Responsibilities of the Director

The Board of Directors of the Company is responsible for preparing the Financial Statements which give a true and fair view of the financial position, results of operations and cash flows of the Company during the period in accordance with Vietnamese Accounting Standards, Vietnamese Enterprise Accounting System and relevant legal regulations on preparation and presentation of financial statements. In preparing the Financial Statements, the Director is required to:

- Establish and maintain internal controls that the Director and the Board of Management determine are necessary to ensure the preparation and presentation of the interim consolidated financial statements that are free from material misstatement, whether due to fraud or error;
- Select suitable accounting policies and apply them consistently;
- Make judgements and estimates that are reasonable and prudent;
- State whether applicable accounting principles have been followed, subject to any material departures disclosed and explained in the interim consolidated financial statements.
- Prepare the interim consolidated financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.
- Prepare and present the interim consolidated financial statements in compliance with Vietnamese Accounting Standards, Enterprise Accounting Regime and legal regulations related to the preparation and presentation of interim consolidated financial statements.

The Board of Directors of the Company is responsible for ensuring that the accounting records are kept to reflect the financial position of the Company, with a true and fair view at any time and to ensure that the interim consolidated financial statements comply with the current regulations of the State. At the same time, it is responsible for ensuring the safety of the Company's assets and taking appropriate measures to prevent and detect fraud and other violations.

The Company's Board of Directors commits that the Financial Statements for the accounting period from October 1, 2024 to December 31, 2024 have honestly and reasonably reflected the financial situation, business performance, and cash flow of the Company as at December 31, 2024, in accordance with Vietnamese Accounting Standards, Enterprise Accounting Regime and in compliance with legal regulations related to the preparation and presentation of financial statements for the accounting period from October 1, 2024 to December 31, 2024.

Other commitments

The Director commits that the Company complies with Decree No. 155/2020/ND-CP dated December 31, 2020 detailing the implementation of a number of articles of the Securities Law applicable to public companies and the Company does not violate the obligation to disclose information as prescribed in Circular No. 96/2020/TT-BTC dated November 16, 2020 of the Ministry of Finance guiding the disclosure of information on the stock market.

Hanoi, July 28, 2025

Director

The stamp is a red circular seal. The outer ring contains the text 'M.S.D.N: 02174005.C.T.C.P.' at the top and 'HÀNG' at the bottom. The inner circle contains the text 'CÔNG TY CỔ PHẦN VINAM' in bold capital letters. A blue ink signature is written across the center of the stamp.

III Accounting standards and policies applied

1. Accounting policies applied

The Company applies the accounting system issued under Circular No. 200/2014/TT-BTC guiding the enterprise accounting system dated December 22, 2014, as amended and supplemented by Circular No. 75/2015/TT-BTC dated May 18, 2015, and Circular No. 53/2016/TT-BTC dated March 21, 2016, issued by the Ministry of Finance.

2. Statement of compliance with accounting standards and accounting policies

The Company has applied the Vietnamese Accounting Standards and relevant guidance documents issued by the State. The separate interim financial statements have been prepared and presented in full compliance with the provisions of each applicable standard, relevant guiding circulars, and the current accounting regime in force

IV Accounting Policies Applied

1. Types of exchange rates applied in accounting

Transactions arising in currencies other than the accounting currency are recorded at the actual transaction exchange rate, based on the following principles:

- Receivables denominated in foreign currencies are recorded at the buying exchange rate of the commercial bank designated by the customer for payment.
- Payables denominated in foreign currencies are recorded at the selling exchange rate of the commercial bank with which the Company frequently transacts
- Transactions for the purchase of assets or expenses that are immediately settled in foreign currencies (not through accounts payable) are recorded at the buying exchange rate of the commercial bank where the Company makes the payment.

At the end of the accounting period, monetary items denominated in foreign currencies—such as assets (cash, receivables, and other monetary assets) and liabilities (loans, payables, and other obligations)—are revalued using the buying and selling exchange rates of the commercial bank where the Company maintains its accounts, as of the closing date. All actual exchange rate differences incurred during the year and revaluation differences at year-end are recognized in the income statement for the accounting period

2. Principles for recognition of cash and cash equivalents

Cash includes: cash on hand, cash at bank, and cash in transit

Cash equivalents are short-term investments with a maturity of no more than 3 months that are readily convertible into cash and subject to an insignificant risk of changes in value from the date of purchase to the reporting date

3. Principles for recognition of trade receivables and other receivables

Trade receivables, advances to suppliers, and other receivables at the reporting date, if :

- Receivables that are due for collection or payment within 1 year (or within a normal operating cycle) are classified as current assets.
- Receivables that are due for collection or payment after more than 1 year (or beyond a normal operating cycle) are classified as non-current assets.

