The Board of Supervisory

1. Mr. Nguyen Anh Dung	Head of the Supervisory Board
2. Mr. Hoang Nhu Thai	Member
3. Mrs. Le Thi Thanh Noi	Member

LEGAL REPRESENTATIVE

The legal representative of the Company during the period and until the date of this report is Mr. La Quy Duan - General Director.

THE BOARD OF MANAGEMENT'S STATEMENT OF RESPONSIBILITY

The Board of Management of the Company is responsible for preparing the interim combined financial statements, which give a true and fair view of the financial position of the Company as at 30 June 2025, and its financial performance and its cash flows for the period from 01 January 2025 to 30 June 2025 in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to the interim combined financial reporting. In preparing these interim combined financial statements, The Board of Management is required to:

- Select suitable accounting policies and then apply them consistently;
- Make judgments and estimates that are reasonable and prudent;
- State whether applicable accounting principles have been followed, subject to any material departures disclosed and explained in the interim combined financial statements;
- Prepare the interim combined financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business; and
- Design and implement an internal control system effectively for the purpose of properly preparing the interim combined financial statements to minimize risks and frauds.

STATEMENT OF THE BOARD OF MANAGEMENT (CONTINUED)

The Board of Management is responsible for ensuring that proper accounting records are kept, which disclose, with reasonable accuracy at any time, the financial position of the Company and that the interim combined financial statements comply with Vietnamese accounting standards, accounting regime and legal regulations relating to interim combined financial statement preparation and presentation. The Board of Management is also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of frauds and other irregularities.

The Board of Management confirms that the Company has complied with the above requirements in preparing these interim combined financial statements.

For and on behalf of the Board of Management,

La Quy Duan
Chief Executive Officer
Hanoi, 11 August 2025

No. 081102/2025/BCSX-iCPA

REVIEW REPORT ON INTERIM FINANCIAL INFORMATION

To: Shareholders, The Board of Management and Board of Directors
Dong Anh LICOGI Mechanical Joint Stock Company

We have reviewed the interim combined financial statements of Dong Anh LICOGI Mechanical JSC (the "Company"), prepared on 11 August 2025 as set out from page 5 to page 36, including the Interim Balance sheet as at 30 Jun 2025, and the Interim Income Statement and Interim Cash Flow Statement for the six-month then ended 30 June 2025, and a summary of significant accounting policies and other explanatory information.

The Board of Management's Responsibility

The Board of Management is responsible for the preparation and fair presentation of these interim combined financial statements in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to interim financial reporting and for such internal control as management determines is necessary to enable the preparation of interim combined financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to raise a conclusion on the Interim Combined Financial Statements based on our review. We conducted our review in accordance with Vietnamese Standards on review engagements No.2410 - Review of interim financial information performed by the independent auditor of the entity.

The review of financial information involves conducting interviews, primarily with those responsible for financial and accounting matters, as well as performing analytical procedures and other review procedures. A review is fundamentally more limited in scope than an audit conducted in accordance with Vietnamese auditing standards, and therefore does not enable us to obtain assurance that all significant matters that could be identified in an audit will be discovered. Accordingly, we do not express an audit opinion.

Conclusion of Auditors

Based on our review, we have not found anything that causes us to believe that the attached interim combined financial statements of the Company do not present, in all material respects, a true and fair view of the Company's financial position as of June 30, 2025, as well as its results of operations and cash flows the six-month then ended 30 June 2025 in accordance with Vietnamese accounting standards, the enterprise accounting regime in Vietnam, and relevant legal regulations on the preparation and presentation of interim financial statements.

6. Explanation on the Comparability of Information in the Financial Statements

The comparative figures presented in the interim balance sheet and the related notes are those of the consolidated financial statements for the fiscal year ended December 31, 2024, which have been audited.

The comparative figures presented in the interim income statement, interim cash flow statement, and the related notes are those of the interim consolidated financial statements for the six-month period ended June 30, 2024, which have been reviewed.

7. Employees

The total number of employees of the Company as at June 30, 2025 was 502 people (as at December 31, 2024 was 510 people).

II. ACCOUNTING CONVENTION AND ACCOUNTING PERIOD**Accounting convention**

The interim combined financial statements, expressed in Vietnam Dong (VND), are prepared under the historical cost convention and in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to interim combined financial reporting.

