No: 61 /2026/CV-UPSC
(Re: Explanation of profit difference between Q4/2025 vs Q4/2024)

Ha Noi, January 19 ,2026

To: **The State Securities Commission**

The Vietnam Stock Exchange

The Hanoi Stock Exchange

Ho Chi Minh City Stock Exchange

Company name: UP SECURITIES JOINT STOCK COMPANY
Abbreviation: UPSC
Address of head office: 8th Floor, Hapro Building, No. 11B Cat Linh, O Cho Dua Ward, Hanoi City, Vietnam
Telephone: (024) 3 944 6666 Fax: (024) 3944 6969

UP Securities Joint Stock Company explains the profit difference between the financial statements of Quarter IV, 2025 and Quarter IV, 2024 as follows:

Profit after tax in Quarter IV, 2025 is (11,093,110,107) VND while profit after tax Quarter IV, 2024 is 1,571,726,338 VND. The main reasons are:

The operating income in Quarter IV, 2025 increased by 31 billion VND, compared to the same period of 2024, primarily driven by financial advisory services revenue which rose by nearly 9 billion VND, revenue from securities brokerage, grew by 8.7 billion VND and interest on held-to-maturity (HTM) investment, increased nearly 6.3 billion VND.

Meanwhile, the operating expenses in Quarter IV, 2025 increased by over 33.5 billion VND, mainly due to a loss of 29 billion VND from selling FVTPL. The financial expenses increased by more than 12 billion VND, compared to Quarter IV, 2024.

The above are some key reasons for the fluctuation of after-tax profit between the financial statements of Quarter IV, 2025 and Quarter IV, 2024, as explained by UP Securities Joint Stock Company.

Respectfully!

Recipient:

UP SECURITIES JOINT STOCK COMPANY

Prepared by	Chief Accountant	General Director
Pham Thuy Dieu	Hoang Thi Mai Huong	Tran Van Chien

NOTES TO THE SEPARATE FINANCIAL STATEMENTS *(next)*

(These notes are an integral part of and should be read in conjunction with the accompanying separate financial statements)

I. CHARACTERISTICS OF BUSINESS ACTIVITIES

1. Form of capital ownership

UP Securities Joint Stock Company was established and operated in Vietnam under the Business Registration Certificate No. 0102311942 issued by the Hanoi Department of Planning and Investment for the first time on July 6, 2007 and amended for the 14th time on November 28, 2025 ; License for establishment and securities business operation No. 58 /UBCK-GPHDKD issued by the State Securities Commission on July 6, 2007. The most recent change is the License to adjust the "License for establishment and securities business operation " No.121 / GPDC - UBCK dated November 13, 2025.

The Company's head office is located at: 8th Floor, Hapro Building, No. 11B Cat Linh, O Cho Dua Ward, Hanoi City.

According to the adjusted operating license No.121/GPĐC-UBCK dated November 13, 2025:

- Registered charter capital: **323.746.000.000 VND**
- Price per share: 10.000 đồng

The Securities Company Charter was newly issued on October 21, 2025.

2. Business Field

The Company's main business areas are:
- Securities brokerage;
- Proprietary trading;
- Securities depository;
- Securities issuance guarantee;
- Securities investment consulting and corporate finance consulting./.

3. Borrowing, lending and investment

Borrowing restrictions

Under Article 26 of Circular No. 121/2020/TT-BTC issued by the Ministry of Finance on December 31, 2020:

- Total liability of a securities company is not over 5 times more than its equity. Total liability prescribed herein does not include the followings:

a) Clients' funds held in trust for trading of stocks;

b) Award and welfare fund;

c) Redundancy or lay-off provisions;

d) Provisions for compensation for investor's losses:

- The maximum short-term liability of a securities company is equal to total short-term asset.

- Securities companies offering securities for sale shall comply with the regulations in Article 31 of Law on Securities, and the decree elaborating on the implementation of several articles of Law on Securities, Laws on Issuance of Corporate Securities, and shall comply with the ratio prescribed in clause 1 and 2 of this Article

Lending restrictions

Under Article 27 of Ministry of Finance Circular No. 121/2020/TT-BTC dated 31/12/2020.

