Disclosure of information comparability in the consolidated financial statements

Comparative figures of the consolidated balance sheet and related notes are figures of the audited consolidated financial statements for the year ended 31 December 2024.

2. ACCOUNTING CONVENTION AND ACCOUNTING PERIOD

Accounting convention

The accompanying consolidated financial statements, expressed in Vietnam Dong (VND), are prepared under the historical cost convention and in accordance with Vietnamese Accounting Standards, the accounting regime for enterprises, and legal regulations relating to consolidated financial reporting.

The accompanying consolidated financial statements are not intended to present the consolidated financial position, consolidated financial performance, and consolidated cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam.

The consolidated financial statements are prepared based on consolidating the separate financial statements of the Holding Company and the financial statements of the subsidiaries of the Company.

Accounting period

The Company's financial year begins on 01 January and ends on 31 December.

These consolidated financial statements are prepared for the three-month period ended 31 March 2025.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies, which have been adopted by the Company in the preparation of these consolidated financial statements, are as follows:

Estimates

The preparation of consolidated financial statements in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to consolidated financial reporting requires the Executive Board to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the accounting period. Although these accounting estimates are based on the Executive Board's best knowledge, actual results may differ from those estimates.

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and enterprises controlled by the Company (its subsidiaries) for the three-month period ended 31 March 2025. Control is achieved when the Company has the power to govern the financial and operating policies of investee enterprises to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the period are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used in line with those used by the Company.

Intra group transactions and balances are eliminated in full-on consolidation.

Non-controlling interests consist of the amount of those non-controlling interests at the date of the original business consolidation (see below) and the non-controlling interests' share of changes in equity since the date of the consolidation. Losses in subsidiaries are respectively attributed to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Effects of changes in the ownership ratio of subsidiary without loss of control are recorded in Retained earnings.

The non-controlling interest at the date of the business combination is determined initially based on the ratio of non-controlling interest in the fair value of the assets, liabilities and contingent liabilities recognised.

Business consolidations under common control

A business consolidation under common control is a business consolidation in which all firms are jointly controlled by the same or more entities before and after a business consolidation, and this control is not transient. A corporation may be controlled by an individual or group of individuals under a contractual agreement.

A business consolidation transaction under common control is carried out as follows:

- Assets and liabilities of entities are consolidated at the carrying amount at the date of business consolidation;
- There is no goodwill arising from a business consolidation transaction;

- A consolidated statement of business results that reflects the results of business activities of the consolidated entities from the time of business consolidation;
- The difference between the cost of the business consolidation and the net asset value of the merged party is recognized in equity.

Net assets are adjusted for unrealized profits (if any) at the date of business combination under common control.

After the date of business combination, if the Company transfers and/or reduces the interest rate in the investment in this entity, the difference between the cost of the combination and the net assets previously recorded in Equity will be gradually allocated and recorded in the Retained earnings on the consolidated Balance Sheet.

Investments in associates

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting. Interests in associates are carried in the consolidated balance sheet at cost as adjusted by post-acquisition changes in the Company's share of the net assets of the associate. Losses of an associate in excess of the Company's interest in that associate (which includes any long-term interests that, in substance, form part of the Company's net investment in the associate) are not recognised, unless the Company has an obligation to make payments on behalf of the associate for debts that the Company has guaranteed and committed to pay. If the associate subsequently makes a profit, the Company shall only recognise its share of that profit after it has offset the previously unrecognised net loss.

Where a group entity transacts with an associate of the Company, unrealised profits and losses are eliminated to the extent of the Company's interest in the relevant associate.

Cash

Cash include cash on hand, bank demand deposits.

Financial investments

Held-to-maturity investments

Held-to-maturity investments comprise investments that the Company has the positive intent or ability to hold to maturity, including bank term deposits. Held-to-maturity investments include bank deposits with original maturities of more than 03 months.

Loan receivables

Loan receivables are measured at cost less provision for doubtful debts. Provision for doubtful debts relating to loan receivables is made in accordance with prevailing accounting regulations.

Receivables

Receivables represent the amounts recoverable from customers or other debtors and are stated at carrying amount less provision for doubtful debts.

Provision for doubtful debts is made for receivables that are overdue for six months or more, or when the debtor is in dissolution, in bankruptcy, or is experiencing similar difficulties and so may be unable to repay the debt.

