banks based on the Banks’ credit rating, followed by periodic reassessment. Each commercial bank would be assigned a specific deposits limit depending on their specific credit rating, as well as certain terms and conditions, to ensure maximum capital preservation. At the same time, SSI established overdraft limit mechanism with multiple banks for simultaneous operation with bank deposits. This allows the Company to maintain liquidity capabilities while ensuring flexible capital uses and providing for credit risk, as bank deposits contracts always have provisions for flexible withdrawal of the overdraft facility. During our 17 years of operation, SSI has incurred no irrecoverable bank deposits. This is an achievement that testifies for our highly effective credit risk management activities.

Margin Lending

Margin lending refers to collateral lending activities, secured by clients’ loan portfolios that have been approved by both SSI and SSC for margin lending. Credit risk arises when the Company is unable to recover sufficient debt upon disposal of all collateral assets of a client, or to process collateral assets due to loss of liquidity and deep depreciation, or cancellation of listing, while the client fails to provide additional collateral assets. In order to mitigate such credit risk, SSI employs a series of coordinated measures, as follows:

- Establish a prudent collateral portfolio based on compliance with regulations by the State Securities Commission of Vietnam. At the same time, rate stocks in consideration of liquidity, price fluctuations and stock valuation based on the corresponding company’s financial and operation analysis report. Based on stock rating, the Company will set lending rates and limits consistent with stock quality.
- The portfolio of collateral assets is revalued monthly to mark to market fluctuation of the stocks. At the same time, individual cases are evaluated as soon as relevant negative news incurs.
- Develop a cross-cut limit system to control concentration of outstanding lending balance as well as alert levels for timely recovery of debts:
 - Total volume limit for margin lending,
 - Maximum limit per client,
 - Maximum limit per stock,
 - Safety warning level,
 - Liquidation warning level, etc.

- Monitor the outstanding balance, concentration of outstanding balance by client, stock and daily risk exposure to timely risk detection. For instance, outstanding balance with high concentration on a specific client or a specific stock, stocks with abnormal price volatility, stocks with unusual news, stocks with abnormal and suspicious transaction movements in trading session, etc.

- Rate and appraise margin lending clients to ensure SSI’s criteria and regulations. Increase Broker’s client management responsibility with regards to warning communication and loan recovery, etc.

- Refrain from competing for market share and outstanding lending balance through over-extending margin lending services .

In 2016, with the overall growth of the market, and the strategy of diversifying the portfolio of client margin lending, increasing the lending of leading and highly liquid stocks, The company’s margin outstanding balance grew from an average of over VND 3,000 billion in 2015 to an average of more than VND 3,890 billion in 2016, with the highest balance reached over VND 4,351 billion. However, related risks remained within the limits approved by the BOD.

Investments in Bonds

Investment in bonds is exposed to the risk of bond issuers losing their liquidity at the bond’s maturity, or the risk of unexpected adversities leading to the bond losing its liquidity. In order to mitigate these risks, SSI has in place an assessment procedure to examine all details and aspects of a bond investment proposal, similar to a credit assessment prior to investment. However, as interest rates on Government bonds remained low and the FED’s interest rate hikes in 2016, SSI mainly invested in government bonds and government guaranteed bonds. For corporate bonds, SSI assessed very carefully, and only invested in bonds issued by reputable businesses with sufficient collateral assets.

LIQUIDITY RISK

Month	
1	679%
2	659%
3	641%
4	635%
5	651%
6	678%
7	606%
8	556%
9	621%
10	572%
11	493%
12	544%

Liquidity risk occurs when SSI loses its ability to fulfill its obligations to pay part or all of the due debts, failing to meet the demand for payment of securities purchased by investors using margin lending, or experiencing delay or failure to meet the requirements of payment activities of investors on accounts maintained at SSI. With the number of clients growing over the years, mounting to over 100 thousand accounts in 2016 across SSI branches in different cities, receiving hundreds of payment requests per day, SSI must ensure the quickest, safest, and most cost effective way to conduct payment operations for investors. In order maintain flexibility in serving clients, SSI has connected with dozens of banks to manage an average investor deposit balance of over VND 1,200 billion in absolute safety.

In 2016, SSI’s margin lending service continued to maintain steady growth, with year-end outstanding debt remained at over VND 3,600 billion, requiring high flexibility in balancing daily cash flow between timely cash disbursement (in margin lending) and efficient use of cash flow when investors repay margin loans. SSI also holds the largest securities investment portfolio in the market, thus the management of low liquidity investments also requires a sound balance of owners’ equity, to be able to reinvest the capital to capture investment opportunities. In 2016, SSI continued to ensure absolute liquidity management, without the occurring of any risky incident. Net capital ratio remained high between 490% and 679%, well above the regulatory 180%.

This achievement was thanks to a strict cash flow management process, which was established based on the particular priority we give to liquidity risk management and the close collaboration we foster between SSI’s offices and departments. All business units have access to a regular and detailed reporting system for timely information update.

	Report	Frequency
Accounting	Banks accounts balance	Daily
	Investors’ accounts balance at SSI	Daily
	Projected expenditure/ revenue	Daily
Treasury and Finance Trading	Start-of-day cash flow	Daily
	Project cash flow	Monthly/ when arising or as requested/ Daily
Securities Services	Advances to investors	Daily
	Disbursement/ loan recovery of margin trading	Daily and when arising
	Investors’ large transfer/ withdrawal/ deposit/ credit	When arising
	Clearing	Daily
	Transactions related to purchasing rights Issue	When arising
Risk Management	Net capital ratio report	Monthly
	Liquidity reserve report	Monthly
	Financial liquidity report (current ratio, quick ratio, etc.)	Monthly

In 2016, in order to continue growing margin lending, SSI raised additional capital from bank loans and bond issuance, cash flow management to ensure efficiency and safety therefore became more complex. However, SSI always maintained a reasonable and balanced ratio of assets and liabilities, applying the fundamentals of liquidity risk management to invest in liquid assets.

SYSTEM RISK AND INFORMATION SECURITY

Matching to higher level of business automation triggered concerns on the 2 key areas, risks of system failure and security protection on systems as well as information. These 2 key areas are always SSI’s main focus on determining what to improve on business automation. For existing solutions, SSI continued its determination on how to further enforce the system stability and information security.

For security protection, the Company had the following:

- Tier 1 facility to detect/prevent cyber-attack
- Advance solution for anti-virus protection
- 3 layers of firewall protection of our data network
- Data-Lost-Protection (DLP) facility to prevent information leakage
- Vulnerability scanning performed annually
- In-premise vulnerability scanning facility for regular scanning and rectification
- Proper policies and procedures ensuring the effectiveness of internal control on avoiding any internal fault.

For disaster recovery protection, SSI achieved the following:

- Proper assessment of Disaster Recovery Plan (DCP) quarterly

- Additional 10% protection of 48 disaster protected scenarios achieved 90% automated coverage. The remaining 10% has been planted into two new core trading solutions for both cash and derivative markets targeted to roll-out on the first half of 2017
- Performed the rehearsal of disaster recovery protection on November 2016

For system stability protection and improvement, SSI had the following:

- All services are running on seamlessly redundancy environment with proper protection on any single point of failure
- Hardware facilities have proper extra but not over capacity to prevent any unexpected business loading
- All connections are protected by redundancy path and diversified on different location
- SSI data center achieved tier 3 industrial standard with redundant Uninterrupted Power Suppliers (UPS), dual data network connections, dual power generators, dual data center grade air-conditioners
- SSI backup/restoration procedure and facilities ensures the recovery of systems within the Service Level Agreement (SLA) and without any data lost.

COMPLIANCE RISK

Compliance risk refers to the risk that the Company must face in the event that the Company or its employee violates or does not comply with the provisions of the law, the provisions of the Company’s charter, internal and professional procedures, regulations, including professional code of ethics.

Preventing and limiting compliance risks are considered an important task of the Company. A number of measures implemented by the Company to prevent compliance risks include:

- Process and operational design with cross-checking among individuals and divisions. At the Company, operational procedures and operational apparatus are designed for mutual cross-check to enhance internal inspection and supervision, limiting power abusing and allowing early detection of violations;
- Improving employees’ compliance awareness. Training and advocacy of compliance are attended to. Newly recruited employees are trained in common procedures, regulations and special regulations related to their areas of work. During the time at SSI, employees are trained periodically to have strong grab on work process and raise awareness of compliance;
- Establishing an internal inspection and supervision system;
- Applying stringent discipline to violations of the Company’s regulations.

In 2016, the Company’s Internal Control conducted 40 inspections across various divisions for compliance checking of internal procedures and regulations and relevant laws. Control results are reported to the CEO, Managing Directors and Head of Legal & Internal Control for timely handling of violations, updating and correcting operational procedures to mitigate risks and increase work performance.

Adherence to corporate accounting system and compliance with tax law is also a focus of the Company. The Company conducted 33 audits in 2016 related to accounting entries, financial reporting and tax auditing. Internal audit activities promptly detected errors and proposed compliance measures to the CEO. Internal audit activities have increased the effectiveness of compliance risk management in the Company. Published financial statements, tax reports and net capital reports of the Company were ensured honesty and objectiveness, in accordance with accounting standards and regulations.

The Company maintained annual training for the entire staff on professional ethics, internal control, and money laundering prevention and control. The Finance and Accounting Department was also trained to update legal knowledge on accounting and tax law, and participated in training courses organized by administrative agencies.

The company has developed and issued regulations to support staff to improve their professional knowledge. This regulation has encouraged many employees to actively participate in courses to update specialized knowledge or long-term courses to improve their professional knowledge. Job positions requiring personnel with practicing licenses were fully met.

By improving the awareness of compliance, increasing the frequency of control and timely updating and finalizing of process, in 2016, the number of violations and errors was strictly controlled and there were no significant errors.

A number of compliance risks that the Company has identified and developed control measures for 2017 (Table 1).

No.	Potential risks	Control measures
1	Brokerage staff violating professional code of ethics, abusing of client accounts.	Training to raise the awareness of professional ethics; Assigning proper access levels to customer information; Designing account management procedures with cross-checking; Encouraging client to conduct transactions over the Internet; Providing timely notification on change of account balance for clients via SMS and email; Conducting centralized specialized control; Strictly handling acts of violating professional ethics.
2	Brokerage staff violating professional code of ethics, engaging in stock price manipulation.	Training to raise the awareness of professional ethics; Monitoring trading accounts of staff and family members; Strictly handling acts of violating professional ethics; Verifying employee's employment history before hiring.
3	Controlling conflicts of interest between clients and brokerage staff.	Training to raise the awareness of professional ethics; Monitoring trading accounts of staff and family members;
4	Controlling of conflicts of interest between brokerage, investment advisory and proprietary trading.	Separating specializations, seating, data systems, and personnel among divisions; Entrusting in long-term proprietary activities to SSI Asset Management (SSIAM)
5	Violation of anti-money laundering regulations, especially in client identification.	Issuing anti-money laundering regulations, and integrating anti-money laundering regulations into business processes; Holding annually training for staff to raise awareness on money laundering prevention and control; Refusing to serve clients failing to provide identification information in accordance with the laws; Actively classifying clients' risk profile in money laundering prevention and control.
6	Violations of the obligation to report and disclose information of securities companies and listed companies.	Issuing the process of reporting and disclosing of detailed information, and assigning specific responsibilities to divisions and individuals. Arranging dedicated staff with legal qualification to carry out reporting and information disclosure functions. Control from the Chief Legal Officer and Internal Control.

Table 1: Potential risks and compliance risks measures

REPUTATIONAL RISK

Branding in the finance – securities sector, in our perspective, has extended beyond being a symbol for clients to identify and position our business products and services; it has become a valuable intangible asset. Reputation risk refers to the loss or damage of value those results from changing Clients’ perception of the Company, creating major impacts on their demands for the Company’s products and services, as well as all general business activities.

Based on our insightful awareness of the potential reputation risks, SSI has established and implemented an effective brand development and management strategy. Our branding is represented, firstly, by the images and information that are communicated through both public and internal media channels. Yet, more importantly, it is also showcased through our products and services, as well as any experience and interaction, no matter how small, between our clients and our representatives. As such the concept “brand ambassador” has taken a higher level of meaning, empowering each and every individual at SSI with the capability to convey important messages about the SSI brand to both our clients and the public. We always strive for consistency and strategic alignment in these messages. Our vision is “The Business of Success” and our mission is to establish SSI as a transparent financial institution.

Maneuvering through today’s information highway, SSI has chosen transparency to be our guiding communication principle to minimize reputation risk. Transparency is key to building trust of our Shareholders and Investors: Information, whether negative or positive, is processed in a consistent manner to provide them with a genuine perspective. When inaccurate information about SSI is published, we apply the same principle of transparency in handling: always willing to initiate direct dialogue with the

public, providing factual and credible information to work towards a resolution Respecting the investment value from our shareholders, SSI is fully aware of our responsibility to provide our shareholders and investors with transparent, complete, accurate and timely information.

As the impact of social networking on branding becomes more powerful, instead of being passively responding to the flow of information, SSI has worked with leading consulting firms to be able to listen to the most detailed discussion of investors, clients, not only on the SSI brand, but also on the stock market. This information helps SSI both take initiative in responding to misleading information, and access a valuable source of information to observe market orientation, so that SSI can continue to pioneer on the path toward market transparency.

In order to mitigate reputation risk, SSI has been working to establish a systematic and professional communication process and plan. Our communication plan is clearly defined every year so that essential information can be related in a timely and complete manner. All materials, messages and announcements from SSI go through a strict internal review process to ensure precision and consistency. To date we have issued and implemented various regulations and rules for information reporting and publishing, with particular provisions for conducting interview with public media, as well as sharing information and producing written materials on SSI’s business activities. Most notably, SSI has in place a clear procedure for correcting false information on public media, asking all of our staff to be responsible for alerting the company about the existence of false information. We also prepared a full guideline for crisis management, emphasizing a willingness to collaborate, share and communicate with the media and the public.

HUMAN RESOURCE MANAGEMENT RISK

Positive changes in macro factors of the economy in general and in the stock market in particular have presented the SSI human resource division with new challenges and opportunities. Understanding that human resource is our most valuable asset – the defining factor in making SSI the difference on the market – we expended focus and effort in developing policies and activities for structured and comprehensive human resource management

In 2016, the stock market continued to show huge demand for manpower as companies operated and expanded. When there was insufficient supply, securities companies were forced to recruit talents from competitors in the same sector. As tension between those who need to attract talents and those who want to retain talents builds, it is understandable that salary competition, employee turnover and job switching ratio all increased.

Faced with challenges in human resource management (HRM) to sustain and develop the staff, risk management activities in this area were also carried out with significant attention. Not only limiting to strict recruitment screening, expanding of recruiting channels, enhancement of staff training, critical performance evaluation and benefit policy development ensure mitigation of manpower shrinkage and losses; SSI also focuses on listing potential risks may be encountered in HRM activities to determine risk assessment and scenario-specific handling.

Human resource management activities	Potential risks	Points of consideration
Salary and benefits package	Financial impact	Authorized personnel to sign decisions related to compensation and benefits scheme.
		The relevant policies to undergo different levels of approval
		Budget control to ensure the approved policies not to exceed the planned budget
Recruitment	Discrimination in the recruitment process	Screening and recruiting process to be applied consistently to all potential candidates
	Selection error	Mechanisms for employee probation and probation assessment to be applied
		Employment terms and conditions to be implemented as agreed in candidates' interview
Work safety and health care	Work environment	Work environment and conditions to be reviewed regularly to ensure safety, hygiene and professional standard
	Employee health	Organize periodic health checks to monitor the health of employees, and have contingency personnel plans where necessary

Human Resource Management Activities	Potential Risks	Points of Consideration
Employee management	Employee lacking information; lacking essential training and guidance for their assigned job	All Company's employees to be given orientation and training to provide on-boarding information and basic support when they start. Throughout their employment contract, all employees to be given on-the-job training and supervised to ensure they have adequate skill and knowledge that are in line with the Company's business needs and growth strategy
	Employee not having access to performance review	All positions in the Company to be given performance review through the Performance Measurement Program at year-end, conducted on the PMS system, with recorded result for later assessment. Specialized employees such as brokerage staff are evaluated for ranking twice a year
	Provisional staffing	All positions in the Company to be given clear job description so that when staff shortage occurs, replacement recruiting could be timely and appropriate. Each department and unit to have their own provisional staffing plan for scenarios of unexpected or long-term leave. Key positions in the Company to have next generation training program or temporary replacement plan during absence
	Ethical violations	Cross-supervision to be increased through strict business procedures. Training on professional ethics and potential violations to be organized to raise employees' awareness and accountability
	Breaching confidential personal information	Employees' personal information to be kept confidential and to be disclosed only when requested by the appropriate authority
	Former employees	Property and job handover procedures to be strictly applied to avoid damage and leak of both material and non-material (information) property
	Company's reputation	Exit interview to be conducted to determine cause of quitting and to avoid negative reputation risk for the Company

In conjunction with employee selection and recruitment, we consider employee training to be a key element in safeguarding and raising human resource quality, as well as an important source of employees' inspiration and motivation. Training programs are designed for specific types of audience, helping to increase work effectiveness, reduce business risk and improve organizational solidarity. As we anticipate changes to the legal framework for human resource and an increasingly challenging market, more than ever, the SSI team needs to strive for a new level of performance and growth and provide our clients with more competitive values.

Benefits policy and performance measurement program always serve as a parallel duo to ensure employee satisfaction, internal fairness and market competitiveness, creating a professional work environment for staff development.

Optimize operating costs but still warrant the pace of HR development in both quality and quantity to adapt to market requirements; attracting and retaining talents, especially high-level personnel is always a challenge for the HRM activities. SSI gives priority to the systematic and procedural management of our organization, ensuring strict compliance, sustainable development and sufficient provisional staffing throughout, so to mitigate risks from fluctuations in our human resource. For human resources management activities, the accuracy and security of information are always considered a major concern. Periodic reports show trends in the Company's personnel are conducted through an information management system to help the Leaders better manage and predict staffing situation, as well as develop training schemes, recruitment, and policies consistent with actual situations. With the support of technology systems, personnel activities have also been able to mitigate risks and improve operational efficiency.

Besides, SSI continues to maintain internal communication channels to share vision, strategy and strengthen corporate culture to foster the Company's spirit. This sharing also acts as a motivating factor, provides information and avoids unnecessary tension. It also serves as an assurance measure for seamless information and ensures that every employee understands individual as well as common objectives to continue making their best contribution to the development of the Company. With the high level of sharing and transparency within the organization, operation will be more smoothly, reducing negative impacts on human resources.

With new challenges and opportunities, human resource management activities at SSI have received valuable attention and support from the Management Board for the development of a human force high in quality and rich in SSI's culture. SSI will continue to be a "cradle for talent development." Here, we fuel ambitions and are willing to provide opportunities for employees' experiment and development. Through our management system and cross-checking processes, we can boldly facilitate experimenting and trying for staffs while ensuring mitigation of potential risks.

LEGAL RISK

Legal risk exposed to the Company in the course of legal compliance due to regulatory changes, failure to comply with regulations or in the arising of disputes and litigations, etc., from stakeholders during the process of the Company's daily operation. The BOD attaches great importance to this issue, and therefore does not tolerate any risks due to deliberate violations of legal regulations.

2017 is anticipated to undergo many significant changes in legal framework for businesses in general and for the stock market in particular, including the adoption of the 2015 Civil Code, the amendment of the Securities Law, the amendment of regulations on management of public companies and operation of securities companies, etc., new trading products such as derivative securities, secured warranties, etc.

In order to limit the risks arising from changes in laws or regulations, SSI organizes the Legal Department with licensed lawyers as well as uses external professional legal consultancy services in case of need. The Legal Department and external consultancy are responsible for updating newly issued legal documents to the BOD, the BOM and relevant Departments; studying the impact of to

be issued draft legal documents on the Company's activities for proper preparation. In addition, the Division is also in charge of providing inputs to draft legal documents that are closely related to the Company's activities, participating in seminars, coordinating with peers and members of professional associations to comment on law making process, summarizing problems arising from the application of current regulations to report to competent state agencies and propose feasible solutions.

The Company's internal procedures and regulations must be reviewed by the Legal Department as well as regularly examined and revised for suitable amendments and adjustments to changing laws.

Most members of the BOD, BOS and managers of the Company have participated in corporate governance training courses for public companies.