Except as provided by clause 1 of Article 86 in Law on Securities, securities companies are not allowed to lend money or securities in any form..

- Securities companies are not allowed to put up money or assets in their or clients' ownership as security for third-party payment obligations

- Securities companies are not allowed to offer loans in any form to owners, major shareholders, members of the Supervisory Boards, members of the Boards of Management, members of the Members' Council, members of the Boards of Directors, Chief Accountants, other office holders appointed by the Boards of Management and relatives of the aforesaid persons

- Securities companies which are allowed to perform trades on margin in accordance with laws can lend money to clients to buy securities in the form of margin trading under the guidance of the Ministry of Finance.

- Securities companies may lend securities to correct transaction errors, or perform swaps of exchange traded funds or other transactions in accordance with relevant laws.

Investment restrictions

Under Article 28 of Ministry of Finance Circular No. 121/2020/TT-BTC dated 31/12/2020:

- Securities companies are not allowed to buy, contribute capital to buy real estate, unless they are used as head offices, branches or transaction offices directly performing services of Securities companies.

- Securities companies can buy and invest in real property as prescribed in clause 1 of this Article and fixed assets on condition that the residual value of fixed assets and real property does not exceed 50% of their total asset.

- Total investment in corporate bonds by a securities company does not exceed 70% of its equity. Securities companies obtaining licenses for the proprietary trading of securities may buy back listed bonds according to relevant regulations on bond repurchases.

- A securities company is not allowed to directly perform, or give trust to other entity or person to perform the following acts:

a) Holding stocks of or making capital contribution to any company owning more than 50% of the former's charter capital, except in case of buying the odd lot of stocks upon the client's request;

b) Joining with related persons to own at least 5% of the charter capital of another securities company;

c) Holding over 20% of total number of outstanding shares or fund certificates of a listed entity;

d) Holding over 15% of total outstanding shares or fund certificates of an unlisted entity. This restriction shall not be applied to member fund certificates, exchange traded funds and open-ended funds;

e) Investing or contributing over 10% of total contributed capital of a limited liability company or business project;

f) Investing or contributing over 15% of total equity of a business entity or project;

g) Investing more than 70% of equity in stocks, share capital and business projects, including more than 20% of equity which is invested in unlisted stocks, share capital and business projects.

- A securities company is established or acquires a fund management company as a subsidiary. In this case, the securities company does not have to comply with the provisions in Points c, d and dd, Clause 4 of this Article. A securities company planning to establish or acquire a fund management company as a subsidiary must satisfy the following conditions:

a) The equity capital after contributing capital to establish or acquire a fund management company must be at least equal to the minimum charter capital for the business operations the company is performing;

b) The ratio of available capital after contributing capital to establish and acquire a fund management company

c) After contributing capital to establish or acquire a fund management company, a securities company must ensure compliance with the debt restrictions prescribed in Article 26 of this Circular and the investment restrictions prescribed in Clause 3 of this Article and Point e, Clause 4 of this Article.

- In case a securities company invests beyond the limit due to underwriting in the form of a firm commitment, due to consolidation, merger or changes in assets or equity of the securities company or capital contributing organization, the securities company must apply necessary measures to comply with the investment limit as prescribed in Clauses 2, 3 and 4 of this Article within a maximum period of 01 year.

II. Basis for preparing financial statements and accounting period

1. Basis for preparing financial statements

The Company's financial statements are presented in Vietnamese Dong (VND), under the historical cost principle and in accordance with Vietnamese accounting standards, accounting regime for enterprises, accounting regime applicable to securities companies and legal regulations related to the preparation and presentation of financial statements of securities companies.

2. Fiscal year

The Company's fiscal year begins on January 1 and ends on December 31 each year.

