Financial assets at FVTPL are initially recognised at cost which includes the purchase price. Subsequent to initial recognition they are measured at market price or fair value (when market price is not available) with changes in market price or fair value being recognised in profit or loss in the statement of income.

For listed securities, the market prices are the closing prices of securities from the Ho Chi Minh City Stock Exchange and the Hanoi Stock Exchange at the latest trading date prior to the end of the annual accounting period.

For securities registered for trading in Unlisted Public Company Market (“UPCOM”), the market prices are the closing prices of securities from UPCOM at the latest trading date prior to the end of the annual accounting period.

For securities which are unlisted and not yet registered for trading, the market price is the average price of the transaction prices at the latest trading date prior to the end of the annual accounting period but within one month from the reporting date provided by three securities companies which are not related to the Company. In case there are no transaction prices within this period, no allowance is required.

For delisted securities and securities for which trading has been suspended or cancelled from the sixth day onward, the fair value is the book value at the latest balance sheet date.

Investments in equity instruments are stated at cost if there are no market prices and their fair values cannot be determined reliably.

(e) Held-to-maturity investments
