COMPANY**

Petroleum General Distribution Services Joint Stock Company**

Pursuant to the responsibilities of the Board of Directors as stipulated in the Law on Enterprises, the Company's Charter, and the Resolutions of the General Meeting of Shareholders in the past period, the Board of Directors ("**BOD**") respectfully submits the following report to the General Meeting of Shareholders:

I. ACTIVITIES OF THE BOARD OF DIRECTORS IN 2024

1.1. Directing the implementation of business targets

In 2024, PSD's distribution operations faced numerous challenges as the economy, although gradually recovering, continued to experience difficulties in production and business activities. High production costs led businesses and consumers to tighten spending, while unpredictable exchange rate fluctuations also affected the company's business efficiency.

The global economy in 2024 showed signs of slow recovery, with gradually decreasing inflationary pressures. However, global financial conditions remained constrained, trade restrictions were increasingly implemented, transportation costs remained high, and debt risks persisted. Additionally, geopolitical tensions, energy security concerns, and food security risks continued to pose challenges. These factors significantly impacted the company's business and distribution operations, making capital circulation more difficult. Given these circumstances, the Board of Directors issued several directives for the Executive Board to implement, ensuring stable business operations and uninterrupted capital flow to achieve planned revenue and profit targets.

Furthermore, the Board of Directors introduced various strategic measures to complete business objectives, focusing on increasing labor productivity and expanding into new, high-potential business sectors. Special attention was given to human resource management and risk control to ensure operational stability. Additionally, cost-cutting initiatives were strictly implemented, with maximum efforts directed toward improving business efficiency while maintaining stable employment and income for employees.

Despite a year filled with challenges, thanks to the solidarity and relentless efforts of all employees, PSD achieved commendable results, as reflected in the following key financial indicators:

Business Performance Results In 2024:

- Consolidated revenue in 2024 reached 5,896.93 billion VND, equal to 82% of the annual plan and 85% compared to the same period in 2023.
- Consolidated pre-tax profit in 2024 reached 104.8 billion VND, exceeding 5% of the annual plan and 26% higher than the same period in 2023.
- State budget contribution in 2024 reached 344.9 billion VND, 22% higher than the same period in 2023.

REPORT OF THE EXECUTIVE BOARD
PETROLEUM GENERAL DISTRIBUTION SERVICES JOINT STOCK COMPANY

To: The General Meeting of Shareholders
Petroleum General Distribution Services Joint Stock Company

In accordance with the duties of the Board of Directors as stipulated in the Enterprise Law, the company's charter, and the resolutions of the General Meeting of Shareholders in the past period, the Board of Directors of the Company ("**BOD**") would like to report to the General Meeting of Shareholders the following contents:

I. IMPLEMENTATION OF THE 2024 PRODUCTION AND BUSINESS TARGETS

In 2024, PSD's distribution activities faced many challenges in the context of a gradually recovering economy, but production and business activities still encountered difficulties; high production costs led businesses and consumers to tighten spending.

The global economy in 2024 tended to recover but slowly; inflationary pressure gradually decreased; global financial conditions remained limited but continued to ease, trade restrictive measures were used more frequently, goods transportation costs were high, debt risks remained high, inflation risks increased, interest rates increased, and geopolitical tensions, energy security, and food security were still present. The International Monetary Fund estimated global economic growth of 3.1% in 2024 (up 0.1% compared to 2023).

Vietnam's economic situation in 2024 saw 12-month GDP growth reaching 7.09%, continuing the recovery trend, along with inflation of 2.71%. According to data from the General Department of Customs, by the end of 2024, the import value of computers, electronic products, and components reached 107.05 billion, an increase of 21.07% compared to 2023.

In addition, other fluctuations from the market and state management in 2024 also significantly impacted PSD's business activities, specifically:

- In the distribution sector, although there was an increase, consumers still tightened spending, did not invest in high-value products, and only focused on medium and low-value products when real demand arose. In addition, in the project sector, the economy has not yet recovered, so there were many difficulties for investment especially for enterprises with state elements.

- The fluctuating exchange rate of the USD affected business efficiency.
- Fierce competition between brands in the market caused profit margins to decrease, increased risks of receivables, and financial costs continued to rise.

Faced with these challenges, since the beginning of 2024, under the direction of the Board of Directors, the PSD Board of Directors has implemented many solutions to

complete the production and business tasks, focusing on drastically directing to increase labor productivity and develop new potential business segments. PSD has made efforts to apply appropriate policies, timely and closely accompany agents, as well as seek to distribute new brands. In addition, human resource management and risk control were particularly focused on by PSD to help business operations run stably; cost reduction was thoroughly implemented, and the highest efforts were focused on improving business efficiency.

At the end of 2024, all PSD employees united, made efforts to overcome difficulties and challenges of the market, and achieved results with the following targets:

- Consolidated revenue in 2024 reached 5,896.93 billion VND, equal to 82% of the annual plan and 85% compared to the same period in 2023.
- Consolidated Profit Before Tax in 2024 reached 104.8 billion VND, exceeding 5% of the annual plan and 26% higher than the same period in 2023.
- State budget payment in 2024 reached 344.9 billion VND, 22% higher than the same period in 2023.

1. Mobile Phone Sector

In 2024, the sales of Samsung mobile phones sector declined. The total annual sales reached 1,495.93 billion VND, which was 57% of the 2024 target and 78% of the actual sales in 2023.

The mobile phone sector faced significant challenges throughout 2024, including declining demand, high inventory levels, especially in the premium segment, and the

strong growth of chain retailers and e-commerce platforms, which further narrowed the market share of traditional retail channels. Samsung's strategy prioritized supplying chain retailers at specific times, affecting other sales channels.

The economic downturn and reduced purchasing power led consumers to delay upgrading their mobile devices, extending the average product lifecycle.

2. IT Sector

In 2024, the IT category recorded 3,675.39 billion VND in revenue, achieving 92% of the annual target and 79% of the 2023 actual performance (as PSD no longer operates in the Non-iPhone segment in 2024)

Throughout 2024, facing numerous challenges due to constant changes from manufacturers—especially in project segments related to operational system restructuring—intense price competition, inventory pressure, and exchange rate fluctuations, the IT sector has closely followed market trends and made continuous efforts to achieve the aforementioned results.

Despite these difficulties, the IT sector closely monitored market trends and continuously sought new distribution opportunities to drive revenue and profit growth. Thanks to its outstanding performance, PSD was appointed by Dell as a Dell Server distributor in June 2024. Subsequently, Lenovo also entrusted PSD with distributing its products for the Small and Medium Business (SMB) segment. Moreover, The IT sector has also introduced new products such as Samsung professional monitors, Philips monitors, Samsung project TVs, and Zotac.

3. Electronics and Home Appliances Category

In 2024, the electronics and home appliance market showed no strong signs of recovery after the 2023 recession, consumer demand remained tight, with spending focused primarily on essential goods.

In 2024, the electronics and home appliances sector continued to restructure its distribution product categories and address long-standing, slow-moving inventory. Manufacturers have pledged stronger cooperation in 2025 after PSD demonstrated positive changes in 2024. Despite numerous difficulties, 2024 revenue reached 389.54 billion VND, achieving 100% of the plan and 23% higher than the actual achievement in 2023.

II. FINANCIAL PERFORMANCE:

1. Assets

The company's total assets in 2024 were 2,790 billion VND, a 10% decrease compared to the same period last year. Short-term assets were 2,725 billion VND, also a 10% decrease compared to the same period, primarily due to a 338 billion VND decrease in inventory (equivalent to 39%) and a 47 billion VND decrease in other Short-term assets (equivalent to 32%).