Inventories

Inventories mainly include work in progress of the following projects:

- (i) The cost of work in progress of these projects includes land use fees, costs of site clearance compensation, construction costs, interest expenses, direct costs, and expenses related to general costs incurred during the construction of the projects.
- (ii) The cost of work in progress of the Villa represents the cost with the value determined corresponding to the volume of work items completed by the subcontractors and accepted by the parties.

The purchase and other costs of merchandise are directly attributable to the purchase of the goods.

The Company accounts for inventories using the perpetual inventory method. Inventories are measured at the lower of cost and net realizable value. Net realizable value is determined at the estimated selling price less the estimated costs of completing the product and any marketing, selling, and distribution costs incurred.

The evaluation of necessary provision for inventory obsolescence follows prevailing accounting regulations which allow provisions to be made for obsolete, damaged, or sub-standard inventories and for those which have costs higher than net realisable values as at the consolidated balance sheet date.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation.

The costs of purchased tangible fixed assets comprise their purchase prices and any directly attributable costs of bringing the assets to their working condition and location for their intended use.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives as follows:

	Years
Buildings, structures	35
Motor vehicles, transmission equipment	6 - 10
Office equipment	3 - 5

Loss or gain resulting from sales and disposals of tangible fixed assets is the difference between profit from sales or disposals of assets and their residual values and is recognised in the consolidated income statement.

Intangible assets and amortization

Intangible assets represent land use rights and computer software that are stated at cost less accumulated amortization.

Land use rights represent indefinite land use rights at villa No. 23, lot D3A.3, auction site 18.6 ha, Phu Thuong Ward, Tay Ho District, Hanoi City. Indefinite-term land use rights are not amortized.

Computer software is amortized on a straight-line basis over its estimated useful life of 5 years.

Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Company as lessor

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are charged to the income statement when incurred or charged to the income statement using straight-line basis over the lease term.

The Company as lessee

Leases where substantially all the rewards and risks of ownership of assets remain with the leasing company are accounted for as operating leases. Rentals payable under operating leases are charged to the income statement on a straight-line basis over the term of the relevant lease or allocated to the cost of finished real estate products at the time of hand-over to customers.

Investment properties

Investment properties are composed of buildings, structures, and other assets held by the Company to earn rentals.

Buildings, structures for rentals are detailed as follows:

No	Project	Address	Owner Company
1	Villa house and furniture at Vuon Dao villa	No. 23, lot D3A.3, auction site 18.6 ha, Phu Thuong Ward, Tay Ho District, Hanoi City	Sunshine Home Development Join Stock Company (Holding Company)
2	Investment properties related to Sunshine Center Project	No. 16 Pham Hung Street, My Dinh 2 Ward, Nam Tu Liem District, Hanoi City	Sunshine Home Development Join Stock Company (Holding Company)
3	Investment properties related to Sunshine City Project	Plot I.A.23, Nam Thang Long Urban area phase II, Dong Ngac Ward and Xuan Dinh Ward, Bac Tu Liem District, Hanoi City	Xuan Dinh Construction Investment Joint Stock Company (Indirect subsidiary of the Company)
4	Investment properties related to Sunshine Garden Project	Plot I1-HH1, Mai Dong Ward, Hoang Mai District and Vinh Tuy Ward, Hai Ba Trung District, Hanoi City	Anh Duong Star Joint Stock Company (Subsidiary of the Company)
5	Investment properties related to Sunshine Palace Project	Plot C2/CN3, Mai Dong Ward, Hoang Mai District, Hanoi City	Anh Duong Star Joint Stock Company (Subsidiary of the Company)

The costs of purchased investment properties comprise their purchase prices and any directly attributable expenditures, such as professional fees for legal services, property transfer taxes and other related transaction costs. The costs of self-constructed investment properties are the finally accounted construction or directly attributable costs of the properties.

Investment properties held to earn rental are amortized on a straight-line basis over their estimated useful lives as follows:

	Years
Buildings, structures	35 - 45
Others	4 - 5

Construction in progress

Properties in the course of construction for production, rental or administrative purposes, or for other purposes, are carried at cost including costs that are necessary to form the assets in accordance with the Company's accounting policy. Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use.

