Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

### **NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

as at 31 March 2025 and for the three-month period then ended (continued)

---

7. **Statement on comparability of the interim consolidated financial statements:** The interim consolidated financial statements as at 31 March 2025 and for the three-month period then ended are completely consistent and ensure comparability with the interim consolidated financial statements for the three-month period ending at 31 March 2024 and the consolidated financial statements for the fiscal year ending 31 December 2024.

## **II. FISCAL YEAR AND ACCOUNTING CURRENCY**

### **1. Fiscal year**

The Company's fiscal year starts on 1 January and ends on 31 December.

### **2. Accounting currency**

The currency used in accounting is Vietnamese Dong (VND) because revenue and expenditure are mainly in VND.

## **III. ACCOUNTING STANDARD AND SYSTEM**

### **1. Accounting system**

The Company applies the Vietnamese Enterprise Accounting System issued under Circular No. 200/2014/TT-BTC dated 22 December 2014 by the Ministry of Finance and circulars guiding the implementation of accounting standards and system of the Ministry of Finance.

### **2. Statement of Compliance with Accounting Standards and Accounting System**

The Management ensures that the requirements of the Vietnamese Accounting Standards and the Vietnamese Enterprise Accounting System issued under Circular No. 200/2014/TT-BTC dated 22 December 2014 issued by the Ministry of Finance, as well as the circulars guiding the implementation of accounting standards and systems by the Ministry of Finance, have been fully complied with in the preparation of the Financial Statements.

### **3. Applied accounting documentation system**

The Company's applied accounting documentation system is the General Journal system.

## **IV. ACCOUNTING POLICIES**

### **1. Basis of preparing consolidated financial statements**

The financial statements are prepared on an accrual basis (except for information related to cash flows).

The consolidated financial statements include the financial statements of Nagakawa Group Joint Stock Company (the parent company) and its subsidiaries. Subsidiaries are entities controlled by the parent company. Control exists when the parent company has the right to directly or indirectly influence the financial and operational policies of the subsidiaries to obtain economic benefits from its activities. In assessing control, the potential voting rights that are currently exercisable or convertible will be considered.

The results of operations of subsidiaries acquired or disposed of during the period are presented in the Consolidated Statement of Profit or Loss from the date of acquisition or up to the date of disposal of the investment in the subsidiary.

## **NAGAKAWA GROUP JOINT STOCK COMPANY**

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

### **NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

as at 31 March 2025 and for the three-month period then ended (continued)

---

In the event that the accounting policies of subsidiaries is different from the accounting policies consistently applied in the Group, the financial statements of the subsidiaries will be appropriately adjusted before being used for the preparation of the consolidated financial statements.

The balances of accounts on the balance sheets between companies within the Group, internal transactions, and unrealized internal profits arising from these transactions are eliminated in the preparation of the consolidated financial statements. Unrealized losses arising from internal transactions are also eliminated unless the costs that resulted in the loss are not recoverable.

The interests of non-controlling shareholders represent the portion of the profit and net assets of the subsidiaries not held by the parent company's shareholders and are presented separately in the Consolidated Statement of Profit or Loss and the Consolidated Balance Sheet. The interests of minority shareholders include the value of the minority shareholders' interests at the date of the initial business combination and their share of the changes in equity since the date of the business combination. Losses corresponding to the minority shareholders' portion of equity exceeding their share of the subsidiary's equity are charged against the Group's interest, unless the minority shareholders have a binding obligation and the ability to absorb those losses.

#### **2. Cash and cash equivalents**

Cash includes cash on hand, demand deposits in banks, monetary gold used for the purpose of storing value excluding gold classified as inventory used as raw materials for product manufacturing or goods for sale.

Cash equivalents are short-term investments with a maturity or due date of not more than 3 months from the date of purchase, easily convertible into a known amount of cash, and subject to insignificant risk of changes in cash.

#### **3. Exchange rates applied in accounting and principles for recording exchange rate differences**

The company has transactions in foreign currencies: USD.

Exchange rate differences arising during the period and those from the revaluation of foreign currency-denominated monetary items at the end of the period are recognized as income or expenses in the period. The revaluation of foreign currency-denominated balances at the end of the period is carried out in accordance with Circular 200/2014/TT-BTC dated 22 December 2014, issued by the Ministry of Finance.

Transactions in foreign currencies are converted at the exchange rate on the transaction date. The balances of foreign currency-denominated monetary items at the end of the period are revalued at the exchange rate on the financial period-end date.

