DONG ANH LICOGI MECHANICAL JOINT STOCK COMPANY

(Established in the Socialist Republic of Vietnam)

NOTES TO THE FINANCIAL STATEMENT FOR THE FIRST QUARTER FOR THE PERIOD ENDING ON MARCH 31, 2026

1. GENERAL INFORMATION

Capital Ownership

Dong Anh Licogi Mechanical Joint Stock Company (referred to as the "Company") was formerly Dong Anh Mechanical One-Member Limited Liability Company, which was transformed into a joint-stock company according to Decision No. 1038/QĐ-BXD dated October 16, 2013, and Decision No. 1058/QĐ-BXD dated December 31, 2013, by the Ministry of Construction. The Company officially became Dong Anh Licogi Mechanical Joint Stock Company according to the Joint Stock Company Registration Certificate No. 0100106391 issued by the Hanoi Department of Planning and Investment on April 11, 2014, with the ninth (9th) amendment on August 10, 2020.

The total number of employees of the Company as of March 31, 2026, is 504 people.

Business Sectors and Main Activities

The Company's business sectors include: Casting of iron and steel; Warehousing and goods storage; Investment consulting (excluding legal, financial, accounting, auditing, tax, and securities consulting); Real estate business; Steel manufacturing and casting; Import-export of pure industrial chemicals and laboratory chemicals (except those prohibited by the state); Import-export of materials, machinery, equipment, spare parts, cast products, mechanical and metallurgical products; Production of non-ferrous metals and precious metals; Production of aluminum alloy profiles; Design and construction of aluminum components and products; Wholesale of metals and metal ores; Business in aluminum alloy profiles; Other professional, scientific, and technological activities not classified elsewhere; Implementation of scientific and technological information services; Design and manufacture of products: construction machine spare parts and equipment in the construction industry; Design of construction machinery; Design of civil and industrial building structures; Project management for construction investment (only within the scope of the registered professional certification); Certification of compliance with safety load-bearing conditions and quality assurance for construction works; Construction supervision and completion of civil and industrial works; Research and experimental development in natural and technical sciences; Manufacture of mining and construction machines; Manufacture and assembly of construction machinery; Manufacture and assembly of pressure equipment; Manufacture and assembly of space frames; Production of metal components; Manufacture, processing, and installation of metal equipment and structures; Automobile and other motor vehicle maintenance and repair; Repair and overhaul of automobiles and tractors.

The Company's main activities include: Steel manufacturing and casting; Production and business of aluminum alloy profiles; Design, manufacture, and assembly of space frames (excluding design services for construction works); Business and agency of all types of fuels, oils, and lubricants; Production, processing, and installation of metal equipment and structures.

Normal Business Production Cycle

The Company's normal business production cycle is typically completed within 12 months, except for certain space frame construction and assembly projects that may extend beyond 12 months.

The Company has 01 factory, 01 research center, and 01 joint venture company. Below is a general overview of the subsidiaries and joint venture company:

	Main Activities	Ownership and Benefits Ration
Joint Venture Company		
-Thang Long Industrial Park Co., Ltd	Industrial park leasing	42%
Affiliated Units		
-Branch of Dong Anh Mechanical Joint Stock Company - Licogi: Dong Anh Aluminum Factory	Manufacturing and trading of products Aluminum alloy products	
-Center for research, development and construction mechanics	Research and development	

2. BASIS FOR PREPARING INTERIM FINANCIAL STATEMENTS AND ACCOUNTING PERIOD

Basis for Preparing Interim Financial Statements

The accompanying interim financial statements are presented in Vietnamese Dong (VND), based on the historical cost principle, in accordance with Vietnamese accounting standards, the enterprise accounting regime in Vietnam, and relevant legal regulations regarding the preparation and presentation of interim financial statements.

The accompanying interim financial statements are not intended to reflect the financial position, results of operations, and cash flows in accordance with accounting principles and practices generally accepted in countries outside of Vietnam.

The interim financial statements of the Company include the interim financial statements of the Dong Anh Licogi Mechanical Joint Stock Company Branch - Dong Anh Aluminum Factory.

Accounting Period

The Company's financial year begins on January 1st and ends on December 31st.

3. APPLICATION OF NEW ACCOUNTING GUIDELINES

On October 27, 2025, the Ministry of Finance issued Circular No. 99/2025/TT-BTC guiding the accounting regime for enterprises. Circular 99 is effective for the fiscal year beginning on or after January 1, 2026. The Company has applied Circular 99 in preparing and presenting financial statements for the operating period ending March 31, 2026.