III. Accounting standards and regimes applied

1. Applicable Accounting Standards and Regimes

The Company applies Vietnamese Accounting Standards, Vietnamese Enterprise Accounting Regime, Accounting Regime applicable to Securities Companies issued under Circular 210/2014/TT-BTC dated December 30, 2014 (Circular 210) of the Ministry of Finance on Accounting Guidance applicable to Securities Companies and Circular No. 334/2016/TT-BTC (Circular 334) dated December 27, 2016 "Amending, supplementing and replacing Appendices 02 and 04 of Circular 210 of the Ministry of Finance guiding accounting applicable to securities companies".

2. Statement on Compliance with Accounting Standards and Accounting Regime

The Company's financial statements are prepared and presented in compliance with the requirements of Vietnamese Accounting Standards, the current Vietnamese Enterprise Accounting Regime, the Accounting Regime applicable to securities companies and legal regulations related to the preparation and presentation of the Financial Statements of the Securities Company.

IV. Summary of significant accounting policies

1. Accounting estimates

The preparation of financial statements in compliance with Vietnamese accounting standards, accounting regimes for enterprises, accounting regimes applicable to securities companies and legal regulations related to the preparation and presentation of financial statements requires the Board of Directors to make estimates and assumptions that affect the reported figures on liabilities, assets and the presentation of contingent liabilities and assets at the date of financial statements as well as the reported figures on revenues and expenses during the period. Although accounting estimates are made with all the knowledge of the Board of Directors, the actual figures may differ from the estimates and assumptions made.

2. Principles of recording cash

Capital recognition in cash

Operating deposits of securities companies (SCs)

Cash is a synthetic indicator reflecting the total amount of money available to the enterprise at the reporting time, including cash in the enterprise's fund, non-term bank deposits and clearing and payment deposits for securities transactions (of securities companies), with high liquidity, easy to convert into cash and low risk related to value fluctuations.

Investors' deposits for securities transactions, deposits of other issuers and investors' deposits for clearing and payment of securities transactions are presented in indicators outside the financial situation report (off-balance sheet).

Investor deposits

Investor deposits are customer deposits for securities trading under the management method of the securities company.

Deposits for sale of issued securities

Deposits for securities issuers reflect deposits collected from the sale of underwritten securities at commercial banks designated by securities companies performing the function of securities underwriting organizations (main or secondary underwriters) (including money collected from securities sales agents). Deposits for the sale of underwritten securities will be settled upon completion of underwriting activities with the Issuer or with the main underwriter.

Deposits for clearing and settlement of securities transactions

Deposits for clearing and settlement of securities transactions are deposits ready to participate in clearing and settlement between the Securities Company and the customer on day T+2 at the request of the Securities Depository Center to pay for buying and selling securities according to the net clearing results.

3. Principles and methods of accounting for financial assets recognized through profit and loss, loans and receivables

3.1 *Principles for classifying financial assets and financial liabilities in the Company's Investment Portfolio*

Financial asset classification principles: (FVTPL, HTM, Loans, AFS)

Financial assets recognized through profit or loss are included in the company's financial assets portfolio

Financial assets recognized through profit/loss in the Company's financial assets portfolio (FVTPL) are financial assets that satisfy one of the following conditions:

a) Financial assets are classified as held for trading. Financial assets are classified as held for trading securities if:

- Purchased or created mainly for the purpose of resale/repurchase in the short term;
- There is evidence of trading in the instrument for short-term profit; or
- Derivative financial instruments (except for derivative financial instruments that are identified as a financial

b) At initial recognition, identified financial assets would be more appropriately presented if classified as FVTPL financial assets for one of the following reasons:

- Classification as FVTPL financial assets eliminates or significantly reduces inconsistencies in the recognition or measurement of financial assets on different bases.

- Financial assets are a group of financial assets that are managed and the performance of which is assessed on a fair value basis in accordance with the company's risk management policy or investment strategy.

These financial assets often include: stocks, bonds, monetary instruments, derivatives (for hedging purposes).

