II. FINANCIAL YEAR AND STANDARD CURRENCY USED IN ACCOUNTING

1. Financial year

The financial year of the Corporation starts on 01 January and ends on 31 December annually.

2. Standard currency unit

The standard currency unit used is Vietnam Dong (VND).

III. ACCOUNTING STANDARDS AND ACCOUNTING SYSTEMS APPLIED

1. Accounting system

The Corporation applies Enterprise Accounting System issued under the Circular 200/2014/TT-BTC dated 22 December 2014 by the Ministry of Finance.

2. Announcement on compliance with Vietnamese standards and accounting system

The financial statements are prepared in accordance with regulations of each standard and supplement documents as well as with current accounting system.

3. Accounting form

The Corporation applies computerized bookkeeping, using BRAVO 7 accounting software.

IV. ACCOUNTING POLICY

1. The type of exchange rates applied in accounting

The real exchange rates applied to transactions by foreign currency incurred during the year are as follows:

- Real exchange rate when purchasing foreign currency is the one regulated in the foreign purchasing contract between the Corporation and the Commercial Bank;
- Exchange rate for recognition the payable is the selling exchange rate of the commercial bank that the Corporation prepared the transaction at the arising time;
- Exchange rate for asset purchasing or paid in foreign currency is the buy-in exchange rate of the commercial bank that the Corporation made the payment.

The real exchange rate applied as assessment of the cash items in foreign currency at the Financial Statement date are as follows:

- The buy-in exchange rate is applied to the classified items as assets items;
- The buy-in rate of the very bank that the Corporation's foreign account is applied to the foreign currency at bank;
- The selling foreign exchange rate of the commercial bank that the Corporation had frequent transactions is applied to the classified items as payables items.

All the differences of real exchange rate generated within the year and the differences by assessment the balance of monetary items denominated in foreign currencies are recorded on income statement of the financial year.

2. Recognition of cash

Cash and cash equivalents include cash on hand and cash at bank.

3. Recognition of Financial investments

a) Securities trading

Reflects the situation of buying, selling and paying securities according to the provisions of law held for business purposes including: stocks, other types of securities and financial instruments.

Trading securities are recorded at historical cost.

b) Held to maturity investments

Reflects the current amount and fluctuations of held to maturity investments.

c) Loans

d) Investments in subsidiaries, joint venture and associated companies

d) Investments in other entities

e) Accounting methods for other transactions related to financial investments.

4. Trade receivables

Businesses receivables from customers are receivables from sales of products, goods, investment properties, fixed assets, and provision of services.

Customer receivables are tracked in detail for each object, each receivable content, detail recovery period is tracked (over 12 months or no more than 12 months from the time of reporting) and recorded according to each payment.

Other receivables are debts receivable from businesses outside the scope of customer receivables, including: missing asset value that has been discovered but the cause has not been determined and must wait for processing; receivables related to material compensation caused by individuals and groups (inside and outside the enterprise) such as loss and damage to materials, goods, capital.... have been processed and compensated; loan interest, dividends, profits receivable from financial investments; and other receivables..

Provision for bad debts: provision for the value of receivables and other held-to-maturity investments that are similar in nature to receivables that are difficult to collect.

When preparing financial statements, corporation identify bad debts and held-to-maturity investments of a similar nature that are likely to be unrecoverable in order to make or reverse provisions for bad debts.

Provision rates for bad debts comply with current regulations; Other conditions as prescribed by law.

5. Accounting policy of inventory

Inventories are recorded at original cost. Where the net realizable value is lower than cost, inventories should be measured at the net realizable value. The cost of inventories should comprise all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. The net realizable value is determined by the difference of the estimated price and estimated cost for completing the product and the occurred selling, distributing expenses.

The cost of inventory at the year-end is calculated by weighted average method.

Inventory is recorded on the basis of perpetual method.

Provision for devaluation of inventories is made at the end of the year based on the difference between the original price of inventories and the net realizable value.

6. Recognition and depreciation of fixed assets

Principles of recording tangible, intangible fixed assets

Fixed assets (tangible and intangible) are stated at the historical cost. During the using time, fixed assets (tangible and intangible) are recorded at cost, accumulated depreciation and net book value.