4. SUMMARY OF KEY ACCOUNTING POLICIES

Below are the key accounting policies applied by the Company in preparing the interim financial statements:

Accounting Estimates

The preparation of the interim financial statements complies with accounting standards, the Vietnamese enterprise accounting regime, and legal regulations related to the preparation and presentation of interim financial statements. This requires the Board of Directors to make estimates and assumptions that affect the reported amounts of liabilities, assets, and the presentation of contingent liabilities and assets as of the date of the interim financial statements, as well as the reported amounts of revenue and expenses throughout the reporting period. Although accounting estimates are made with the Board's best knowledge, actual results may differ from the estimates and assumptions made.

Financial Instruments

Initial Recognition

Financial Assets: At initial recognition, financial assets are recorded at cost, including any directly attributable transaction costs related to the acquisition of the financial asset. The Company's financial assets include cash, cash equivalents, accounts receivable from customers, and other receivables.

Financial Liabilities: At initial recognition, financial liabilities are recorded at cost, including any directly attributable transaction costs related to the issuance of the financial liabilities. The Company's financial liabilities include accounts payable to suppliers, other payables, accrued expenses, short-term provisions, and loans and financial lease liabilities.

Revaluation after Initial Recognition

Currently, there are no regulations regarding the revaluation of financial instruments after initial recognition.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, demand deposits, short-term investments that are highly liquid, easily convertible to cash, and subject to minimal risk of changes in value.

Financial Investments

Joint Venture Contributions

Joint venture contributions are agreements based on contracts where the Company and other participants carry out economic activities based on joint control. Joint control is defined as the requirement for unanimous decisions on strategic policies concerning the operational and financial matters of the joint venture.

Joint venture agreements leading to the establishment of an independent business entity in which the participating parties have joint control are called joint control business entities.

The Company initially recognizes investments in joint ventures at cost. The Company records income from the share of cumulative retained earnings of the investee after the investment date as financial income in the income statement. Other amounts received by the Company, besides the share of profits, are considered as recoveries of investments. Investments in joint ventures are presented in the interim balance sheet at cost.

4. SUMMARY OF KEY ACCOUNTING POLICIES (Continued)

Receivables

Receivables represent amounts due from customers or other entities. Receivables are presented at book value, less any allowance for doubtful debts.

The allowance for doubtful debts is made for receivables that have been overdue for more than six months or for receivables where the debtor is unlikely to pay due to liquidation, bankruptcy, or similar difficulties.

Inventories

Inventories are valued at the lower of cost or net realizable value. The cost of inventories includes direct material costs, direct labor costs, and overhead costs, if any, incurred to bring the inventory to its present location and condition. Net realizable value is determined as the estimated selling price less any estimated costs to complete the product and the costs of marketing, selling, and distribution. Inventories are accounted for using the periodic inventory system. The cost of inventory is calculated using the monthly weighted average method.

The Company sets up an inventory impairment provision in accordance with current accounting regulations. In particular, the Company is allowed to establish an allowance for obsolete, damaged, or low-quality inventory, and in cases where the cost of inventory exceeds the net realizable value at the end of the accounting period.

Tangible Fixed Assets and Depreciation

Tangible fixed assets are presented at cost less accumulated depreciation.

The cost of tangible fixed assets includes the purchase price and all other directly related costs necessary to bring the asset to a ready-for-use condition.

The cost of self-constructed tangible fixed assets includes construction costs, actual production costs incurred, along with installation and testing costs.

Other assets	02 - 08

(*) Tangible fixed assets are revalued when there is a decision from the State or an authorized body. The original cost, accumulated depreciation, and remaining useful life are adjusted based on the revaluation results approved by the relevant authorities in accordance with regulations.

Gains or losses arising from the disposal or sale of assets are the difference between the income from the disposal and the remaining value of the asset. These are recognized in the Interim Income Statement.

Leasing of Assets

A lease is considered a finance lease when most of the benefits and risks associated with ownership of the asset are transferred to the lessee. All other leases are considered operating leases.

The Company records finance lease assets at the fair value of the leased asset at the lease commencement date, or at the present value of the minimum lease payments, whichever is lower. The corresponding lease liability is recognized on the balance sheet as a finance lease payable. Lease payments are allocated between finance charges and principal repayments to ensure a constant periodic interest rate on the outstanding lease liability. The finance lease expenses are recognized in the income statement, unless these expenses directly form part of the leased asset, in which case they are capitalized according to the Company's policy on borrowing costs.

A lease is considered an operating lease when the lessor retains most of the benefits and bears the risks associated with ownership of the asset. Operating lease expenses are recognized in the Interim Income Statement using the straight-line method over the lease term. Any amounts received or receivable in connection with entering into an operating lease are also recognized using the straight-line method over the lease term.