Financial assets are classified out of FVTPL in the following cases: the financial asset is a loan or receivable if the purpose is determined to be held for a specified period in the future or until maturity or the financial asset is a deposit classified into the cash and cash equivalents group.

When selling financial assets that are not FVTPL financial assets, securities companies must reclassify financial assets from other types of assets related to FVTPL financial assets. The revaluation differences of financial assets currently tracked in the item "Revaluation differences of assets at fair value" will be recorded in the corresponding or expense account at the date of reclassification of financial assets when selling.

Non-derivative FVTPL financial assets that are not required to be classified as FVTPL financial assets upon initial recognition may be reclassified to loans and receivables in certain special cases or to cash and cash equivalents if they meet the criteria for classification into such groups. Gains and losses recognized on revaluation of FVTPL financial assets before the reclassification date are not reversed.

FVTPL financial assets are instruments that, upon maturity, must be transferred to receivables and provisioned for as doubtful receivables (if any).

Loans

Loans are non-derivative financial assets with fixed or determinable payments and not listed on a clear market, with the exceptions of:

- Those that the Company intends to sell immediately or in the near future are classified as held for trading, and those that the Company upon initial recognition designates as being measured at fair value through profit or loss;

- Those that the Company upon initial recognition designates as available-for-sale; or

- Those for which the holder can recover considerably all of its initial investment, other than because of credit deterioration, are classified as available-for-sale.

3.2 **Principles of recognition and accounting methods for recording the revaluation value of investments at market value or fair value or original cost**

Financial assets recognized through profit or loss are included in the company's financial assets portfolio

FVTPL financial assets are recognized at the cost of securities purchased (historical cost). The cost of purchasing FVTPL financial assets is recognized into trading cost of the financial assets on the income statement as incurred.

After the initial recognition, FVTPL financial assets are recognized at the market value. Any gain or loss incurred from changes in value of these financial assets shall be classified as part of FVTPL group and recognized into the income statement.

At the end of the accounting period, FVTPL financial assets listed as Financial assets of the securities company shall be re-valued at the market price or fair value (in case no market price is available)

At the first re-valuation, the fair value of FVTPL financial assets listed as financial assets of the securities company are recorded into Account 1212 "Difference on re-valuation" as the difference between re-valued amount of FVTPL financial assets at the re-valuation time at the market price or fair value and the initial purchase price of the FVTPL financial assets listed as financial assets of the securities company.

For the presentation of the statement of financial position, the Item "FVTPL financial assets" is recorded at net amount (The item is computed as follows: FVTPL financial assets = Debit Balance on Account 1211 "Purchase price" plus (+) Debit Balance on Account 1212 "Increase due to-re-valuation of FVTPL financial assets" or minus (-) Credit Balance on Account 1212 "Decrease due to re-valuation of FVTPL financial assets" for FVTPL financial assets listed as financial assets of the securities company).

The representation of FVTPL financial assets listed as financial assets of the securities company in Notes to the financial statements shall be made with 3 norms: Purchase price, Re-valued amount and Net value (Purchase price +/- re-valued amount) for all groups of FVTPL financial assets.

Increase or decrease due to re-valuation of FVTPL financial assets FVTPL financial assets listed as financial assets of the securities company is recorded on the no-offsetting principle and represented in the income statement with 2 norms:

Decrease due to re-valuation of FVTPL financial assets is recorded as "Loss and cost of proprietary trading FVTPL financial assets", detailed for "Decrease due to re-valuation of FVTPL financial assets".

Increase due to re-valuation of FVTPL financial assets is recorded into the norm "Income", detailed for "Increase due to re-valuation of FVTPL financial assets".

Increase or decrease difference due to re-valuation of FVTPL financial assets listed as financial assets of securities company shall determine the unrealized profit or loss in the period.

Loans

Loans are initially recorded at cost (disbursed amount of the loan). After initial recognition, loans are recorded at amortized cost using the effective interest method.