The Company's interim combined financial statements are prepared on the basis of the financial statements of the Company's Office and its subsidiaries. All transactions and balances between the Corporate Office and its subsidiaries are eliminated in full when preparing the interim combined financial statements.

The interim combined financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam.

Financial year

The company's financial year begins from 01 January to 31 December.

The interim financial statements are prepared for the period from 01 January 2025 to 30 June 2025.

III. ACCOUNTING STANDARDS AND SYSTEM APPLIED

The Company adopted Vietnamese accounting regulations as stipulated in Circular No. 200/2014/TT-BTC ("Circular 200") dated 22 December 2014 issued by the Ministry of Finance and Circular No. 53/2016/TT-BTC dated 21 March 2016 of the Ministry of Finance amending and supplementing some articles of Circular No. 200/2014/TT-BTC. The Company has fully complied with the requirements of Vietnamese Accounting Standards in the preparation and presentation of the combined Financial Statements.

Accounting form applied: General journal.

NOTES TO THE INTERIM COMBINED FINANCIAL STATEMENTS (CONTINUED)*These notes are an integral part of and should be read in conjunction with the accompanying interim financial statements***IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The significant accounting policies, which have been adopted by the Company in the preparation of these combined financial statements, are as follows:

Estimates

The preparation of combined financial statements in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the combined financial statements and the reported amounts of revenues and expenses during the year. Although these accounting estimates are based on the management's best knowledge, actual results may differ from those estimates.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid investments with original maturities of three (03) months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Financial investments***Held-to-maturity investments***

Held-to-maturity investments include those that the Company has the intention and ability to hold to maturity. Held-to-maturity investments include: term deposits with banks (including bills and promissory notes), bonds, and preferred shares that the issuer is required to redeem at a specified date in the future and held-to-maturity loans for the purpose of earning periodic interest and other held-to-maturity investments.

Held-to-maturity investments are recognized beginning on the date of acquisition and are initially measured at the purchase price and costs associated with the acquisition of the investments. Interest income from held-to-maturity investments after the acquisition date is recognized in the income statement on an accrual basis. Interest earned before the Company holds it is deducted from the original cost at the time of purchase.

Held-to-maturity investments are measured at cost less allowance for doubtful debts.

Provision for bad debts of investments held to maturity is made in accordance with current accounting regulations.

Loan receivables

Loan receivables are measured at cost less provisions for bad debts. Provisions for doubtful debts of the Company's loans are made in accordance with current accounting regulations.

Invest in ventures, associates

An associate is an entity over which the Company has significant influence but is not a subsidiary or joint venture of the Company. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies.

The Company initially recognizes investments in associates at cost. The Company recognizes in income in the income statement the share from the accumulated net profit of the investee arising after the date of investment. Other amounts received by the Company in addition to distributed profits are considered to be the recovery of investments and are recognized as a deduction from the cost of the investment. Dividends received by shares are only tracked for the number of additional shares, not the value of shares received/recognized at par value.

NOTES TO THE INTERIM COMBINED FINANCIAL STATEMENTS (CONTINUED)

These notes are an integral part of and should be read in conjunction with the accompanying interim financial statements

IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)***Invest in ventures, associates (Continued)***

Investments in associates are stated in the balance sheet at cost less allowance for diminution in value (if any).

Provision for loss of investments in associates is made when the associate suffers a loss with an allowance equal to the difference between the actual contributed capital of the parties in the associate and the actual equity, multiplied by the Company's capital contribution ratio compared to the total actual contributed capital of the parties in the associate. If the associate is the subject of the combined Financial Statements, the basis for determining the provision for loss is the combined Financial Statements.

Increase or decrease in the amount of provision for loss of investments in associates must be made at the balance sheet date and recognized in financial expenses.

Receivables

Receivables are measured at cost less provision for doubtful debts. Provision for doubtful debts relating to loan receivables is made in accordance with prevailing accounting regulations.

The allowance for doubtful debts reflects the value of receivables that the company expects to be unable to recover at the end of the accounting period. Any increase or decrease in the balance of the allowance is recorded as an expense under administrative expenses in the Income Statement.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost comprises direct materials and where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is calculated using the specific identification method. Net realisable value represents the estimated selling price less all estimated costs to completion and costs to be incurred in marketing, selling and distribution.

Method of determining the value of work in progress at the end of the period:

- Unfinished production and business costs are collected for each project that is not completed or does not meet the conditions for revenue recognition, corresponding to the amount of unfinished work at the end of the period..
- For products: The cost of production in progress is collected according to the ratio of equivalent finished products.