Exchange rate differences arising during the period from foreign currency transactions of monetary items and those from the revaluation of foreign currency-denominated monetary items at the end of the period, after offsetting gains and losses, are recognized in financial income or financial expenses.

Particularly in the construction investment period to form fixed assets before the Company enters into production and business activities (pre-operation period), the exchange rate difference arising when paying for foreign currency items to carry out construction investment and the exchange rate difference arising when re-evaluating foreign currency items at the end of the accounting period are reflected cumulatively on the Balance Sheet (index Exchange rate difference). This exchange rate difference is gradually allocated to financial revenue or financial expenses within a period of no more than 5 years from the date the project is put into operation.

## NAGAKAWA GROUP JOINT STOCK COMPANY

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam  
NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS  
as at 31 March 2025 and for the three-month period then ended (continued)

---

The exchange rate used to convert foreign currency transactions is the actual exchange rate at the transaction date applied by the commercial bank where the Company conducts transactions. The exchange rate used to revalue the balances of foreign currency-denominated monetary items at the end of the period is the buying rate of the commercial bank or the average buying rate of commercial banks where the Company opens accounts at the end of the accounting period.

#### 4. Accounting principles for investments

##### *Held-to-maturity investments*

Investments are classified as held-to-maturity investments when the Company has both the intention and the ability to hold it until maturity. Held-to-maturity investments include term deposits (including treasury bills and promissory notes), bonds, preferred shares that the issuer is obligated to repurchase at a specific future date, and loans held to maturity for the purpose of earning periodic interest, as well as other held-to-maturity investments.

Held-to-maturity investments are initially recognized at cost, including the purchase price and any related transaction costs. After initial recognition, these investments are recorded at their recoverable value. Interest income from held-to-maturity investments after the purchase date is recognized in the Income Statement on an accrual basis. Interest earned before the Company acquires the investment is deducted from the initial cost at the time of purchase.

When there is conclusive evidence that a portion or the entire investment may not be recoverable, and the loss can be reliably measured, the loss is recognized as a financial expense for the period and directly deducted from the investment's value.

##### *Investments in subsidiaries, joint ventures, and associates*

###### *Subsidiaries*

Subsidiaries are companies controlled by the Company. Control is achieved when the Company has the ability to govern the financial and operating policies of the investee to derive economic benefits from its activities.

###### *Joint ventures*

Joint ventures are companies established based on a contractual agreement in which the Company and other participating parties undertake economic activities under joint control. Joint control means that strategic decisions related to the joint venture's financial and operating policies require unanimous consent from all participating parties.

###### *Associates*

Associates are companies in which the Company has significant influence but does not have control over its financial and operating policies. Significant influence is the power to participate in decision-making regarding the financial and operating policies of the investee but does not include control over those policies.

Investments in subsidiaries, joint ventures, and associates are initially recognized at cost, including the purchase price or contributed capital, along with any directly attributable investment costs. If the investment is made using non-monetary assets, the investment cost is recorded at the fair value of the non-monetary assets at the transaction date.

Dividends and profits from periods before the investment acquisition are deducted from the investment's value. Dividends and profits from periods after the investment acquisition are recognized as revenue. Dividends received in the form of shares are only recorded as an increase in the number of shares held, without recognizing their value / are recorded at their par value.

## **NAGAKAWA GROUP JOINT STOCK COMPANY**

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

### **NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

as at 31 March 2025 and for the three-month period then ended (continued)

---

A provision for impairment of investments in subsidiaries, joint ventures, and associates is recognized when these entities incur losses. The provision amount is determined as the difference between the actual contributed capital of all parties in the subsidiary, joint venture, or associate and the entity's actual equity, multiplied by the Company's ownership percentage relative to the total actual contributed capital. If the subsidiary, joint venture, or associate is required to prepare consolidated financial statements, the basis for determining the impairment provision is the consolidated financial statements.

Increases or decreases in the provision for impairment of investments in subsidiaries, joint ventures, and associates that need to be recognized at the financial period-end are recorded as financial expenses.

#### **5. Trade receivables and other receivables**

Trade receivables and other receivables are recognized based on actual amounts incurred. Receivables are presented at their carrying amount, net of any allowance for doubtful debts.

The classification of receivables as trade receivables, internal receivables and other receivables is carried out according to the following principles:

- Trade receivables reflect trade-related receivables arising from purchase-sale transactions between the company and buyers who are independent parties from the Company, including receivables from entrusted export sales to other parties.
- Internal receivables represent amounts receivable from dependent units that do not have legal entity status and operate under the Company's accounting system.
- Other receivables reflect non-trade receivables that are not related to purchase-sale transactions.