Compliance is a criterion in the professional code of ethics of the Company that the entire BOD and employees have committed to.

ENVIRONMENTAL RISK

The Company provides services in the financial sector, without material use of natural resources, therefore environmental risk exposure is negligible.

2017 ACTION PLAN

As part of the plan to improve the Company’s risk management capability, 2016 was a milestone year with the completion of the risk management system, growth of human resource, and initial update of framework policies and procedures. The main objective of 2017 is to improve the system of policies, procedures, monitoring, and early warning specifically to each type of risk, along with the implementation of new policies and procedures.

With strong growth in personnel force as well as branch network and clients, the Company has to face increasing operational risks. Therefore, 2017 to focus on improving the effectiveness of risk management with the implementation of risk management training for all employees to enhance risk management culture, for each employee is to serve as a risk management agent. At the same time, the Risk Management Department will coordinate with business units to develop a risk category, risk prevention and mitigation measures for each department and continuous action plans for each division as well as for the whole Company.

In addition, the adequate management of credit risks, liquidity risks and market risks will continue to be carried out daily as well as be improved for higher effectiveness of risk management activities for their directly connection to the Company’s core businesses. In 2017, as derivatives to start trading, the completion of risk management for the products will also be a focus

Challenges in the implementation of risk management activities

ĐIn order to achieve sufficient risk management, it is necessary to be accurate and effective in identifying, measuring, monitoring, warning and handling risks, along with awareness building at all levels from management to employees on the importance of risk management and each member’s initiative to engage in risk management activities of SSI.

Because risk management is a new field in Vietnam as well as a growing field in the world, there remain issues with inconsistent and changing definitions, limited risk measurement models, and inadequate awareness on the importance of risk management activities across majority of the work force. Therefore, risk management activities to encounter the following difficulties:

- Measuring risks using the quantitative method requires the use of historical data. However, at present, the data source is either very limited or unavailable, making the use of quantitative risk measurement to be challenging, inaccurate or unfeasible. In addition, quantitative risk measurement models themselves have limitations and vary in approaches. For instance: The Value at Risk (VaR) method can help to measure maximum loss at a specific level of confidence over a period of time. However, when a risk is outside of the confidence level, the maximum loss cannot be defined and often is very large. In addition, VaR also has a variety of measurement methods depending on specific conditions, requiring users to have experience for appropriate measurement application.
- Due to limited awareness on the importance of risk management, the effectiveness of staff contribution to risk management process remains below expectation and risk management activities are mainly carried out by the Risk Management Division and part of the business divisions that directly generate risks.
- Current software systems supporting risk measurement require very high investment costs that only large banks or financial corporations in the world can reach the scale to attain meaningful cost effective use. As a result, certain semi-manual calculations remain in use.

INVESTOR RELATIONS ACTIVITIES IN 2016

In 2016, SSI continued to maintain and intensify shareholder and investor relations activities, aiming at the objective of “maximizing shareholders’ value.” Many activities were designed to increase transparency, protect shareholders’ rights and ensure equality among various shareholder groups. The Company proactively took actions to share information and connect to the investor community, winning trust from existing shareholders while facilitating access to many potential ones and promoting SSI’s brand in both Vietnam and the region.

PROMOTING INFORMATION TRANSPARENCY

In order to ensure transparent information disclosure to investors, SSI developed a complete, accurate and timely process of disclosing important matters as well as those that affect stock prices and investors’ decisions in accordance with the Ministry of Finance (MOF)’s Circular 155/2015/TT-BTC.

In 2016, SSI continued to provide investors with quarterly updates of business performance. Such updates, which provided in-depth explanation of impacting factors on the revenues/profits in the period, and operations as well as achievements of each business unit, helped keep investors accurately informed for sound decision making. The information was also made available to the press and prospective investors, both individual and institutional, ensuring access to the latest updates. Besides, the Investor Relations Division also played an active role in receiving and responding to shareholders’ inquiries via multiple channels including telephone, email, or in-person meetings.

The corporate website at www.ssi.com.vn serves as an efficient communication channel where updates of SSI’s activities are fully provided. Investors can obtain therefrom publicly available information, financial data, meeting minutes and important documents such as the Company’s Charter, Corporate Governance Principles, etc. from the Company’s establishment in both Vietnamese and English.

Annual reports are published on an annual basis and provide an overview of the Company’s operations, financial position, business performance, governance as well as sustainable development activities. SSI’s annual reports have repeatedly been named among the best reports in annual voting held by HOSE.

PROTECTING SHAREHOLDER INTERESTS

At SSI, top priority has always been given to the protection of shareholder interests and equality.

In order to facilitate shareholders’ complete, accurate and timely access to important information affecting investment decisions, SSI has, over the years, strived to diversify its information channels to include corporate website, email, mass media, shareholders’ meetings, annual reports, etc. Particularly, in 2016, SSI became one of the first listed companies to commit to providing information disclosure in English on HOSE’s website. Such initiative aims to ensure equal access to corporate information between local and foreign shareholders.

Regarding the right to attend and vote at Shareholders’ Meetings, to vote for and dismiss Board members: SSI shareholders are always clearly notified of the meeting rules and voting process at Annual Meetings. Moreover, all meeting materials are provided prior to meeting days, allowing adequate timing shareholders’ preparation and decision making. In addition, proxy voting is also available. The Company’s Charter and Governance Principles expressly provide that equality is to be ensured to all shareholders, without any preferential treatments, and that voting is to take place proportional to the number of shares owned.

Over the years, a regular dividend rate of 10% has been maintained by SSI to ensure stable and periodic earnings for its shareholders.

ACTIVELY CONNECTING WITH THE INVESTOR COMMUNITY

In 2016, SSI was not only proactive in promoting information transparency and protecting shareholder interests but also in connecting with the investor community, especially institutional investors.

In 2016, the Company continued to receive many analysts and portfolio managers from a number of foreign investment funds based in Japan, the US, Hong Kong, Singapore, etc. who came to work with our management to understand the Company’s development strategy, business lines, investment operations as well as other in-depth economic-financial information.

Besides, the Company’s Management also participated in several investor conferences both at home and abroad, including the ASEAN Broker Networking Conference held in Hanoi in October 2016 and the Investment Forum held by Daiwa in Hong Kong in November 2016.

In 2017, in addition to continual effort in information transparency promotion and shareholder interest protection, SSI will pay attention to other Investor Relations activities, including:

- Improving corporate profile publications and materials for enhanced professional communication of SSI’s images and stories to existing and prospective shareholders and investors;
- Actively participating in investment conferences and organizing roadshows abroad to promote SSI stock;
- Seeking and promoting opportunities to connect with institutional investors in key financial markets such as the UK, the US, Singapore, Hong Kong, Japan and South Korea.
- Proactively working with and providing information to market analysts in order to increase the number of analytical reports covering SSI in the 2017.

CORPORATE GOVERNANCE REPORT BASED ON ASEAN CORPORATE GOVERNANCE SCORECARD

A. SHAREHOLDER RIGHTS

Item	Questions	Answers	Evaluation	Notes
A.1. Basic shareholder rights				
A.1.1	Does the Company pay (interim and final/ annual) dividends in an equitable and timely manner; that is, all shareholders are treated equally and paid within 30 days after being (i) declared for interim dividends and (ii) approved by annual general shareholder's meeting (GSM) for final dividends?	Yes	Partly implemented	SSI has paid annual dividends in an equitable manner in accordance with profit distribution plan approved by the GSM. However, the execution period is more than 30 days.
A.2. Right to participate in decisions concerning fundamental corporate changes				
A.2.1	Amendments to the company's constitution?	Yes	Well implemented	
A.2.2	The authorization of additional shares?	Yes	Well implemented	
A.2.3	The transfer of all or substantially all assets, which in effect results in the sale of the company?	Yes		The situation of transferring all or substantially all assets hasn't ever happened in SSI. However, the Company Charter regulated that GSM has rights and obligations to make decisions on the sale of assets valued at 35% or more of the total value of the Company's assets, with the voting ratio must be more than 65%.
A.3. Right to participate effectively in and vote in general shareholder meetings and should be informed of the rules, including voting procedures that govern general shareholder meetings				
A.3.1	Do shareholders have the opportunity, evidence by an agenda item, to approve remuneration (fees, allowances, benefit-in-kind and other emoluments) or any increases in remuneration for the non-executive directors/ commissioners?	Yes		Total remuneration of the BOD is approved annually by the GSM.

Item	Questions	Answers	Evaluation	Notes
A.3.2	Does the Company provide non-controlling shareholders a right to nominate candidates for board of directors (BOD)/ commissioners?	Yes	Well implemented	
A.3.3	Does the Company allow shareholders to elect directors/ commissioners individually?	Yes	Well implemented	
A.3.4	Does the Company disclose the voting and vote tabulation procedures used, declaring both before the meeting proceeds?	Yes	Well implemented	It is recorded in the minutes of latest GSM. Nomination and voting procedures are announced in invitation letter and at the opening of the meeting.
A.3.5	Do the minutes of the most recent GSM record that there was an opportunity allowing for shareholders to ask questions or raise issues?	Yes	Well implemented	The latest GSM minutes recorded the detailed discussion, all the questions and responses as well as other opinions from shareholders.
A.3.6	Do the minutes of the most recent GSM record questions and answers?	Yes	Well implemented	The latest GSM minutes recorded the detailed discussion, all the questions and responses as well as other opinions from shareholders.
A.3.7	Did the disclosure of the outcome of the most recent GSM include resolution(s)?	Yes	Well implemented	GSM Resolution was disclosed together with GSM minutes in accordance with the regulations.
A.3.8	Did the Company disclose the voting results including approving, dissenting, and abstaining votes for each agenda item for the most recent GSM?	Yes	Well implemented	The minute of the most recent GSM disclosed the full details of voting results including approving, dissenting and abstaining votes for each agenda item.

Item	Questions	Answers	Evaluation	Notes
A.3.9	Did the Company disclose the list of board members who attended the most recent GSM?	Yes	Well implemented	The Board of Directors, Board of Management have all attended SSI GSM for the past several years. Their participation was recorded in GSM minute.

MESSAGE FROM THE CHAIRMAN ON SUSTAINABLE DEVELOPMENT

MESSAGE FROM THE CHAIRMAN ON SUSTAINABLE DEVELOPMENT

Dear Shareholders,

Nowadays, adverse environmental impacts on economic development have raised concerns for many countries and threatened the sustainable growth of the global economy. The side effects of a developed economy are represented by global climate change, environmental degradation and exhaustion of natural resources. Against this background, sustainable development has been an issue of top concern for the nations in the world, which aim for a green economy to ensure long-term development for future generations.

Amid this global mainstream, Vietnam has also formulated a 2011-2020 sustainable development strategy under which a balance is to be struck among social, economic and environmental aspects. Within this framework, enterprises have an important and active role to play in order to realize national goals and contribute to the restructuring of the economy along the lines of sustainability. Special importance is attached to the incorporation of sustainability goals into enterprises' business strategy, particularly amid in-depth international integration.

Having emerged as a leading financial institution in Vietnam, SSI, more than anyone else, understands the importance of incorporating sustainable development goals into its business strategy. Not only has SSI paid attention to revenue and profit growth, but it has also bundled such growth with environmental and social goals, ensuring a harmony of interests among stakeholders. The proper execution of sustainability activities helps the Company enhance its prestige and market competitiveness, attract local and foreign investors' interest, bond the team and engage talents, thereby efficiently contributing to the market, community and society.

In 2016, SSI continued to proactively invest in sustainability development activities. The Company's decent business performance over the past several years has contributed to the State budget by means of taxes and other payables. Apart from this, indirect contributions have been made to the overall development of the economy in general and the stock market in particular, namely:

- Providing advisory services for enterprises' fund-raising, contributing to the formation of a channel to direct and distribute capital to the economy under market mechanism, activating and mobilizing resources for boosting economic growth
- Safe and transparent management of investors' assets; facilitating their access to profitable investment opportunities
- Contributing to the development of the local stock market via market making activities and involvement in new product development
- Implementing a responsible investment strategy and companionship with associated companies.
- Strengthening transparency and efficiency in corporate governance; protecting shareholders' interests.
- Creating jobs and providing stable income for employees

SSI's sustainable development would not have been possible without the support of its customers. Therefore, SSI has made consistent efforts in all activities to secure customer satisfaction. The Company has at the same time intensified communication and exchanges with customers so as to better understand them and foster a strategy for long-term companionship and development.

Human resources always have a key role to play in sustainable development and SSI has over the past 17 years striven incessantly to build an organization where each member feels satisfied at work. This has been made possible by facilitating and promoting work-life balance, continuous training and personal development, and intensification of compliance to realize sustainable goals as opposed to short-term benefits.

In addition, under a commitment "We strive to better the communities in which we work", throughout its course of growth, SSI has proactively developed intellectual and physical education programs for young generations and joined the community in building a better society.

At the start of the 18th year of its connecting journey, SSI will continue to execute its chosen mission and pledge to secure sustainable development steps for itself, Shareholders, Customers, Employees, Partners, and the Community. I would like to extend my sincere thanks to Shareholders, Customers, Partners and Employees for your valuable support and companionship.

We wish You good health and success!

**Chairman cum CEO
Nguyen Duy Hung**

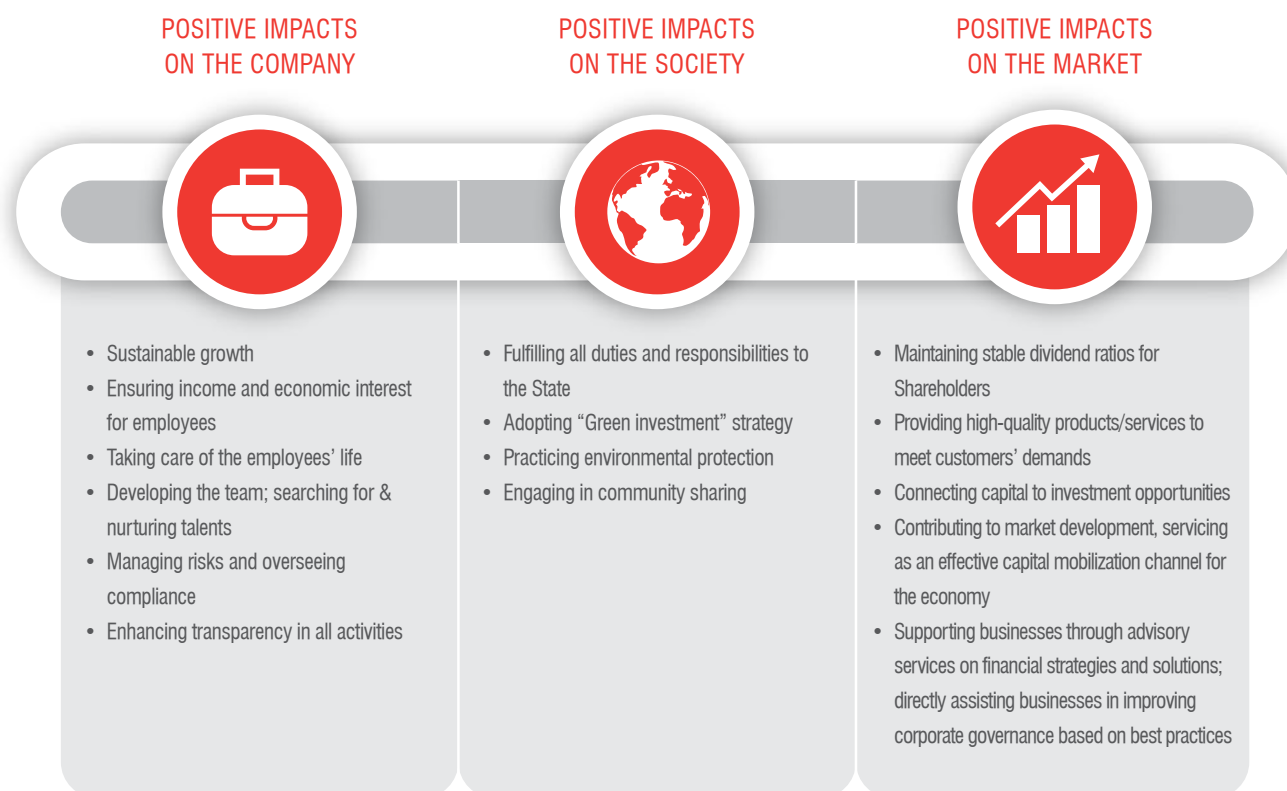

SUSTAINABLE DEVELOPMENT DIRECTION

STRATEGIC DIRECTION FOR SUSTAINABLE DEVELOPMENT

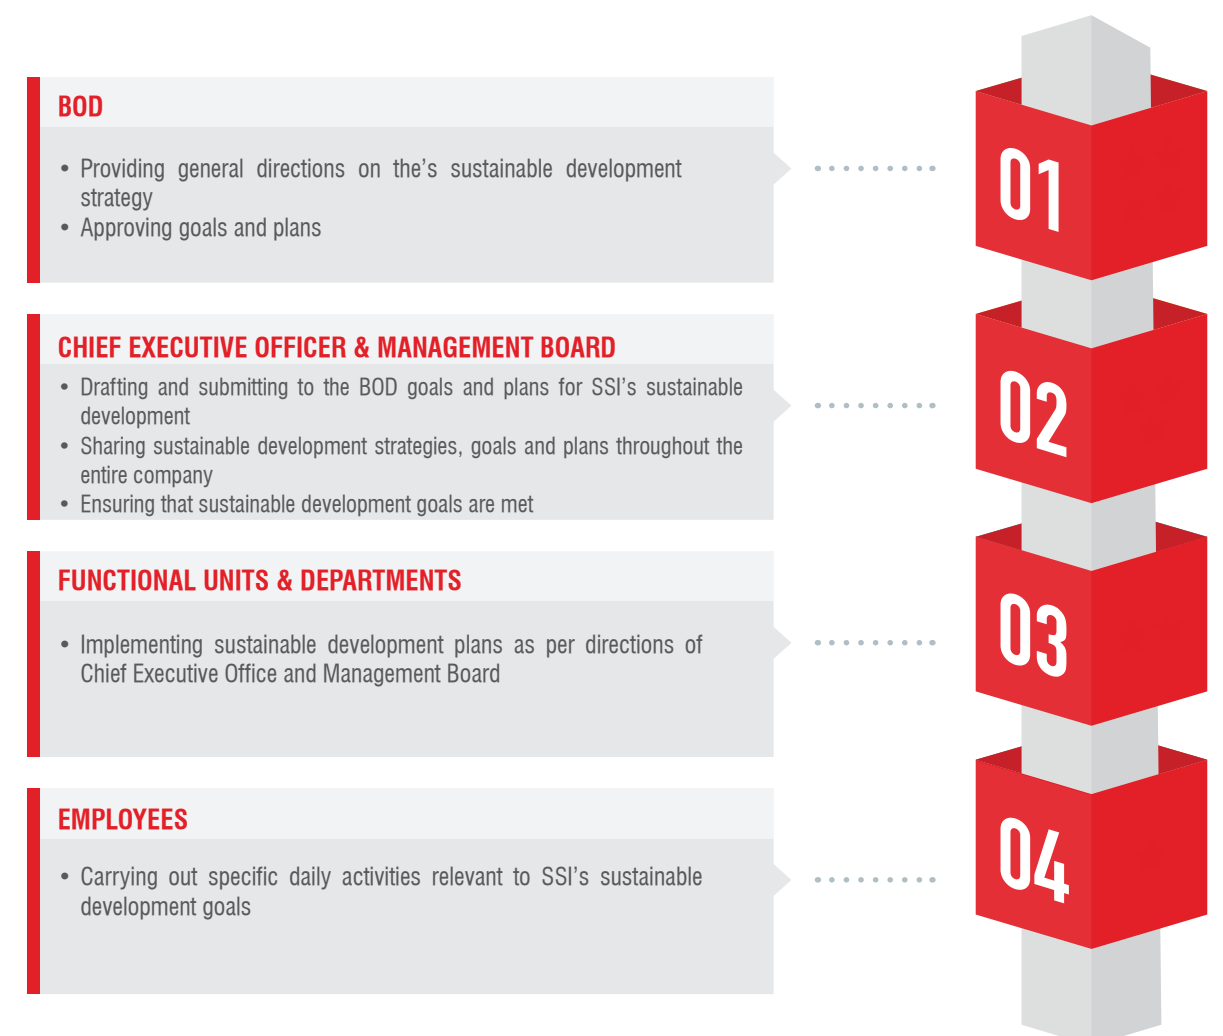

Through 17 years in business with the vision “We succeed together”, for SSI, the Company’s success means maximizing effectiveness and value for Clients, Associates, Partners, Shareholders and the Community.

