Profit after tax for the fourth quarter of 2024: 51.631.324 Vietnamese Dong

Profit after tax for the fourth quarter of 2023: 473.179.026 Vietnamese Dong

The main reason is due to:

In 2024, the Company accelerated the completion of construction work items in the first 9 months, leading to a 136% increase in sales and service revenue compared to the same period in 2023. Selling expenses and interest expenses in 2024 increased in line with the growth in business activities

In the fourth quarter of 2024, the value of completed and accepted construction work items was lower compared to the same period in 2023, resulting in a 55% decrease in sales and service revenue. Additionally, selling expenses increased slightly by 11% compared to the same period in 2023.

The impact of the above factors led to a significant decline in business performance for the fourth quarter of 2024 compared to the same period in 2023. However, the full-year business performance for 2024 showed a substantial increase compared to 2023
