UBND, the
company
transitioned to
operate under
the Enterprise
Law as Thanh
Hoa Water
Supply Joint
Stock
Company

28/05/2016 - now

Thanh Hoa Water Supply Joint Stock Company was formerly known as Thanh Hoa Water Supply Company, that was established on July 1, 1931. Over 93 years of construction and development, the company has undergone multiple name and organizational structure changes, continuously expanding its scale and production capacity. The company's journey of growth and development is divided into five main periods:

- The period from 1931 to 1953
- The period from 1954 to 1985
- The period from 1986 to 2005
- The period from 2006 to 27/5/2016
- Since from 28/5/2016 to present

Each of these periods marks a significant milestone, serving as a solid foundation for the company to move forward into the future. Celebrating 93 years of tradition is also an opportunity for the company to review its nearly century-long history of construction and development, alongside the nation and Thanh Hoa province, through heroic historical periods, contributing to the growth and advancement of Thanh Hoa City.

*** From 1931 to 1985**

Thanh Hoa Water Plant operated under the administration of the French authorities. At that time, its primary service recipients were government offices managed by the French, while the remaining supply was provided to private traders in Thanh Hoa Town. During this period, following the government's 'Scorched Earth Resistance' policy, all machinery and equipment of the plant were dismantled and transferred to military workshops for weapons manufacturing in support of the resistance war, leading to the plant's cessation of operations.

After the victory at Dien Bien Phu, with the support of the Soviet Union, Thanh Hoa Water Plant was restored, invested in, and upgraded. It resumed operations, supplying water to government agencies, enterprises, and a portion of the population within the inner area of Thanh Hoa Town.

Entering the period of peace under the socialist-oriented development, Thanh Hoa Town expanded, and two major urban areas, Sam Son and Bim Son, were established as towns within the province. Economic zones, industrial clusters, townships, and trade centers were formed and developed. The growing demand for clean water for domestic use, production, and services required Thanh Hoa Water Plant to invest in, upgrade, and renovate the water supply system.

*** From 1986 to 2005**

On December 27, 1986, the Chairman of the Thanh Hoa Provincial People's Committee issued Decision No. 1690/QĐ-TC-UBTH, renaming Thanh Hoa Water Plant to Thanh Hoa Water Supply Company. The company's functions and duties include: extracting and producing clean water to serve the needs of Thanh Hoa Town and Sam Son; surveying, designing, constructing, and managing water supply projects and systems under its management and operation.

On May 30, 1992, the Chairman of the Thanh Hoa Provincial People's Committee issued Decision No. 775/QĐ-TC-UBTH, renaming Thanh Hoa Water Supply Company to Thanh Hoa Water Supply and Drainage Company. Its responsibilities were expanded to include managing, surveying, designing, and constructing water supply and drainage systems.

However, in practice, the management of the drainage system in Thanh Hoa town and urban areas remained under the administration of local authorities. Therefore, on 15th April, 1996, the Chairman of the Thanh Hoa Provincial People's Committee issued Decision No. 1479/TC-UBTH, renaming Thanh Hoa Water Supply and Drainage Company back to Thanh Hoa Water Supply Company.

*** From 2005 to 27/5/2016**

The company was converted from Thanh Hoa Water Supply and Drainage Company into Thanh Hoa One-Member Limited Liability Water Supply Company under Decision No. 2039/QĐ-CT-UBTH on the transformation of Thanh Hoa Water Supply Company into Thanh Hoa One-Member Limited Liability Water Supply Company, abbreviated as Thanh Hoa Water Supply Company. From this point, the company's responsibilities and authority became more clearly defined, and its water supply management scope expanded beyond Thanh Hoa City, Sam Son Town, and Bim Son Town to include urban areas and industrial zones across the province.

*** Since 28/05/2016**

The company was converted from Thanh Hoa One-Member Limited Liability Water Supply Company into Thanh Hoa Water Supply Joint Stock Company under Decision No. 4753/QĐ-UBND of Thanh Hoa Province, approving the equitization plan and transforming Thanh Hoa One-Member Limited Liability Water Supply Company into Thanh Hoa Water Supply Joint Stock Company. From this point, the company transitioned to operating under the Enterprise Law as a joint stock company model, with its responsibilities and authority more clearly defined. The company's water supply management scope extended beyond Thanh Hoa City, Sam Son Town, and Bim Son Town to encompass urban areas, industrial zones, and several districts across the province.

- Listing Date: The company's shares were registered for securities trading and assigned a stock code at the Vietnam Securities Depository Center as of January 7, 2017.