A provision for doubtful debts is established for each doubtful receivable based on the overdue age of the debts or the estimated potential loss, as specified below:

- For overdue receivables:
  - 30% of the value for receivables overdue from 6 months to less than 1 year.
  - 50% of the value for receivables overdue from 1 year to less than 2 years.
  - 70% of the value for receivables overdue from 2 years to less than 3 years.
  - 100% of the value for receivables overdue for 3 years or more.

For receivables that are not yet overdue but are unlikely to be recovered: the provision is established based on the estimated potential loss.

#### **6. Inventories**

Inventories are recognized at the lower of cost and net realizable value.

The cost of inventories is determined as follows:

- Raw materials, goods: include purchase costs and other directly attributable costs incurred to bring the inventory to its current location and condition.
- Finished goods include the cost of raw materials, direct labor, and related manufacturing overhead allocated based on normal operating capacity.
- Work-in-progress costs include only the costs of main raw materials, labor costs, depreciation of assets used in production activities, and other manufacturing overheads related to production operations.

## NAGAKAWA GROUP JOINT STOCK COMPANY

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

### NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

as at 31 March 2025 and for the three-month period then ended (continued)

Net realizable value is the estimated selling price of inventories in the normal course of production and business operations, minus the estimated costs of completion and the estimated costs necessary to sell them.

The value of inventory is determined using the weighted average method and is accounted for using the perpetual inventory system.

A provision for inventory devaluation is established for each inventory item whose cost exceeds its net realizable value. For unfinished services, the provision is determined based on each type of service with a separate pricing structure. Increases or decreases in the provision for inventory devaluation that need to be recognized at the financial year-end are recorded in cost of goods sold.

#### 7. Tangible fixed assets

##### a) Principles of recording and depreciating tangible fixed assets

Tangible fixed assets are presented at cost less accumulated depreciation. The cost of tangible fixed assets includes all expenses incurred by the company to acquire the asset and bring it into a condition ready for use. Costs incurred after initial recognition are only added to the cost of tangible fixed assets if these costs are expected to result in future economic benefits from the use of the asset. Costs that do not meet this condition are immediately recognized as expenses.

When tangible fixed assets are sold or disposed of, the cost and accumulated depreciation are removed, and any resulting gain or loss from the disposal is recognized as income or expense in the period.

Tangible fixed assets are depreciated using the straight-line method based on the estimated useful life. The depreciation periods for various types of tangible fixed assets are as follows:

<u>Type of fixed assets</u>	<u>Number of years</u>
Buildings and structures	10 - 25
Machineries and equipment	06 - 10
Means of transportation	06 - 08
Office equipment	03-05
Others	05

#### 8. Intangible Assets

Intangible assets are presented at their cost less accumulated amortization.

The cost of an intangible asset includes all expenses incurred by the Company to acquire the asset until it is ready for use. Expenses related to intangible assets incurred after initial recognition are recognized as production or business expenses for the period, unless these costs are directly associated with a specific intangible asset and enhance its economic benefits.

When an intangible asset is sold or disposed of, its cost and accumulated amortization are removed from the books, and any resulting gain or loss from the disposal is recognized as income or expense in the year.

## **NAGAKAWA GROUP JOINT STOCK COMPANY**

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

### **NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

as at 31 March 2025 and for the three-month period then ended (continued)

---

The Company's intangible assets include:

#### ***Land use rights***

Land use rights refer to all actual costs incurred by the Company directly related to the use of land, including: expenses for acquiring land use rights, compensation costs, site clearance costs, land leveling costs, and registration fees,....

The land use rights of the Company are depreciated as follows:

- Legal transfer acquisition: Depreciated using the straight-line method based on the land lease term. Land use rights with no specified time limit are not subject to depreciation.

#### ***Computer software***

Costs related to computer software programs that are not integral to the associated hardware should not be capitalized. The cost of computer software is the total amount the Company has spent up until the software is ready for use. The computer software is amortized using the straight-line method over a period of 5 years.

### **9. Prepaid expenses**

Prepaid expenses are recognized as costs that have been incurred but relate to the operating results of multiple accounting years, with these costs being allocated to the operating expenses of future accounting years.

#### ***Tools and equipment***

Tools and equipment that are put into use are amortized over a straight-line basis with an allocation period not exceeding 3 years.

#### ***Major repairs***

Major repairs of factories are allocated to expenses using the straight-line method over a period not exceeding 03 years.