The amortized cost of loans is determined by the initial recognition value of the financial asset minus principal repayments plus (minus) the cumulative amortization using the effective interest method of the difference between the initial recognition value and the maturity value, minus any reductions in provisions for impairment or uncollectibility (if any).

Loans are reviewed for impairment at the reporting date. Provisions for loans are made based on the estimated loss, calculated as the difference between the market value of the securities used as collateral for the loan and the balance of that loan. Increases or decreases in the provision account balance are recorded in the Income Statement debt under the item "Provision expenses for financial assets, handling of bads, deterioration losses of financial assets and borrowing costs of loans".

3.3. Fair value of financial assets

The market/fair value of financial assets is determined on the following bases:

- The market value of securities listed on the Hanoi Stock Exchange and Ho Chi Minh City Stock Exchange is the closing price on the most recent trading day up to the date of securities valuation.

For securities of companies that are not listed on the stock market but have registered for trading on the trading market of unlisted public companies and state-owned enterprises that carry out equitization in the form of public offering of securities (Upcom), the actual price of securities on the market is determined as the average reference price in the 30 most recent consecutive trading days before the time of preparing the annual financial statements announced by the Stock Exchange.

- For listed securities that are cancelled or suspended from trading or cease trading from the sixth trading day onwards, the actual stock price is the book value on the date of the most recent Financial Statement.

For unlisted and unregistered securities traded on the unlisted public companies trading market (UPCom), the actual market price of securities is the average price of actual transaction prices as reported by three (3) securities companies that transacted at the time closest to the time of securities valuation.

- Securities that do not have reference prices from the above sources will be assessed at fair value based on a review of the financial situation and book value of the issuer on the date closest to the securities assessment date.

- Securities whose market value is not determined by the above methods will not be subject to provision.

4. Principles of recording and depreciation methods of fixed assets

4.1. Principles of recognition and depreciation methods of tangible fixed assets

Tangible fixed assets are recorded at original cost, reflected in the Statement of Financial Position according to the indicators of original cost, accumulated depreciation and residual value.

The initial cost of a tangible fixed asset purchased comprises its purchase price (net of trade discounts or rebates), any taxes and any directly attributable costs of bringing the asset to its working condition for its intended use.

Expenses incurred after the initial recognition of tangible fixed assets are recorded as an increase in the original cost of the asset when these expenses certainly increase future economic benefits. Expenses incurred that do not satisfy the above conditions are recorded by the Company as production and business expenses in the year.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives. For accounting purpose, tangible fixed assets are categorized by nature and purpose of use in the Company's production process, as follows:

Property Type	*Number of Years*
- Management equipment and tools	04 - 08
- Other fixed assets	08

4.2 Principles of recognition and depreciation methods of intangible fixed assets

Intangible fixed assets are recorded at original cost, reflected in the Financial Statements according to the indicators of original cost, accumulated depreciation and residual value.

The cost of intangible fixed assets includes all costs incurred by the Company to acquire the fixed assets up to the date when the asset is ready for use. Expenses related to intangible fixed assets incurred after initial recognition are recognized as production and business expenses in the year unless these expenses are associated with a specific intangible fixed asset and increase the economic benefits from these assets.

When intangible fixed assets are sold or disposed of, their costs and accumulated depreciation are eliminated from the accounts and any gain or loss resulting from their disposal is recognized as income or expense in the year.

The Company's intangible assets include computer software and other intangible assets.

Costs relating to computer software programs that are not an integral part of the related hardware are capitalized. The cost of computer software is the total cost incurred by the Company up to the date the software is put into use. Computer software is amortized on a straight-line basis over the period from 03 to 08 Other intangible assets are amortized over a period of 03 years.

5. Principles and methods of accounting for short-term and long-term receivables

Principle of recording recordings: *at original price minus provision for doubtful receivables.*

Principles and methods of accounting for receivables from the sale of financial assets

The entire value of receivables from the sale of financial assets in the Company's financial asset portfolio (not through the Stock Exchanges), including the maturity value of financial assets or the liquidation of these financial assets, is monitored through the "Receivables from the sale of financial assets" indicator on the separate Financial Position Statement.