Method of depreciation of tangible, intangible fixed assets

Fixed assets are depreciated using the straight-line method over their estimated useful lives, as follows:

Type of fixed asset	Depreciation period <year>
- Buildings & Architectures	07-50
- Machinery & equipment	06-15

- Means of transportation	05-10
- Management tools and equipment	02-08
- Other fixed assets	04
- Computer software	03
- Personnel management software	03

7. Recognition and depreciation of invested real estates

Investment real estate includes factories and structures held by the Corporation for rental purposes and is stated at cost less accumulated depreciation. Original price is the final settlement value of the project and directly related costs of investment real estate.

Investment properties are depreciated using the straight-line basis over the estimated useful lives of 50 years.

8. Principles for recording construction in progress costs

Construction in progress reflects costs directly related (including related interest expenses in accordance with the company's accounting policies) to assets that are in the process of being constructed. machinery and equipment being installed to serve production, rental and management purposes as well as costs related to ongoing repairs of fixed assets. These assets are recorded at cost and are not depreciated.

9. Recognition of Business Cooperation Contract (BCC)

A BCC is a contractual agreement of two or more ventures in order to jointly carry out economic activities, but not forming an independent legal entity. Those activities may be co-controlled by capital contributors under BCC (hereinafter referred to as ventures) or controlled by one of the participants.

The money or assets received from other entities in the BCC are recorded as liabilities. The money or assets invested in BCC are recorded as receivables. In the process of implementing BCC activities, the specific accounting forms are as follows:

a) BCC in the form of jointly controlled operations

The parties in BCC book keep and record in their financial statements with the following contents:

- The assets invested in joint ventured and under the control of the joint venture capital contributors;
- The liabilities that generated;
- The distributed revenue from the sale of goods rendering of services of the joint venture;
- The expenses incurred.

The ventures distributed the revenue from sale of goods and rendering of services as well as the general expenses according to the agreement in the BCC.

b) BCC in the form of distribution of after-tax profits

- BCC regulated that the other parties of BCC enjoy a fixed profit without depending on the business results of the contract:

- The accounting implementation party of the BCC records all revenues, expenses, and after tax profit of BCC on its Consolidated Income Statements. In which, the expenses of BCC include the fixed profits paid to the other parties of BCC.

- The other ventures recorded only revenue from rental of property for the amount distributed from BCC.

- BCC regulated that all the parties distribute of profits, losses under as a business result of the BCC:

- The ventures recorded proportion on its Consolidated Income Statements according to the amount distributed as the agreement of BCC.

- The accounting implementation party of the BCC is responsible for the statutory obligation from BCC to State budget, taking its tax finalization and reallocating it to the other parties under the agreement of BCC.

10. Accounting principles for deferred corporate income tax

Deferred tax assets

Deferred income tax assets are calculated based on the differences between the carrying amount and the tax base of assets or liabilities in the financial statements and are recognized using the balance sheet method. Deferred income tax assets are only recognized when it is certain that there will be sufficient taxable profit in the future to offset the temporary differences.

The tax rate (%) used to determine the value of deferred income tax assets is applied in accordance with government regulations.

The offsetting of deferred income tax assets and deferred income tax liabilities is only performed when preparing the balance sheet and is not applied when recognizing deferred income tax assets in the accounting records.

Deferred corporate income tax payable

Deferred corporate income tax expenses are determined based on deductible temporary differences, taxable temporary differences, and the applicable corporate income tax rate. Current corporate income tax expenses and deferred corporate income tax expenses are not offset against each other.

When preparing financial statements, accountants must determine deferred income tax expenses in accordance with the accounting standard on "Corporate Income Tax."

11. Principle of capitalization of prepaid expenses

The other expenses actually incurred related to the performance of many manufacturing business accounting years are recorded to prepaid expenses for allocating gradually to the operation results of the subsequent accounting years.

The calculation and allocation the prepaid expenses to the operation expenses of each accounting year is depended on the characteristic, level of each expense in order to apply the reasonable method and the allocation criteria. The expenses are allocated on a straight-line basis.

12. Recognition of liabilities and accrued expenses payables

The payables and accrued expenses are recorded for the amount payables in the future relating to the goods and service supplied. The accrued expenses are recorded in the basis of reasonable estimated amount payables.

The criteria for payables classification of trade payables, accrued expenses and other payables are as follows:

- Trade payables reflects the payable in the trading characteristic from purchasing goods, services, assets and the supplier are an independent unit with the Corporation, including the payables amounts of importing through the entrustor.
- Accrued expenses reflect the payables for the goods, services received from the seller or supplied to buyer but not yet paid due to no or insufficient invoice, accounting documents and the payable to employees on sabbatical salary, the accrued production expenses.
- Other expenses reflect the payable non-trading characteristic, not relating to purchasing goods and supplying services transactions.