The Company's provision for devaluation of inventories is made in accordance with current accounting regulations. Accordingly, the Company is allowed to make provision for devaluation of inventories in case the cost of inventories is higher than the net realizable value at the balance sheet date.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation.

The costs of purchased tangible fixed assets comprise their purchase prices and any directly attributable costs of bringing the assets to their working condition and location for their intended use.

NOTES TO THE INTERIM COMBINED FINANCIAL STATEMENTS (CONTINUED)

These notes are an integral part of and should be read in conjunction with the accompanying interim financial statements

IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**Tangible fixed assets and depreciation (Continued)**

For fixed assets formed by investment in capital construction by contracting or self-construction and production, the historical cost is the settlement price of the construction work according to current investment and construction management regulations, other directly related costs and registration fees (if any). In case the project has been completed and put into use but the final settlement has not been approved, the historical cost of the fixed assets is recorded at the provisional price on the basis of the actual costs spent to acquire the fixed assets. The estimated historical cost will be adjusted according to the final settlement price approved by the competent authorities.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives as follows:

	<u>Years</u>
Buildings and structures	05 - 25
Machinery and equipment	06 - 10
Motor vehicles	06 - 10
Equipment, management tools	01 - 05
Other fixed assets	02 - 08

Gains and losses arising from the disposal or sale of assets are the difference between the income from liquidation and the carrying amount of the assets and are recognized in the income statement.

Prepayments

Prepayments are expenses which have already been paid but relate to results of operations of multiple accounting periods, including land rentals, establishment costs and other types of long-term prepayments and are considered likely to bring future economic benefits to the Company. These expenses are capitalized as prepayments and amortized to the income statement, using the straight-line method in accordance with applicable accounting regulations.

Construction in progress

Properties in the course of construction for production, rental or administrative purposes, or for the purposes not yet determined, are carried at cost. Cost includes service costs and borrowing costs dealt with in accordance with the Company's accounting policy. Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use.

Provisions payable

Provisions for payables are recognized when the Company has a present obligation as a result of a past event, and it is probable that the Company will be required to settle this obligation. Provisions are determined on the basis of management's estimation of the costs necessary to settle this obligation as at the balance sheet date.

For casting products, the Company makes a warranty provision equivalent to 0.25% of revenue made during the warranty period specified in each specific contract.

For aluminum and glass products, the Company makes a warranty provision corresponding to 0.41% and 0.5% of the revenue of the completed projects, handover and final settlement within the specified warranty period specified in each specific contract. In addition, for projects with detailed estimates, warranty provisions will be made according to the estimates

For space truss construction products, the Company makes a provision for warranty corresponding to 0.25% of revenue from completed, handed over and final settlement projects within the warranty period specified in each product. Specific contracts and from 1% to 4% of revenue for a number of works of specific nature. In addition, the works have detailed estimates, provision for warranty according to the estimate.

NOTES TO THE INTERIM COMBINED FINANCIAL STATEMENTS (CONTINUED)*These notes are an integral part of and should be read in conjunction with the accompanying interim financial statements***IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****Provisions payable (Continued)**

Provisions for payables are recognized in production and business expenses of the accounting period. The difference between the provision for payables made in the previous accounting period that has not yet been used up is larger than the provision for payables made in the reporting year, which is reversed and recorded as a decrease in production and business expenses in the year minus the difference. The greater of the provision for payables for construction and installation warranties is reversed into other income in the accounting year.

Revenue recognition

Revenue from the sale of goods is recognised when all five (5) following conditions are satisfied:

- (a) The Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- (b) The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- (c) The amount of revenue can be measured reliably. When the contract stipulates that the buyer is entitled to return the product or goods purchased under specific conditions, revenue is recognized only when those specific conditions no longer exist and the buyer is not entitled to return products and goods (unless the customer has the right to return the goods in exchange for other goods or services);
- (d) It is probable that the economic benefits associated with the transaction will flow to the Company; and
- (e) The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue from a service transaction is recognized when the outcome of the transaction can be measured reliably. In case the service provision transaction involves many periods, revenue is recognized in the period according to the result of the work completed as at the balance sheet date of that period. The outcome of a service transaction is determined when all four (4) of the following conditions are satisfied:

- (a) Revenue can be measured reliably. Where the contract stipulates that the buyer is entitled to return the purchased service under specific conditions, revenue is recognized only when those specific conditions no longer exist and the buyer is not entitled to return the service rendered;
- (b) It is probable that economic benefits will flow to the transaction;
- (c) The work completed at the balance sheet date can be measured reliably; and
- (d) The costs incurred for the transaction and the costs to complete the transaction can be determined.