The entire value of receivables when selling financial assets in the Company's financial asset portfolio through the Stock Exchanges uses account 321 - Clearing and settlement of financial asset transactions and is not reflected in the Company's financial statements.

Principles and methods of accounting for receivables and accrued dividends and interest on financial assets

All receivables and accrued dividends and interest on financial assets in the Company's financial assets portfolio arising during the year are monitored at the item "Receivables and accrued dividends and interest on financial assets" on the separate Financial Statement.

Principles and methods of accounting for bad debt provisions: Receivables are considered for risk provisions based on the age of the debt or the expected loss that may occur in the event that the debt has not yet reached its maturity date but the economic organization is bankrupt or undergoing dissolution procedures; the debtor is missing, absconding, being prosecuted, tried by law enforcement agencies, or serving a sentence or has died. The arising provision costs are reflected in "Management costs" during the year.

6. Principles of accounting for financial investments

Accounting principles for capital investments in other entities

An investment in another entity is an investment by the Company in the equity instruments of another entity but does not have control or joint control, and does not have significant influence over the investee.

Investments are recorded at cost, including purchase price and costs directly attributable to the investment. In the case of investments in non-monetary assets, the cost of the investment is recorded at the fair value of the non-monetary assets at the time of acquisition.

For investments that the Company holds for a long term (not classified as trading securities) and does not have significant influence on the investee, the provision for losses is made as follows: For investments whose fair value cannot be determined at the reporting date, the provision is made based on the loss of the investee. The basis for setting up the provision for losses on investments in other entities is the financial statements of the invested company.

7. Principles of recording and presenting short-term and long-term collaterals, mortgages, deposits

Collaterals, mortgages, deposits are tracked in detail for each customer's deposit and bet amount by term and by currency. Deposits and bets payable with a remaining term of no more than 12 months are presented as short-term debt, and those with a term of more than 12 months are presented as long-term debt.

Collaterals, mortgages, deposits are received in foreign currencies are converted into accounting currency at the actual exchange rate at the time of occurrence. When preparing financial statements, accountants re-evaluate the deposits and bets received to be returned in foreign currencies at the actual exchange rate at the time of reporting. Exchange rate differences arising are immediately recorded in financial expenses or financial revenue.

In case of receiving mortgage or pledge in kind, it is not reflected in the financial situation report but is monitored in the notes to the financial statements.

8. Prepaid expenses

Prepaid expenses include actual expenses that have been incurred but are related to the results of production and business activities of many accounting periods. Prepaid expenses include: tools and equipment issued for use awaiting allocation, prepaid rent and other prepaid expenses.

Tools and equipment: Tools and equipment put into use are allocated to expenses using the straight-line method over 12 months.

Prepaid rent and other prepaid services are allocated to expenses using the straight-line method over the period specified in each contract.

9. Principles and methods of accounting for short-term and long-term liabilities

9.1 *Loans and obligations under finance leases*

Loans and financial lease liabilities are recognized on the basis of receipts, bank documents, contracts and loan and financial lease contracts.

9.2 *Principles for recording issued bonds:*

Companies issue bonds usually for short-term borrowing purposes.

The carrying amount of a bond is generally stated on a net basis as the face value of the bond minus (-) the bond discount plus (+) the bond premium.

The Company monitors discounts and premiums for each type of bond issued and the allocation of each discount and premium when determining borrowing costs to be included in production and business expenses or capitalized for each period, specifically:

- Bond discounts are gradually allocated to each period's borrowing costs throughout the term of the bond;
- Bond premium is gradually allocated to reduce borrowing costs each period over the term of the bond;
- The Company uses the straight-line method to allocate the discount or premium:
- Straight-line method: The discount or premium is distributed evenly over the term of the bond.

9.3 *Principles for classifying payables to sellers, payables to investors for securities transaction deposits and other payables*

Payables are amounts payable to suppliers and other creditors. Payables include amounts payable to vendors, amounts payable to investors for securities trading deposits, amounts payable to securities issuers, and other payables. Payables are not recognized as lower than the payment obligation.

