FINANCIAL STATEMENT EXPLANATION

I. General Information:

Form of Ownership: The Corporation operates as a joint-stock company. Business Registration Certificate No. 4103003829, issued on 14/09/2005 by the Ho Chi Minh City Department of Planning and Investment, along with amended business registration certificates. The Corporation was converted from Petrochemical Construction Investment Consulting Company, a state-owned enterprise, and a member of the Vietnam National Industry – Energy Group.

Total Employees: As of 30/06/2025, the Corporation has 140 employees.

Main activities

- Management consulting services: Project management consulting for civil engineering construction projects; consulting for oil and gas projects, both onshore and offshore, including exploration, exploitation, refining, industrial, and civil projects. Investment project formulation. Preparation of bidding documents, tendering, analysis, and evaluation of bids. Project management and construction cost management. Preparation of construction investment projects.
- Architecture and related technical consulting: Designing electrical systems for civil and industrial projects. Designing heating and cooling systems for civil and industrial projects. Designing mechanical systems for oil and gas projects. Designing technology for chemical and petrochemical industrial projects, gas processing. Designing electrical systems for industrial projects.
- Investment consulting (excluding financial and accounting consulting): Operation of oil and gas projects and other construction projects. Manufacturing of oil and gas technology products (not conducted at headquarters). Construction surveying. Designing: structures for civil and industrial construction, urban technical infrastructure, voltage <22kV, architecture for civil and industrial projects. Construction quality inspection. Construction: civil, industrial, transportation, oil and gas (partial or turnkey EPC). Building various types of houses. Construction of other civil engineering projects. Site preparation. Other specialized construction activities. Wholesale of machinery, equipment, and spare parts for mining and construction. Wholesale of electrical machinery, equipment, and materials (generators, electric motors, wires, and other electrical circuit components). Wholesale of other machinery, equipment, and spare parts. Real estate business. Designing civil and industrial construction projects. Designing electrical and mechanical systems for civil and industrial projects. Designing urban technical infrastructure projects. Designing industrial projects (heating, air conditioning). Geological surveying for construction. Topographic surveying. Other related technical consulting activities. Technical inspection and analysis. Repair of prefabricated metal products. Repair of machinery and equipment (excluding mechanical processing and electroplating). Installation of industrial machinery and equipment. Labor supply and management.

Subsidiaries

- Petroleum Project Management Consulting Joint Stock Company (PVE-PMC): Established under Business Registration Certificate No. 0310755120, issued on 05/04/2011 by the Ho Chi Minh City Department of Planning and Investment (re-issued on 15/12/2015), with a total charter capital of VND 49,680,000,000. Main

activity: Consulting on project management and supervising civil and industrial construction projects.

- Petroleum Survey Consulting Joint Stock Company (PVE-SC): Established under Business Registration Certificate No. 0310755346, issued on 05/04/2011 by the Ho Chi Minh City Department of Planning and Investment, with a total charter capital of VND 20,000,000,000. Main activity: Consulting on assessment of oil and gas, industrial, and civil projects, topographic surveying for construction, and quality inspection of projects.
- Petrovietnam Engineering (Malaysia) SDN.BHD: Established under Malaysian law. Main activity: Construction of civil and industrial projects.

II. Basis for preparing financial statements and fiscal year:

Basis for Preparing Financial Statements

The accompanying financial statements are presented in Vietnamese Dong (VND), based on historical cost principles, and comply with Vietnamese Accounting Standards, the Vietnamese Accounting System, and other applicable accounting regulations in Vietnam.

Fiscal Year

The Corporation's fiscal year begins on January 1 and ends on December 31.

III. Summary of Key Accounting Policies:

The following are the key accounting policies applied by the Corporation in preparing financial statements:

Accounting Estimates

Preparing financial statements in accordance with Vietnamese Accounting Standards, the Vietnamese Accounting System, and other applicable accounting regulations in Vietnam requires the Board of Directors to make estimates and assumptions that affect the reported amounts of liabilities, assets, and the presentation of contingent liabilities and assets at the end of the fiscal year, as well as the reported amounts of revenue and expenses during the accounting period. Actual results may differ from these estimates and assumptions.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, demand deposits, short-term investments with high liquidity, easily convertible to cash, and minimal risk of value fluctuation.

Provision for Doubtful Debts

Provisions for doubtful receivables are made for amounts overdue for six months or more, or for receivables where the debtor is unlikely to settle due to liquidation, bankruptcy, or similar difficulties.