Prepayments

Prepayments are expenses that have already been paid but relate to results of operations of multiple accounting periods. Prepayments include expenses related to cost of issuing LC, salesperson's commissions and bonuses, real estate consulting and brokerage, subsidy for interest expense of customers and other prepaid expenses.

Salesperson's commissions and bonuses, real estate consulting and brokerage, subsidy for interest expense of customers incurred before the handover of real estate to customers are expected to provide future economic benefits to the Company and are allocated to the consolidated income statement in accordance with real estate revenue upon handover to customers.

The cost of issuing LC are amortized to the consolidated income statement over the LC guarantee term.

Other types of prepayments are expected to provide future economic benefits to the Company and have been capitalised as prepayments and are allocated to the consolidated income statement using the straight-line method in accordance with the current prevailing accounting regulations.

Bond issuance

The Company issues ordinary bonds for mid-term borrowing purposes with the issue price equal to the bond par value.

Bond issuance expenses are amortized over time with the bond term on a straight-line basis. At the time of initial recognition, issuance expenses of bonds are reduced to a decrease in the principal of the bond. Periodically, bond issuance costs are amortized by recording an increase in the value of the principal and recording it into financial expenses or capitalization in accordance with the recognition of interest payable on bonds.

Payable provisions

Payable provisions are recognised when the Company has a present obligation as a result of a past event, and it is probable that the Company will be required to settle that obligation. Provisions are measured at the Executive Board's best estimate of the expenditure required to settle the obligation as at the consolidated balance sheet date.

Unearned Revenue

Unearned revenue is the amounts received in advance relating to results of operations of for multiple accounting periods for services on apartment management and operation fees that have been yet provided or delivered. The Company recognizes unearned revenue in proportion to its obligations that the Company will have to perform in the future. When the revenue recognition conditions are satisfied, unearned revenue will be recognized in the consolidated income statement for the period corresponding to the portion that meets the revenue recognition conditions.

Revenue recognition

Revenue from real estate

Revenue from the sale of real estate which the Company is the investor is recognised when all five (5) following conditions are satisfied:

- (a) the real estate has been completed and transferred to the buyer, the Company has transferred to the buyer the significant risks and rewards of ownership of the real estate;
- (b) the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the real estate sold;
- (c) the amount of revenue can be measured reliably;
- (d) the economic benefits associated with the transaction flowed or will flow to the Company; and
- (e) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

For real estate in which the Company is an investor; the client has the right to complete the interior of the real estate and the Company performs the interior completion of the property in accordance with the customer's designs and requirements. The Company recognizes as revenue upon completion, handing over the raw construction to the customers when all five (5) of the same conditions are met.

Revenue from services rendered

Revenue of a transaction involving the rendering of services is recognized when the outcome of such transactions can be measured reliably. Where a transaction involving the rendering of services is attributable to several periods, revenue is recognized in each period by reference to the percentage of completion of the transaction at the balance sheet date of that period. The outcome of a transaction can be measured reliably when all four (4) following conditions are satisfied:

- (a) the amount of revenue can be measured reliably;
- (b) it is probable that the economic benefits associated with the transaction will flow to the Company;
- (c) the percentage of completion of the transaction at the balance sheet date can be measured reliably; and
- (d) the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Interest income and gain from investments

Interest income is accrued on a time basis, by reference to the principal outstanding and at the applicable interest rate.

Income from investments is recognized when the Company has the right to receive the interest.

Borrowing costs

Borrowing costs are recognized in the consolidated income statement in the period when incurred unless they are capitalized in accordance with Vietnamese Accounting Standard No. 16 "Borrowing costs". Accordingly, borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period to get ready for their intended use or sale, are added to the cost of those assets, until the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the cost of those assets. For specific borrowings for construction of fixed assets and investment properties, borrowing costs are capitalized even when the construction period is under 12 months.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the period. Taxable profit differs from profit before tax as reported in the consolidated income statement because it excludes items of income or expense that are taxable or deductible in other periods (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognized on significant differences between carrying amounts of assets and liabilities in the consolidation financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilised.

As at 31 March 2025, Hung Thinh Phat Housing Investment Company Limited - a subsidiary of the Company has losses that can be carried forward to offset against future taxable income within 5 years. The Company has not recognized deferred income tax assets for this tax loss due to uncertainty about future profits.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities's examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.