We understand that a business cannot operate while focusing only on stand-alone and short-term development goals without paying attention to long-term growth in relation to the economy, environment and society. Therefore, the Company’s long-term strategic direction is to ensure the Business’s sustainable development in line with the sustainable development of the Vietnamese Financial Market, and to contribute most effectively and practically to the Society.

MANAGEMENT MODEL FOR SUSTAINABLE DEVELOPMENT

The BOD holds the highest responsibility regarding SSI’s sustainable development strategy. The Chief Executive Officer and the Management Board are responsible for building and implementing goals and plans, as well as sharing and ensuring that all sustainable development initiatives are understood and adopted throughout the Company, from business units and departments to each and every employee.

PRINCIPLES UNDERLYING THE SUSTAINABLE DEVELOPMENT OF SSI

With the mission “Connect Capital to Opportunities”, SSI contributes to the development of the market and society through business activities, including diversification of investment opportunities for clients, efficient management of Investors’ assets, focusing on the array of services with professional and high added value. Not only does SSI support businesses in need of advice on strategy and financial solutions, the Company also directly involves in supporting enterprises in governance.

With the aligned Mission of “The Business of Success”, SSI’s sharing of potential opportunities with clients, colleagues, partners and the community plays an important factor in accomplishing the set forth mission, as well as bringing about sustainable development to SSI and its stakeholders.

SSI commits to enhance client satisfaction with products and services meeting specific needs and offering optimal solutions to maximize performance for each client segments.

SSI preserves and develops relationships with partners and colleagues to work together in delivering optimal and sustainable efficiency to all parties.

To gain the trust of shareholders, SSI commits to absolute transparency in operations and information, continuing efforts to explore and develop for higher value creation.

SSI voluntarily fulfills corporate social responsibilities, jointly contributing to the development of the community. We focus on the development of education for the younger generations to foster future talents for the country. We join hands with the community in efforts to build a better society.

We endeavor to develop a professional work environment, where SSI employees - who create added values for shareholders - are encouraged, guided and supported to achieve the highest satisfaction in work and life. Our team is the most valuable assets of SSI.

REPORT OVERVIEW

The Sustainable Development Report is created in order to collect, publish, review and assess sustainable development goals and activities of Saigon Securities Inc. (SSI) with a strategic direction toward sustainable development. The report content shows the Company’s approach to sustainable development. This is SSI’s 5th year in making this report, also the 3rd year where the Report is prepared in accordance with disclosure standards based on the Sustainable Development Report Guidelines, G4 version for the Financial Sector developed by the Global Reporting Initiative (GRI).

REPORT CONTENT

The 2016 Sustainability Report sets forth the strategic direction for the Company’s sustainable development initiatives in the coming years, at the same time reflecting the results of sustainability development activities in 2015. The report will help Investors to have a more complete understanding of the Vision, Strategy as well as results of Sustainable development activities of the Company in Economics, Society and Product Liability.

The report consists of the following main contents:

- Message from the Chairman of the Board on Sustainable development
- Sustainable development direction
- Report overview
- Connecting stakeholders for sustainable development
- Identifying critical issues
- Report on 2016 sustainable development activities

REPORTING SCOPE & LIMITS

The 2016 Sustainability Development Report is closely linked to the 2016 Annual Report and the Financial Report of the Company. The Report is published online at www.ar.ssi.com.vn.

The Report is prepared annually according to the fiscal year, ending on 31 December 2016. All data in the report is collected from SSI’s actual activities at the Head Office and Branches/Trading offices nationwide, starting from 1 January 2016 to 31 December 2016. Financial data in the report is referenced from the audited 2016 Consolidated Financial Report.

The report provides business results for 2016 and discusses SSI’s direction and goals in the coming years regarding sustainable development.

The report is prepared by the Sustainable Reporting Team - Saigon Securities Inc., including members from several Departments responsible for data provided in the Report such as the Investor Relation Department, Public Relation, Finance - Accounting, BOD Secretary.

REPORT CONTENT DETERMINATION METHOD

SSI’s approach to sustainable development issues arises from the Company’s long-term economic development goals, coupled with business environment and social development goals, thus contributing to the overall development of the community.

The Sustainable Development content is discussed by SSI with stakeholders in order to identify topics of interest. These issues will continue to be evaluated and reviewed by SSI in relation to the Company’s current business operation and sustainable development strategy, thus identifying critical matters to be reviewed, improved as well as highlighted in the 2016 Sustainable Development Report

Besides, prioritized stakeholders are identified based on the level of influence and their dependency on the Company as in the following evaluation model:

The model for identifying prioritized stakeholders

IDENTIFICATION OF KEY AREAS

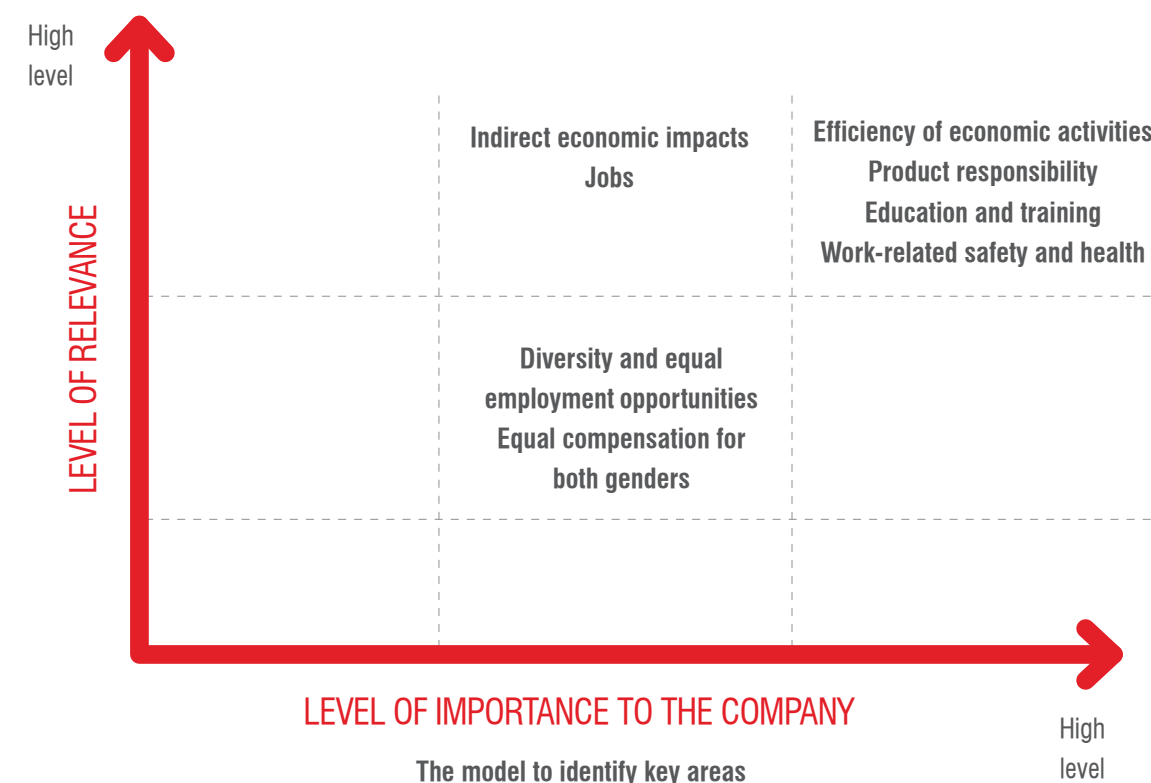

The process of evaluating key areas in order to determine the report's contents includes the following steps:

SSI has simultaneously applied several consultation methods to achieve the most completed and sufficient results. Firstly, SSI has used online surveys to ask for opinions from the majority of Employees, Clients and Investors. Information on the survey was published widely on communication channels such as social networks, internal newsletter, internal forum, and has gathered over 100 responses.

Several group interviews continue to be done with representatives of Investors, Clients, Employees and Managers after collecting survey results in order to gain a deeper understanding of the matters of interest to all parties.

Following the consultation process with the Company's management and other prioritized stakeholders, the key areas have been identified as follows:

Accordingly, the key areas are organized into the report contents on SSI's sustainable development activities in 2016:

SUSTAINABLE DEVELOPMENT ACTIVITIES IN 2016

CORPORATE GOVERNANCE TOWARDS SUSTAINABLE DEVELOPEMENT

COMPLIANCE CONTROL ACTIVITIES

SSI always upholds good corporate governance as one of the most important factors ensuring corporate sustainable development, thus winning investor confidence and maximizing investor interest. This, in its turn, contributes to the development of the entire market and the wider community. SSI’s governance function is built and gradually fine-tuned based on the best practices of corporate governance in the region and the world such as the ASEAN Corporate Governance Scorecard, together with strict compliance with Vietnam’s regulatory provisions on the governance of public companies. Under this framework, Compliance Control, Risk Management and Shareholder Interest protection activities are the key focus areas.

Compliance control at SSI is performed via the Board of Supervisory (BOS)’s supervision over the Board of Directors (BOD), the Board of Management (BOM) and the Management as well as the BOD’s supervision over the BOM. In daily activities, the Management relies on Internal Control function to carry out compliance control within the Company.

The Company’s Charter expressly separates shareholders’ ownership from corporate governance jurisdiction. It delegates powers to corporate gover-nance units while putting in place obligations and checks to effectively control these functions. Besides, business processes and operational apparatus are designed to facilitate cross-checks for the purpose of strengthened internal checking and monitoring, less abuse of power, and early detection of potential breach.

The Internal Control is based at the Head Office and performs the control of the Company’s units to ensure staff and their respective departments’ com-pliance with relevant regulations of law as well as internal rules and pro-cesses. Daily control activities mainly comprise of inspection and monitor-ing of compliance with the law, the Company’s Charter, decisions by the Shareholders’ Meeting, decisions by the BOD, Internal Business Rules and Processes, and Risk Management Process by relevant units and by securi-ties practitioners within the Company; monitoring the execution of internal regulations, activities with potential conflicts of interest within Company,

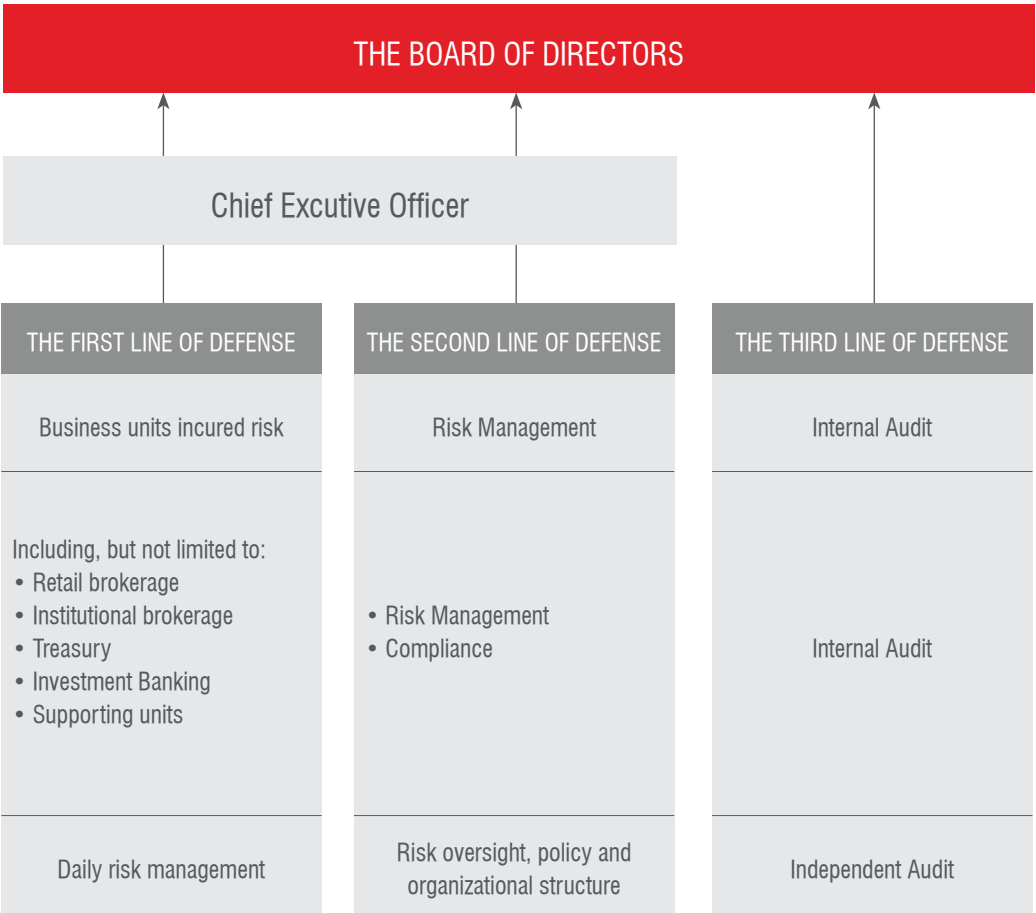

especially with regards to the Company’s business activities and individual transactions by the Company’s staff; monitoring staff’s execution of respon-sibilities within the Company and partner’s’s’ execution of responsibilities with regards to authorized activities. In 2016, 40 audits were conducted at all the units in the entire SSI system. Audit reports were sent to heads of the audited units for feedback. After that, the final reports were submitted to the BOM and Heads of relevant divisions as well as heads of the audited units. In addition, tight control was also in place for overseeing transactions of the Company’ with related persons. When performing transactions with related persons, the Company would enter into written contracts on an equal and voluntary foot-ing. The Company adopted necessary measures to prevent related persons from interfering in the Company’s activities, harming the Company’s interests, performing transactions that led to the Company incurring losses of capital, properties or other resources, controlling the Company’s merchandise trading channels or manipulating prices. Data of transactions with related persons is disclosed in the Company’ Financial statements.

The Legal Department performs legal advisory function, inspects and mon-itors the launch of products, and issuance of internal processes and rules as well as the Company’s transactions with third parties in order to ensure compliance with law and mitigate legal risks for the Company. The Legal De-partment is also responsible for updating newly issued regulatory documents for the BOD, the Management and relevant units. It also studies the impacts of draft regulatory documents on the Company’s activities for proper preparation.

RISK MANAGEMENT SYSTEM

SSI builds a complete Risk Management System (RMS) which comprises of risk management (RM) personnel, processes and supporting tools. The RMS aims to reduce a number of instable changes in the Company’s cash flows and profits resulting from the instability of interest rates, exchange rates, com-modity, stock prices or other instable factors in the Company’s business. Anticipating potential risks facing the Company as a result of strong growth of staff size, number of branches, client base, and capital size and to prepare for continued growth in the years to come, the BOD introduced a plan to enhance RM efficiency by forming a RM capabilities enhancement project in August 2015. The project, completed in 2016, resulted in a better specialized RM function, more detailed RM activities which were categorized by type of risk, and additional RM personnel who was both qualified in terms of knowledge and practical experience. Moreover, to pave the way for the introduction of de-rivative products in 2017, SSI prepared full resources together with a system of RM policies and processes dedicated for these products in 2016.

The Company employs a 3-defense-line model in RM activities as follows:

RM principles define the responsibilities of different stakeholders in the Company’s RMS from the BOD, the BOD’s RM Committee, the BOM, the Management, the RM unit and other individuals and units in the organization structure. The RMS specifies ways to handle critical risks that may significantly affect the Company’s business including operational risks, market risks, credit risks, liquidity risks, compliance risks, third party transaction risks, human resources management risks, IT risks and brand risks. Details of these types of risk and how to handle/treat them constitute part of the Risk Management section of this Annual Report.

RM policies are available in written documents which all the staff and units within the Company can access, study and properly understand their responsibilities in the Company’s RM activities. Thanks to its conservative RM policy, in 2016, the Company incurred no material risk-induced damages.

SHAREHOLDERS’ INTEREST PROTECTION

At SSI, top priority has always been given to the protection of shareholders’ interests and equality.

Shareholders’ basic rights such as the right to receive dividends, to attend and vote at Shareholders’ Meetings, to be engaged in decisions relating to the Company’s fundamental changes, etc. are expressly provided for in the Company’s Charter and have been properly exercised over the years. Equality is ensured for all shareholders without any preferential treatments, decisions by the Shareholders’ Meeting are all based on results of voting which takes place proportionally to the number of shares owned.

SSI has over the years strived to diversify its information channels to include corporate website, email, mass media, shareholders’ meetings, annual reports, etc. This serves to facilitate shareholders’ complete, accurate and timely access to important information and to insulate them from adverse impacts on their investment decisions. Moreover, the disclosure of information both in English and Vietnamese was remarkably improved in 2016. This ensures equal access to corporate information between local and foreign shareholders/investors.

SSI maintains a policy of stable dividend payment which aims to balance Shareholders’ desire to gain profit and the Company’s retained earnings for long-term development. In 2015, the Company paid dividends in cash at a dividend rate of 10%.

SUSTAINABLE ECONOMIC GROWTH

SSI understands that its long-term sustainable development strategy can only materialize if the Company is based on a solid financial foundation as well as stable economic growth, thereby increasing its contributions to the community and society by contributing to the State budget, matching funds with investment opportunities, managing Investors’ assets safely and transparently, and actively participating in the building of the stock market in particular and the financial market as a whole.

EFFECTIVE BUSINESS CONTRIBUTES TO STATE BUDGET

Over its 17 years of existence, SSI has always striven to achieve positive business results, reaching the business plan adopted by the GSM. Over the most recent 5 years, SSI’s revenues and profits have been maintained at high level with the stock market price being valued stably at twice the par value. Specifically, the consolidated revenues in 2016, which reached VND 2,312 billion, exceeded the target by 60% and represented a year-on-year increase of 28%, while profit before tax hit VND 1,056.8 billion 11.24% higher than the profit target. Besides, all the business lines performed decently.

Business performance in the 2012-2016 period

Source: SSI Consolidated Financial Report

In 2016, SSI’s consolidated assets totaled approximately VND 13,228 billion, up 9% against the previous year, and equity stood at VND 7,152.6 billion.

The Company has consistently fulfilled tax obligations with contributions to the State budget evolving incrementally over the years. In 2005, SSI’s contributions to the State budget were VND 347 million. In 2006, the number surged to VND 3.8 billion. In 2007 and 2008 – despite tax incentives resulting from its listing on the local stock market - the Company’s tax payments rocketed to VND 103 billion and 140 billion, respectively. From 2009 to date, regardless of the global economic turmoil that seriously affected the local economy and, in particular, the stock market, SSI has maintained proper management of its own as well as Investors’ funds, ensured safety and high profitability, and made steady contributions to the State budget. In 2016, SSI paid VND 390.8 billion in taxes, a year-on-year rise of approximately 45%.

SUCCESS IN CONNECTING CAPITAL TO OPPORTUNITIES

SSI's activities focus on helping enterprises mobilize capital through the stock market, contributing to the formation of a distribution channel of capital and long-term capital market mechanism for the economy; contributing to the activation and mobilization of resources, boosting economic growth; and contributing to accelerating the economy toward greater transparency, publicity, fairness and flexibility.

In 2016, SSI continued to be the market leader in investment banking thanks to successful advisory deals involving multiple million-dollar transactions. One of the blockbusters worth mentioning is SSI's successful advisory on the offer of 78.38 shares of Viet Nam Dairy Products Joint Stock Company (VNM – HOSE). This represents the biggest deals in 2016 in terms of value in Southeast Asia. In addition, SSI also provided advisory services to a number of major local listed companies. Examples of such projects include the divestment by shareholders of DHG Pharmaceutical Joint-Stock Company (DHG – HOSE), fund-raising through private placement using book building method by for No Va Land Investment Group Corporation (NVL - HOSE), the offer of The PAN Group (PAN – HOSE)'s entire shareholding in 2 cleaning service subsidiaries, and a bid to assume major shareholder's controlling stake by Domesco Medical Import-Export Joint-stock Corporation (DMC – HOSE). SSI also acted as bond issuing agent for many issuers including National Citizen Bank, HD Saison Finance Co., Ltd, VPBank Finance Company Limited, Kido Corporation (KDC – HOSE), Transimex Corporation (TMS – HOSE), and so on.