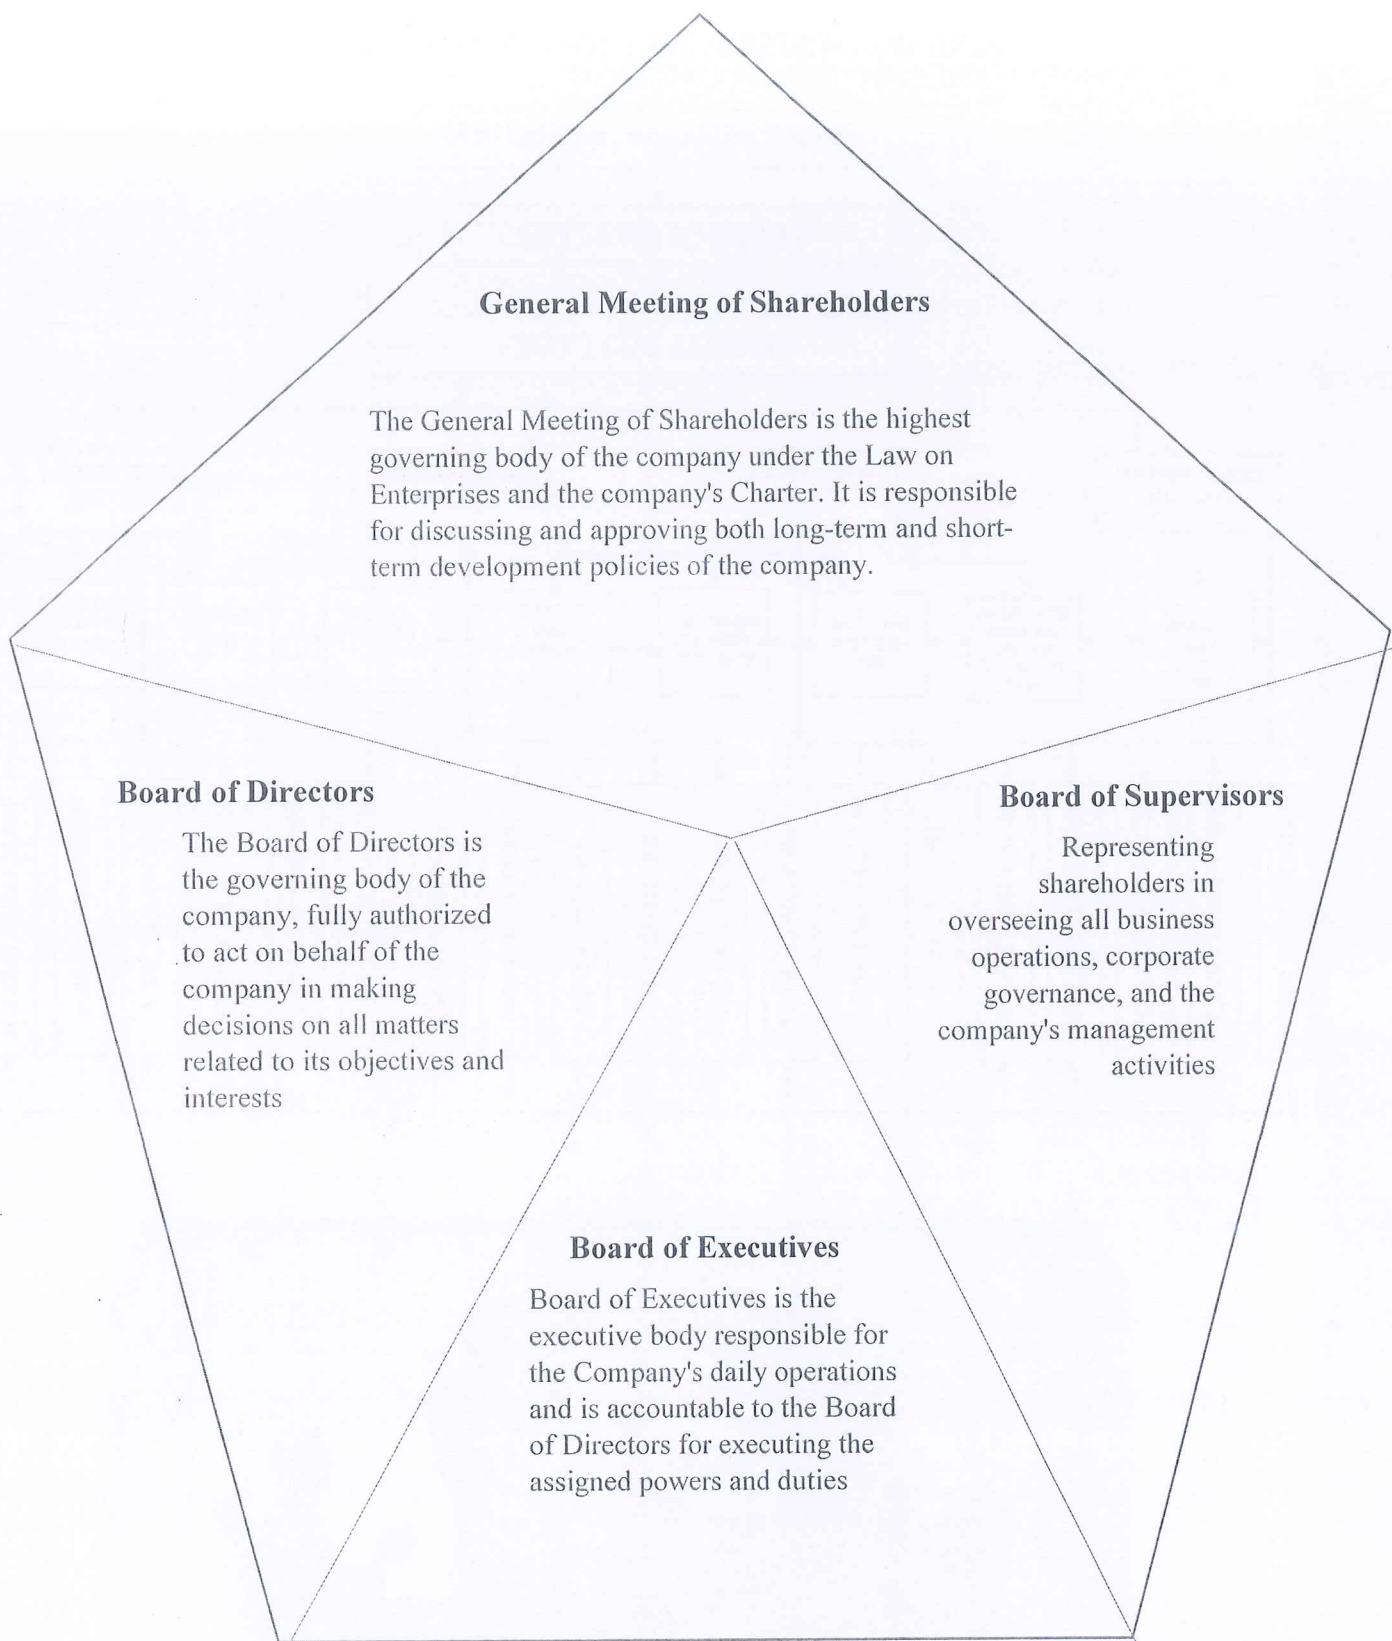

3. Business lines and locations

- The company's primary business activities include the management and production of clean water across the entire province. Other business functions include: investment in the construction of water supply and drainage projects and environmental sanitation; acting as the general contractor for turnkey water supply and drainage projects; construction and installation of technological equipment for water supply and drainage systems, wastewater treatment, and solid waste management; construction of civil, industrial, transportation, and medium-to small-scale irrigation projects; hotel services; and other business activities as permitted by law.