#### ***Goodwill***

Goodwill arising in business combinations resulting in a parent-subsidiary relationship is amortized to expense on a straight-line basis over 10 years.

### **10. Principles of accounting for payables**

Payables are recorded in detail by payment term, partner, original currency and other factors according to the management needs of the enterprise.

Payables that satisfy the definition of foreign currency items are revalued at the end of the period when preparing the Financial Statements.

### **11. Borrowings and financial leases**

The company must closely monitor the repayment terms of borrowings and financial leases. Payable amounts with a repayment period of more than 12 months from the reporting date are classified as long-term borrowings and financial leases. Amounts due for repayment within the next 12 months from the reporting date are classified as short-term borrowings and financial leases to facilitate payment planning.

For financial leases, the total lease liabilities reflected on the credit side of account 341 is the total amount payable, calculated as the present value of the minimum lease payments or the fair value of the leased asset.

## **NAGAKAWA GROUP JOINT STOCK COMPANY**

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

### **NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

as at 31 March 2025 and for the three-month period then ended (continued)

---

Borrowings and financial leases in foreign currencies must be converted into the accounting currency at the actual exchange rate at the transaction date;

- When repaying foreign currency borrowings and financial leases, the debit side of account 341 is converted according to the actual exchange rate recorded in the accounting books for each specific item;

- When preparing the financial statements, the balances of foreign currency borrowings and financial leases must be revalued according to the actual exchange rate at the reporting date.

- The exchange rate differences arising from the settlement and revaluation at the end of the period of foreign currency borrowings and financial leases are recognized in the financial income or financial expenses.

#### **12. Construction in progress**

Construction in progress reflects costs directly related (including interest expenses in accordance with the Company's accounting policy) to assets under construction, machinery and equipment being installed for production, leasing, and management purposes, as well as costs related to the repair of fixed assets under renovation. These assets are recorded at cost and are not subject to depreciation.

#### **13. Payables and accrued**

Payables and accrued expenses are recognized for amounts owed in the future related to goods and services that have been received. Accrued expenses are recognized based on reasonable estimates of the amounts payable.

The classification of payables as trade payables, accrued expenses, and other payables is carried out according to the following principles:

- Accounts payable to suppliers reflect trade payables arising from transactions involving the purchase of goods, services, and assets, where the supplier is an independent entity from the Company. This includes payables arising from imports through a consignee.
- Accrued expenses reflect amounts owed for goods or services received from the supplier or provided to the buyer but not yet paid due to the absence of invoices or incomplete accounting documentation. It also includes payables to employees for wages, vacation pay, and other production or business expenses that need to be accrued.
- Internal payables reflect amounts owed between the parent company and its dependent branches that do not have legal status and are dependent on the parent company's accounting system.

Other payables reflect amounts owed that are non-commercial in nature and not related to the purchase, sale, or provision of goods and services.

#### **14. Provisions**

Provisions are recognized when the Company has a present obligation (legal or constructive) arising from a past event, and the settlement of this obligation is expected to result in an outflow of economic benefits, with the value of the obligation being reliably estimated.

If the time value is material, the provision will be determined by discounting the future amount required to settle the obligation using a pre-tax discount rate, reflecting current market assessments of the time value of money and the specific risks of the obligation. The increase in the provision due to the passage of time is recognized as a financial expense.

## **NAGAKAWA GROUP JOINT STOCK COMPANY**

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

### **NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

as at 31 March 2025 and for the three-month period then ended (continued)

---

The Company's provisions payable include:

#### ***Provision for product warranties***

Provision for product warranties is made for each type of product or goods with warranty commitments.

The provision for product warranties is set at 0.5% - 1% of the revenue from the products and goods. This ratio is estimated based on historical warranty cost data from previous years and the weighted probability of all possible outcomes with their corresponding probabilities. Increases or decreases in the warranty provision that need to be recognized at the financial year-end are recorded as selling expenses.

#### ***Provision for construction warranties***

Provision for construction warranties are made for each construction project with warranty commitments.

The provision for construction warranties is set at 5% of the revenue from construction projects that require warranty. This ratio is estimated based on historical warranty cost data from previous years and the weighted probability of all possible outcomes with their corresponding probabilities. When the warranty period expires, any unused or partially used construction warranty provision is recognized as other income.

## **15. Owners' Equity**

### ***Issued share capital***

Issued share capital is recognized based on the actual amount contributed by shareholders.