13. Recognition of loans and financial lease liabilities

Short-term (long-term) loans are recorded on the basis of receipts, bank documents, and loan contracts. Corporation account in detail and monitor each loan subject, each debtor, each loan contract and each type of loan asset.

Corporation monitor detailed repayment terms of loans and financial lease liabilities. Amounts with a repayment period of more than 12 months from the date of preparation of the financial statements are presented by the accountant as long-term loans and financial lease liabilities. Amounts due to be paid within the next 12 months from the date of preparation of the Financial Statements are presented by the accountant as short-term loans and financial lease liabilities to have a payment plan.

14. Recognition and capitalization of borrowing costs

Borrowing costs are recognized as expenses in the production and business activities of the year when incurred, except for borrowing costs directly related to the investment, construction, or production of unfinished assets, which are capitalized into the value of those assets when the conditions specified in Vietnamese Accounting Standard No. 16 "Borrowing Costs" are met. Additionally, for specific loans used for the construction of fixed assets and investment properties, interest expenses are capitalized even if the construction period is less than 12 months.

15. Principles and methods for recording provisions for payable

Recognized provisions for payables satisfy the conditions specified in Accounting Standards "Provisions, potential assets and liabilities".

The recognized value of a provision for liabilities is the most reasonable estimate of the amount of money that will be required to settle the present obligation at the end of the annual accounting period or at the end of the accounting period mid-year accounting.

16. Principles for recognizing unrealized revenue

Reflects existing data and the increase and decrease in unrealized revenue of the Corporation during the accounting period. Unrealized revenue includes revenue received in advance such as: the amount of money customers have paid in advance for one or more accounting periods for asset leasing; interest received before lending capital or purchasing debt instruments.

The Corporation does not account in this account the following amounts: money received in advance from the buyer for which the Corporation has not yet provided products, goods or services; revenue has not been collected money from asset leasing and provision of services for multiple periods.

17. Recognition of owner's equity

Owner's equity is stated at actually contributed capital of owners.

Other equity funds are appropriated from undistributed after-tax profits according to the decision of shareholders at the Annual General Meeting of Shareholders. This fund is set aside for the purpose of supplementing equity capital in the future.

Undistributed profit after tax reflects the business results (profit or loss) after deduction of corporation income tax and the situation of Corporation's profit distribution or loss settlement. The profits are entitled to distribute as getting the undistributed after – tax profit not exceeding the undistributed after-tax profit stated on the Consolidated Financial Statements after eliminating the impact of profits recorded from negative goodwill. When The dividends, profits paid to the owners exceeding the undistributed after-tax profits, it's recorded as the deduction of contributed capital. Undistributed after-tax profits can be divided to investors under the ratio of their capital contribution according to approval of Annual General Meeting/Board of Management and after setting the funds according to Corporation Charter and the legal provisions of Vietnam.

Dividend payable to shareholders is recorded as liabilities on Balance Sheet of the Corporation after the dividends announcement of the Board of Management.

18. Principles and method of recording revenue

Revenue from sale of goods, finished goods

Revenue from sale of goods should be recognized when all the following conditions have been satisfied:

- The significant risks and rewards of ownership of the goods have been transferred to the buyer;
- The Corporation retains neither continuing managerial involvement as a neither owner nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- The economic benefits associated with the transaction of goods sold have flown or will flow to the Corporation;
- The costs incurred or to be incurred in respect of the transaction of goods sold can be measured reliably.

Revenue from sale of goods is determined by the reasonable value of the amount has been received or will be collected by accrual basis of accounting. Amounts received in advance from the customers are not recorded as revenue in the year.

Revenue from rendering of services

Revenue from rendering of services is recognized when the outcome of that transaction can be measured reliably. Where a transaction involving the rendering of services is attributable to several periods, each period's revenue should be recognized by reference to the stage of completion at the balance sheet date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Corporation;
- The stage of completion of the transaction at the balance sheet date can be measured reliably;
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Revenue from sales of real estate

Recording revenue from sales of real estate that the Corporation is an investor should be recognized when all have been satisfied must satisfy these following conditions:

- The real estate has completed and transferred to the buyers, the Corporation have transferred risks and benefits associated with ownership of the real estate to the buyers;
- The Corporation no longer hold the right to manage the real estate as real estate 's owners or the right to control the real estate;
- The revenue is determined reliably;
- The Corporation have received or will receive economic benefits from the sales of the real estate;
- The costs with the transaction of real estate can be measured reliably.

