5. The company structure consists of the head office and branches, which are construction factories

- Construction Factory No. 1: Established on March 16, 2015, in Vũng Tàu City, Bà Rịa - Vũng Tàu Province.
- Construction Factory No. 2: Established on March 16, 2015, in Vũng Tàu City, Bà Rịa - Vũng Tàu Province.
- Construction Factory No. 3: Established on March 16, 2015, in Vũng Tàu City, Bà Rịa - Vũng Tàu Province.
- Construction Factory No. 5: Established on November 30, 2011, in Vũng Tàu City, Bà Rịa - Vũng Tàu Province, dissolved under Decision No. 31/QĐ-HĐQT dated April 13, 2017.

II. Accounting period, currency used in accounting:

1. Accounting year (from 1/1 to 31/12)

The Company's financial year begins on January 1 and ends on December 31 of the calendar year
The accounting period of the Company's first financial statements is from January 1 to December 31

2. Currency Used in Accounting: VND (Vietnamese Dong)

Method of Converting Other Currencies: The currency used is VND.

The method of converting other currencies is based on the exchange rate from the State Bank of Vietnam.

III. Applicable accounting standards and system

1. Applicable accounting standards: Apply circular No. 200/2014/TT-BTC dated December 22, 2014 of the Minister of Finance.
2. Statement on Compliance with Accounting Standards and Regulations: The Board of Management ensures that the requirements of the current Vietnamese accounting standards and regulations for enterprises have been fully complied with in the preparation of the financial statements.

IV. Applicable accounting policies:

1. Accounting estimates:

- The preparation of financial statements in compliance with accounting standards, the Vietnamese accounting standard for enterprise, and relevant legal regulations requires the Board of Management to make estimates and assumptions that affect the reported figures for liabilities, assets, and the presentation of potential liabilities and assets as of the financial statement date, as well as the reported figures for revenue and expenses throughout the fiscal year. Although the accounting estimates are made with the full understanding of the Board of Management, the actual results may differ from the estimates and assumptions made.

2. Cash and cash equivalents:

- Cash and cash equivalents include cash on hand, demand deposits, short-term investments with high liquidity, easily convertible to cash, and with minimal risk of value fluctuations.

3. Account receivable:

- Accounts receivable represents the amounts expected to be collected from customers or other parties. Accounts receivable are presented at their book value, less any provision for doubtful debts.
- Provision for doubtful debts is made for receivables that are overdue by six months or more, or for receivables where the debtor is unlikely to pay due to liquidation, bankruptcy, or similar difficulties. The Board of Management of the Company has carefully evaluated and considered the recoverability of the accounts receivable and believes that the provision as of September 30, 2024, is appropriate given the Company's actual situation.

4. Inventories:

- Inventory is recognized at the lower of cost and net realizable value. The cost of inventory includes direct material costs, direct labor costs, and overhead costs, if any, incurred to bring the inventory to its current location and condition. The cost of inventory is determined using the weighted average method. The net realizable value is determined by estimated selling prices less estimated costs to complete the product and costs for marketing, selling, and distribution.
- The Company's provision for inventory impairment is made in accordance with current accounting regulations. Accordingly, the Company is allowed to create provisions for inventory that is obsolete, damaged, of inferior quality, or in cases where the cost of inventory exceeds its net realizable value at the end of the accounting period.

5. Tangible fixed assets and depreciation:

- Tangible fixed assets are presented at cost less accumulated depreciation.
- The cost of tangible fixed assets includes the purchase price and all other direct costs incurred to bring the asset to its ready-to-use condition.
- Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives, as follows:

	Depreciation year
Building, structures	5 - 40 years
Machinery and equipment	5 - 7 years
Transportation	5 - 8 years
Office equipment	3 - 5 years

6. Leased assets:

- A lease is classified as a finance lease when substantially all the risks and rewards of ownership are transferred to the lessee. All other leases are classified as operating leases.
- The Company recognizes assets under finance leases as its own assets at the fair value of the leased assets at the inception of the lease or at the present value of the minimum lease payments, whichever is lower. Corresponding lease liabilities are recognized on the balance sheet as finance lease obligations. Lease payments are allocated between finance costs and principal repayment to ensure a constant periodic interest rate on the remaining balance of the liability. Finance costs are recognized in the statement of profit or loss unless they are directly attributable to the acquisition of the leased asset, in which case they are capitalized in accordance with the Company's accounting policy on borrowing costs.
- A lease is classified as an operating lease when the lessor retains substantially all the risks and rewards of ownership. Operating lease expenses are recognized in the statement of profit or loss on a straight-line basis over the lease term. Any payments received or receivable to facilitate the signing of an operating lease are also recognized on a straight-line basis over the lease term.
- Assets under finance leases are depreciated over their estimated useful lives, similar to assets owned by the Company, as follows:

	Depreciation
Transportation	7 - 8 years

7.1. Land use rights:

- Intangible fixed assets represent the value of land use rights for Lot 35G, 30/4 Street, Vung Tau City, Ba Ria - Vung Tau Province, and are presented at cost less accumulated amortization. The current value of land use rights is allocated on a straight-line basis over an estimated useful life of 10 years.

7.2. Software:

- Intangible fixed assets include computer software handed over to the Project Management Board of the Thi Vai LPG refrigerated storage facility construction project by the Petro Vietnam Construction Joint Stock Corporation, as well as human resource management software. These are presented at cost less accumulated amortization. The software is amortized on a straight-line basis over 3 years.