### ***Share premium***

Share premium is recognized as the difference between the issue price and the par value of the shares when they are initially issued, when additional shares are issued, the difference between the reissue price and the book value of treasury shares, and the equity component of convertible bonds upon maturity. Direct costs related to the issuance of additional shares and the reissue of treasury shares are deducted from the share premium.

### ***Other owners' capital***

Other owners' capital is formed from additions from business operations, asset revaluation, and the remaining value between the fair value of donated, gifted, or funded assets after deducting any related taxes payable (if applicable).

### ***Treasury shares***

When the company repurchases its own shares, the amount paid, including related transaction costs, is recognized as treasury shares and reflected as a deduction in shareholders' equity. Upon reissue, the difference between the reissue price and the book value of the treasury shares is recorded under the "Share Premium".

### ***Undistributed profits***

It reflects business results (profit, loss) after corporate income tax and the situation of profit distribution or loss of the enterprise.

### ***Other funds***

Other funds are set aside and used according to the Company Charter and the Resolution of the annual General Meeting of Shareholders.

## **NAGAKAWA GROUP JOINT STOCK COMPANY**

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

### **NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

as at 31 March 2025 and for the three-month period then ended (continued)

---

#### **16. Profit distribution**

The net profit after corporate income tax is distributed to shareholders after setting aside funds in accordance with the resolutions of the company's general meeting of shareholders and the regulations of the law.

The distribution of profits to shareholders takes into account non-cash items within the undistributed after-tax profit that may affect cash flow and the ability to pay dividends, such as gains from revaluation of assets contributed as capital, gains from revaluation of monetary items, financial instruments, and other non-cash items.

Dividends are recognized as a liability when approved by the General Meeting of Shareholders.

#### **17. Recognition of revenue and income**

##### ***Revenue from the sale of goods***

Revenue from the sale of goods are recognized when the following conditions are simultaneously met:

- The enterprise has transferred most of the risks and rewards associated with the ownership of the goods to the buyer.
- The enterprise no longer retains control over the goods as the owner or has control over the goods.
- The revenue is determined to be reasonably certain. When the contract stipulates that the buyer has the right to return the purchased products or goods under specific conditions, revenue is only recognized when those specific conditions no longer exist, and the buyer no longer has the right to return the goods (except in cases where the customer has the right to return goods in exchange for other goods or services).
- The enterprise has received or will receive economic benefits from the sales transaction.
- The costs related to the sales transaction can be reliably estimated.

##### ***Revenue from service provision***

The revenue from service provision are recognized when the outcome of the transaction can be reliably determined. In cases where the service is performed over multiple periods, the revenue is recognized in the period based on the extent of work completed as of the end of the accounting period. The outcome of the service provision transaction is determined when all of the following conditions are met:

- The revenue is determined to be reasonably certain. When the contract specifies that the buyer has the right to return the purchased service under certain conditions, revenue is only recognized when those specific conditions no longer exist, and the buyer no longer has the right to return the provided service.
- There is a possibility of obtaining economic benefits from the service provision transaction.
- The portion of work completed as of the end of the financial year can be determined.
- The costs incurred for the transaction and the costs to complete the service provision transaction can be determined.

##### ***Interest income***

Interest income is recognized on an accrual basis and is determined based on the balance of deposit accounts and the actual interest rate for each period.

## **NAGAKAWA GROUP JOINT STOCK COMPANY**

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

### **NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

as at 31 March 2025 and for the three-month period then ended (continued)

---

#### **18. Accounting principles for revenue deductions**

Revenue deductions include: Trade discounts, sales discounts, and sales returns.

Trade discounts, sales discounts, and sales returns that occur in the same period as the sale of products, goods, or services are adjusted to reduce the revenue of the period in which they arise;

In cases where products, goods, or services have been sold in previous periods, and trade discounts, sales discounts, or sales returns occur in a later period, the company is allowed to reduce revenue based on the principle of adjusting the revenue in the period in which the discount, allowance, or return is recognized:

+ If products, goods, or services that were consumed in previous periods require a price reduction, a trade discount, or are returned, but the events occur before the financial report is issued, accounting must treat this as an event requiring adjustment after the balance sheet date and reduce revenue in the financial statements of the reporting period (the previous period).

+ In the case where products, goods, or services are subject to price reductions, trade discounts, or returns after the financial report has been issued, the company must reduce the revenue of the period in which the event occurs (the subsequent period).

#### **19. Cost of Goods Sold**

The cost of goods sold for the year is recognized in accordance with the revenue generated during the period and ensures compliance with the prudence principle.