4. Information about Corporate governance model, Management structure

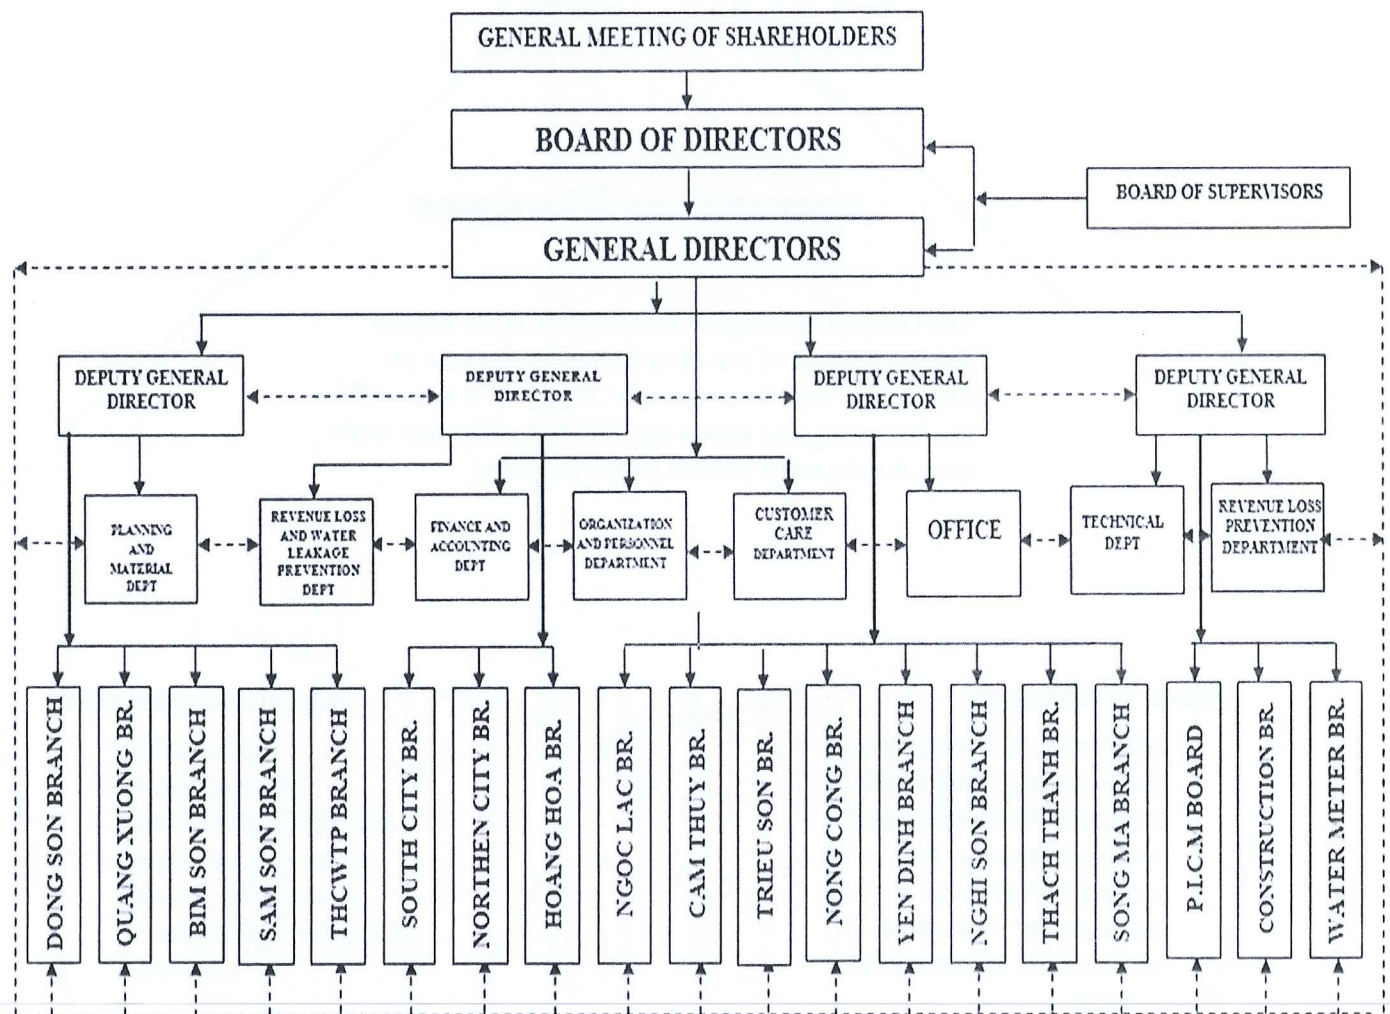

- Corporate governance model: General Meeting of Shareholders; Board of Directors; Board of Supervisors; Board of Executives.

- Management Structure includes:
- + Board of Directors;
- + Board of Supervisors;
- + Board of Executives;
- + Departments and Affiliated Units;
- Subsidiaries: None

GOVERNANCE MODEL

ORGANIZATIONAL CHART OF THANH HOA WATER SUPPLY JOINT STOCK COMPANY

5. Development orientation

5.1. The primary targets of ThaWACO:

- The company strives to be the leading enterprise in Thanh Hoa province in the field of clean water production and business.
- ThaWACO also strives to be an efficient enterprise, improving the living standards of employees in the company, and aligning the company's development goals with those of its employees.

5.2. Middle and long-term targets:

a) The main objectives in water supply operations:

- Implement directives from the Provincial People's Committee and State management agencies in water supply operations, ensuring stability in the company's activities after equitization.
- Ensure water supply meets current regulations and standards while fulfilling the water usage needs of residents in areas under the company's water distribution management.
- Build a unified and cohesive team of officers and employees to successfully achieve the planned targets and plans.
- Expand business activities and gradually extend the market to increase the company's revenue and profit.

b) Objectives for production development and basic construction investment:

- Develop an investment strategy for water supply system expansion, market development, and implement specific solutions to execute the company's growth strategy, gradually achieving sustainable development and growth.
- Develop product and service pricing based on the technical-economic norms of each regulated sector, and propose relevant departments to submit for approval by the Provincial People's Committee as a basis for implementation.
- Implement the policy of multi-sector and multi-industry operations. The company focuses on research to develop new industries that bring high economic efficiency.

5.3. Key tasks:

To enhance operational efficiency and strive to exceed the 2024 planned targets, departments and affiliated units must focus on effectively executing the following tasks:

- Continue to strengthen political and ideological education for officials, Party members, and employees to enhance their sense of responsibility in performing duties;