SAFE AND TRANSPARENT MANAGEMENT OF INVESTORS' ASSETS

Despite tough competition in the industry, SSI has consistently adhered to the principles of respect for clients and respect for the law so as to make profits while protecting investors from losses and building stock market transparency. Over the years, SSI has efficiently managed assets of both local and foreign investors, thereby helping to anchor investor confidence in the local stock market and to build a stable local economy. As of late this year, SSI is providing safe and secure custody for over 100,000 customer accounts.

With regards to asset management, SSIAM has been striving to mobilize resources from new customers while maintaining efficient management of existing ones' assets. As at the end of 2016, the total assets under SSIAM's management were VND 7,913, up 27,4% against 2015. Especially, SSIAM is the first Vietnamese company to successfully raise funds abroad. This is to pave the way for new and efficient approaches in raising funds for the economy.

We invariably strive to improve the quality of managing assets entrusted by customers. Our investment, risk management and internal control processes are operated properly and professionally, which not only guarantees compliance with law but also minimizes conflicts and adverse impacts on investor's benefits. With sustainable development being our motto, we work toward building trust, transparency and long-term asset value growth for investors.

PROACTIVE AND POSITIVE PARTICIPATION IN THE MARKET CONSTRUCTION

SSI does not confine itself to strictly and fully complying with securities-related regulations and other statutory requirements. The Company has also proactively contributed its recommendations to draft regulations on stock market, which helped enhance the practical aspects and quality of the regulator’s documents, and participated in the development of new products on the market.

In 2016, SSI continued to contribute recommendations to drafts of decrees and circulars which were designed to provide clearer regulations and instructions as to activities on the stock market. These documents included draft of the Government’s Decree 86/2016/ND-CP of Jul.1, 2016 prescribing eligibility conditions for securities investment and trading; draft of a decree replacing the Government’s Decree 90/2011/ND-CP of Oct. 14, 2011 on the issuance of corporate bonds; draft of the Ministry of Finance (MOF)’s Circular 272/2016/TT-BTC of Nov. 14, 2016 governing the amount, receipt, payment, management and utilization of fees and charges in the securities sector; draft of a circular replacing the MOF’s Circular 210/2014/TT-BTC of Dec.30, 2014 providing instructions on accounting applicable at securities companies; draft of a circular replacing the MOF’s Circular 226/2010/TT-BTC of Dec.31, 2010 providing for financial safety indicators and sanctions against securities trading institutions failing to attain such indicators; draft of the State Bank of Vietnam’s Circular 10/2016/TT-NHNN of June 29, 2016 guiding the implementation of the Government’s Decree 135/2015/ND-CP of Dec. 31, 2015 on indirect overseas investment; draft of the State Securities Commission (SSC)’s Regulations on reporting on foreign investors’ activities; draft of Decree on internal auditing; draft of the SSC’s regulations on margin trading and Regulations on Information disclosure at HOSE; draft of a decree on corporate governance applicable to public companies and draft of a circular guiding the implementation of this Decree.

In preparation for the introduction of a derivatives market in Vietnam in 2017, in addition to its involvement in HOSE’s development of covered warrant product, SSI has actively contributed comments to regulators for the purpose of designing legal framework, process and regulations. For instance, comments and recommendations have been made to the draft of the MOF’s Circular 107/2016/TT-BTC of June 29, 2016 guiding the offer and trading of cover warrants, drafts of Regulations on listing, Regulations on supplementary trading, Regulations on market-making activities, Regulations on information disclosure and management of risk prevention activities with respect to covered warrants.

SSI also named its representative to attend and contribute opinions at periodic meetings of the Vietnam Securities Market Index Council, the Vietnam Bond Market Association (VBMA), and the Vietnam Association of Securities Business (VASB).

In addition, as part of its activities with the State Securities Commission and two Exchanges (HOSE, HNX) celebrated the 20th anniversary of the Vietnam stock market, SSI sponsored the workshop on “Developing capital market for startups”, and together with the NDH newspaper held the talk show “20 years of stock market and the transfer of foreign capital flows” - the event that was chaired by Mr. Nguyen Duy Hung (SSI Chairman cum CEO). He exchanged with representatives of management agencies and enterprises about the process of building the stock market in the past 20 years, the story attracts foreign capital flows & prospects in the future.

ACTION FOR CLIENTS

Customers’ trust and confidence has been a solid foundation for SSI’s sustainable development. Driven by this perception, SSI has consistently pursued customer satisfaction by professionally and devotedly designing products which are tailored to each customer segment. In parallel, the Company has made relentless efforts to innovate, improve and enhance product/service quality and apply flexible and dynamic customer care policy.

DEVELOPMENT OF NEW PRODUCTS AND CONSTANT INNOVATION AND IMPROVEMENT OF EXISTING ONES

One of the most awaited events on the local financial market in 2017 is the introduction of a derivatives market, which will operate in tandem with the capital market. As the market leader and a pioneer in engineering new products, SSI has dedicated a lot of efforts and resources to the building of systems, development of products and has collaborated with regulators in introducing derivative products to customers and investors.

SSI’s derivatives market project team, formed in late 2015, has been equipping themselves with relevant expertise both by self-study and training courses and study visits to the stock exchanges of selected regionals in South Korea, Taiwan, Thailand, Hong Kong, and Malaysia. These are well established derivatives markets where investor categorization is similar to that in Vietnam (i.e. the bulk of investors are individuals). Besides, in 2016, the Company spent considerable time and efforts seeking the qualified vendor for a derivatives infrastructure system and commenced the building thereof. The selected bidder, which has over 15 years of experience in the supply of derivatives systems, is also the leading supplier of trading systems in Hong Kong. It is capable of delivering a twofold objective: to operate the derivatives system in accordance with Vietnam’s regulatory framework and to spare room for SSI’s long-term vision in anticipation of the introduction of advanced derivative products. To date, SSI’s trading and margin management systems are almost totally compatible when connected to the HNX’s trading system and VSD’s clearing and settlement system. By actively equipping the staff with professional expertise, selecting an experienced system solution vendor and working closely with regulatory agencies in launching the market, SSI is now ready to offer investors derivative products in 2017.

In 2016, the Web Trading facility continued to be improved with many additional functionalities including online stock transfer, which was designed for easier trading and portfolio management, and online order confirmation, which allows customers' review and management of orders made on their account without having to physically sign written orders. In addition, the Direct Market Access (DMA) service, an ordering tool for institutional customers – was also successfully launched.

The investment advisory and recommendation product for retail customers constantly stayed abreast of market developments and combined basic with technical analysis to make tailored recommendations for different customer segments. In 2016, SSI launched 2 break-through products which were the monthly “Vietnam Chartbook” and the semi-annual strategy report “Stories of 2016”. Besides, reports in Japanese were also developed as a separate system with 3 types of report which aim to provide information and investment recommendations to Japanese customers. Investment advisory and recommendation products have traditionally been SSI's strengths for several years and have won trust from local and foreign customers. SSI is providing reports with insights into 29 industries and over 70 listed companies which make up for up to 90% of the total market capitalization.

FLEXIBLE AND DYNAMIC CUSTOMER CARE POLICY

With regards to the organization of its customer care personnel, SSI maintains a policy of constant separation of customer care teams in charge of existing customers versus prospective, institutional customers versus retail ones, local customers and foreign ones. For the purpose of optimized service quality, foreign retail customers are classified by language while foreign institutional ones are classified by location.

SSI's retail customers are whole-heartedly cared for by a team of energetic and professional brokers. The annual increase in the number of accounts is accompanied by the growth of brokers. By 2016, 353 full-time brokers were hired, up 30% against 2015. As the team grew, its quality was also strictly controlled so that information, knowledge and experience of communicating with and advising customers is properly updated and shared along with the growth and increasing maturity of the market.

With regards to **SSI's institutional customers**: customer service is enabled by three key factors: technology, people and responsive products and services. Intensive investments have been made in technology, especially the ordering system for institutional customers, in order to ensure stability during large-scale transactions and compliance with international standards on trading systems exclusively used for institutional customers.

For public funds (open-ended funds, ETFs) managed by SSIAM, customers are updated on NAV as well as with the relevant fund's performance report. For portfolio management services, the Company holds periodic meetings with customers to discuss investment performance and services supplied so as to make timely adjustments and better satisfy customers' demands. SSI frequently hold mini workshops to help investors better understand asset allocation and long-term investment strategies. These workshops provide customers with broader overview of the market as well as long-term orientations for enhanced investment profitability.

“Always listening” is the slogan to which each agent of SSI's Call Center, which operates the two hotline numbers 1900545471 and 1900545418, adheres. The operation of these two call centers demonstrate SSI's goodwill in offering the best of services to its customers. All transactions performed via the call centers are processed promptly, which helps save 80% of the time compared with conventionally processed ones.

RESPONSIBLE INVESTMENT ACTIVITIES

SSI believes that Environmental, Social and Corporate governance (ESG) factors, in addition to fundamental analysis and stock valuation, constitute one of the principles of investment choice. We notice a business’s growth in the long run and stock value are closely linked to its environmental and social impacts as well as corporate governance quality.

SSI applies the ESG standards of the International Finance Corporation (IFC) for its investments, aiming ultimately at sustainable development. Specifically, during our investment process, we spend a lot of time trying to understand a company’s top management and their vision, transparency and corporate governance aspects. Together with the assessment of environmental and social impacts of the company’s business activities, we also take into account other factors like working environment and determine whether it is one that works in the best interests of employees. ESG assessment represents a key factor in SSI’s decision-making process. There were cases where we had to reconsider investment decisions as it was impossible to work with the target company’s management on the ESG criteria.

After an investment decision has been made, SSI continues to work closely with the recipient company to pursue its responsibility of encouraging and advising on the improvement of the ESG factors. Members of SSI’s investment team serve in the Board of Directors (BOD) and Board of Supervisory of the investee company to assist them with corporate governance and to promote transparency in decision-making. SSI, in addition, also refers independent BOD members to the recipient company with a view to nurture transparency and reduce conflicts of interest therein.

Specifically, as an investor in agriculture, SSI plays an active role in creating a value chain where the origin of marketed products can be traced. By delivering products to the end-users, SSI minimizes farmers’ concern about market and pricing, thus creating a more sustainable product life-cycle. When working with a company that invested in crop species, by encouraging that company to work more closely with farmers in technology transfer and guaranteed purchase of products, SSI contributed to helping the farmers double their income.

In another case, SSI encouraged the investee company’s management to act with more transparency during its decision-making process. SSI advised the recipient company on the amendment of its charter in order to ward off the risk of a hostile takeover. Assistance was also provided to help the recipient company review its operating expenses and recruit senior executive personnel to run underperforming units, and so on.

Over the years, SSI’s investment strategy of companionship has helped recipient companies improve ESG factors to head for sustainable development. Besides, it has also enabled the Company to realize its goal of sustainable development in investment activities, which are responsible for major contributions to the total income. Specifically, in 2016, revenues from principal investment made up 40.4% of the consolidated earnings. As of late 2016, SSI had 3 associated companies, all of which are leaders in their respective industries and have high revenues, stable profitability, high dividend rate and competitive products. All these 3 affiliated companies are involved in the Agriculture - Food Transport and Warehousing value chains.

Brief profile of SSI’s Associated Companies

Name	% stake held by SSI (*)	Number of BOD/BOS members representing SSI	Business performance in 2016
The PAN Group Jsc. (PAN – HOSE)	20.10%	2 BOD members 1 BOS member	Despite PAN’s key subsidiaries being adversely affected by climate change, the PAN Group in 2016 managed to maintain stable business and growth. Revenues, which stood at VND 2,752 billion, were equivalent to 83% of the target and up 103% against 2015 profit after tax
Vietnam Fumigation JSC. (VFG - HOSE)	20.01%	1 BOD member 1 BOS member	In spite of difficult conditions in the plant protection agent market due to harsh weather and falling demands compared with 2015, VFG continued to benefit from previous efforts in restructuring, corporate governance improvement and sales network re-engineering. Revenues, which stood at VND 2,283 billion, were equivalent to 98% of the target and up 13% against 2015. Profit after tax reached VND 146 billion, equal to 100% of the target and up 5% against 2015.
Dong Nai Port Jsc. (PDN - HOSE)	20.01%	1 BOD member 1 BOS member	Revenues totaled VND 422 billion, equivalent to 120% of the target and up 131% against 2015. Profit after tax was VND 66 billion, equivalent to 132% of the target and up 29% against 2015.

TEAM COHESION FOR SUSTAINABILITY

SSI believes motivating staffs can help to enhance customer satisfaction, thereby increasing added values for shareholders and partners. SSI has applied various approaches to ensure every member can stay happy at work and maintain a work life balance. By valuing this balance, SSI has, in effect, made families and friends of SSI staffs proudly become a part of SSI. This has improved connection between each staff and the team, creating a strong bond for SSI’s sustainable development.

Corporate culture is especially highlighted by SSI in our development on the basis of established core values. Such culture is indicative of SSI’s features, philosophies and also incorporated in the company’s strategies to date. It has shaped the spirit of SSI and each employee, which has continuously been nurtured, engaging all staff in the common development. With the SSI spirit being constantly nurtured, each member will increasingly strengthen their bond with the Company for the sake of a common development.

As at 31/12/2016, the total number of SSI staffs is 720, of whom those holding undergraduate and postgraduate degrees account for a dominant majority (96%). SSI possesses a young and well-trained labor force who continuously improve themselves through practical experience. SSI staffs always update knowledge to stay current with industrial trends and create added values for customers.

RECRUITMENT APPROACH

In SSI, we aim to become a “cradle for talent development”. SSI offers equal opportunities to all applicants, from new graduates to experienced professionals in the financial market. SSI is willing to provide training and opportunities to encourage employees to take up challenge and fulfill their potentials. In 2016, SSI recruited 206 new members to strengthen human resource and replace retiring and resigning staff with a reasonable diversity of age and gender.

Employee new hire

Our approach is simply to offer a working environment where every individual can fulfill their potential. To maintain our status as Vietnam’s leading financial institution with enormous potential to expand regionally in Asia, SSI focuses on attracting outstanding individuals with international qualifications and skills to develop with.

SSI has also developed recruitment criteria to ensure transparency, fairness and equal opportunity for all applicants and fortify confidence and pride of becoming a part of SSI. At SSI, we:

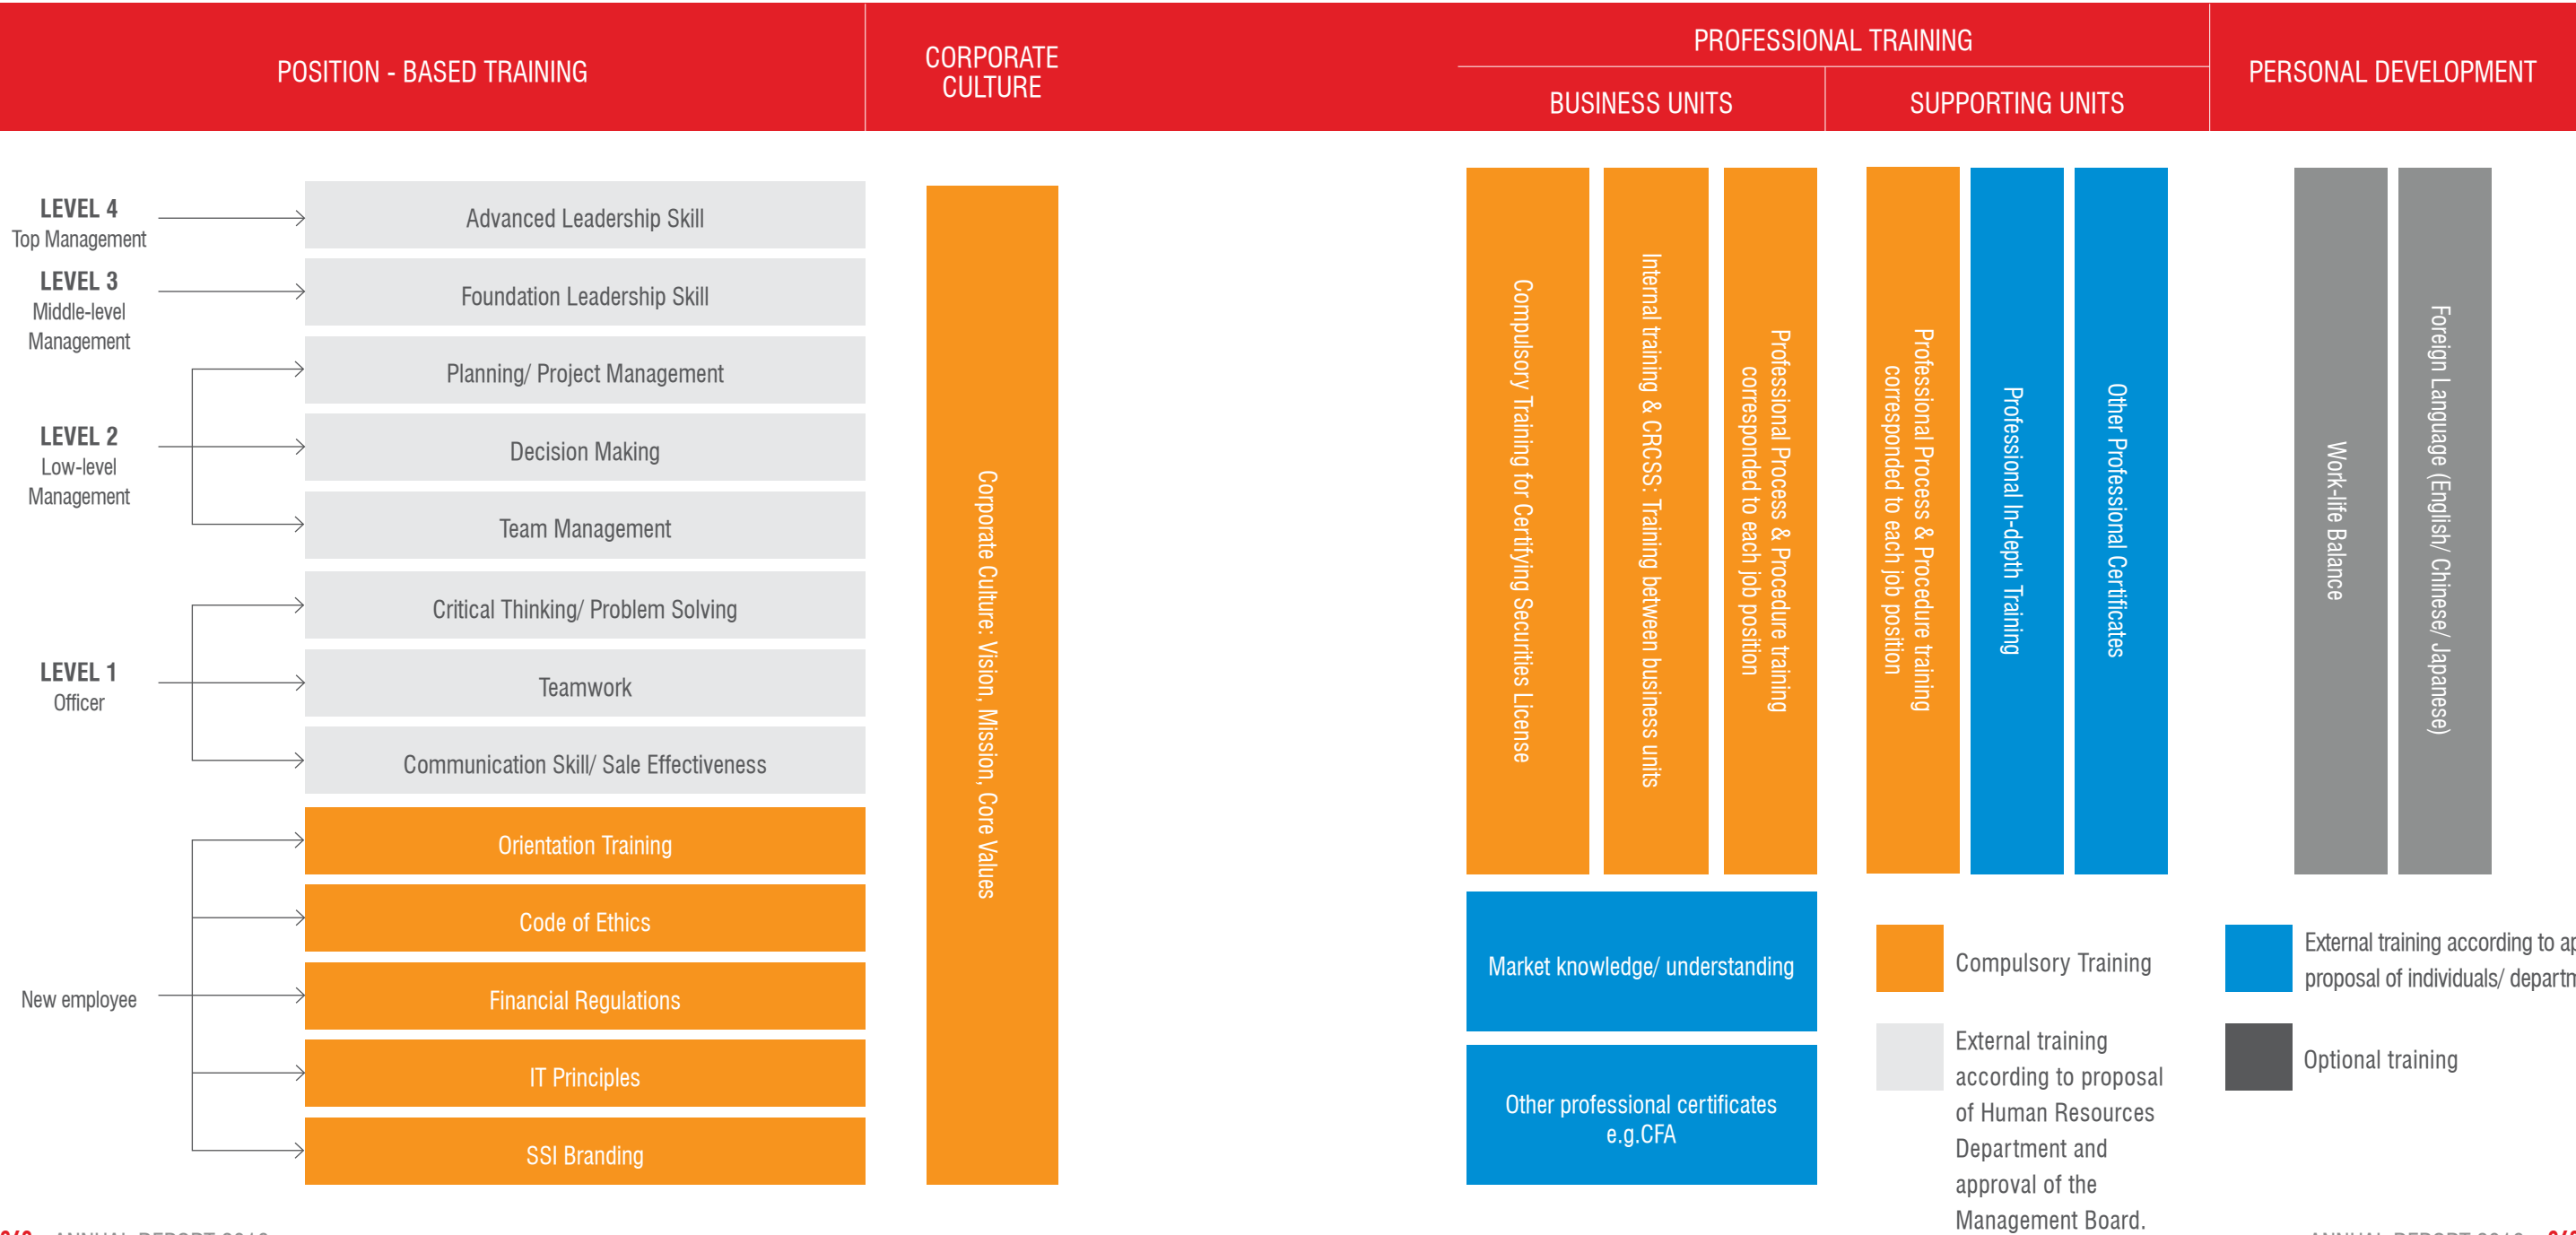

- Fully respect rights of applicants (in terms of access to information, job description, communication and negotiation)
- Select applicants who fully meet recruitment criteria
- All recruitment decisions are based on thorough, unbiased and transparent assessment of the applicants’ competence, attitude and motivation.

DEVELOP HUMAN RESOURCES' PROFESSIONAL COMPETENCE AND SKILLS

Human resources are the competitive advantage of SSI. To retain the status of Vietnam's leading financial institution and aim at growing internationally, SSI focuses on developing high quality human resources to satisfy increasingly demanding markets.

SSI offers training to newly hired employees since SSI understands that starting the journey with the Company requires thorough orientation and guidance to prepare new members with needed competence and understanding of the Company. These training programs are customized to target different groups, not only to equip employees with required competence and skills but also inspire and motivate them for better performance. SSI also support employees to obtain professional licenses required by the State Securities Commission (SSC) like CFA, ACCA.

We believe every employee needs to fully understand the company's code of conduct and regulations, which is critical to the sustainable development of SSI in particular and the stock market in general. Therefore, training programs and workshops on code of conduct and updated legal framework are organized regularly and actively joined by all employees.

In 2016, external and internal training was provided to enhance professional competence and skills for SSI's stock brokers. More training programs on soft skills targeting at different groups, such as courses on Leadership, Presentation or Selling skills also helped to inspire, motivate and empower SSI's employees at work. In addition, these training programs are opportunities for team building and practical experience for sake of better understanding among employees.

Besides conventional training methods, SSI also employs internal training models such as Gala 2016, year-end parties of departments, business luncheon and some other internal activities to facilitate information update, promoting corporate culture and bridge the management with the staff and among staff in the pursuit of common goals namely a more prosperous company, better working environment and personal and organizational development.

All these factors, ranging from professional competence, soft skills, code of conduct to corporate culture altogether shall be incorporated in staff's thinking and behavior. This also constitutes SSI's human resource brand, which is dynamic, competent, aspiring and compliant with standards. SSI values continuous human resource development and upholds our human resource brand towards greater professionalism.

REMUNERATION IS LINKED TO WORK PERFORMANCE ASSESSMENT SYSTEM; COMPREHENSIVE WELFARE POLICIES

These are important policies to create employee loyalty and coherence. With fair and competitive remuneration policies, SSI Management commits to ensure reasonable payment of salaries and bonuses in the best interest of staff and shareholders.

SSI focuses on developing the 3P remuneration model (Position, Person, Performance). This model fixes shortcomings of conventional payment methods such as overemphasizing qualifications and seniority and failing to separating work performance and contribution to corporate goals. With this new model, SSI can:

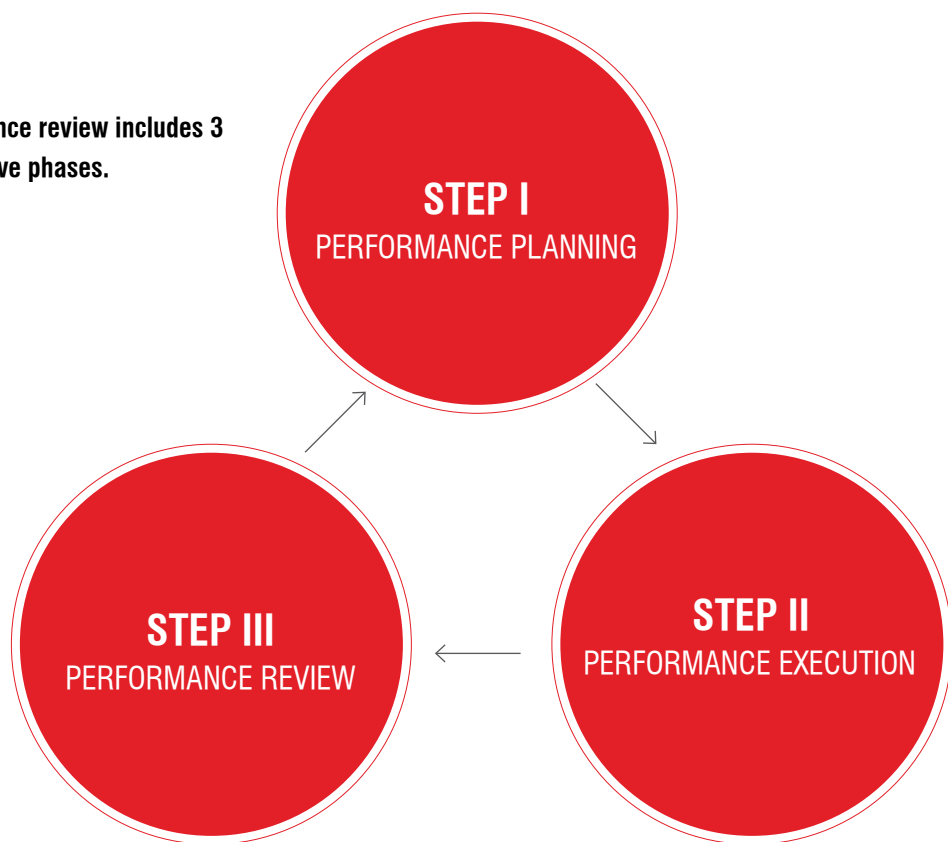

- Align financial rewards with employees' contribution and remain competitive in the market.
- Attract and retain talents with fair remuneration policies
- Encourage staff to perform more effectively by acknowledging their contribution properly and fairly

Work performance assessment is supported by the Performance Management System (PMS), ensuring transparency, convenience and information privacy. Based on assessment results, the company acknowledges individuals' values and contribution with proper and flexible remuneration policies.

Promotion and personal development opportunities are also based on observation and recognition of employees' work performance and progress. This helps them better visualize their career path with SSI

Performance review includes 3 consecutive phases.

Objectives of Performance review

REMUNERATION POLICIES

- Identify positions for promotion
- Identify benefit packages
- Motivate individuals with outstanding performance

ORGANIZATIONAL DEVELOPMENT

- Provide guidance to individuals with under-performance
- Identify objectives and implementation results
- Assess training needs of employees
- Improve employees’ work performance
- Improve the Company’s overall efficiency

In 2016, SSI has spent approximately VND 260 billion on salaries, insurance premiums, other benefits, performance-based bonuses following year-end performance review; of which performance bonuses accounted for a relatively large proportion

Total direct costs for human resources in 2016 (VND)	259,657,568,619
Salaries	125,779,387,024
Social insurance - Health insurance - Unemployment insurance	14,323,694,755
Other benefits	34,378,492,099
Performance bonuses - Sales commission	85,175,994,741

AIMING TOWARDS AN IDEAL WORKING ENVIRONMENT

SSI defines an ideal working environment as a workplace which facilitates innovation and endeavor while ensuring a work life balance. This is highly emphasized for high rank managers. SSI employees are encouraged to work efficiently, relax reasonably and participate in sports and social activities. These activities are intended to help employees obtain work-life balance and foster bond among the team. SSI has common interest clubs such as photography, yoga, football and performance which are eagerly joined by employees. For 3 consecutive years, SSI organized a Family Day for all families of our staffs to come together and network. This has become a popular event appreciated and looked forward to by SSI employees as well as their families. Such events have enhanced family bonds as well as the connection between staff’s families and the Company.

“Charity begins at home” – the spirit of mutual assistance and sharing that characterizes SSI is best demonstrated with both material and spiritual contributions in the event of any member’s critical illness. These contributions both relieve the financial burdens for those in need and provide additional energy for their fight against the misfortune. Even when we face the grief of losing a colleague, the entire SSI team maintains our support to the decease’s family to help them overcome the difficult time.

Through charity work dedicated to poor children and farmers in mountainous and disadvantaged areas, SSI continues to develop a connected team who is willing to share and contribute to the development of society. Social responsibility of each individual and of the entire organization is always upheld and encouraged by the Management.

In addition, SSI applies a humanitarian policy of flexible working time to support female employees with small children so that they can devote to the company.

ATTENTION TO EMPLOYEES' HEALTH CARE

The Company pays keen attention to the staff's health. Every year, the Company provides employees with additional health insurance packages with premium services. In addition, SSI supports employees to buy flexible health insurance packages for their families so they can have a sense of security and concentrate on work. SSI also organizes thematic workshops, to which leading medical professionals are invited, to raise employees' awareness on health protection and disease prevention. For example, SSI has held workshops on cancer, emergency first-aid, liver diseases and how to avoid, ways to choose healthy foods and diets for family, etc. Moreover, guest speakers are also willing to answer employees' questions or offer additional advisory on health related issues. Proactive and focused provision of health information helps employees protect their own and families' health.

Regular medical checkups are conducted by reliable and renowned health-care facilities to monitor employees' health and detect any problems for early intervention. Health-related information is tracked over years and used as input to design relevant additional health insurance schemes for employees.

Besides, employees are encouraged to participate in sports and exercise activities such as Yoga classes, Rumba club, annual football tournaments, and regional friendship football matches.

ENCOURAGE COMMUNICATION BETWEEN THE MANAGEMENT AND STAFFS

SSI believes a seamless communication mechanism will further strengthen the connection between the Management and Staffs. Business strategies, plans and objectives are openly shared within SSI through messages from the Chairman of the Board of Directors and the CEO to help employees understand and act towards such common goals. Individual or organizational achievements are honored internally to spread the pride among all SSI members, thereby encouraging further efforts.

SSI also attaches importance to regular communication between the Management and Staffs so that the whole company is heading together toward the same direction. Performance assessment results are also discussed openly between employees and their line managers in order to reach mutual understanding and a better picture objectives and level of achievement.

With the mission "We volunteer to implement CSR and join common efforts for community development", SSI's development over the past 17 years has been characterized by a harmony of interests among Shareholders, Customers, Society and the Community. SSI has proactively developed intellectual and physical education programs for young generations and joined the community in building a better society.

COMMUNITY DEVELOPMENT

With the mission “We strive to better the communities in which we work”, SSI has been maintaining a harmony in the interests of shareholders, customers, and the community. SSI has proactively developed intellectual and physical education programs for young generations and joined the community in building a better society.

INVESTMENTS IN EDUCATION

SCHOOL BUILDING PROJECTS

Since 2007, SSI has built 10 schools in the Northern region to assist with the development education therein. The school are all located in key areas to which students have better access.

On a yearly basis, SSI visits the schools and provides timely funds for expansion so that continued schooling can be provided for the country’s future generations.

In the case of Bac Ha Lower and Upper Secondary High Boarding School for Ethnic Minorities alone, after launching in 2010, the number of students at the school has increased and stabilized, thus making continued contributions to education development.

NDH SCHOLARSHIP FUND

Human resource quality is the key success factor of any nation. Well perceiving this orientation, SSI has consistently been supporting many projects for young generations across Vietnam. SSI has provided substantial support, not only to disadvantaged children in remote and hardship areas but also to young people seeking professional development in the financial market.

SSI defines a developed society as a society based on knowledge and kindness. The company and the NDH Scholarship Foundation continued to award scholarships to needy students with excellent academic performance picked within academic year 2015. 30 selected students from Foreign Trade University, Banking Academy, University of Science, Hanoi Medical University, Hanoi Law University and Academy of Finance continued to be granted scholarships to pursue their career orientations. They will contribute to the development of society with their knowledge and will, in their turn, support other needy people like themselves, thanks to which kindness will be spread to later generations.

TALENT DEVELOPMENT AND ENGAGEMENT

In 2016, SSI supported many programs hosted by students studying in the US to help them develop into outstanding human resources for Vietnam in the future. In addition to the funding of community engagement exchanges and activities held by Vietnamese students in the US, SSI also provided funds and sent its senior managers to panel discussions on career orientation in order to equip the youngsters with the right perception of career choices.

Keeping up with the trendy start-up movement, SSI undertook a role of judge at business ideas contest where it can contribute certain business experiences.

EDUCATION SUPPORT FOR DISADVANTAGED AREAS

- SSI has joined a charity project called “Cặp lá yêu thương” (Two leaves of love) initiated by VTV24 and supported by the Ministry of Labor, Invalids and Social Affairs, the Vietnam Bank for Social Policy for 34 disadvantaged children in Cao Bang province. These children will be supported with tuition fees and living allowance until they reach the age of maturity and in their turn, contribute to the society.
- A sponsorship program for the Education Fund of Thuy Dan Commune Elementary School.

HUNGER ERADICATION, POVERTY REDUCTION AND HANDLING OF CHALLENGES

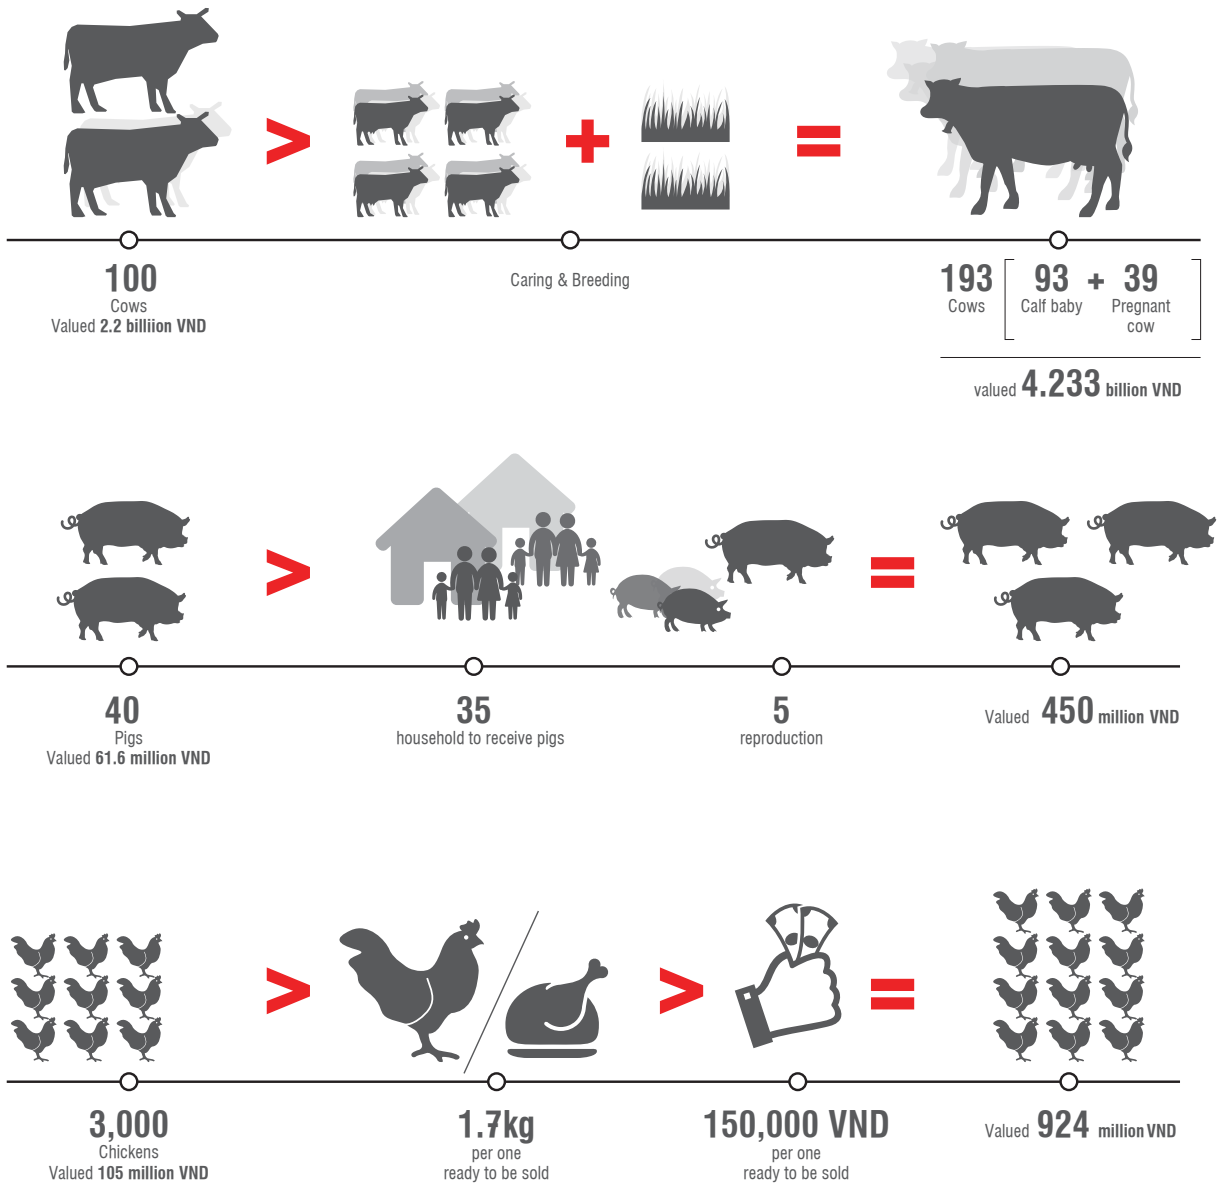

SSI has long been contributing long-term and sustainable support to Vietnam’s implementation of the United Nations’ Millennium Development Goals (MDG) and poverty reduction strategy. SSI provided material and intangible support to people living in disadvantaged areas nationwide, contributing to hunger eradication, poverty reduction and sustainable development.