The classification of payables is carried out according to the following principles:

- Trade payables include commercial payables arising from transactions of purchasing goods, services, assets and the seller is an independent entity from the buyer.

- Payables to investors for securities trading deposits are the amounts payable to investors for securities trading under the method that the Company manages for customers through specialized accounts opened at commercial banks. These transactions include margin, repo, and advances for selling financial assets. Payables to investors for securities trading deposits are presented in the indicators outside the financial statement.

- Other payables include non-commercial payables not related to the purchase, sale or provision of goods or services.

- Payables are tracked in detail by subject and payment term.

9.4 Principles and methods of accounting for taxes and funds payable to the State

Value Added Tax (VAT)

The Company applies VAT declaration and calculation according to the guidance of current tax laws.

Corporate Income Tax:

Corporate income tax represents the sum of current and deferred tax liabilities.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expenses that are taxable or deductible in other years (including loss carried forward, if any) and it further excludes items that are not taxable or deductible.

The company applies a corporate income tax rate of 20% on taxable profits.

The determination of the Company's corporate income tax is based on current tax regulations. However, these regulations are subject to change from time to time and the final determination of corporate income tax depends on the results of the examination by the competent tax authority.

Other taxes and fees payable:

Other taxes and fees must be declared and paid by the enterprise to the local tax authorities according to current tax laws in Vietnam.

9.5 Principles of recording short-term and long-term payable expenses

The Company's payable expenses are actual expenses that have not yet occurred but are deducted in advance from the business expenses of the year to ensure that when actual expenses arise, they do not cause sudden changes in business expenses based on the principle of matching revenue and expenses. When such expenses arise, if there is a difference with the deducted book, the accountant will record additional expenses or reduce the expenses corresponding to the difference.

The provision for production and business expenses during the year must be carefully calculated and there must be reasonable and reliable evidence of the expenses that must be provided in advance during the year, to ensure that the amount of expenses payable in this account is consistent with the actual expenses incurred.

10. Principles and methods of accounting for equity recognition

Principles of recording owner's capital investment

The Company's equity is recorded at the actual amount contributed by shareholders.

Other funds belonging to equity are supplemented from after-tax profits of business operations.

Profit recognition principle

Undistributed earnings include:

- Realized profit of the accounting period is the difference between total revenue, income and total expenses included in the Company's Income Statement, except for profits and losses from revaluation of financial assets that have been recorded in unrealized profit.

- Unrealized profit of the accounting period is the difference between the total value of revaluation profit and loss of financial assets recorded through profit and loss/or other financial assets included in the profit and loss statement of the Report on operating results belonging to the Company's financial asset portfolio.

11. Accounting principles and methods for recording revenue and income

Principles and methods of recording revenue, income and expected dividends and interest from financial assets:

The Company's revenue comprises income from securities trading, revenue from providing securities brokerage services, securities depository, securities investment advisory service and corporate finance advisory services.

Income from securities trading

Income from securities trading is determined based on the difference between the selling price and the average cost price of the securities.

Revenue from providing services *(security brokerage, securities depository, securities investment consulting, auction entrustment)*

Service revenue is recorded at the time the transaction occurs, when it is certain to receive economic benefits, determined at the fair value of the rights to receive, regardless of whether the money has been collected or not.

Revenue from services provided to customers must be consistent with the business operations specified in the Company's Establishment and Operation License. Revenue from services provided to customers is confirmed as completed on the basis of payment by customers in cash or acceptance of payment or commitment to payment or is deducted from the customer's securities sales proceeds.

Revenue from securities brokerage activities is recorded in the income statement when the securities transaction is completed.