- Continue to effectively protect and manage water sources, ensuring absolute safety in water supply to meet customer demand, especially during the Lunar New Year, summer, and public holidays;
- Decisively direct and implement water loss and revenue loss prevention efforts; conduct monthly and quarterly evaluations of these efforts to establish synchronized and

effective measures for the following months; strive to reduce the water loss and revenue loss rate to 15.0%;

- Focus resources on implementing key projects such as upgrading Mat Son Water Plant to 70,000 m³/day-night, upgrading Yen Dinh Water Plant, expanding output pipelines from Mat Son Water Plant, constructing the reaction mixing tank and Lamella settling tank at LK13 Bim Son station, and Pipeline No. 3 Thanh Hoa - Sam Son, etc., to ensure water supply capacity across all service areas;

- Strengthen communication efforts on cashless payment methods and non-consuming customers while applying legal regulations to temporarily suspend water supply for customers who do not use water, aiming to reduce the rate of 0m³ customers;

- Take advantage of the support from local authorities at all levels, continue selective investment in customer development, expand the consumer market, and ensure efficiency in investment and growth;

- Accelerate the implementation of digitalization and enhance the application of technology in enterprise management and water supply network management;

- Maintain and promote the great unity within the leadership, officers, and employees of the entire company. Further strengthen leadership, direction, and management; promptly address and resolve obstacles in business operations;

- Set a good example, especially for unit leaders, to enhance employees' sense of responsibility in complying with company regulations, internal policies, and legal provisions in their assigned tasks;

- Continue to tighten discipline and labor regulations, strengthen inspection and supervision, and promptly detect and strictly handle violations of the company's internal rules and regulations;

- Effectively carry out preliminary and final reviews, evaluations, and experience-sharing. Timely commend and reward collectives and individuals with outstanding achievements in the production emulation movement; widely promote exemplary models across the entire company;

- Continue to strengthen the activities of mass organizations through emulation movements, promoting technical innovation initiatives. Maintain effective implementation of the democratic regulation to harness collective intelligence and strength, ensuring the successful achievement of the 2025 production and business objectives.