4. Principles for recognition of inventory

Trading securities: These are securities held by the Company for trading purposes. Trading securities are recognized from the date the Company acquires ownership and the initial value is determined based on the fair value of the payments at the transaction date, plus any related transaction costs.

The value of inventories is determined using the weighted average method

Inventories are accounted for using the perpetual method.

At the end of the period, a provision for inventory devaluation is recognized for the amount by which the cost of inventories exceeds their net realizable value..

5. Principles for the recognition of investments

Trading securities: These are securities held by the Company for trading purposes. Trading securities are recognized from the date the Company obtains ownership rights and their initial value is determined at the fair value of the consideration paid at the transaction date, plus any directly attributable transaction costs related to the purchase of the trading securities.

Investments in subsidiaries are accounted for using the cost method.

Net profits distributed by subsidiaries or associates arising after the date of investment are recognized in the **Income Statement**.

Other distributions (excluding net profits) are considered a recovery of investment and are recognized as a reduction in the carrying amount of the investment.

Held-to-maturity investments are recognized from the purchase date and initially measured at purchase cost plus any directly attributable transaction costs.

Interest income from held-to-maturity investments arising after the purchase date is recognized in the **Income Statement** on an accrual basis and upon collection.

Investments at the reporting date, if:

- Investments with a maturity or redemption period of no more than 3 months from the purchase date are considered "cash equivalents.";

- Investments with a maturity or repayment period of less than 1 year or within a normal operating cycle are classified as current assets;

- Investments with a maturity or repayment period of more than 1 year or beyond a normal operating cycle are classified as non-current assets

The provision for investment impairment is recognized at the end of the period as the difference between the cost of the investments recorded in the accounting books and their market value at the time the provision is made.

6. Principles for recognition and allocation of prepaid expenses

Prepaid expenses that are related to the current fiscal year's production and business activities are recognized as current prepaid expenses and are allocated to the production and business costs within the current fiscal year

The calculation and allocation of long-term prepaid expenses to production and business costs in each accounting period are based on the nature and extent of each type of expense to determine the appropriate allocation method and criteria. Prepaid expenses are gradually allocated to production and business costs using the straight-line method

7. Principles for recognition of trade payables and other payables

Trade payables, other payables at the reporting date, if

- Payables with a repayment period of less than 1 year or within a normal operating cycle are classified as current liabilities.;

- Payables with a repayment period of more than 1 year or beyond a normal operating cycle are classified as non-current liabilities.

8. Principles for recognition of accrued expenses

Accrued expenses are costs that have not yet been incurred but are accrued in advance as production and business expenses during the period to ensure that the actual costs do not cause a sudden impact on production and business costs. This is done based on the principle of matching revenue and expenses. When these expenses are actually incurred, if there is a discrepancy with the amount accrued, the accountant will make adjustments by adding or reducing the expense accordingly to match the difference

9. Principles for recognition and capitalization of borrowing costs

Borrowing costs are recognized as production and business expenses in the period in which they are incurred, except for those borrowing costs that are directly attributable to the acquisition, construction, or production of qualifying assets. Such costs are capitalized as part of the cost of the asset when all conditions specified in Vietnamese Accounting Standard No. 16 "Borrowing Costs" are met.

10 Principles for recognition of owners' equity

Owners' capital is recognized based on the actual amount contributed by the owners.

Undistributed post-tax profit represents the profit generated from the Company's operations after deducting (-) adjustments resulting from retrospective application of changes in accounting policies and retrospective corrections of material errors from prior years.

11. Principles and methods of revenue recognition

Revenue from sale of goods

Revenue from sale of goods is recognized when all of the following conditions are simultaneously satisfied:

- The majority of the risks and rewards associated with ownership of the goods or products have been transferred to the buyer;
- The Company no longer retains managerial rights over the goods as the owner or control over the goods;
- The revenue can be measured with reasonable certainty;
- The Company has received or will receive the economic benefits from the sale transaction;
- The costs related to the sale transaction can be reliably determined.

Revenue from rendering of services

Revenue from rendering of services is recognized when the outcome of the transaction can be reliably determined. In cases where the service is rendered over multiple periods, revenue is recognized during the period based on the stage of completion of the service as of the balance sheet date. The outcome of a service transaction is considered to be reliably determined when all of the following conditions are met::

- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Company;
- The stage of completion of the transaction at the reporting date can be measured reliably;
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

The stage of completion of the service rendered is determined based on the percentage-of-completion method..