Revenue from providing other services

Revenue from a service transaction is recognized when the outcome of the transaction can be measured reliably. In cases where a service transaction involves multiple periods, revenue is recognized in the year based on the results of the work completed at the date of the Financial Statement of that period. The outcome of a service transaction is recognized when all four (4) of the following conditions are met:

- Revenue is measured reliably; When a contract provides that the buyer has the right to return the purchased services under specific conditions, revenue is recognized only when those specific conditions no longer exist and the buyer has no right to return the services provided;

- It is possible to obtain economic benefits from the transaction of providing that service;

- Determine the portion of work completed at the date of the Financial Statements; and

- Identify the costs incurred for the transaction and the costs to complete the transaction to provide that service.

Interest revenue

Interest is recognized on an accrual basis, determined on the deposit account balance and the actual interest rate for each period.

Dividends and profits distributed

Dividends and profits distributed are recognized when the Company receives the right to dividends or profits from capital contributions. Dividends received in shares are only tracked according to the number of shares increased, not the value of shares received.

Principles and methods of recording losses and transaction costs of financial assets:

- Losses on financial assets are recognized on the basis of the smaller difference between the selling price of the financial asset and the weighted average cost of the financial asset.

- Transaction costs of purchasing financial assets are recognized as actual costs incurred from the transaction of purchasing financial assets.

12. Method of calculating cost of securities sold

The Company applies the moving weighted average method to calculate the cost of proprietary securities.

13. Principles of recording financial operating expenses

Financial expenses recorded in the Income Statement are total financial expenses incurred during the year, not offset against financial revenue, including interest expenses, bond interest and other financial expenses.

14. Principles of recording management costs

The Company's management costs include for expenses management staff salaries (salaries, wages, allowances, etc.); social insurance, health insurance, union fees, unemployment insurance for management staff; office materials, labor tools, depreciation of fixed assets used for management work; business license tax; outsourced services (electricity, water, telephone, fax, etc.); other cash expenses (reception, customer conferences, etc.).

15. Financial Risk Management for the Company

General qualitative and quantitative description of financial risks to the Company:

The Company is exposed to market risk, credit risk, and liquidity risk. The Company's general financial risk management policy focuses on anticipating unexpected market fluctuations and minimizing their adverse effects on the Company's business performance.

Credit risk

Credit risk is the risk that a party to a financial instrument or customer contract will not meet its obligations, leading to a financial loss for the Company. The Company has a suitable credit policy and regularly monitors the situation to assess whether the Company is exposed to credit risk. Credit risk is assessed at a low level. The Company is exposed to credit risk from bank deposits, trade receivables and financial investments. The maximum credit risk for each group of financial assets is equal to the carrying amount of that group of instruments in the separate financial statements.

Bank deposits

The Company mainly maintains bank deposits with well-known banks in Vietnam. The Company considers that the concentration of credit risk with respect to bank deposits is low.

Financial investment

The Company's financial investments are depreciated and the Company makes provisions for investment depreciation at the time of preparing the Company's Financial Statements.

Customer receivables

The Company regularly monitors its customer receivables and requires customers to pay in full as per the contract. The Company seeks to maintain tight control over outstanding receivables and has a credit control staff to minimize risk.

The Company establishes impairment provisions to reflect the estimated level of impairment for trade receivables, other receivables and investments. The main component of these impairment provisions is the specific loss related to the specific level of impairment for each customer.

Liquidity risk

Liquidity risk is the risk that the Company will have difficulty in fulfilling its financial obligations due to lack of capital. The Company's liquidity risk arises mainly from the fact that financial assets and financial liabilities have different maturities.

The Company monitors liquidity risk by maintaining cash and cash equivalents at a level adequately appreciated by the Board of Directors to finance the Company's operations and to mitigate the effects of changes in cash flows.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market conditions. Market prices are exposed to different types of risk: interest rate risk and other price risk. Financial instruments affected by market risk include deposits and short-term investments. The objective of market risk management is to manage and control market risk exposures to acceptable limits, while maximizing returns.

V. Additional Information to the Financial Statements

1 Notes to the Separate Financial Statements

1.1 Cash and cash equivalents

	31/12/2025 VND	01/01/2025 VND