Interest on deposits is recognized on an accrual basis, determined on the balance of deposit accounts and the applicable interest rate unless recovery of interest is uncertain.

Deductions from sales and service provision arising in the accounting year include: Trade discounts, sales discounts and sales returns.

Trade discounts, sales discounts, sales returns incurred in the same year of product consumption, goods and services are adjusted to decrease the revenue of the year in which they arise. In case of products, goods and services that have been consumed from previous years, revenue deductions will be recorded in the following year as a decrease in revenue according to the principle: if incurred before the time of report issuance in the financial statements, a decrease in revenue in the financial statements of the reporting period (previous accounting period) shall be recorded, and if incurred after the issuance of the financial statements, a decrease in the revenue of the arising accounting period shall be recorded.

Exchange differences arising from the translation of these accounts are recognised in the income statement. Exchange differences due to revaluation of monetary items denominated in foreign currencies at the balance sheet date after netting for the increase and decrease in difference are recognized in financial income or as financial expenses.

NOTES TO THE INTERIM COMBINED FINANCIAL STATEMENTS (CONTINUED)*These notes are an integral part of and should be read in conjunction with the accompanying interim financial statements***IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****Foreign currencies**

Transactions in foreign currencies are converted at the exchange rate on the transaction date. Balances of monetary items denominated in foreign currencies at the balance sheet date are translated at the exchange rates prevailing at that date.

Borrowing costs

Borrowing costs include interest and other costs directly attributable to the loan.

Borrowing costs are recognized as expenses when incurred. Where borrowing costs are directly related to the investment in construction or production of unfinished assets that require a sufficiently long period (more than 12 months) before they can be put into use for the intended purpose or sold. This borrowing cost is capitalized. For separate loans for the construction of fixed assets, investment real estate, interest is capitalized even if the construction period is less than 12 months. Gains arising from the temporary investment of loans are recorded as a reduction to the cost of the related asset.

For general loans which are used for investment in construction or production of unfinished assets, the capitalized borrowing cost is determined by the capitalization rate to the weighted average accumulated cost. rights arising for the investment in capital construction or production of such assets. The capitalization rate is calculated at the weighted average interest rate of outstanding loans for the year, excluding separate loans for the purpose of forming a specific asset.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

The determination of the Company's income tax is based on current tax regulations. However, these regulations change from time to time and the final determination of corporate income tax depends on the examination results of the competent tax authorities.

Deferred tax is recognised on significant differences between carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and are accounted for using balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilized.

Deferred tax is calculated at the tax rates that are expected to apply in the year when the liability is settled or the asset realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis. Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

NOTES TO THE INTERIM COMBINED FINANCIAL STATEMENTS (CONTINUED)*These notes are an integral part of and should be read in conjunction with the accompanying interim financial statements***IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****Earnings per share**

Basic earnings per share is calculated by dividing the profit or loss after tax distributed to shareholders owning ordinary shares of the Company (after adjusting for the appropriation of bonus and welfare funds) by weighted average number of common shares outstanding during the year.

Diluted earnings per share is calculated by dividing the after-tax profit (or loss) to holders of the Company's common shares (after adjusting for dividends on convertible preferred shares) for the weighted average number of ordinary shares outstanding for the year and the weighted average number of ordinary shares to be issued in the event that all potential shares of common stock have an impairments are converted into common shares.

Related parties

Enterprises and individuals that directly, or indirectly through one or more intermediaries, control or are controlled by, or under common control with, the Company, including holding companies, subsidiaries and fellow subsidiaries are related parties of the Company. Associates and individuals owning, directly or indirectly, an interest in the voting power of the Company that gives them significant influence over the enterprises, key management personnel, including directors and officers of the Company and close members of the family of these individuals and companies associated with these individuals also constitute related parties. In considering each related party relationship, attention is paid to the nature of the relationship, not the legal form.

V. INFORMATION SUPPLEMENTING THE ITEMS IN THE INTERIM BALANCE SHEET**1. CASH AND CASH EQUIVALENTS**