For direct material costs that exceed normal consumption, labor costs, and fixed production overheads that are not allocated to the value of goods in inventory, accounting must immediately include them in the cost of goods sold (after deducting any compensation, if applicable), even when the products or goods have not been recognized as sold.

The provision for inventory write-down is included in the cost of goods sold based on the quantity of inventory and the difference between the net realizable value and the original cost of the inventory. When determining the volume of inventory to be written down, accounting must exclude inventory that has been contracted for sale (with a net realizable value not lower than its carrying value) but has not yet been transferred to the customer, if there is reliable evidence that the customer will not withdraw from fulfilling the contract.

#### **20. Financial expenses**

It reflects financial operating costs, including expenses or losses related to financial investment activities, loan and borrowing costs, joint venture and affiliate capital contribution costs, short-term securities disposal losses, securities transaction costs; provision for impairment of trading securities, provision for investment losses in other entities, losses arising from the sale of foreign currencies, and foreign exchange rate losses....

#### **21. Selling expenses and administrative expenses**

Selling expenses reflect the actual costs incurred during the process of selling products, goods, or providing services, including costs for offering, product promotion, advertising, sales commissions, product warranty costs (excluding construction activities), storage, packaging, and transportation costs...

## NAGAKAWA GROUP JOINT STOCK COMPANY

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

### NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

as at 31 March 2025 and for the three-month period then ended (continued)

Administrative expenses reflect the general management costs of the company, including expenses for the salaries of company management staff (wages, salaries, allowances, etc.); social insurance, health insurance, trade union funds, and unemployment insurance for the company's management staff; office materials, labor tools, and depreciation of fixed assets used for company management; land rent, business license tax; provisions for doubtful accounts receivable; outsourced services (electricity, water, telephone, fax, property insurance, fire insurance, etc.); and other cash expenses (entertainment, client meetings, etc...).

## 22. Corporate income tax

### *Current income tax*

Current income tax is the tax calculated based on taxable income. The taxable income differs from accounting profit due to adjustments for temporary differences between tax and accounting, non-deductible expenses, as well as adjustments for income that is exempt from tax and carried-forward losses.

The current statutory corporate income tax rate applicable to the Company is 20%.

### *Deferred income tax*

Deferred income tax is the income tax that will be paid or refunded due to temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the tax base. Deferred income tax liabilities are recognized for all taxable temporary differences. Deferred income tax assets are recognized only when it is probable that there will be sufficient taxable profits in the future to utilize the temporary differences that can be deducted.

The carrying amount of deferred income tax assets is reviewed at the end of each fiscal year and is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the benefit of some or all of the deferred tax asset to be utilized. Deferred income tax assets that have not been previously recognized are reviewed at the end of each fiscal year and are recognized when it becomes probable that sufficient taxable profits will be available to utilize the unrecognized deferred tax assets.

Deferred income tax assets and deferred income tax liabilities are determined based on the tax rates expected to apply in the years when the asset is realized or the liability is settled, using the tax rates enacted at the end of the fiscal year. Deferred income tax is recognized in the statement of profit or loss and is only directly recognized in equity when the tax is related to items recognized directly in equity.

Deferred income tax assets and deferred income tax liabilities are offset when:

- The company has the legal right to offset the current income tax assets with the current income tax liabilities payable.
- The deferred income tax assets and deferred income tax liabilities are related to corporate income tax managed by the same tax authority.

The company intends to settle the current income tax liabilities and current income tax assets on a net basis or recover the assets simultaneously with the settlement of liabilities in each future period when the significant amounts of deferred income tax liabilities or deferred income tax assets are settled or recovered.

## NAGAKAWA GROUP JOINT STOCK COMPANY

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

### NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

as at 31 March 2025 and for the three-month period then ended (continued)

---

## 23. Financial instruments

### i. Financial assets

#### *Classification of Financial Assets*

The company classifies financial assets into the following categories: financial assets measured at fair value through profit or loss, held-to-maturity investments, loans and receivables, and available-for-sale financial assets. The classification of these financial assets depends on the nature and purpose of the financial asset and is determined at the time of initial recognition.

#### *Financial assets are recognized at fair value through the income statement*

Financial assets are classified as measured at fair value through profit or loss if they are held for trading or are designated as fair value through profit or loss at initial recognition.

Financial assets are classified as held-for-trading securities if:

- Purchased or created primarily for the purpose of selling in the short term;
- The company intends to hold them for the purpose of short-term profit;
- Derivative financial instruments (except for derivative financial instruments designated as a financial guarantee contract or an effective hedging instrument).

