REPORT OF THE GENERAL MEETING OF SHAREHOLDERS

*Regarding the report summarizing business activities in 2024,
Operating direction for 2025*

I. Characteristics of business operations in 2024:

In 2024, the global economy slowed down with persistent inflation and prolonged supply chain disruptions, putting pressure on food raw material costs due to high energy costs, transportation, and input agricultural prices. Protectionist trade trends and geopolitical instability disrupted material flows. However, production shifts and a focus on sustainability created opportunities for countries like Vietnam if they meet global standards.

Impacts on the Food Ingredients industry include inflation and supply chain disruptions pushing input material prices up, global instability making it difficult to ensure stable supply and predictable prices, sustainability trends and international standards requiring businesses to invest in green production and traceability, and businesses needing to improve quality, reduce costs, and adapt to new standards to compete.

Despite experiencing a year with many difficulties and challenges in the general situation, thanks to continuous efforts, proactiveness, creativity, sensitivity, as well as the close connection between the Board of Directors and employees, AIG Asia Ingredients Corporation ("AIG") still took advantage of opportunities and achieved encouraging business results, creating jobs and ensuring stable income for all Company employees in the face of difficulties in the past year.

II. Summary of business operations in 2024:

- AIG's total consolidated net revenue in 2024 was 12,387 Billion VND, reaching 96% of the 2024 plan.

Profit after tax	Billion VND	836	890	94%

III. Business plan 2025

International organizations such as the IMF and World Bank forecast that global economic growth in 2025 will slow down. The main reasons are increased trade tensions, slow cooling of inflation, and geopolitical instability. Growth is expected to be uneven across regions, with the US and China likely to grow more slowly, while some Asian countries maintain good growth momentum. Financial risks and supply chain volatility remain factors to monitored closely.

Vietnam is expected to continue maintaining positive economic growth in 2025, with a forecast from the World Bank of 6.8%. The main growth drivers come from export recovery, stable FDI inflows and domestic consumption. However, Vietnam also faces challenges from the unstable global economic situation, especially the new trade policies of the US and the slowdown of major trading partners. The government continues to focus on improving the investment environment, promoting the disbursement of public investment capital and sustainable development to achieve the set growth targets.

Despite the aforementioned difficulties, the Company's Board of Directors still proposes a double-digit growth business plan for 2025, aiming for sustainable development in revenue and profit growth.

Key business plan Indicators for 2025:

- The consolidated revenue plan for 2024 is 14,800 Billion VND, equivalent to 119% compared to the actual figure in 2024.
 - The consolidated after-tax profit plan for 2025 is 980 Billion VND, equivalent to 117% compared to the actual figure in 2024.
- ❖ Below are the main Indicators of the 2024 business plan.

- Profit after tax of Non-controlling Interests	Billion VND	132	181	137%
Profit after tax	Billion VND	836	980	117%

The entire Board of Management and all members of the AIG Corporation continue to strive to achieve the revenue and profit Indicators according to the plan set for 2025 with the following orientations:

- Closely monitor the plan objectives and make timely adjustments according to each stage and time to complete the assigned plan.

Dear the General Meeting of Shareholders:

In 2024, in the face of unpredictable market and economic fluctuations, AIG reacted quickly and promptly and found opportunities to strongly reform the Company's organization and business management model in order to create a solid foundation for future development steps.

The Board of Supervisors would like to report some key points in 2024 as follows:

- Entering 2024, the economy still faces many challenges as the market has not shown strong signs of recovery, affecting the business operations of enterprises, including AIG. Therefore, AIG's leadership has always developed plans to respond, as well as always striving to minimize negative impacts on the Corporation's business operations such as best controlling arising costs in each member company to optimize profits, focusing on developing core business lines to rise revenue growth, increase operational efficiency, focusing on investing in technology, consolidating the personnel apparatus to work effectively, optimizing the supply chain, diversifying customer service methods, coordinating with customers to bring the best products to consumers thereby optimizing the Corporation's revenue, costs and profits.

❖ **Consolidated business results in 2024 the Company achieved are as follows:**

No.	Indicators	Unit	Actual 2023	Plan 2024	Actual 2024	% of Actual compared to Plan	% of Actual compared to 2023
1	Net revenue	Billion VND	11,915	12,950	12,387	96%	104%
2	Profit after tax	Billion VND	787	890	836	94%	106%

According to the Resolution of the General Meeting of Shareholders in 2024, the Company developed a consolidated business plan for the AIG Corporation in 2024: Net revenue equal to 109% and profit after tax equal to 113% compared to the implementation in 2023.

Implementation results in 2024 the Company has achieved:

- Resolution No. 02/2024/NQ-DHĐCĐ dated June 7, 2024, of the 2024 Annual General Meeting of Shareholders approved the continued implementation of the Employee Stock Ownership Plan (ESOP) for 2023–2024, as previously approved under