Inventories

Work-in-progress costs at the end of the period include costs of raw materials, direct labor, machinery usage, and general production overheads incurred during the period related to the cost of construction, surveying, and designing projects. Year-end work-in-progress costs also include the cost of subcontractors' completed and delivered work that has not been recognized as consumed in the fiscal year.

Tangible fixed assets and depreciation:

Tangible fixed assets are stated at cost less accumulated depreciation. The cost of tangible fixed assets includes the purchase price and all directly attributable costs to bring the asset to a ready-to-use condition. The cost of self-constructed or self-manufactured tangible fixed assets includes actual construction and production costs, plus installation

030
TỔN
J V A
D
C
C
BE

and testing costs, if any. Tangible fixed assets are depreciated using the straight-line method based on their estimated useful lives as follows:

- Buildings and structures: 5–25 years
- Machinery and equipment: 3–10 years
- Office equipment: 3–6 years
- Vehicles: 6–10 years

Leased assets

A lease is classified as an operating lease when the lessor retains most of the risks and rewards of ownership. Operating lease expenses are recognized in the business results using the straight-line method over the lease term.

Intangible fixed assets and amortization

Intangible fixed assets represent the value of design software and are stated at cost less accumulated amortization. Software is amortized using the straight-line method.

Long-term prepaid expenses

Long-term prepaid expenses include tools and instruments expected to generate future economic benefits for the Corporation for one year or more. These costs are capitalized as long-term prepaid expenses and amortized to business results using the straight-line method over three years.

Other Long-term investments

Other long-term investments are investments in other companies where the Corporation holds 20% or less of the equity (below 20% voting rights), with no significant influence and a recovery or settlement period exceeding one year. The value of other long-term investments is recorded at cost. In subsequent accounting periods, investments are stated at cost less provisions for impairment. Provisions for impairment of long-term investments are made when the carrying amount exceeds the market value at the end of the accounting period or when the investee incurs losses.

Provisions

Provisions are recognized when the Corporation has a present obligation resulting from a past event, and the Corporation will probably have to settle the obligation. Provisions are determined based on the Board of Directors' estimates of the costs required to settle the obligation at the end of the accounting period.

Revenue Recognition

For construction contracts specifying payment based on planned progress, when the contract outcome can be reliably estimated, revenue and expenses are recognized based on the work completed as determined by the contractor at the financial statement date, regardless of whether progress invoices have been issued or the invoiced amount.

For construction contracts specifying payment based on the value of work performed, when the contract outcome can be reliably determined and confirmed by the client, revenue and expenses are recognized based on the work completed and confirmed by the client in the fiscal year as reflected in issued invoices.

When the contract outcome cannot be reliably estimated, revenue is recognized only to the extent of contract costs incurred that are likely to be recoverable. Contract costs are recognized as all costs incurred in the year.

When total contract costs are likely to exceed total contract revenue, the estimated loss is immediately recognized as an expense.

Interest income from deposits is recognized on an accrual basis, determined based on deposit balances and applicable interest rates.

Foreign Currency

Transactions in foreign currencies are converted at the exchange rate on the transaction date. Exchange rate differences arising from these transactions are recorded in the income statement. Balances of monetary assets and liabilities in foreign currencies at the end of the fiscal year are converted at the exchange rate on that date. Exchange rate differences arising from the revaluation of short-term monetary assets and liabilities in foreign currencies are recorded in the exchange rate difference item under equity in the balance sheet.

Taxation

Corporate income tax represents the total of current tax payable and deferred tax. Current tax payable is calculated based on taxable income for the year. Taxable income differs from net profit as presented in the income statement because it excludes taxable income or deductible expenses from other years (including carried-forward losses, if any) and non-taxable income or non-deductible expenses.

Deferred income tax is calculated on differences between the carrying amount and tax base of assets or liabilities in the financial statements and is recognized using the balance sheet method. Deferred tax liabilities are recognized for all taxable temporary differences, while deferred tax assets are recognized only when it is probable that sufficient taxable profits will be available to utilize the temporary differences.

Deferred income tax is determined using the tax rates expected to apply in the year the asset is recovered or the liability is settled. Deferred income tax is recognized in the income statement and only in equity when related to items directly recorded in equity. Deferred tax assets and liabilities are offset when the Corporation has a legal right to offset current tax assets against current tax liabilities, and when the deferred tax assets and liabilities relate to corporate income tax managed by the same tax authority, and the Corporation intends to settle current tax on a net basis.

The determination of the Corporation's corporate income tax is based on current tax regulations. However, these regulations change periodically, and the final determination of corporate income tax depends on the results of audits by the competent tax authority. Other taxes are applied in accordance with current tax laws in Vietnam.