Revenue from construction contract

Construction contracts implemented by the Corporation regulated that contractors are paid according to executed workload. The revenue of construction contract is recorded respectively to execute workload confirmed by the customer in the year. The results of implementing contracts are estimated reliably based on approval documents with investors.

Operating rental revenue

Revenue from leasing assets that are operating leases is recognized in the income statement on a straight-line basis based on the term of the lease contract. Rental commissions are recognized as an integral part of total rental revenue.

Financial income

Income from interest, royalties and dividends and other financial income earned by the Corporation should be recognized when these two conditions are satisfied:

- It is probable that the economic benefits associated with the transaction will flow to the Corporation;
- The amount of the income can be measured reliably.

19. Principles for revenue deductions

- Revenue deductions include: Trade discounts, sales discounts and returned sales.
- Trade discounts, sales discounts, and sales returns incurred in the same period as the sale of products, goods, or services are adjusted as a reduction in revenue for the period in which they occur.
- In cases where products, goods, or services were sold in previous periods, but trade discounts, sales discounts, or sales returns occur in a subsequent period, the enterprise shall reduce revenue based on the following principles:
 - + If products, goods, or services sold in previous periods are subject to price reductions, trade discounts, or returns in a subsequent period but occur before the financial statements are issued, these are considered adjusting events after the balance sheet date. In this case, the accountant shall record a revenue reduction in the financial statements of the reporting period.
 - + If products, goods, or services are subject to price reductions, trade discounts, or returns after the financial statements have been issued, the enterprise shall record the revenue reduction in the period in which the adjustment occurs (the subsequent period).

20. Principles and method of recording cost of goods sold

Cost of goods sold is recorded and grouped according to the value and quantity products, goods, and materials sold to customers, in accordance with the revenue recorded in the period.

The cost of construction is determined based on the amount of production and business costs outstanding at the beginning of the period plus the actual costs incurred during the period and minus the unfinished costs at the end of the period (this cost is determined based on the value of unfinished output).

Cost of investment real estate when complete records and documents on costs directly related to investment and construction of real estate have not yet been collected but revenue from real estate sales has been generated. The corporation deducts a portion of expenses to temporarily calculate the cost of goods sold for the portion of real estate that is determined to be sold during the period and meets the criteria for recording revenue for the expenses included in the investment estimate.

The amount recorded as a decrease in cost of goods sold is the import taxes, special consumption taxes, environmental protection taxes included in the value of purchased goods when the goods are sold and those taxes are refunded. The difference in the reserve for inventory devaluation that must be established this year is smaller than the amount established last year that has not been fully used.

21. Principles and method of recording of financial expense

Items recorded into financial expenses consist of:

- Expenses or losses related to financial investment activities;
- Cost of capital leasing and borrowing;
- Loss due to foreign exchange differences arising from transactions relating to foreign currencies;
- Other financial expenses.

The above items are recorded by the total amount arising within the period without compensation to financial revenue.

22. Recognition of selling expenses general and administration expenses

Selling expenses reflect actual expenses incurred in the process of providing services, including costs of offering, introducing products, advertising products, sales commissions, and warranty costs for products, goods (except for construction and installation activities), costs of storage, packaging, transportation, ...

General and administrative expenses reflect the general administrative expenses of the enterprise, including the costs of salaries of the management department's employees (salaries, wages, allowances, ...); social insurance, health insurance, trade union funding, unemployment insurance of enterprise management staff; cost of office materials, labor tools, depreciation of fixed assets used for enterprise management; land rent, license tax; provision for bad debts; outsourced services (electricity, water, telephone, fax, property insurance, fire and explosion, ...); other monetary expenses (reception, ...).

The reduction in business management costs is the difference in provisions made this period that is smaller than the amount set aside from the previous period.

23. Principles and method of recording current corporate income tax expense and deferred income tax expense

Current corporate income tax expenses are calculated basing on taxable profits and income tax rate applied in the current year.

Deferred income tax expenses are determined on the basis of deductible temporary differences, the taxable temporary differences and corporation income tax rate.
