## NOTES TO FINANCIAL STATEMENTS

From 01/01/2025 to 31/03/2025

### I. Characteristics of the company's operations

#### 1. Form of capital ownership

Sao Mai - Ben Dinh Petroleum Investment Joint Stock Company (hereinafter referred to as "the Company") was established and operates in Vietnam in the form of a joint stock company under Investment Certificate No. 49121000147 dated September 27, 2012 and the first change on October 27, 2016 issued by the People's Committee of Ba Ria - Vung Tau province. According to the first Business Registration Certificate No. 4903000636 dated May 7, 2007 and the 10th change No. 3500794814 dated July 5, 2024.

As of March 31, 2025, the Company's charter capital is VND 500,000,000,000, divided into 50,000,000 common shares, each with a par value of VND 10,000. The Company's shares are listed on Upcom with the stock code PSB.

The total number of employees of the Company as of March 31, 2025 is 68 (December 31, 2024 is 68).

#### 2. Scope of business:

The fields of operation, products and services, and goods provided to the market are detailed in the Company's business license.

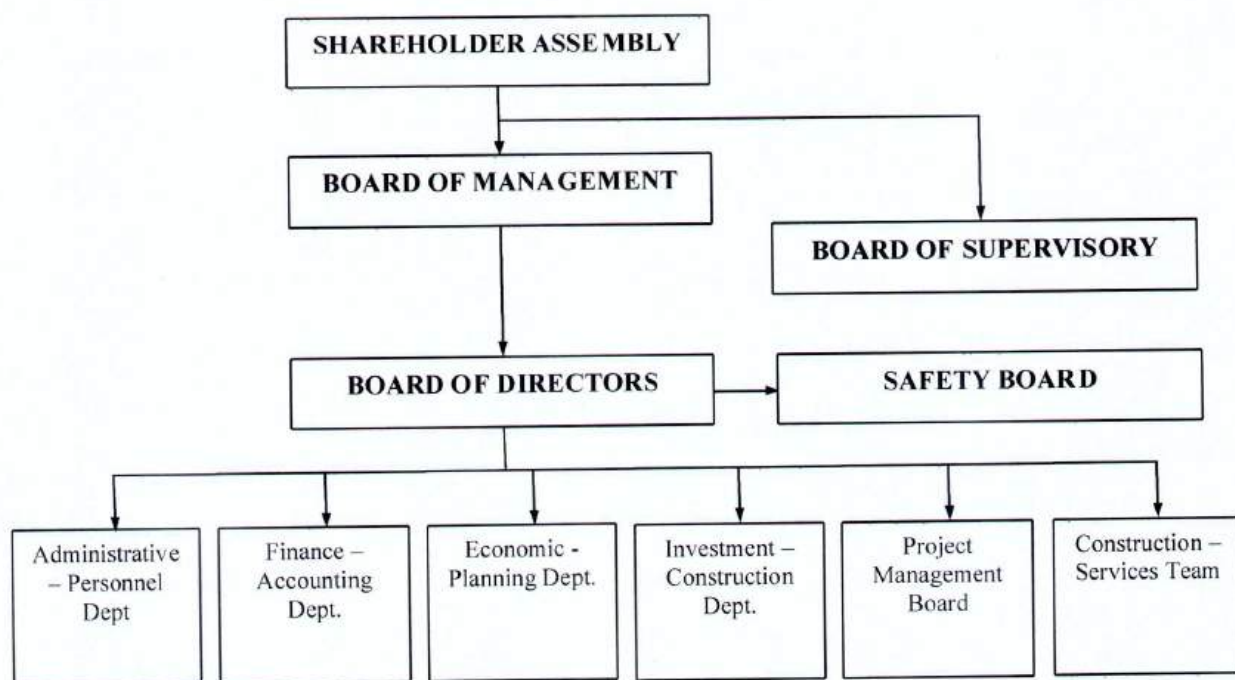

#### 3. Main business lines and activities

- Operation of Sao Mai-Ben Dinh container port complex and economic zone; Warehouse leasing.
- Building and repairing ships, floating vehicles; Assembling drilling rigs and floating structures for the oil and gas industry; Manufacturing, repairing and leasing containers; Buying and selling machinery and equipment for the oil and gas and maritime industries;
- Construction of works serving the oil and gas industry, warehouses for storing oil and gas products, oil - gas - fuel pipelines; Construction of civil and industrial engineering works; Construction of water supply and drainage pipelines; Construction of construction structures; Construction of electrical works up to 35KV; Construction of underground and underwater works; Construction of all kinds of houses;
- Buying and selling machinery and equipment for the Oil and Gas and Maritime industries;
- Transport business by sea and inland waterways; Trading in fertilizers, construction materials, chemicals (except for highly toxic and banned chemicals, chemicals used in industry);
- Wholesale of silk, fiber, textile yarn; wholesale of cotton fiber raw materials, dyes; Wholesale of packaging materials and packaging for the textile industry; Wholesale of asphalt and chemical raw materials, additives for asphalt production; Wholesale of plastics in primary form: Polypropylene resins and other related products;
- Leasing of means of transport, warehouses; transporting goods by road; Transporting crude oil and petrochemical products; Shipping agency services;
- Labor leasing.