SSI had provided 100 breeds of cattle, 400 breeds of pig, 3,000 breeds of chicken to farmers of Vinh Thach commune, Vinh Linh district, Quang Tri province, helping them with a high value livelihood.

Besides support for livestock farming, SSI also helped to build a communal medical station to provide medical care to the community. Launched and handed over in 2015 with modern facilities, the station offered medical services to over 5,000 patients every year. of which: Elderly people: 358, disabled people: 55, students 496 An average 80 patients are treated every year and 230 others are transferred to upper-level hospitals. The station also properly carried out the Micronutrient Day, vaccination campaigns and medical examination & treatment for women commune-wide under project 52. Besides, advocacy activities for family planning, junior healthcare, newborn screening, prenatal screening, and so on were also implemented.

Thanks to such support, living conditions of Vinh Thach people have been significantly improved, contributing to the achievement of social welfare objectives put forward in the National Target Program on New Rural Development.

SSI performs our community responsibility through charity activities for people living in remote, mountainous, border, island and socially-economically disadvantaged areas or areas exposed to natural disasters to lift them out of extreme hardship and, at the same time, implement major strategies of the government such as new rural development, border and island protection to preserve sovereignty and community development.

The auditors of the Company are Ernst & Young Vietnam Limited.

REPORT OF MANAGEMENT

Management of Saigon Securities Incorporation (“the Company”) is pleased to present its report and the Company’s consolidated financial statements as at and for the year ended 31 December 2016.

MANAGEMENT’S RESPONSIBILITY IN RESPECT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Management is responsible for the consolidated financial statements of each financial year that give a true and fair view of the consolidated state of affairs of the Company and of the consolidated results of its operations, its consolidated cash flows and consolidated changes in owners’ equity for the year. In preparing those consolidated financial statements, Management is required to:

- select suitable accounting policies and apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the consolidated financial statements; and
- prepare the consolidated financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

Management is responsible for ensuring that proper accounting records are kept to disclose, with reasonable accuracy at any time, the financial position of the Company and to ensure that the accounting records comply with the applied accounting system. It is also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of frauds and other irregularities.

Management confirmed that it has complied with the above requirements in preparing the accompanying consolidated financial statements.

STATEMENT BY MANAGEMENT

Management does hereby state that, in its opinion, the accompanying consolidated financial statements give a true and fair view of the consolidated financial position of the Company as at 31 December 2016 and of the consolidated results of its operations, its consolidated cash flows and its consolidated changes in owners’ equity for the year then ended in accordance with Vietnamese Accounting Standards, Vietnamese Enterprise Accounting System, accounting guidance applicable to securities companies and statutory requirements relevant to preparation and presentation of consolidated financial statements.

For and on behalf of Management

Mr. Nguyen Duy Hung
Chief Executive Officer

Ho Chi Minh City, Vietnam
27 March 2017

INDEPENDENT AUDITORS’ REPORT

*To: The shareholders of
Saigon Securities Incorporation*

We have audited the consolidated financial statements of Saigon Securities Incorporation (the “Company”) and its subsidiaries, as prepared on 27 March 2017 and set out on pages 6 to 88 which comprise the consolidated statement of financial position as at 31 December 2016, the consolidated income statement, the consolidated cash flow statement and the consolidated statement of changes in owners’ equity for the year then ended and the notes thereto.

MANAGEMENT’S RESPONSIBILITY

The Company’s Board of Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Vietnamese Accounting Standards, Vietnamese Enterprise Accounting System, accounting guidance applicable to securities companies and statutory requirements relevant to preparation and presentation of the consolidated financial statements, and for such internal control as the Management determines is necessary to enable the preparation and presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

AUDITORS’ RESPONSIBILITY

Our responsibility is to express an opinion on the consolidated financial statements based on our audit. We conducted our audit in accordance with Vietnamese Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors’ judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity’s preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

AUDITORS’ OPINION

In our opinion, the consolidated financial statements give a true and fair view, in all material respects, of the consolidated financial position of the Company as at 31 December 2016, the consolidated results of its operations, its consolidated changes in cash flows and owners’ equity for the year then ended in accordance with Vietnamese Accounting Standards, Vietnamese Enterprise Accounting System, accounting guidance applicable to securities companies and statutory requirements relevant to preparation and presentation of consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

B05-CTCK/HN

AS AT 31 DECEMBER 2016 AND FOR THE YEAR THEN ENDED

1. CORPORATE INFORMATION

Saigon Securities Incorporation (“the Company”) is a joint stock company established under the Corporate Law of Vietnam, Operating License No. 3041/GP-UB dated 27 December 1999 issued by Ho Chi Minh City People’s Committee and the first Business Registration No. 056679 dated 30 December 1999 issued by Ho Chi Minh City Department of Planning and Investment. The Company operates under Securities Trading License No. 03/GPHDKD issued by the State Securities Commission on 5 April 2000 and subsequent amended licenses.

The Company’s initial charter capital was VND 6,000,000,000. The charter capital has been supplemented from time to time in accordance with amended licenses. As at 31 December 2016, in accordance with the latest Amended License No. 02/GPDC-UBCK granted by the Chairman of State Securities Commission, which has been effective since 12 January 2017, the Company’s total charter capital was VND 4,900,636,840,000.

The Company’s primary activities are to provide brokerage service, securities trading, underwriting for securities issues, custodian service, finance and investment advisory service and margin lending services. The Company’s Head Office is located at 72 Nguyen Hue Boulevard, District 1, Ho Chi Minh City, Vietnam. As at 31 December 2016, the Company has branches located in Ho Chi Minh City, Hanoi, Hai Phong, Vung Tau and Nha Trang, and transaction offices located in Ho Chi Minh City and Hanoi.

The number of the Company’s employees as at 31 December 2016 was 720 persons (31 December 2015: 616 persons).

COMPANY’S OPERATION

Capital

As at 31 December 2016, total charter capital of the Company is VND 4,900,636,840,000, owners’ equity including non-controlling interests is VND 7,152,567,156,682, total assets is VND 13,227,969,251,704.

Investment objectives

As the biggest listed securities company in Vietnam stock market, the Company’s principal activities are to provide brokerage service, securities trading, finance and investment advisory service, custodian service and underwriting for securities issues. The Company’s goals are to become a partner with clients, to focus all resource and initiatives to bring success to all stakeholders.

Investment restrictions

The Company is required to comply with Article 44 under Circular No. 210/2012/TT-BTC dated 30 November 2012 providing guidance on establishment and operation of securities companies, Circular No. 07/2016/TT-BTC dated 18 January 2016 amended some articles of Circular No. 210/2012/TT-BTC and other applicable regulations on investment restrictions. The current applicable practices on investment restrictions are as follows:

- Securities company is not allowed to purchase, contribute capital to invest in real-estate assets except for the purpose of use for head office, branches, and transaction offices directly serving professional business activities of the securities company.
- Securities company may invest in real-estate investment and fixed assets on the principle that the carrying value of the fixed assets and real-estate investment should not exceed fifty percent (50%) of the total value of assets of the securities company.
- Securities company is not allowed to use more than seventy percent (70%) of its owners’ equity to invest in corporate bonds. Securities company, licensed to engage in self-trading activity, is allowed to trade listed bonds in accordance with relevant regulation on trading Government bonds.
- Securities company must not by itself, or authorize another organization or individuals to: Invest in shares or contribute capital to companies that owned more than fifty percent (50%) of the charter capital of the securities company, except for purchasing of odd lots at the request of customers; Make joint investment with an affiliated person of five percent (5%) or more in the charter capital of another securities company; Invest more than twenty percent (20%) in the total currently circulating shares or fund certificates of a listing organization; Invest more than fifteen percent (15%) in the total currently circulating shares or fund certificates of an unlisted organization, this provision shall not apply to member fund certificates; Invest or contribute capital of more than ten percent (10%) in the total paid-up capital of a limited liability company or of a business project; Invest more than fifteen percent (15%) of its owners’ equity in a single organization or of a business project; Invest more than seventy percent (70%) of its total equity in shares, capital contribution and a business project, specifically invest more than twenty percent (20%) of its total owners’ equity in unlisted shares, capital contribution and a business project.
- Securities company is allowed to establish or purchase an asset management company as a subsidiary. In that case, securities company is not required to follow the above restrictions.

SUBSIDIARIES

As at 31 December 2016, the Company had two (02) directly owned subsidiaries as follows:

Company name	Established under	Business sector	Charter capital	% holding
SSI Asset Management Company Ltd. (SIAM)	Operating License No.19/UBCK-GP dated 03 August 2007	Investment fund management and investment portfolio management	VND30 billion	100%
SSI Investment Member Fund (SSI IMF)	Approval Letter of Member Fund Foundation No.130/TB-UBCK dated 27 July 2010	Investments in securities and other investible assets, including real estates	VND390 billion	80%

In addition, as at 31 December 2016, the Company had one (01) indirectly owned subsidiary named SSI International Corporation.

ASSOCIATES

As at 31 December 2016, the Company had three (03) indirectly owned associates presented on the consolidated financial statements as follows:

Name	Business establishment	Sector	Charter capital (VND)
The Pan Group (PAN)	Business Registration No. 0301472704 dated 23 March 2016 issued by Ho Chi Minh City Department of Planning and Investment (13th amended license). At the initial stage, the company operated under Business Registration No. 4103003790 dated 31 August 2005. The company's shares have been officially listed on Ho Chi Minh City Stock Exchange.	Cultivation, farming; Livestock services; Post-harvest services; Cultivation services activities; House cleaning services; Investment advisory services (except for financial advisory); Management advisory services (except for finance, economics and law); Market research services.	1,023,724,970,000
Vietnam Fumigation Joint Stock Company (VFG)	Vietnam Fumigation Joint Stock Company is transformed from a State - owned enterprise, so called Vietnam Fumigation Company under Ministry of Agriculture and Rural Development, in accordance with Decision No. 70/QĐ-TTĐ dated 3 May 2001 issued by Prime Minister of the Socialist Republic of Vietnam. The company operates under the first Business Registration No. 0302327629 dated 31 December 2001 issued by Ho Chi Minh City Department of Planning and Investment and the 23th amended license dated 11 September 2015. The company's shares have been officially listed on Ho Chi Minh City Stock Exchange.	Production, processing, carton boxes, packaging; plant protection products and fumigating materials; Rendering of fumigating services, eradication of harmful animals for agricultural and forestry products, and other materials; Trading of pesticide, plant protection materials, fumigation materials; Trading of materials and chemicals for agricultural production (except for toxic substances); Fertilizer wholesale; Handling, maintenance, sanitation in factories, warehouses, offices services; Anti – termite service; Anti-termite service for construction works; Renting office, warehouse; Goods inspection; Caring service for agricultural products; Wholesale corn and other grains.	182,854,360,000

Name	Business establishment	Sector	Charter capital (VND)
Dong Nai Port Joint Stock Company	The company was initially a State-owned enterprise, so called Dong Nai Port Company under Dong Nai Department of Transport, privatised under Decision No. 3004 dated 24 August 2015 issued by People's Committee of Dong Nai Province. The company operates under the first Business Registration No. 4703000301 dated 4 January 2006 and subsequent amended Business Registration No. 3600334112 dated 27 December 2009, 27 December 2010 and 19 March 2016 issued by Dong Nai Department of Planning and Investment. The company's shares have been officially listed on Ho Chi Minh City Stock Exchange.	Warehouses and wharf services; Loading and unloading, transportation of goods in and out of the port; Loading and unloading equipment and vehicles repairs services; Agents and maritime services; Fuel supply services; Building materials trading; Entertainment services for ship's crews; Infrastructure and real estate investment and business.	123,479,870,000

2. BASIS OF PRESENTATION

2.1 APPLIED ACCOUNTING STANDARDS AND SYSTEM

The consolidated financial statements of the Company are prepared and presented in accordance with Vietnamese Enterprise Accounting System, the accounting regulation and guidance applicable to securities companies as set out in Circular No. 210/2014/TT-BTC dated 30 December 2014, Circular No. 334/2016/TT-BTC dated 27 December 2016 amending, supplementing and replacing Appendices No. 02 and No. 04 of Circular No. 210/2014/TT-BTC, Circular No. 146/2014/TT-BTC dated 6 October 2014 providing guidance on financial regime applicable to securities companies and asset management companies and other Vietnamese Accounting Standards promulgated by the Ministry of Finance as per:

- Decision No. 149/2001/QĐ-BTC dated 31 December 2001 on the Issuance and Promulgation of Four Vietnamese Standards on Accounting (Series 1);
- Decision No. 165/2002/QĐ-BTC dated 31 December 2002 on the Issuance and Promulgation of Six Vietnamese Standards on Accounting (Series 2);

- Decision No. 234/2003/QĐ-BTC dated 30 December 2003 on the Issuance and Promulgation of Six Vietnamese Standards on Accounting (Series 3);
- Decision No. 12/2005/QĐ-BTC dated 15 February 2005 on the Issuance and Promulgation of Six Vietnamese Standards on Accounting (Series 4); and
- Decision No. 100/2005/QĐ-BTC dated 28 December 2005 on the Issuance and Promulgation of Four Vietnamese Standards on Accounting (Series 5).

2.2 BASIS OF CONSOLIDATION

The consolidated financial statements comprise the financial statements of Saigon Securities Incorporation (the parent company) and its subsidiaries as at 31 December 2016.

Subsidiaries are fully consolidated from the date of acquisition, being the date on which the parent company obtains control, and continued to be consolidated until the date that such control ceases.

The financial statements of the parent company and subsidiaries are prepared for the same reporting period using the consistent accounting policies.

All intra-company balances, incomes and expenses, and unrealized gains or losses resulting from intra-company transactions are eliminated in full.

Non-controlling interests represent the portion of profit or loss and net assets of the subsidiaries which are not held by the Company, and are presented separately in the consolidated income statement and within equity in the consolidated statement of financial position, separately from parent shareholders' equity.

2.3 REGISTERED ACCOUNTING DOCUMENTATION SYSTEM

The Company's registered accounting documentation system is the General Journal Voucher system.

2.4 FISCAL YEAR

The Company's fiscal year starts on 1 January and ends on 31 December.

The Company also prepares its interim financial statements for the six-month period from 1 January to 30 June and its quarterly financial statements for the three-month periods ended 31 March, 30 June, 30 September and 31 December each year.

2.5 ACCOUNTING CURRENCY

The consolidated financial statements are prepared in Vietnam dong ("VND"), which is the accounting currency of the Company.

3. STATEMENT ON COMPLIANCE WITH VIETNAMESE ACCOUNTING STANDARDS AND SYSTEMS

Management confirms that the Company has complied with Vietnamese Accounting Standards and Vietnamese Enterprise Accounting Systems in preparing the consolidated financial statements.

Accordingly, the accompanying consolidated income statement, consolidated statement of financial position, consolidated statement of cash flows, consolidated statement of changes in owners' equity and notes to the consolidated financial statements, including their utilisation are not designed for those who are not informed about Vietnam's accounting principles, procedures and practices and furthermore are not intended to present the financial position and results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

4.1 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

On 30 December 2014, the Ministry of Finance issued Circular No. 210/2014/TT-BTC providing guidance on accounting policies applicable to securities companies ("Circular 210"). This Circular replaces Circular No. 95/2008/TT-BTC dated 24 October 2008 of the Ministry of Finance providing guidance on accounting policies applicable to securities companies and Circular No. 162/2010/TT-BTC dated 20 October 2010 amending and supplementing Circular No. 95/2008/TT-BTC. Circular 210 is applicable to fiscal years beginning on or after 1 January 2016. Circular 210 prescribes contents concerning accounting vouchers, system of accounting accounts as well as method of preparing and presenting the financial statements of securities companies.

On 27 December 2016, the Ministry of Finance issued Circular No. 334/2016/TT-BTC amending, supplementing and replacing Appendices No. 02 and No. 04 of Circular No. 210/2014/TT-BTC dated 30 December 2014 ("Circular 334").

Circular 210 and Circular 334 lead to the following significant changes:

- Changes in name and content of the financial statements: balance sheet is renamed as statement of financial position, statement of cash flows from brokerage and trust activities of investors is separately presented as a part of the basic financial statements.
- Financial assets are categorised into four (4) groups: financial assets at fair value through profit and loss, available-for-sale financial assets, held-to-maturity investments and loans.
- Assets and liabilities of securities companies and investors (including deposits, securities investment and payable accounts) are separately managed.

In addition, Circular 210 and Circular 334 provide guidance on measurement of financial assets, particularly, all financial assets are initially recognized at cost and are subsequently recognized as follow:

- Financial assets at fair value through profit and loss (FVTPL): are recognized at cost. In case they are recognized at fair value, such recognition must comply with current Accounting Law. Gains or losses arisen from the revaluation of these assets are recognized in the income statement.

- Available-for-sale (AFS) financial assets: are recognized at fair value. Any gain or loss arisen from revaluation of AFS financial assets is recognized directly in owners' equity (Other comprehensive income), except for provision for impairment in value of AFS financial assets.

As the fair value basis has not been allowed to be applied under the current Accounting Law, AFS financial assets are subsequently recognised at cost.

- Held-to-maturity (HTM) financial assets: are recognized at amortised cost based on effective interest rate method.
- Loans: are recognized at amortised cost based on effective interest method.

Circular 210 and Circular 334 are applied for fiscal years beginning on or after 1 January 2016.

The Company has restated the comparative figures of previous year in accordance with requirements of Circular 210 and Circular 334 as presented in Note 44.7 to the consolidated financial statements.

4.2 STANDARDS AND REGULATIONS ISSUED BUT NOT YET TAKEN EFFECT

On 20 November 2015, the National Assembly of Vietnam passed the Law on Accounting No. 88/2015/QH13 ("the new Accounting Law"). The new Accounting Law extends its governing scope to electronic accounting documents and allows the application of fair value basis for some types of assets and liabilities whose value frequently varies in line with market fluctuation, provided that the fair value of these assets and liabilities can be reliably determined. The new Accounting Law takes effect from 1 January 2017.

4.3 CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise cash on hand, cash at banks and short-term, highly liquid investments with an original maturity of three months or less that are readily convertible into known amounts of cash and that are subject to an insignificant risk of change in value.

Cash deposited by customers for securities trading and cash deposited by securities issuers are presented off-balance sheet.

4.4 FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT AND LOSS (FVTPL)

Financial assets recognized at fair value through profit and loss are financial assets that satisfy either of the following conditions:

- It is classified as held for trading. A financial asset is classified as held for trading if:

- it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term;
- there is evidence of a recent actual pattern of short-term profit-taking; or
- it is a derivative (except derivative that is a financial guarantee contract or effective hedging instrument).

b) Upon initial recognition, a financial asset is designated by the entity as at fair value through profit and loss as it meets one of the following criteria:

- The designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the asset or recognising gains or losses on a different basis; or
- The assets and liabilities are part of a group of financial assets which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management or investment strategy.

Financial assets at FVTPL are initially recognized at cost (acquisition cost of the assets excluding transaction cost arising from the purchase) and subsequently recognized at cost less reduction in value arising from revaluation of the assets. Increase in value of the assets is not recognised into the financial statements as the prevailing Law on Accounting has not allowed the use of fair value basis. The reduction in value arising from revaluation is calculated as the difference between the cost of a financial asset at FVTPL and its market value determined in accordance with the guidance under Circular No. 146/2014/TT-BTC.