- Based on the set plan targets, the company will consider rewarding units that exceed their assigned goals.

5.4. Development strategy and orientation towards year of 2030

Implementing Decision No. 177/QĐ-UBND dated January 16, 2017, of the People's Committee of Thanh Hoa Province approving the adjustment of the master plan for industrial and commercial development of Thanh Hoa Province with an orientation towards 2030.

With the strong development of urban populations and industrial zones, as well as economic zones across the province, the company continues to focus on water production and supply, investing in water supply infrastructure to meet market demand for clean water. Additionally, the company aims to expand and diversify its business sectors and investment models to fulfill its mission in the new era. The company will primarily focus on the following key tasks:

- Invest in key projects to supplement water sources, upgrade and expand the pipeline and distribution system to meet the demand for residential, industrial, and tourism water supply. Develop an implementation roadmap for water supply projects in alignment with the progress of economic-social development, urban tourism, and industrial zone projects in the province.

- Implement a leakage prevention plan by region and pipeline, striving to reduce the water loss rate to 15% by 2025. Prioritize projects aimed at preventing water loss and revenue leakage to enhance the operational capacity of the water supply system and minimize water losses.

- Implement socialization in investment and water supply operations, attracting domestic and foreign capital to invest in upgrading and expanding the water supply system; aim to achieve 100% urban water supply coverage.

- Enhance capacity and increase water supply output, focusing on water quality management. Provide clean water products that meet Vietnamese standards TCVN 5502:2003. Maintain the quality management system in compliance with the international standard ISO 9001:2008, develop and refine internal regulations, and implement personnel planning. Organize training and retraining programs for employees; implement policies to attract specialized engineers and economic management professionals to work at the company.

- Apply scientific and technological advancements, including information technology, to enhance management and operations. Innovate service delivery methods to provide the best customer experience, implementing the "Customer-Centric" strategy for sustainable growth and development.

6. Risks that may affect business operations or the achievement of the company's targets

a) Economic risks:

Along with the overall economic development, the issue of clean water has become increasingly essential and urgent. The Government of Vietnam has issued numerous documents and policies to develop the industry.

In the trend of integration, the issue of clean water has become increasingly essential and important for every Vietnamese citizen.

Thus, it can be concluded that the operations of Thanh Hoa Water Supply Joint Stock Company in the coming period are not expected to face significant obstacles from the economy.

b) Legal risks:

In the operations of Thanh Hoa Water Supply Joint Stock Company, there may be some risks as follows:

Risks related to changes in the government's macroeconomic policies may lead to difficulties in the company's expansion and development direction.

The business legal system, in general, lacks consistency, and the legal framework for activities in the field is still incomplete.

c) Specific risks:

The company primarily operates in the field of clean water production and business, which is dependent on climate and environmental changes. The company cannot control the raw water source, electricity for production, the coverage area of water supply, and the scale of assets. Additionally, it is subject to strict price regulation, etc.

d) Other risks:

Other unforeseen risks beyond human control, such as natural disasters, fires, wars, saline intrusion, and water pollution, are considered force majeure risks. These factors are beyond the company's control, and if they occur, they could cause significant damage to the company's assets, personnel, and overall operations of Thanh Hoa Water Supply Joint Stock Company.

II. Operations in the year

1. Business operation (from 01/01/2024 to 31/12/2024)

- *In water supply production activities:* The coverage of water supply services continues to expand, and water quality meets regulatory standards. The company's total water output reached 42,301,528 m³, achieving 101.7% of the business plan. Water supply revenue amounted to VND 438.16 billion, reaching 102.7% of the planned target.

- *In construction, consulting, and other activities:* Despite facing challenges in securing projects, the revenue from construction, consulting, and other activities reached VND 30,52 billion, achieving 218.8% of the planned target.

- *Operational Efficiency:* Total revenue reached VND 468,68 billion, achieving 106% of the planned target, while pre-tax profit amounted to VND 69,52 billion, equivalent to 163.6% of the plan. Despite challenges in construction and consulting activities, the company's efforts in cost reduction contributed to a relatively positive and noteworthy business performance during its joint-stock period.

- Changes in the Board of Directors and Executive Management: Mr. Duong Van Hoa, Deputy General Director of the Company, retires in accordance with regulations.

- As of December 31, 2024, the company's total number of employees is 873, including: 370 female employees; 55% with a university degree or higher; 28% with a college or vocational diploma; and 17% skilled workers.

- Policies and Changes in Employee Policies to adapt to the operational model of a joint-stock company, after transitioning to this model, the company has revised and issued

internal management regulations to align with its operations. These include regulations on salaries and bonuses, financial management regulations, and other relevant policies.