8. Construction in progress:

- Assets under construction for production, rental, administrative, or any other purposes are recognized at cost. These costs include all necessary expenses incurred to create the asset, including service costs and related borrowing costs, in accordance with the Company's accounting policies. Depreciation of these assets is applied similarly to other assets, starting from the time the assets are ready for use.

9. Prepaid expenses:

- Prepaid expenses include actual costs incurred that relate to the production and business operations of multiple accounting periods. Prepaid expenses consist of goodwill arising from the valuation of the enterprise during the transition to a joint-stock company and other prepaid expenses.

- The goodwill arising from the valuation of the enterprise during the transition to a joint-stock company was incurred on February 1, 2010, amounting to VND 5,186,760,000. This amount is amortized on a straight-line basis over the estimated useful life of the goodwill, which is 10 years. According to the Company's Board of Directors, allocating goodwill over 10 years is consistent with current accounting regulations and the Company's current production and business activities.

- Other prepaid expenses include the value of tools, instruments, and small components that have been put into use and are expected to bring future economic benefits to the Company. These expenses are capitalized as prepaid expenses and allocated to the statement of profit or loss on a straight-line basis, in accordance with current accounting regulations.

10. Revenue recognition:

Revenue from the sale of goods is recognized when all the following five (5) conditions are satisfied:

- (a) The Company has transferred the majority of the risks and rewards associated with ownership of the goods to the buyer;
- (b) The Company no longer retains management rights as the owner or control over the goods;
- (c) Revenue can be measured reliably;
- (d) The Company is likely to receive economic benefits from the sale transaction; and
- (e) The related costs of the sale transaction can be identified.

- Revenue from service transactions is recognized when the outcome of the transaction can be measured reliably. For service transactions spanning multiple accounting periods, revenue is recognized in each period based on the portion of work completed as of the balance sheet date of that period. The outcome of a service transaction is determined when all the following four (4) conditions are met:

- (a) Revenue can be measured reliably;
- (b) Economic benefits from the service transaction are likely to be received;
- (c) The portion of work completed as of the balance sheet date can be identified; and
- (d) The costs incurred and the costs required to complete the service transaction can be measured.

- Revenue from the Company's construction contracts is recognized in accordance with the Company's accounting policy on construction contracts (details provided below).

- Interest income is recognized on an accrual basis, determined based on the balance of deposit accounts and applicable interest rates.

11. Construction contracts:

- When the outcome of a construction contract can be reliably estimated, revenue and expenses related to the contract are recognized based on the percentage of completion as of the end of the accounting period. This is calculated as the ratio of the costs incurred for completed work to the total estimated costs of the contract, unless these costs do not correspond to the actual progress of the construction work. These costs may include additional expenses, compensation, and performance bonuses as agreed with the customer. When the outcome of a construction contract cannot be reliably estimated, revenue is recognized only to the extent of the contract costs incurred that are likely to be recoverable.

12. Foreign currencies:

- Transactions denominated in foreign currencies are converted at the exchange rates prevailing on the transaction dates. Monetary items denominated in foreign currencies at the end of the accounting period are converted at the exchange rates on that date. Exchange rate differences arising are recorded in the statement of income.

13. Borrowing costs:

- Borrowing costs are recognized as production and business expenses in the period they are incurred unless they are capitalized in accordance with Vietnamese Accounting Standard No. 16, "Borrowing Costs." Borrowing costs directly attributable to the acquisition, construction, or production of assets that require a substantial period of time to be ready for their intended use or sale are added to the cost of the assets until the assets are ready for use or sale. Any income generated from the temporary investment of these borrowings is deducted from the cost of the related assets. For specific loans used for the construction of fixed assets or investment properties, interest expenses are capitalized even if the construction period is less than 12 months.

14. Provisions for liabilities:

- Provisions are recognized when the Company has a present obligation resulting from a past event, and it is probable that the Company will be required to settle this obligation. Provisions are determined based on the Board of Directors' estimate of the necessary costs to settle the obligation as of the end of the accounting period. As of June 30, 2024, the Board of Directors has prudently assessed and confirmed that the Company is not required to make a provision for warranties on the projects it has executed.

15. Taxes:

- Corporate income tax represents the total value of current tax payable and deferred tax.
- Current tax payable is calculated based on taxable income for the year. Taxable income differs from pre-tax profit presented in the income statement because taxable income excludes income or expenses that are taxable or deductible in other years (including carryforward losses, if any), and also excludes non-taxable or non-deductible items.
- Deferred tax is calculated on the differences between the carrying amount and the tax base of assets or liabilities in the financial statements and is recognized using the balance sheet method. Deferred tax liabilities must be recognized for all temporary differences, while deferred tax assets are only recognized when it is probable that sufficient future taxable profits will be available to offset the temporary differences.
- Deferred tax is determined using the tax rates expected to apply in the year when the asset will be recovered or the liability will be settled. - Deferred tax is recognized in the income statement and is only recorded in equity when it relates to items recognized directly in equity.
- Deferred tax assets and deferred tax liabilities must be offset when the Company has a legal right to offset current tax assets against current tax liabilities, and when the deferred tax assets and deferred tax liabilities relate to corporate income tax managed by the same tax authority and the Company intends to settle the current tax liabilities on a net basis.
- The determination of the Company's income tax is based on the current tax regulations. However, these regulations change over time, and the final determination of corporate income tax depends on the results of audits by the competent tax authorities.
- Other taxes are applied in accordance with the current tax laws in Vietnam.