Increase in the negative difference arising from revaluation of financial assets at FVTPL is recognized into the consolidated income statement under "Loss from revaluation of financial assets at FVTPL". Decrease in the negative difference arising from revaluation is recognized into the consolidated income statement under "Gain from revaluation of financial assets at FVTPL".

Transaction costs relating to the purchase of the financial assets at FVTPL are recognized when incurred as expenses in the consolidated income statement.

4.5 HELD-TO-MATURITY INVESTMENTS (HTM)

Held-to-maturity investments are non-derivative financial assets with determinable payments and fixed maturity that an entity has the positive intention and ability to hold to maturity other than:

- those that the entity upon initial recognition designates as at fair value through profit or loss;
- those that the entity designates as available-for-sale; and
- those meet the definition of loans and receivables.

Held-to-maturity investments are initially recognized at cost (acquisition cost of the assets plus (+) transaction costs which are directly attributable to the investments such as brokerage fee, trading fee, issuance agency fee and banking transaction fee). After initial recognition, held-to-maturity financial investments are subsequently measured at amortized cost using the effective interest rate ("EIR").

Amortized cost of HTM financial investments is the amount at which the financial asset is measured at initial recognition minus (-) principal repayments, plus (+) or minus (-) the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction for impairment or irrecoverability (if any).

The effective interest rate method is a method of calculating the cost allocation on interest income or interest expense in the period of a financial assets or a group of HTM investments.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial assets or liabilities.

HTM investments are subject to an assessment of impairment at the consolidated financial statements date. Provision is made for an HTM investment when there is any objective evidence that the investment is unrecoverable or there is uncertainty of recoverability, resulting from one or more events that has occurred after the initial recognition of the investment and that event has an impact on the estimated future cash flows of the investment that can be reliably estimated. Evidence of impairment may include a drop in the fair value/market value of the investment, indications that the debtors or a group of debtors are experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults. When there is any evidence of impairment, provision for an HTM investment is determined as the negative difference between its fair value and amortized cost at the assessment date. Any increase/decrease in the balance of provision is recognized in the income statement under “Provision expense for diminution in value and impairment of financial assets and doubtful receivables, and borrowing costs of loans”.

4.6 LOANS

Loans are non-derivative financial assets with fixed or identifiable payments and not listed on the market, with the exceptions of:

- a) The amounts the entity has the intent to immediately sell or will sell in a near future which are classified as assets held for trading, and like those which, upon initial recognition, the entity categorized as such recognized at fair, value through profit or loss statements;
- b) The amounts categorized by the entity as available-for-sale upon initial recognition; or
- c) The amounts whose holders cannot recover most of the initial investment value not due to credit quality impairment and which are categorized as available-for-sale.

Loans are recognized initially at cost (disbursement amount of the loans). After initial recognition, loans are subsequently measured at amortized cost using the effective interest rate (“EIR”).

Amortized cost of loans is the amount at which the loans is measured at initial recognition minus (-) principal repayments, plus (+) or minus (-) the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction for impairment or irrecoverability (if any).

Loans are subject to an assessment of impairment at the consolidated financial statements date. Provision is made for loan based on its estimated loss which is determined by the negative difference between the market value of securities used as collaterals for such loan and the loan balance. Any increase/decrease in the balance of provision is recognized in the income statement under “Provision expense for diminution in value and impairment of financial assets and doubtful receivables, and borrowing costs of loans”.

4.7 AVAILABLE-FOR-SALE (AFS)

Available-for-sale financial assets are those non-derivative financial assets that are designated as available-for-sale or are not classified as:

- a) loans and receivables;
- b) held-to-maturity investments; or
- c) financial assets at fair value through profit or loss.

AFS financial assets are recognized initially at cost (acquisition cost plus (+) transaction costs which are directly attributable to the purchase of the financial assets). After initial recognition, available-for-sale financial assets are subsequently measured at cost less reduction in value arising from revaluation, as the prevailing Law on Accounting does not allow the use of fair value basis. Accordingly, the reduction in value due to revaluation is calculated by the difference between fair value and cost of the assets at the assessment date.

Any increase or decrease in the negative difference arising from the revaluation of AFS financial assets in comparison with previous is recognized under “Gain/(loss) from revaluation of AFS financial assets” in “Other comprehensive income after tax” which is a part of the consolidated income statement.

As at the consolidated financial statement date, the Company assessed whether there is any objective evidence that an AFS financial asset is impaired. Any increase/decrease in the balance of provision is recognized in the income statement under “Provision expenses for diminution in value and impairment of financial assets and doubtful debts and borrowing costs of loans”.

- Where an equity instrument is classified as available-for-sale, evidence of impairment include a significant or prolonged decline in the fair value of the investment below its original cost. ‘Significant’ is to be evaluated against the original cost of the asset and ‘prolonged’ indicates the period in which the fair value has been below its original cost. When any evidence of impairment exists, provision is determined as the difference between the AFS asset’s cost and fair value at the assessment date.

- Where a debt instrument is classified as available-for-sale, the assessment of impairment is conducted using the same criteria as those applied for HTM investments. When there is any evidence of impairment, provision for an AFS asset is determined as the negative difference between its fair value and amortized cost at the assessment date.

4.8 FAIR VALUE/MARKET VALUE OF FINANCIAL ASSETS

Fair value/market value of the securities is determined in accordance with Circular No. 146/2014/TT-BTC as follows:

- For securities listed on Hanoi Stock Exchange and Ho Chi Minh City Stock Exchange, their market prices are their closing prices on the trading day preceding the date of setting up the provision.
- For securities registered for trading on UPCOM, their market prices are their average closing prices on the trading day preceding the date of setting up the provision.
- For the delisted securities and suspended trading securities from the sixth day afterward, their prices are the book value at the latest financial report date.
- The market price for unlisted securities and securities unregistered for trading used as a basis for setting up the provision is the average of actual trading prices quoted by 3 securities companies conducting transactions at the latest date preceding the revaluation date.

For provision making purpose, fair value is the market price of the securities at the latest trading date which must be within one month to the date of provision making.

For securities which do not have reference price from the above sources, the impairment is determined based on the financial performance and the book value of securities issuers as at the assessment date.

4.9 DERECOGNITION OF FINANCIAL ASSETS

A financial asset (or part of a group of similar financial assets) is derecognized when:

- The rights to receive cash flows from the assets have expired; or
- The Company has transferred its rights to receive cash flows from the assets or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a “pass-through” arrangement; and either:
 - the Company has transferred substantially all the risks and rewards of the assets, or
 - the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Company’s continuing involvement in the asset. In that case, the Company also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

The continued participation in transferred assets in the form of guarantee will be recognized at smaller value between the initial carrying value of the assets and the maximum amount that the Company is required to pay.

4.10 RECLASSIFICATION OF FINANCIAL ASSETS

Reclassification when selling financial assets other than FVTPL

When selling financial assets other than FVTPL, securities companies are required to reclassify those financial assets to financial assets at FVTPL. The difference arising from the revaluation of financial assets AFS which was recognized in “Gain/(loss) from revaluation of AFS financial assets” will be recognized as corresponding revenue or expenses at the date of reclassification of financial assets AFS.

Reclassification due to change in purpose or ability to hold

Securities companies are allowed to reclassify financial assets to their applicable categories if their purpose or ability to hold have changed, consequently:

- Non-derivative financial assets at FVTPL or financial assets that are not required to be classified as financial asset at FVTPL at the initial recognition can be classified as loans and other receivables or as cash and cash equivalents if the requirements are met. The gains or losses arising from revaluation of financial assets at FVTPL prior to the reclassification are not allowed to be reversed.
- Due to changes in purposes or ability to hold, some HTM investments are required to be reclassified into AFS financial assets and to be revaluated at fair value. The difference arising from revaluation between carrying value and fair value are recognized in the income statement under “Gain/loss from revaluation at fair value”.

4.11 INVESTMENTS IN ASSOCIATES

An associate is an entity in which the Company has significant influence but that is neither subsidiaries nor joint ventures. The Company generally deems they have significant influence if they have over 20% of the voting rights.

The Company’s investments in associates are accounted for using the equity method of accounting.

Under the equity method, the investment is initially carried in the consolidated statement of financial position at cost. In term of the acquisition, the difference between cost of the investment and the determinable net asset fair value in correspondence with the Company’s shares in associate at the acquisition date is defined as goodwill. Negative goodwill is recognized in “Other investment revenue (share of profits/(loss) in associates)” of the consolidated income statement. Positive goodwill will be reflected in the value of investment in associate of the consolidated statement of position.

When determining the determinable fair value of net assets in associates, the Company applies principles and suppositions as follows:

- Fair value of cash and short term deposit, payables to suppliers and other short term liabilities approximates their carrying value due to their short term;
- Fair value of receivables is determined based on estimation of recoverability, therefore, the Company estimates fair value at the cost less provisions for receivables;
- Fair value of financial investments is determined at market prices;
- Fair value of fixed assets approximates their cost less accumulated depreciation
- Fair value of the qualification in the auditors' report in the audited financial statements of associates is determined as zero (0); and
- Fair value of other immaterial assets and debts is determined as their carrying value.

After the initial recognition, the investment is adjusted to changes of the Company's share in associates' post-acquisition net assets. The consolidated income statement reflects the share of the post-acquisition results of operation of the associates. Changes in net asset value of associates, including changes arisen from revaluation of fixed assets and investments, foreign exchange differences and differences arisen from consolidation of associates are not reflected in the consolidated income statement, but recognized directly in "Undistributed profit" in the consolidated statement of financial position.

The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Dividend receivable from associates is deducted from the carrying amount of the investment.

The financial statements of the associates are prepared for the same reporting period as the Company, using the same accounting policies. Where necessary, adjustments are made to bring the accounting policies in line with those of the Company.

4.12 RECOGNITION OF MORTGAGED FINANCIAL ASSETS

During the year, the Company had mortgaged/pledged financial assets which are used as collaterals for financial obligations of the Company.

According to the terms and conditions of the mortgage/pledge contracts, during the valid period of the contracts, the Company is not allowed to sell, transfer or use the mortgaged/pledged assets under repurchase or swap contracts with any other third party.

In case the Company is unable to fulfil its obligations, the mortgagee/pledgee is allowed to use the mortgaged/pledged assets to settle the obligations of the Company after a period specified in the mortgage/pledge contracts, since the obligations due date.

The mortgaged/pledged assets are monitored in the Company's consolidated statement of financial position in accordance with accounting principles relevant to the assets' classification.

4.13 RECEIVABLES

Receivables are initially recorded at cost and subsequently always presented at cost.

Receivables are subject to review for impairment based on their overdue status or estimated loss arising from undue debts of corporate debtors who have bankruptcy or are under liquidation; or of individual debtors who are missing, have fled, are prosecuted, detained or tried by law enforcement bodies, are serving sentences or have deceased. Increases or decreases to the provision balance are recorded as "Provision expenses for diminution in value and impairment of financial assets and doubtful debts and borrowing costs of loans" in the consolidated income statement.

The Company has made provision for doubtful receivables in accordance with Circular No. 228/2009/TT-BTC dated 7 December 2009 issued by the Ministry of Finance. Accordingly, the provision rates for overdue receivables are as follows:

Overdue period	Provision rate
From over six (6) months to less than one (1) year	30%
From one (1) year to less than two (2) years	50%
From two (2) years to less than three (3) years	70%
From three (3) years and above	100%

4.14 TANGIBLE FIXED ASSETS

Tangible fixed assets are stated at cost less accumulated depreciation.

The cost of a tangible fixed asset comprises of its purchase price and any directly attributable costs of bringing the tangible fixed asset to working condition for its intended use.

Expenditures for additions, improvements and renewals are added to the carrying amount of the assets and expenditures for maintenance and repairs are charged to the income statement as incurred.

When tangible fixed assets are sold or retired, any gain or loss resulting from their disposal (the difference between the net disposal proceeds and the carrying amount) is included in the income statement.

4.15 INTANGIBLE FIXED ASSETS

Intangible assets are stated at cost less accumulated amortization.

The cost of an intangible fixed asset comprises of its purchase price and any directly attributable costs of preparing the intangible fixed asset for its intended use.

Expenditures for additions, improvements and renewals are added to the carrying amount of the assets and other expenditures are charged to the income statement as incurred.

When intangible fixed assets are sold or retired, any gain or loss resulting from their disposal (the difference between the net disposal proceeds and the carrying amount) is included in the income statement.

4.16 DEPRECIATION AND AMORTISATION

Depreciation and amortisation of tangible and intangible fixed assets are calculated on a straight-line basis over the estimated useful life of each asset as follows:

Buildings and architectures	6 years
Office machineries	3 years
Means of transportation	6 years
Office equipment	3 - 5 years
Software	3 years
Land use rights with indefinite life	not amortised
Other intangible fixed assets	2 years

4.17 INVESTMENT PROPERTIES

Investment properties are stated at cost, inclusive of related transaction fees less accumulated depreciation.

Subsequent expenditure relating to an investment property that has already been recognised is added to the net book value of the investment property when it is probable that future economic benefits, in excess of the originally assessed standard of performance of the existing investment property, will flow to the Company.

Depreciation and amortisation of the property is calculated on a straight-line basis over the estimated useful life of each asset. The depreciation period is 27.5 years.

4.18 OPERATING LEASE

Whether an agreement is determined as a property lease agreement depends on the nature of the agreement at the beginning: whether the implementation of the agreement depends on the use of a certain asset and whether the agreement includes clauses on the use rights of the asset.

Rentals respective to operating leases are charged to the income statement on a straight-line basis over the term of the lease.

4.19 PREPAID EXPENSES

Prepaid expenses, including short-term prepaid expenses and long-term prepaid expenses in the statement of financial position, are amortised over the period for which the amounts are paid or the period in which economic benefits are generated in relation to these expenses.

The following types of expenses are recorded as prepaid expenses and are amortised over the period from one (1) years to three (3) years to the income statement:

- Office renovation expenses;
- Office rental expenses; and
- Office tools and consumables.

4.20 REPURCHASE AGREEMENTS

Securities sold under the agreements to be repurchased at a specified future date (“repos”) are not derecognized from the statement of financial position. The corresponding cash received is recognized in the statement of financial position as a liability. The difference between the sale price and repurchase price is treated as interest expense and is accrued in the income statement over the life of the agreement using the straight-line method.

4.21 BORROWINGS AND BONDS ISSUANCE

Borrowings and bonds issued by the Company are recorded and stated at cost of the balance at the end of the financial year.

4.22 PAYABLES AND ACCRUED EXPENSES

Payables and accrued expenses are recognized for amounts to be paid in the future for bonds interest payables, goods and services received, whether or not billed to the Company.

4.23 EMPLOYEE BENEFITS

4.23.1 Post-employment benefits

Post-employment benefits are paid to retired employees of the Company by the Social Insurance Agency, which belongs to the Ministry of Labour and Social Affairs. The Company is required to contribute to these post-employment benefits by paying social insurance premium to the Social Insurance Agency at the rate of 18% of an employee’s basic salary on a monthly basis. The Company has no further obligation to fund the post-employment benefits of its employees, other than the liability to pay Social Insurance Agency on a monthly basis.

4.23.2 Severance pay

The severance pay to employee is accrued at the end of each reporting period for all employees who have been in service for more than 12 months up to 31 December 2008 at the rate of one-half of the average monthly salary for each year of service up to 31 December 2008 in accordance with the Labour Code, the Law on Social Insurance and related implementing guidance. Since 1 January 2009, the average monthly salary used in this calculation will be revised at the end of each reporting period following the average monthly salary of the 6-month period up to the reporting date. Increase or decreases to the accrued amount other than actual payment to employee will be taken to the income statement.

This accrued severance pay will be used to perform payment to employee when terminating labour contract in accordance with the Labour Code.

4.23.3 Unemployment allowance

According to prevailing regulations, the Company is required to pay the unemployment insurance at 1% of salary fund of employees who engage in the unemployment insurance program and to deduct 1% from each employer's basic salary to contribute to the Unemployment Insurance Fund.

4.24 FOREIGN CURRENCY TRANSACTIONS

Transactions in currencies other than the Company's reporting currency of VND are recorded at the actual transaction exchange rates of commercial banks at transaction dates. At the end of the period, monetary balances denominated in foreign currencies are determined as follows:

- Monetary assets are translated at buying exchange rate of the commercial bank where the Company conducts transactions regularly.
- Monetary liabilities are translated at selling exchange rate of the commercial bank where the Company conducts transactions regularly.

All foreign exchange differences incurred during the period and arisen from the revaluation of monetary accounts denominated in foreign currencies at the end of the period are taken to the consolidated income statement.

4.25 TREASURY SHARES

Equity instruments issued by the Company which are reacquired (treasury shares) are recognised at cost and deducted from equity. No gain or loss is recognised in the income statement upon purchase, sale, issue or cancellation of the Company's own equity instruments.

4.26 CONVERSION OF SUBSIDIARIES' FINANCIAL STATEMENTS INTO PARENT COMPANY'S ACCOUNTING CURRENCY

Subsidiaries' financial statements which are prepared in the foreign currency that is different from the Parent Company's

accounting currency are converted into the Parent Company's accounting currency for consolidation purpose. Actual transaction exchange rates used for converting subsidiaries' financial statements are determined as follows:

- For assets, the exchange rate used for translation is the banking buying rate at the reporting date;
- For liabilities, the exchange rate for translation is the banking selling rate at the reporting date.
- If the gap between the banking buying rate and banking selling rate does not exceed 0.2%, the Company is allowed to apply the average exchange rate.
- All items on the income statement and cash flow statement are converted using the actual exchange rate at the time of the transaction. Average exchange rate is allowed to be applied if it approximates the actual exchange rate at the time of the transaction (the difference is 2% or less). If the gap between the exchange rate at the beginning of the year and at the end of the year is higher than 20%, the Company shall apply the exchange rate at the end of the year.

Foreign exchange rate difference arising from the translation of subsidiary's financial statements is accumulatively reflected in "Foreign exchange rate difference" item of the Owners' Equity section of the consolidated financial statements.

4.27 REVENUE RECOGNITION

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of receipts or receivables less trade discount, concessions and sales return. The following specific recognition criteria must also be met before revenue is recognised:

Revenue from brokerage services

Where the contract outcome can be reliably measured, revenue is recognized by reference to the stage of completion. Where the contract outcome cannot be reliably measured, revenue is recognized only to the extent of the expenses recognized which are recoverable.

Revenue from trading of securities

Revenue from trading of securities is determined by the difference between the selling price and the weighted average cost of securities sold.

Other income

Revenues from irregular activities other than turnover-generating activities are recorded to other incomes as stipulated by VAS 14 – "Revenue and other income", including: Revenues from asset liquidation and sale; fines paid by customers for their contract breaches; collected insurance compensation; collected debt which had been written off and included in the preceding period expenses; payable debts which are now recorded as revenue increase as their owners no longer exist; collected tax amounts which now are reduced and reimbursed; and other revenues.

Interest income

Revenue is recognized on accrual basis (taking into account the effective yield on the asset) unless collectability is in doubt.

Dividends

Income is recognized when the Company’s entitlement as an investor to receive the dividend is established, except for dividend received in shares in which only the number of shares is updated.

Properties leasing revenue

Properties leasing revenue is recognized into operational result on a straight-line basis over the leasing contract life.

Other revenues from rendering services

Where the contract outcome can be reliably measured, revenue is recognised by reference to the stage of completion.

Where the contract outcome cannot be reliably measured, revenue is recognised only to the extent of the expenses recognised which are recoverable.

4.28 BORROWING COSTS

Borrowing costs include accrued interest and other expenses which are directly attributable to the Company’s borrowings and bonds issued.

4.29 COST OF SECURITIES SOLD

The Company applies moving weighted average method to calculate cost of equity securities sold and specific identification method to calculate cost of debt securities sold.

4.30 CORPORATE INCOME TAX

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted as at the report date.

Current income tax is charged or credited to the income statement, except when it relates to items recognized directly to equity, in which case the current income tax is also dealt with in equity.

Current income tax assets and liabilities are offset when there is a legally enforceable right for the Company to set off current tax assets against current tax liabilities and when the Company intends to settle its current tax assets and liabilities on a net basis.