3. Investment and project status

a) Major Investments:

To enhance water supply capacity for customers and reduce water loss rates in accordance with the Government and Provincial People's Committee roadmap, the company has prioritized investment in upgrading key projects, such as: Upgrading the capacity of the Mat Son, Ngoc Lac, and Bim Son water plants; repairing, renovating, replacing, and expanding the water supply network in several areas to support market expansion, especially in rural, remote, and isolated areas, in line with Resolution No. 58 dated August 5, 2020, of the Politburo; ensuring sufficient water supply to meet customer demand. In 2024, the company added 11,738 new customer households;

Many degraded infrastructure components have been promptly repaired and renovated, significantly improving the quality of the distribution network, enhancing water supply capacity, and reducing water loss rates;

The company is completing the necessary documentation and implementing the investment project to increase the capacity of the Mat Son Water Plant to 70,000 m³ per night. At the same time, it is conducting research and finalizing the investment plan for Pipeline No. 3, connecting Thanh Hoa and Sam Son along Vo Nguyen Giap Boulevard. Once completed, these projects will significantly enhance the local water supply capacity, ensuring a stable and sufficient water supply to meet customer demand within the company's management scope.

The company prioritizes investment in repairing and upgrading old pipelines with poor quality to enhance water supply capacity, address localized water shortages and low pressure in certain areas, and contribute to reducing the overall water loss rate.

III. Board of Executives' assessment report

1. Evaluating the Results of Business operations

- *In water supply production activities:* Despite the unfavorable conditions regarding raw water sources, electricity, and the water price remaining unchanged for many years, with the timely and decisive leadership of the Party Committee, the Board of Directors, and the Executive Board, as well as the close coordination between departments and units, the water supply production process has been ensured safely in all situations, effectively meeting the water usage needs of customers; The production process is strictly adhered to, ensuring water quality in accordance with QCVN 01-1:2018/BYT. The service quality has been continuously improved across all criteria, with very positive feedback from customers;

- *In construction, consulting, and other activities:* Despite facing many difficulties in finding projects, the revenue from construction, consulting, and other activities reached VND 30,52 billion, achieving 218.8% of the target.

- *Operational effectiveness:* Total revenue reached VND 468,68 billion, achieving 106% of the target; pre-tax profit reached VND 69,52 billion, achieving 163.6% of the target. Therefore, despite facing many challenges in business operations, the company's efforts to reduce costs resulted in positive operational outcomes in 2024, which deserve recognition.

2. Financial status

a) Asset status:

- As of the end of the period (December 31, 2024), the total assets amounted to VND 692,614,383,822. Of this, current assets were VND 96,516,546,779, and non-current assets were VND 596,097,837,043.

- The total assets at the end of the period increased by VND 330,974,418, representing a 0.05% increase compared to the beginning of the period.

b) Liabilities status:

- The total liabilities as of the end of the period (31/12/2024) are 265,396,043,581 VND, with short-term liabilities amounting to 140,096,143,059 VND and long-term liabilities amounting to 125,299,900,522 VND.

- The total liabilities at the end of the period decreased by 21,382,454,733 VND, a reduction of 7.46% compared to the beginning of the period.

3. Improvements in organizational structure, policies and management

4. Future development plan

Implementing Decision No. 177/QĐ-UBND dated January 16, 2017, by the People's Committee of Thanh Hoa Province, approving the adjustment of the master plan for the development of industry and trade in Thanh Hoa Province until 2020, with a vision towards 2030.

The company's future development plan is as follows:

- The company plans to invest in key projects to supplement the water supply, renovate, and expand the pipeline and distribution systems to meet the needs for domestic water, production, and tourism. A roadmap will be developed to implement the water supply projects in alignment with the progress of the province's economic-social development projects, tourism urban areas, and industrial zones.

- The company will implement a plan to reduce water loss by region and pipeline, aiming to decrease the loss rate to 15%. Priority will be given to projects that address water loss and leakage, in order to enhance the operational capacity of the water supply system.

- Socialization in investment and water supply activities, attracting both domestic and foreign funding to invest in upgrading and expanding the water supply system. The goal is to achieve 100% urban water supply coverage

- Enhance capacity and increase water supply capacity, focusing on managing the quality of clean water to ensure that the product meets the Vietnamese standard QCVN 01:2009 set by the Ministry of Health. Maintain the implementation of the quality management system in accordance with the international standard ISO 9001:2008, build and complete the internal regulations; implement the staff planning work up to 2030.

- Organize training and retraining for the staff; implement policies to attract specialized engineers and economic management professionals to work at the company.

- Apply scientific, technological, and information technology advancements to enhance management and operational quality, innovate service methods, and provide the best services to customers. Implement the "Customer-Centric" strategy to ensure survival and sustainable development.

5. Explanation by the Board of Executives regarding the audit opinions (if any).

6. Environmental and Social Responsibility Assessment Report

a) Evaluation related to environmental indicators:

- The company strictly complies with legal regulations in business operations, the financial accounting regime for enterprises, tax obligations to the State budget, and regulations regarding the management and protection of urban underground infrastructure during the construction of the water supply system.