#### 4. Normal production and business cycle

The Company's normal production and business cycle is carried out within a period of no more than 12 months.

**5. Company organization chart:**

**II. Accounting period, currency used in accounting:**

**1. Accounting period**

The Company's fiscal year begins on January 1 and ends on December 31.

**2. Currency used in accounting:**

Financial statements are presented in Vietnamese Dong (VND)

**III. Applicable accounting standards and regimes:**

The Company applies the enterprise accounting regime according to Circular 200/2014/TT-BTC issued on December 22, 2014 and Circular No. 53/2016/TT-BTC dated March 21, 2016 amending and supplementing a number of articles of Circular No. 200/2014/TT-BTC.

The financial statements are presented in Vietnamese Dong (VND), under the historical cost principle and in accordance with Vietnamese Accounting Standards, the Vietnamese Accounting System and relevant current regulations in Vietnam.

**IV. Summary of significant accounting policies:**

The following are the principal accounting policies applied by the Company in preparing its financial statements:

**Types of exchange rates applied in accounting**

The Company applies exchange rates according to the guidance of Circular No. 200/2014-TT BTC dated December 22, 2014 and Circular No. 53/2016/TT-BTC dated March 21, 2016.

**Accounting estimates**

The preparation of financial statements in accordance with Vietnamese accounting standards, accounting regimes for enterprises and legal regulations related to the preparation and presentation of financial statements

requires the Board of Directors to make estimates and assumptions that affect the reported figures on liabilities, assets and the presentation of contingent liabilities and assets at the date of the financial statements as well as the reported figures on revenues and expenses during the financial year. Although accounting estimates are made with all the knowledge of the Board of Directors, the actual figures that arise may differ from the estimates and assumptions made.

## **1. Financial instruments**

### **Initial notes**

*Financial assets:* At the date of initial recognition, financial assets are recorded at cost plus transaction costs that are directly attributable to the acquisition of the financial assets. The Company's financial assets include cash and cash equivalents, short-term financial investments, trade receivables, other receivables, deposits and other long-term investments.

*Financial liabilities:* On the date of initial recognition, financial liabilities are recorded at cost less transaction costs directly attributable to the issuance of such financial liabilities. The Company's financial liabilities include trade payables and accrued expenses.

### **Re-evaluate after initial recording**

Currently, there are no regulations on revaluation of financial instruments after initial recognition.

## **2. Cash and cash equivalents**

Cash and cash equivalents include cash on hand, deposits, short-term or highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

## **3. Principles of accounting for financial investments**

Held-to-maturity investments: include investments that the Company has the intention and ability to hold until maturity. Held-to-maturity investments are mainly term bank deposits with the purpose of earning periodic interest.

Held-to-maturity investments are recognized on the acquisition date and initially measured at cost. Interest income from investments held to maturity after the acquisition date is recognized in the Income Statement on an accrual basis.

Provision for doubtful debts of investments held to maturity is made in accordance with current accounting regulations.

## **4. Provision for doubtful debts**

Provision for doubtful debts is made for receivables that are overdue for six months or more, or receivables that the debtor is unlikely to be able to pay due to liquidation, bankruptcy or similar difficulties, based on the provisions in Circular No. 48/2019/TT-BTC issued by the Ministry of Finance on August 8, 2019 and Circular No. 24/2022/TT-BTC dated April 7, 2022 of the Ministry of Finance.

## **5. Inventory**

Inventories are stated at cost. Where the net realizable value is lower than the cost price, the net realizable value shall be used. The cost of inventories comprises direct materials, direct labour and, where applicable, those overheads incurred in bringing the inventories to their present location and condition.

Cost of inventories is determined using the weighted average method. Net realizable value is determined as the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.

The Company's inventories mainly consist of work in progress related to projects and costs incurred related to project management consulting services.

Provision for inventory devaluation is made for obsolete, substandard inventories and when the book value of inventories is higher than net realizable value at the balance sheet date.

## **6. Fixed assets and depreciation**

Tangible fixed assets are stated at cost less depreciation.

The initial cost of tangible fixed assets comprises the purchase price and any costs directly attributable to bringing the asset to working condition for its intended use.

Tangible fixed assets are depreciated according to Circular 45/2013-TT-BTC dated April 25, 2013 issued by the Ministry of Finance, effective from June 10, 2013.

Depreciation is calculated using the straight-line method over the estimated useful life, as follows:

	Year
Houses, buildings	6-40
Machinery & Equipment	7-15
Means of transport	7
Office equipment	3
Other tangible assets	5-10

## **7. Assets lease**

A lease is classified as an operating lease when the lessor retains a significant portion of the rewards and is subject to the risks of ownership of the asset. Operating lease expenses are recognised in the income statement on a straight-line basis over the lease term. Consideration received or receivable as an incentive to enter into an operating lease is also recognised on a straight-line basis over the lease term.