Deferred income tax

Deferred income tax is provided using the liability method on temporary differences at the reporting date between the tax base of assets and liabilities and their carrying amount for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except where the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction affects neither the accounting profit nor taxable profit or loss.

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profits will be available against which deductible temporary differences, carry forward of unused tax credits and unused tax losses can be utilized, except where the deferred tax asset in respect of deductible temporary difference which arises from the initial recognition of an asset or liability which at the time of the related transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to a certain extent that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Previously unrecognized deferred income tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset realized or the liability is settled based on tax rates and tax laws that have been enacted at the reporting date. Deferred tax is recorded to the income statement, except when it relates to items recognized directly to equity, in which case the deferred tax is also dealt with in equity. Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxable entity and the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

4.31 OWNERS’ EQUITY

Contributed capital from shareholders

Contributed capital from stock issuance is recorded in Charter Capital at par value.

Undistributed profit

Undistributed profit comprises of realised and unrealised undistributed profit.

- Unrealised profit of the period is the difference between gain and loss arisen from revaluation of financial assets at FVTPL or other financial assets through profit and loss in the consolidated income statement.
- Realised profit during the period is the net difference between total revenue and income, and total expenses in the income statement of the Company, except for gain or loss arisen from revaluation of financial assets recognized in unrealised profit.

Reserves

According to Circular No. 146/2014/TT-BTC issued by the Ministry of Finance on 6 October 2014, securities companies are required to make appropriation of profit after tax to the following reserves:

	Percentage of profit after tax	Maximum balance
Charter Capital Supplementary Reserve	5%	10% of charter capital
Operational risk and finance Reserve	5%	10% of charter capital

Other reserves are appropriated in accordance with the Resolution of the General Meeting of Shareholder.

4.32 APPROPRIATION OF NET PROFITS

Net profit after tax is available for appropriation to shareholders after being approved by the General Meeting of Shareholders and after making appropriation to reserve funds in accordance with the Company's Charter and Vietnam's regulatory requirements.

4.33 NIL BALANCES

Items or balances required by Circular No. 210/2014/TT-BTC dated 30 December 2014, Circular 334/2016/TT-BTC dated 27 December 2016 and Circular No. 146/2014/TT-BTC dated 6 October 2014 issued by the Ministry of Finance that are not shown in these financial statements indicate nil balance.

5. CASH AND CASH EQUIVALENTS

	Ending balance VND	Opening balance (restated) VND
Cash	201,151,935,146	511,360,295,275

Total	10,028,398,494	222,726,349,946,000

7. FINANCIAL ASSETS

Concepts of financial assets

Cost

Cost of a financial asset is the amount of cash or cash equivalents paid, disbursed or payable of such financial asset at its initial recognition. The transaction costs incurred directly from the purchase of financial asset might be included in the cost of the financial asset or not depending on the category that the financial asset is classified in.

Fair value/market value

The fair value or market value of a financial asset is the price at which the financial asset would be traded voluntarily between knowledgeable parties on an arm's length basis.

The fair value/market value of securities is determined in accordance with Circular No. 146/2014/TT-BTC as described in Note 4.8.

Amortised cost

Amortized cost of a financial investment (which is debt instrument) is the amount at which the financial asset is measured at initial recognition minus (-) principal repayments, plus (+) or minus (-) the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction for impairment or irrecoverability (if any).

For presentation purpose, provision for diminution in value or irrecoverability of financial assets is recognised in “Provision for impairment of financial assets and mortgage assets” in the statement of financial position.

Carrying amount

Carrying amount of a financial asset is the amount at which the financial asset is recognized in the statement of financial position. Carrying amount of a financial asset might be recognised at cost minus reduction in value due to revaluation (for FVTPL and AFS financial assets) or at amortised cost (for HTM investments and loans), depending on the category that the financial asset is classified in.

Total	98,503,673,467	241,647,273,383

(*) These represent short-term cost of investment relating to the contract between the Company and its customers for selling the shares of Hoang Anh Gia Lai International Agriculture JSC, previously known as Hoang Anh Gia Lai Rubber JSC. Accordingly, the customer will make payments to the Company in accordance with the payment schedule specified in the contract. The control of shares will be transferred to the buyer in line with the payment schedule. The underlying shares after transfer will be blocked and used as collateral assets for the contract. The value of investment awaiting for payback is determined as the difference between original costs of the investment sold, awaiting for payback and the provision for diminution in value of collaterals based on their market value at reporting date.

Total	2,501,998,996	5,038,079,472

39. CORPORATE INCOME TAX

39.1 CORPORATE INCOME TAX ("CIT")

The tax returns filed by the Company are subject to examination by the tax authorities. As the application of tax laws and regulations is susceptible to varying interpretations, the amounts reported in the financial statements could change later upon final determination by the tax authorities.

The current tax payable is based on taxable profit for the year. The taxable profit of the Company for the year differs from the profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other periods and it further excludes items that are not taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted by the reporting date. The Company is required to fulfil its corporate income tax obligation with the current tax rate of 20% (in 2015: 22%) on the total taxable profit according to Circular No. 78/2014/TT-BTC dated 02 August 2014.

The estimated current corporate income tax in this year and prior year is represented in the table below:

	Current year VND	Previous year (restated) VND
Profit before tax	1,056,825,860,115	1,053,797,641,057
Adjustments to increase/(decrease) accounting profit:	(31,527,632,391)	(192,240,296,954)
Adjustments to increase accounting profit:	277,787,220,802	426,844,249,827
- Provision for diminution in value of unlisted shares at year-end	37,839,537,400	40,956,993,400
- Provision for impairment of investment awaiting for pay-back at the end of the year	198,657,082,945	49,994,489,716
- Temporary difference taxable incurred in 2015	-	135,656,679,197

	Current year VND	Previous year (restated) VND
<i>Difference from revaluation of AFS financial assets</i>	333,533,023	10,339,161,500
<i>Provision for impairment of loans and receivables</i>	40,051,234,311	-
<i>Unrealized revenue (share of profit in associates)</i>	-	28,291,257,837
<i>Reversal of provision for investments in associates for consolidation purpose</i>	-	109,759,654,941
<i>Disposal of associates</i>	-	51,403,634,636
<i>Non-deductibles expenses during the year</i>	905,833,123	442,378,600
Adjustments to decrease accounting profit:	(309,314,853,193)	(619,084,546,781)
<i>Income from tax exempted activities – dividends</i>	(77,276,999,500)	(58,882,634,250)
<i>Profit before tax from subsidiaries</i>	(67,074,882,903)	(47,233,988,764)
<i>Gain from investments in associates</i>	(73,457,661,737)	(109,964,025,808)
<i>Reversal of provision expenses for unlisted shares at the beginning of the year</i>	(40,956,993,400)	(402,058,826,278)
<i>Reversal of provision for investment awaiting for payback at the beginning of the year</i>	(49,994,489,716)	-
<i>Tax-deductible expenses from previous year</i>	(553,825,937)	(945,071,681)
Estimated current taxable income	1,025,298,227,724	861,557,344,103
Corporate income tax rate	20%	22%
Estimated CIT expenses	205,059,645,545	189,542,615,702
Estimated CIT expenses in subsidiaries	15,462,957,711	12,260,958,527
CIT payable at the beginning of the year	75,215,403,673	23,038,276,709
CIT adjustment in accordance with tax finalization	181,317,272	379,510,893
CIT paid in the year	(244,437,916,359)	(150,005,958,158)
CIT payable at the end of the year	51,481,407,842	75,215,403,673

39.2 DEFERRED CORPORATE INCOME TAX

Movement of deferred CIT assets during the year is as follows:

	Current year VND	Previous year (restated) VND
Deferred income tax assets		
Opening balance	50,979,884,031	88,452,941,782
Decrease of non-deductible provision for unlisted shares	(623,491,200)	(80,261,543,101)
Provision for impairment of investment awaiting for payback from current year	29,732,518,646	9,998,897,943
Temporary taxable difference in 2015	-	27,131,335,840
Provision for impairment of loans and receivables	8,010,246,862	-
Unearned revenue arising from consolidating financial statement	-	5,658,251,567
Ending balance	88,099,158,339	50,979,884,031
Payable income tax deferred		
Opening balance	1,812,751,858	27,359,739,675
Temporary non-taxable income from subsidiary	(1,755,466,008)	(1,404,966,074)
Reversal of provision for associates during the year	-	(24,142,021,743)
Ending balance	57,285,850	1,812,751,858

Deferred tax (income)/expense is charged to the income statement for the year ended 31 December 2016 and 31 December 2015 as follows:

	Current year VND	Previous year (restated) VND
Deferred income tax (income)/expense		
Decrease of non-deductible provision for unlisted shares	623,491,200	80,261,543,101
Provision for impairment of investment awaiting for payback	(29,732,518,646)	(9,998,897,943)
Temporary taxable difference in 2015	-	(27,131,335,840)
Provision for impairment of loans and receivables	(8,010,246,862)	-
Unearned revenue arising from consolidating financial statements	-	(5,658,251,567)
Temporary non-taxable income from subsidiary	(1,755,466,008)	(1,404,966,074)
Reversal of provision for associates during the year	-	(24,142,021,743)
Adjustment to deferred corporate expense under tax finalization	-	207,915,769
Total	(38,874,740,316)	12,133,985,703

40. ACCUMULATED OTHER COMPREHENSIVE INCOME

Item	Beginning balance (restated)	Movement during the year	Changes in owners' equity recorded in income statement	Ending balance
Gain/(loss) from revaluation of AFS finance assets	(3,123,757,542)	434,267,399	-	(2,689,490,143)

41. ADDITIONAL INFORMATION FOR STATEMENT OF CHANGES IN OWNERS' EQUITY

Incomes and expenses, gains or losses which are recorded directly to owners' equity:

	Ending balance VND	Beginning balance VND
Income recorded directly to owners' equity	434,267,399	10,339,161,500
<i>Gain from revaluation of AFS financial assets</i>	<i>434,267,399</i>	<i>10,339,161,500</i>
Expense recorded directly to owners' equity	(16,312,940,936)	(27,099,286,669)
<i>Loss arising from changes in number of outstanding shares of associates</i>	<i>(12,421,041,327)</i>	-
<i>Loss arising from associate' changes of investment portion in its subsidiaries</i>	<i>(3,891,899,609)</i>	<i>(27,099,286,669)</i>
Total	(15,878,673,537)	(16,760,125,169)

42. DISCLOSURE OF STATEMENT OF CASH FLOWS

Non-monetary transactions which impact statement of cash flows and cash and cash equivalents managed by the Company but not in use

	Ending balance VND	Beginning balance VND
1 Cash and cash equivalents which are term deposits with maturity of 3 months or less used as collaterals for the Company's short-term borrowings	-	135,000,000,000

43. EARNINGS PER SHARE

Earnings per share is calculated by dividing the net profit after tax attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares in issue during the year. After tax profit attributable to ordinary shareholders of the Company for the year ended 31 December 2016 is calculated as after-tax profit after deduction for setting up non-shareholder reserves according to the actual appropriation ratio of 2015. For the purpose of compiling consolidated financial statements, other comprehensive incomes not yet included in the net profit after tax to calculate the earnings per share (EPS) indicator since there is no guidance detail.

	Current year	Previous year (restated)
Net profit attributable to ordinary shareholders (VND)	815,643,347,992	781,933,156,129
Weighted average number of ordinary shares for calculation of earnings per share	480,436,945	471,713,404
Earnings per share (VND/share)	1,698	1,658

44. OTHER INFORMATION

44.1 TRANSACTIONS WITH RELATED PARTIES

List of related parties and relationships with the Company is as follows:

Related parties	Relationships
NDH Invest Ltd. and its subsidiaries	SSI's Chairman is the owner of NDH Invest Ltd.
Sunway Investment JSC.	SSI invested in this Company and its member of the BOD is the younger brother of SSI's Chairman
Daiwa Securities Group Inc.	Strategic shareholder
The PAN Group JSC. and its subsidiaries	Associate
Vietnam Fumigation JSC	Associate
Dong Nai Port JSC	Associate

Division reporting information by geographic area

Company's activities are mainly in the territory of Vietnam.

The Company has a wholly-owned US subsidiary, SSI International Incorporated ("SSIIC"), which operates in the US real estate business. However, SSIIC's total revenue, expenses and total assets are very low compared to its total revenue, expense and total assets (about 2% to 4%). As a result, the Company does not present segmental reports by geographical area in the notes to the consolidated financial statements .

44.3 OPERATING LEASE COMMITMENTS

The Company leases office under operating lease arrangements. As at 31 December 2016 and 31 December 2015, the committed future rental payment under the operating lease agreements is as follows:

	Ending balance VND	Beginning balance VND
Less than 1 year	37,582,831,346	31,297,190,825
From 1 - 5 years	93,343,925,550	54,035,694,786
More than 5 years	-	988,202,160
Total	130,926,756,896	86,321,087,771

44.4 MARGIN LENDING SERVICES

The Company signed margin lending contracts with investors to facilitate securities trading activities of investors.

The Company's commitments to provide funds under outstanding margin lending contracts as of 31 December 2016 and 31 December 2015 are as follows:

	Ending balance VND	Beginning balance VND
Head Office (at Ho Chi Minh City)	456,914,659,106	113,910,667,241

Total	973,502,374,040	243,636,378,790

44.5. PURPOSES AND POLICIES OF FINANCIAL RISK MANAGEMENT

The Company's financial liabilities comprise mostly loans and borrowings, payables to suppliers and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company has loans, trade and other receivables, cash and short-term deposits that arise directly from its operations. The Company does not hold or issue derivative financial instruments.

The Company is exposed to market risk, credit risk and liquidity risk.

Risk management is integral to the whole business of the Company. The Company has a system of controls in place to maintain an acceptable balance between the cost arisen from risks and the cost of managing the risks. The management continually monitors the Company's risk management process to ensure that an appropriate balance between risk and control is achieved.

Management reviews and agrees policies for monitoring each of these risks which are summarized below.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. There are four types of market risk: interest rate risk, currency risk, commodity price risk and other price risk, such as equity price risk. Financial instruments affected by market risk include loans and borrowings, deposits and available-for-sale investments.

The Company manages market risk by analysing financial sensitivity of the Company as at 31 December 2016 and 31 December 2015. When analysing sensitivity, Management assumes that sensitivity of Available-for-sale debt instruments in the statement of financial position and other related items in the income statement is affected by changes in corresponding market risk. The analysis is based on financial assets and liabilities held by the Company as at 31 December 2016 and 31 December 2015.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to market risk due to changes in interest rate relates primarily to cash and short-term deposits. Financial liabilities have fixed interest rate.

The Company manages interest rate risk by looking at the competitive structure of the market to identify a proper interest rate policy which is favourable for its purposes within its risk management limits.

No analysis on interest sensitivity is performed since the Company's exposure to risk of changes in interest rate is insignificant.

Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities in which revenue or expense is denominated in a different currency from the Company's accounting currency and its investments in oversea subsidiaries.

The Company manages foreign exchange risk by hedging against transactions that are expected to take place in the future. The Company do not use any hedging instruments to mitigate foreign exchange risk.

Equity price risk

Listed and unlisted securities which are held by the Company are affected by market risk arising from the uncertainty of future value of invested securities. The Company manages equity price risk by establishing investment limits. The Company's Investment Council considers and approves investments in securities.

As at the reporting date, the fair value of listed shares (FVTPL and AFS) was VND 2,632,964,025,790. The 10% increase (or decrease) in market index would possibly result in a corresponding increase (or decrease) in profit after tax of the Company, depending on its magnitude and length as well as the Company's ownership position of securities which have significant influence on market index.

Credit risk

Credit risk is the risk that counterparty would not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily for loans and receivables) and from its financing activities, including deposits with banks, foreign exchanges activities and other financial instruments.

Receivables

Customer credit risk is managed by the Company based on its established policies, procedures and control relating to customer credit risk management. Credit quality of customers is evaluated on the basis of Management's assessment.

Outstanding customer receivables are regularly monitored. Customer credit quality's impairment is analysed at each reporting date on an individual basis for major clients. The Company closely monitors outstanding receivables and operates a credit control unit to mitigate credit risk. Due to the fact that the Company's receivables relate to a large number of diversified customers and corresponding collateral assets, there is no significant concentration of credit risk.

Bank deposits

The Company's bank balances are mainly maintained with high credit rating banks in Vietnam. Credit risk from balances with banks is managed by the Company's treasury department in accordance with the Company's policy. The Company's maximum exposure to credit risk for the components of the statement of financial position at each reporting date is the carrying value as presented in Notes 5, 7.3 and 11. The Company evaluates the concentration of credit risk in respect to bank deposit as low.

Margin lending and advances to customers

The Company manages its credit risks via the use of internal control policies, processes and procedures relevant to margin lending and advance payments to customers. The Company assesses customers to determine their credit limits and margin rates before lending margin and advances to customers and periodically reassesses the financial position of customers to adjust the credit limits and margin rates accordingly. The credit limits are measured based on value of collateral assets, customer's credit rating and other indicators.

The following loans considered as overdue as at 31 December 2015 (excluding of contracts that was extended or liquidated before the signing date of this report). Except for financial assets which are reserved for impairment as stated in Notes 8 and 9, according to the Management's assessment, the remaining financial assets are neither overdue nor impaired as they are all liquid.

Unit: VND					
		Neither past due nor impaired	< 80 days	Past due but not impaired	
Total				81–180 days	>180 days
Ending balance	3,779,178,042,796	3,770,764,073,993	6,699,128,102	1,714,840,701	-
Beginning balance	3,349,821,357,080	3,336,640,152,102	13,176,220,438	2,509,267	2,475,273

Liquidity risk

The liquidity risk is the risk that the Company will encounter difficulty in meeting financial obligation due to shortage of funds. The Company's exposure to liquidity risk arises primarily from mismatches of maturities of financial assets and liabilities.

The Company monitors its liquidity risk by maintaining a level of cash and cash equivalents, borrowings deemed adequate by the Management to finance the Company's operations and to mitigate the effects of fluctuations in cash flows.

The below table summarizes the maturity profile of the Company's financial liabilities based on contractual undiscounted payments:

	Overdue VND	On demand VND	Less than 1 year VND	1 – 5 year VND	Over 5 years VND	Total VND
31 December 2016

COMMENTS FROM INTERNAL AUDIT

Internal Audit is established and operated in accordance with the decision of the Board of Management and under the Governance/ Control Unit. Internal Audit consists of a number of staff who have experiences in accounting – auditing field, and are fully certified in securities field. It is an independent department supporting Board of Management in auditing Company’s financial and accounting activities. It periodically reviews the financial reports, financial safety ratio reports, accounting books and points out errors in accounting activities to report to the Board of Management; makes recommendations to amend accounting activities in accordance with current regulations.

Quarterly Financial Reports, Semi-Annual Financial Report, Audited Financial Statement for 2016, Financial Safety Ratio Report of the Company were disclosed in accordance with regulations. Periodical recommendations from Internal Audit were promptly considered and applied by the accounting department. Accounting Department should limit the application of the extension of the consolidated financial statements, presenting in full and in more detail the explanatory notes in the financial statements.

Two members of the BOD who haven’t got corporate governance certificate are Mr Nguyen Duy Khanh and Mr Hironori Oka since they was newly elected in 2015. They will arrange to fully participate in the corporate governance training course as prescribed in the near future. In addition, there is still no training course for corporate governance organized in English for foreigners in Vietnam

In 2016, the BOD also sent representatives and company secretary to attended, exchanged and also contributed their opinion on seminars and conferences about corporate governance organized by SSC, Exchanges and other organizations. Especially, SSI’s representative has attended training course on ASEAN Corporate Governance Scorecard organized by HOSE and IFC.

SHAREHOLDER INFORMATION

The shares of Saigon Securities Inc. are listed on the Ho Chi Minh Stock Exchange with the ticker SSI and are centrally deposited at the Vietnam Securities Depository – Ho Chi Minh City Branch.

Stock Information: As at 31/12/2016, the charter capital of SSI stood at VND 4,900,636,840,000 and divided into 490,063,684 common shares with the par value of VND 10,000. The Company did not issue any other but common shares

Treasury share transaction in 2016: The number of treasury shares at 31/12/2016 was 238,434 shares, increasing 232,115 compared to that at 31/12/2015. The reason was the Company bought odd lot SSI shares according to investors’ request and bought back ESOP shares from employees who violated the rules according to the decision of the BoD.