#### *Held-to-maturity investments*

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and a fixed maturity date that the company intends and has the ability to hold until maturity.

#### *Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not listed on the market.

#### *Ready-for-sale financial assets*

Available-for-sale financial assets are non-derivative financial assets that are designated as available for sale or are not classified as financial assets measured at fair value through profit or loss, held-to-maturity investments, or loans and receivables.

#### *The initial carrying amount of a financial asset*

Financial assets are recognized on the purchase date and derecognized on the sale date. At the initial recognition, the financial asset is determined at the purchase price/issuance cost plus any other costs directly attributable to the acquisition or issuance of the financial asset.

### ii. Financial liabilities

The company classifies financial liabilities into the following categories: financial liabilities measured at fair value through profit or loss, and financial liabilities measured at amortized cost. The classification of financial liabilities depends on the nature and purpose of the liability and is determined at the time of initial recognition.

#### *Financial liabilities measured at fair value through profit or loss*

Financial liabilities are classified as measured at fair value through profit or loss if they are held for trading or are designated as fair value through profit or loss at initial recognition.

Financial liabilities are classified as held-for-trading securities if:

- Issued or created primarily for the purpose of repurchasing in the short term;
- The company intends to hold them for the purpose of short-term profit;
- Derivative financial instruments (except for derivative financial instruments designated as a financial guarantee contract or an effective hedging instrument).

## NAGAKAWA GROUP JOINT STOCK COMPANY

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

### NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

as at 31 March 2025 and for the three-month period then ended (continued)

#### *Financial liabilities measured at amortized cost*

Financial liabilities measured at amortized cost are determined by the initial carrying amount of the financial liability, less any principal repayments, plus or minus the cumulative amortization of the difference between the initial carrying amount and the maturity value, calculated using the effective interest method, less any impairments (either directly or through the use of a provision account) due to a decrease in value or non-recovery.

The effective interest method is the method used to calculate the amortized cost of a financial liability or group of financial liabilities and allocate interest income or expense over the relevant period. The effective interest rate is the rate that discounts the estimated future cash flows that will be paid or received throughout the expected life of the financial instrument, or shorter if necessary, to the net present value of the financial liability.

#### *The initial carrying amount of a financial liability*

At initial recognition, financial liabilities are determined at the issue price plus any directly attributable costs incurred in issuing the financial liability.

#### *iii. Equity instruments*

Equity instruments are contracts that represent a residual interest in the assets of the company after deducting all liabilities.

#### **24. Segment report**

A business segment is a distinguishable part that engages in the production or provision of goods or services and has risks and economic benefits that are different from those of other business segments.

A geographical segment is a distinguishable part that engages in the production or provision of goods or services within a specific economic environment and has risks and economic benefits that are different from those of business segments in other economic environments.

#### **25. Related parties**

Parties are considered related if one party has the ability to control or exert significant influence over the other party in making financial and operating policy decisions. Parties are also considered related if they share joint control or significant common influence.

In considering the relationship between related parties, the nature of the relationship is emphasized more than the legal form.

Transactions with related parties during the year are presented in note VIII.1

## NAGAKAWA GROUP JOINT STOCK COMPANY

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

### NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

as at 31 March 2025 and for the three-month period then ended (continued)

---

#### 3. Financial Risk Management

The Company's operations give rise to the following financial risks: credit risk, liquidity risk, and market risk. The Board of Directors is responsible for establishing policies and controls to mitigate financial risks, as well as overseeing the implementation of the established policies and controls.

##### A, Credit risk

Credit risk is the risk that one party involved in a contract is unable to fulfill its obligations, resulting in financial losses for the Company.

The Company faces credit risks primarily arising from accounts receivable from customers and bank deposits.

##### *Accounts receivable from customers*

The Company minimizes credit risk by only engaging in transactions with financially stable entities, requiring the opening of letters of credit or securing assets for first-time or unknown financial entities. Additionally, the accounts receivable staff regularly monitors outstanding debts to expedite collections.

The Company's accounts receivable from customers are related to multiple entities and individuals, so the credit risk concentration for accounts receivable is low.

##### *Term deposits*

The Company's term and non-term bank deposits are placed at domestic banks. The Board of Directors does not perceive any significant credit risk from these deposits.

##### *Loans*

The Company lends money to its subsidiaries and key management members. These entities and individuals are all reputable and have good payment capacity, so the credit risk for the loans is low.