Financial income

Revenue arising from interest, royalties, dividends, shared profits, and other financial income is recognized when both of the following conditions are met:

- It is probable that the economic benefits associated with the transaction will flow to the Company;
- The amount of revenue can be measured reliably.

Dividends and distributed profits are recognized when the Company obtains the right to receive the dividend or the profit from its investment..

Revenue deductions include

This item is used to reflect the deductions from sales of goods and provision of services incurred during the period, including: trade discounts, sales allowances, and sales returns. This account does not reflect taxes that are deducted from revenue, such as output value-added tax (VAT) calculated using the direct method

Revenue deductions are made as follows:

- Trade discounts, sales allowances, and sales returns arising in the same period as the sale of products, goods, or services are deducted from the revenue of the period in which they occur;
- In cases where products, goods, or services have been sold in previous periods, and trade discounts, sales allowances, or sales returns arise in subsequent periods, the company is allowed to reduce the revenue based on the following principle:

If products, goods, or services have been sold in previous periods, and discounts, trade allowances, or returns arise in subsequent periods but occur before the financial statement issuance date, accounting should treat this as an adjusting event after the balance sheet date and reduce the revenue in the financial statements for the reporting period

If products, goods, or services are subject to discounts, trade allowances, or returns after the financial statement issuance date, the company should reduce the revenue in the period in which they occur

12. Principles and methods for recognizing cost of goods sold

Cost of goods sold reflects the cost value of products, goods, or services sold during the period.

The provision for inventory write-down is included in the cost of goods sold based on the inventory quantity and the difference between the net realizable value and the cost of inventory. When determining the volume of inventory to be written down, accountants must exclude the inventory that has been contracted for sale (with a net realizable value not less than the carrying value) but has not yet been transferred to the customer, if there is strong evidence that the customer will not cancel the contract.

13. Principles and methods of recording financial expenses

Expenses recorded in financial expenses include:

- Cost of lending and borrowing capital;
- Losses due to changes in exchange rates of transactions involving foreign currencies;

The above items are recorded according to the total amount arising in the period, not offset with financial revenue.

14. Principles and methods of recording sales costs and business management costs

Selling expenses reflect actual expenses incurred in the process of selling products, goods, and providing services, including costs of offering, introducing products, advertising products, sales commissions, product and goods warranty costs (excluding construction activities), preservation, packaging, and transportation costs

Business management costs reflect the general management costs of the enterprise, including costs for salaries of employees in the business management department (salaries, wages, allowances, etc.); social insurance, health insurance, union fees, unemployment insurance for business management employees; costs of office materials, labor tools, depreciation of fixed assets used for business management; land rent, business license tax; provision for bad debts; outsourced services (electricity, water, telephone, fax, property insurance, fire and explosion insurance, etc.); other cash expenses (reception, customer conferences, etc.)

15. Principles and methods of recording current corporate income tax expenses

Current corporate income tax expense is determined on the basis of taxable income and corporate income tax rate in the current year..

16. Department report

Segment reporting includes a business segment or a geographical segment.

Business segment: A distinguishable component of an entity that is engaged in providing an individual product or service or a group of related products or services and that is subject to risks and returns that are different from those of other business segments.

Geographical segment: A distinguishable component of an entity that is engaged in providing products or services within a particular economic environment and that is subject to risks and returns that are different from those of components operating in other economic environments

17. Financial instruments

Initial notes

Financial assets

At the date of initial recognition, financial assets are recorded at cost plus transaction costs that are directly attributable to the acquisition of the financial assets

The Company's financial assets include cash, short-term deposits, short-term receivables, other receivables and investments

Financial liabilities

On the date of initial recognition, financial liabilities are recorded at cost less transaction costs directly attributable to the issuance of that financial liability

The Company's financial liabilities include trade payables, accrued expenses, other payables and loans

Offsetting of financial instruments

Financial assets and financial liabilities are offset against each other and presented at net value in the Balance Sheet when and only when the Company:

- Have a legal right to offset the recorded value;
- Intend to settle on a net basis or to recognise the asset and settle the liability at the same time.

Re-evaluate after initial recording

Currently, there are no regulations on revaluation of financial instruments after initial recognition

18. Related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions

Parties are also considered to be related if they are subject to common control or common significant influence