- Build the image of Thanh Hoa Water Supply Joint Stock Company as a water supply enterprise with good services, customer-oriented, ensuring the clean water supply needs of the people and organizations, businesses across all areas the company serves.

b) Evaluation related to employee matters:

The legal and legitimate rights and benefits of employees are always guaranteed. In addition to effectively implementing policies on wages, bonuses, social insurance, health insurance, and unemployment benefits as prescribed by law, the company maintains welfare programs for major holidays, meal allowances, provision of uniforms, labor protection equipment, regular health check-ups, personal accident insurance, and support for employees in cases of personal events such as weddings and funerals, etc; THN also places great emphasis on the material and spiritual well-being of its employees. With an average income of 12,000,000 VND per person per month, the living standards of employees have continuously improved and developed. The employees' spiritual life has also become richer and more meaningful through activities such as leisure retreats, sightseeing tours, cultural and artistic exchanges, volleyball matches after working hours, and other cultural events, etc. All of these efforts have contributed to creating the company's unique culture, making employees proud, healthy, enthusiastic, and creatively engaged in their work, ultimately contributing to the company's continuous development.

c) Evaluation related to the company's responsibility towards the local community:

IV. Assessment of the Board of Directors regarding the company's operations

1. Assessment of the Board of Directors regarding the company's activities, including assessments related to environmental and social responsibility

- Strictly comply with legal regulations in business operations, accounting and financial regulations for enterprises, obligations to contribute to the State budget, and regulations on the management and protection of urban underground infrastructure during the construction of the water supply system.

- Build the image of Thanh Hoa Water Supply Joint Stock Company as a water supply enterprise with good services, customer-oriented, ensuring the clean water needs of the people and organizations, businesses in all areas served by the company.

2. The Board of Directors' evaluation of the activities of the General Director's Board

In 2024, the leadership and management work continued to be innovated, creating an enthusiastic and competitive atmosphere in all production activities. The Board of General Directors always adhered to the legal regulations and the company's charter, ensuring democracy, upholding a strong sense of responsibility, and fostering unity, consensus, and high agreement within the company.

The company has proposed effective policies and solutions in leadership and directing production and business activities, while simultaneously implementing comprehensive measures. The organizational structure has been improved, with key staff appointments and rotations in 2024 to stabilize and enhance production and business efficiency. Tight management practices have been applied to minimize production costs, while timely and appropriate solutions have been implemented to resolve difficulties, ensure income, and improve the living standards of employees.

The Board of Directors is always proactive in directing and managing production and business activities according to the assigned functions and tasks. They regularly report and propose to the Board of Directors on matters related to the company's interests and development strategies, in order to promptly issue resolutions that align with the sustainable development direction.

Through the strong and close leadership of the Executive Board in strictly implementing the management, operation, maintenance, and equipment improvement regimes, as well as optimizing the chemical dosing process, significant savings have been achieved in electricity and water treatment chemical costs, particularly at the three major plants: Mat Son, Ham Rong, and Quang Thinh.

Regularly coordinating with Party organizations and other unions within the company to enhance operational efficiency and ensure employees' rights. Improving both the material and spiritual life to build collective strength, create motivation in production labor, and foster a positive environment for employees to dedicate themselves wholeheartedly to building and developing the company.

Closely and effectively coordinating activities between the Board of Directors, the Board of Executives, and the Supervisory Board of the company, in strict compliance with the provisions of the Enterprise Law and the Company's Charter.

3. Strategic Orientation Plan of the Board of Directors

3.1. Business operations:

- Water supply service coverage: Thanh Hoa City: 97% or higher; Sam Son City and Bim Son Town: 93% or higher; Other areas: 75%–92% or higher. The company focuses on implementing a safe water supply program to ensure the water consumption needs of all customers within its management area.

- Focus on investing in the upgrading and maintenance of the water supply system, continuing to implement a comprehensive program to reduce water loss and leakage, thereby enhancing business efficiency. Effectively utilize commercial loan financing to implement investment projects for the expansion, renovation, and upgrading of the water supply system.

- Effectively implement solutions for managing the water supply network and enhancing customer service to continuously improve service quality. Efficiently manage key business indicators in the clean water sector, contributing to increased water revenue in particular and overall business performance in general.

- Strengthen the supervision and inspection activities of the Board of Directors; review, amend, and improve internal regulations to ensure they serve as effective management tools for enhancing business efficiency.

- Focus on improving labor productivity, training a dedicated, highly skilled workforce that is customer-friendly; enhance the application of information technology to meet service quality requirements for customers and overall management. Build the image of Thanh Hoa Water Supply Joint Stock Company as a more friendly, professional, and modern water supply enterprise.