Operating lease revenue is recognised on a straight-line basis over the lease term. Initial direct costs incurred in negotiating an operating lease are recognised as part of the carrying amount of the leased asset and are also recognised on a straight-line basis over the lease term.

## **8. Intangible fixed assets and depreciation**

Intangible fixed assets represent accounting software and are stated at cost less accumulated amortization. Accounting software is amortized using the straight-line method over 05 years.

## **9. Cost of unfinished basic construction**

Assets in the course of construction for production, rental or administrative purposes, or for other purposes, are carried at cost. Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use.

## **10. Real estate investment**

Investment properties comprise infrastructures held by the Company to earn rental income or for capital appreciation and are stated at cost less accumulated depreciation. The cost of purchased investment properties comprises the purchase price and directly attributable costs such as legal fees, property transfer taxes and other transaction costs. The cost of self-constructed investment properties is the final settlement value of the construction or directly attributable costs of the investment properties.

Investment properties are depreciated using the straight-line method over the lease term.

## **11. Prepaid expenses**

Prepaid expenses include actual expenses that have been incurred but are related to the business performance of many accounting periods.

Long-term prepaid expenses include the value of tools, supplies, and small components issued for use and are considered to be capable of providing future economic benefits to the Company for a period of 01 year or more. These expenses are capitalized as prepayments and allocated to the Income Statement, using the straight-line method in accordance with current accounting regulations.

## **12. Provisions for payables**

Provisions are recognised when the Company has a present obligation as a result of a past event, and it is probable that the Company will be required to settle that obligation. Provisions are measured based on management estimate of the expenditure required to settle the obligation at the balance sheet date.

## **13. Revenue recognition**

Sales revenue is recognized when all five (5) following conditions are satisfied:

- (a) The Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- (b) The Company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods;
- (c) Revenue is measured with relative certainty;
- (d) It is probable that the economic benefits associated with the transaction will flow to the Company; and
- (e) Identify the costs associated with a sales transaction.

Revenue from a transaction involving the rendering of services is recognised when the outcome of the transaction can be measured reliably. Where a transaction involving the rendering of services is spread over several periods, revenue is recognised in each period based on the results of the stage of completion of the work at the balance sheet date of that period. The outcome of a transaction involving the rendering of services is recognised when all four (4) of the following conditions are met:

- (a) Revenue is measured with relative certainty;
- (b) It is possible to obtain economic benefits from the transaction of providing that service;
- (c) Determine the stage of completion of the work at the balance sheet date; and
- (d) Identify the costs incurred for the transaction and the costs to complete the transaction to provide that service.

Interest income is recognized on an accrual basis, based on the outstanding balances and the applicable interest rate.

Interest from financial investments is recognized when the Company is entitled to receive interest.

## **14. Construction contract**

When the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the end of the reporting period, measured as a proportion of the estimated total contract costs incurred for work performed to date, except where this proportion is not representative of the stage of completion. This may include additional costs, compensation and performance bonuses as agreed with the customer.

When the outcome of a contract cannot be estimated reliably, revenue is recognised only to the extent of contract costs incurred that are likely to be recoverable.

## **15. Foreign currency**

The Company applies the treatment of exchange rate differences according to the guidance of Vietnamese Accounting Standard No. 10 (VAS 10) "Effects of changes in exchange rates". Accordingly, transactions arising in foreign currencies are converted at the exchange rate on the date of the transaction. Exchange rate differences arising from these transactions are recorded in the income statement.

The balances of cash assets and receivables and payables denominated in foreign currencies at the balance sheet date are translated at the exchange rate on that date and treated as follows:

Exchange rate differences arising from revaluation of cash, short-term receivables and short-term payables in foreign currencies at the end of the accounting period after offsetting the increase and decrease, the remaining difference is included in financial income or financial expenses in the period.

#### **16. Borrowing costs**

Borrowing costs directly related to the purchase, construction or production of fixed assets for the period before they are put into use or business are added to the original cost of fixed assets (capitalized), borrowing costs incurred after the assets have been put into use or business are recorded as expenses in the period.

All other borrowing costs are recognized in the Income Statement when incurred.

#### **17. Tax**

Corporate income tax represents the sum of current and deferred tax liabilities.

The tax currently payable is based on taxable profit for the period. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other periods (including losses carried forward, if any) and it further excludes items that are not taxable or deductible.

Deferred income tax is calculated on the differences between the carrying amount and the tax base of assets or liabilities in the financial statements and is recorded under the balance sheet method.

Deferred tax liabilities should be recognized for all temporary differences while deferred tax assets are recognized only to the extent that it is probable that future taxable profits will be available against which the temporary differences can be used.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled. Deferred tax is recognised in the income statement, except when it relates to items recognised directly in equity, in which case the deferred tax is also recognised in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The determination of the Company's corporate income tax payable and deferred income tax is based on current tax regulations. However, these regulations are subject to change from time to time and the ultimate determination of corporate income tax depends on the results of the examination by the competent tax authority.

Other taxes are applied according to current tax laws in Vietnam.