##### B, Liquidity risk

Liquidity risk is the risk that the company faces difficulties in meeting its financial obligations due to a lack of cash.

The Board of General Directors is ultimately responsible for managing liquidity risk. The company's liquidity risk primarily arises from the mismatch in the maturity dates of financial assets and financial liabilities.

The Company manages liquidity risk by maintaining an appropriate amount of cash and cash equivalents, as well as loans at a level deemed sufficient by the Board of Directors to meet the Company's operational needs, in order to minimize the impact of cash flow fluctuations.

**NAGAKAWA GROUP JOINT STOCK COMPANY**

Address: Xuan Thuong 1 Residential Area, Phuc Thang Ward, Phuc Yen City, Vinh Phuc Province, Vietnam

**NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

as at 31 March 2025 and for the three-month period then ended (continued)

The payment terms of the financial liabilities are based on the expected payments under the contracts, undiscounted, as follows:

	Within 1 year	From 1 to 5 years	Over 5 years	Total
<b>Ending balance</b>				
Borrowing	1,071,283,460,229	-	-	1,071,283,460,229
Trade payables	383,481,117,663	-	-	383,481,117,663
Other payables	88,348,228,782	-	-	88,348,228,782
<b>Total</b>	<b>1,543,112,806,674</b>	-	-	<b>1,543,112,806,674</b>
<b>Beginning balance</b>				
Borrowing	1,137,306,992,519	-	-	1,137,306,992,519
Trade payables	182,004,186,374	-	-	182,004,186,374
Other payables	16,266,845,929	-	-	16,266,845,929
<b>Total</b>	<b>1,335,578,024,822</b>	-	-	<b>1,335,578,024,822</b>

The Board of Directors believes that the level of concentration risk related to debt repayment is low. The Company has the ability to settle due debts through cash flows from operating activities and proceeds from maturing financial assets. The Company has access to sufficient sources of funding and loans maturing within 12 months can be rolled over with existing lenders.

**C, Market Risk**

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices.

Market risk includes three types: foreign exchange risk, interest rate risk, and other price risks.

*Foreign exchange risk*

Foreign exchange risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in exchange rates.

The company imports raw materials for production and exports products with the main transaction currencies being USD and EUR, so it is affected by fluctuations in exchange rates.

The Company manages risks related to exchange rate fluctuations by optimizing debt payment terms, forecasting foreign exchange rates, maintaining a reasonable loan and debt structure between foreign currencies and VND, choosing the time to buy and pay foreign currencies at low exchange rates, and optimally using existing cash resources to balance exchange rate risks and liquidity risks.

*Commodity/raw material price risk*

The Company is exposed to the risk of fluctuations in commodity/raw material prices. The Company manages commodity/raw material price risk by closely monitoring relevant market information and situations to manage purchase timing, production planning and inventory levels appropriately.

The Company has not used derivative instruments to hedge commodity/raw material price risks.

<b>Total</b>	<b>1,543,112,806,674</b>	<b>1,335,578,024,822</b>	<b>1,543,112,806,674</b>	<b>1,335,578,024,822</b>

The fair value of financial assets and financial liabilities is reflected at the value that the financial instrument could be exchanged for in a current transaction between knowledgeable and willing parties.

The company uses the following methods and assumptions to estimate fair value:

- The fair value of cash and cash equivalents, trade receivables, loans, other receivables, borrowings, payables to suppliers and other short-term payables is equivalent to the book value (less the provision for the estimated uncollectible portion) of these items due to their short maturity.
- The fair value of held-to-maturity investments and ready-for-sale financial assets listed on the stock market is the published transaction price at the end of the accounting period. For unlisted held-to-maturity investments and ready-for-sale financial assets with transaction prices published by 3 securities companies at the end of the accounting period, the fair value of these investments is the average price based on the transaction prices published by 3 securities companies..
- The fair value of loans, trade receivables, other receivables, borrowings, trade payables and other long-term payables, held-to-maturity investments that are not listed on the stock market and do not have a trading price announced by 3 securities companies is estimated by discounting cash flows at the interest rate applicable to debts with similar characteristics and remaining maturity.

## **NAGAKAWA GROUP JOINT STOCK COMPANY**

### **NOTE TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

as at 31 March 2025 and for the three-month period then ended (continued)

---

The Company has not yet conducted an official valuation of unlisted available-for-sale financial assets and there are no published trading prices of the three securities companies. However, the Board of Directors assesses that the fair value of these financial assets is not materially different from the carrying value.