3.2. Business plan targets for 2025:

Based on the business performance results of 2024 and the company's strategic development orientation, the Board of Directors has set the objectives and tasks for 2025 as follows:

a) *Enhancing business efficiency* while ensuring sustainability with six key objectives: Striving to exceed the 2025 business plan targets; reducing the water loss rate to 15%; maintaining an average annual growth rate of 3.5-4% in revenue, profit, and employees' average income; expanding service coverage to rural areas; gradually automating the water supply system operations; and continuously improving service quality;

b) Key indicators:

- Commercial water volume:	43,663,000m ³
- Water leakage and revenue loss rate:	15%
- Customer development:	8,605 households
- Total revenue:	VND 462,700 million
- Tax payment:	VND 50,000 million
- Profit:	VND 61,000 million
- Average income:	VND 12,000,000/person/month

V. Corporate governance

1. Board of Directors

a) Members and structure of the Board of Directors, consisting of 5 members:

- Mr. Le The Son - Chairman of the Board of Directors, owned 8,399,110 shares = 25.45% of the total voting shares.

- Mr. Pham Van Tu - Vice Chairman of the Board of Directors, owned 6,883,500 shares = 20.86% of the total voting shares.

- Mr. Nguyen Ngoc Can – Member of the Board of Directors, General Director, owned 8,941,812 shares = 27.10% of the total voting shares.

- Mr. Le Sy Len - Member of the Board of Directors, Vice General Director, owned 3,816,749 shares = 11.56 % of the total voting shares.

- Mr. Le Van Qui - Member of the Board of Directors, Head of Personnel Organization Department, owned 7,400 shares = 0.022% of the total voting shares.

b) Board of Directors' Subcommittees: None

c) Activities of the Board of Directors:

66	76/NQ-HĐQT	31/12/2024	Resolution on the 2024 business and production results, directions, goals, and tasks for 2025.
----	------------	------------	--

- All resolutions passed by the Board of Directors are assigned to the Executive Board for implementation and reporting to the Board of Directors. In other cases, decisions of the Board of Directors are formalized as resolutions and assigned to relevant units or individuals for execution.

- The resolutions issued by the Board of Directors focus on approving the company's business and financial plans, promptly adjusting the list of infrastructure development and network renovation projects to align with actual conditions, and addressing employee wages in connection with productivity improvement requirements.

d) Activities of the Board of Directors' Members:

- All members fully attended the Board of Directors' meetings, provided insightful contributions, and reached a high level of consensus within their authority and responsibilities. They actively participated in shaping the company's business strategy and development direction;

- The activities of the Board of Directors' members strictly adhere to the Company's Charter and the Board's operational regulations. The Chairman and assigned members regularly supervise, urge, and inspect the implementation of decisions approved in Board meetings and issued resolutions. The Board of Directors operates independently;

- The disclosure of information, as required by regulations, has been regularly supervised, reminded, and inspected by the Chairman of the Board of Directors to ensure timely, accurate, and complete disclosures.

e) List of Board of Directors' members with corporate governance training certificates: None

As authorized by the General Meeting of Shareholders, the Board of Directors selected International Auditing Co., Ltd. as the auditor for the 2024 Financial Statements (including the reviewed interim financial statements). The audit has been completed, and the report has been submitted to the relevant authorities.

2. Board of Supervisory

a) Members and structure of the Supervisory Board, consisting of 5 members

- Mrs. Le Thi Ha - Head of the Supervisory Board, owned 7,700 shares = 0.023% of the total voting shares.

- Mrs. Trinh Thi Huyen - Member of the Supervisory Board, owned 6,200 shares = 0.018% of the total voting shares.

- Mr. Nguyen Cong Khanh - Member of the Supervisory Board, owned = 0.00% 0.018% of the total voting shares.

b) Activities of the Supervisory Board:

The General Meeting of Shareholders of Thanh Hoa Water Supply Joint Stock Company, held on June 29, 2020, elected the Supervisory Board for the 2020–2025 term,

consisting of three members. The Supervisory Board has elected the Head of the Board and assigned responsibilities as follows:

- | | |
|-------------------------|-----------------------------------|
| - Mrs. Le Thi Ha | - Head of the Supervisory Board |
| - Mrs. Trinh Thi Huyen | - Member of the Supervisory Board |
| - Mr. Nguyen Cong Khanh | - Member of the Supervisory Board |

The Head of the Supervisory Board works on a full-time basis and is primarily responsible for inspection and supervision. The remaining members work on a part-time basis and are directly responsible for their assigned duties.

The Supervisory Board developed the 2023 work plan and implemented key tasks as scheduled. Quarterly, the Board held meetings to assess task execution, review and approve inspection and supervision results, and plan for the upcoming quarter.

In fulfilling its supervisory role, the Supervisory Board attended all monthly briefings chaired by the General Director, as well as several meetings of the Board of Directors and the Company. This ensured close monitoring of the management and operations of the Board of Directors, the General Director, and the Company's business activities.

All Resolutions, Decisions, and Meeting Minutes of the Board of Directors, as well as Reports from the General Director and company-issued documents, were fully provided to the Supervisory Board at the same time and in the same manner as to the Board members. The company's management always facilitated the Supervisory Board's access to records and documents and respected its right to review their legality and rationality.

While carrying out its duties, the Supervisory Board has never interfered with the company's business operations. All members follow the law, the company's charter, and shareholder resolutions, making sure to fulfill their responsibilities honestly and carefully to protect the company's legitimate interests.

In 2024, the Supervisory Board did not receive any requests from shareholders or shareholder groups to review matters related to the company's management, operations, or administration.