Construction in Progress Expenses

Assets under construction for production, leasing, management, or other purposes are recorded at cost. This cost includes all necessary expenses incurred to form the asset, including construction, equipment, and other related costs in accordance with the Company's accounting policies. These costs will be transferred to the fixed asset's original cost at the estimated value (if no approved final settlement is available) when the assets are completed and ready for use.

According to the State's regulations on investment and construction management, depending on the management classification, the final settlement value of completed construction works must be approved by the relevant authorities. Therefore, the final value of construction works may change and depend on the final settlement approved by the competent authorities.

Prepaid Expenses

Prepaid expenses include actual costs that have been incurred but relate to the results of operations for future accounting periods.

The main prepaid expenses include business advantages, the value of small tools, components, and supplies already used, repair costs, and vehicle insurance costs. These costs are capitalized as prepaid expenses and allocated to the Interim Income Statement using the straight-line method in accordance with current accounting regulations.

4. SUMMARY OF KEY ACCOUNTING POLICIES (Continued)

Provisions

Provisions are recognized when the Company has a present obligation arising from a past event, and it is probable that the Company will be required to settle the obligation. Provisions are determined based on estimates made by the Board of Directors about the necessary costs to settle the obligation at the end of the reporting period.

For casting products, the Company sets aside a warranty provision corresponding to 0.25% of the revenue earned during the warranty period specified in each individual contract.

For space frame products, the Company sets aside a warranty provision corresponding to 0.25% of the revenue earned from completed and handed-over projects, with approved final settlement, during the warranty period specified in each individual contract. For some specialized projects, the warranty provision is set between 1% and 4% of the revenue. Additionally, for projects with detailed estimates, warranty provisions are set according to the estimates.

For aluminum and glass construction products, the Company sets aside a warranty provision corresponding to 0.41% and 0.5% of the revenue from completed, handed-over, and finalized projects during the warranty period specified in each individual contract. Additionally, for projects with detailed estimates, the warranty provision is set according to the estimate.

The Board of Directors of the Company believes that the above warranty provision ratio has been built on a reasonable estimate, in line with the actual warranty obligations arising at the Company, and in accordance with current regulations.

Revenue Recognition

Sales revenue is recognized when all of the following five (5) conditions are met:

(a) The Company has transferred most of the risks and rewards related to the ownership of the product or goods to the buyer;
(b) The Company no longer retains control over the goods as the owner or controls the goods;
(c) The revenue can be reliably measured;
(d) The Company is likely to receive economic benefits from the transaction;
(e) The costs related to the transaction can be reliably measured.

Revenue from service transactions is recognized when the outcome of the transaction can be reliably determined. If a service transaction spans multiple periods, revenue is recognized in the period based on the portion of the work completed at the balance sheet date of that period. The outcome of a service transaction is considered reliably determined when all of the following four (4) conditions are met:

(a) The revenue can be reliably measured;
(b) There is a probability of receiving economic benefits from the transaction; (c) The portion of work completed at the balance sheet date can be determined; (d) The costs incurred for the transaction and the costs to complete the service transaction can be measured.

Revenue from manufacturing and assembling space frames and steel structures is recognized according to the principle that when the results of the contract for manufacturing and assembling space frames and steel structures can be reliably estimated and confirmed by the customer, revenue and related costs are recognized according to the completed work portion confirmed by the customer for the period. When the results of execution cannot be reliably estimated, revenue is recognized only equivalent to the costs incurred for the contract that are reasonably certain to be reimbursed.

Interest income from deposits is recognized on an accrual basis, determined based on the balance of deposit accounts and applicable interest rates.

Foreign Currency

The Company applies exchange rate differences in accordance with the Vietnamese Accounting Standard No. 10 (VAS 10) "Effects of Changes in Foreign Exchange Rates." Accordingly, transactions in foreign currencies are converted at the exchange rate on the transaction date. The balances of monetary items in foreign currencies at the end of the reporting period are converted at the exchange rate on that date. The resulting exchange differences are recognized in the Income Statement. Exchange gains or losses from the revaluation of balances at the end of the reporting period are not distributed to shareholders.

4. SUMMARY OF KEY ACCOUNTING POLICIES (Continued)

Borrowing Costs

Borrowing costs are recognized as an expense in the period in which they are incurred, unless they are capitalized in accordance with the Vietnamese Accounting Standard No. 16 "Borrowing Costs." Accordingly, borrowing costs directly related to the purchase, construction, or production of assets requiring a relatively long time to complete and ready for use or sale are capitalized as part of the asset's cost until the asset is ready for use or sale. Income arising from the temporary investment of borrowed funds is deducted from the cost of the related asset. For loans specifically for the construction of fixed assets or investment properties, interest is capitalized even if the construction period is less than 12 months.

Taxes

Corporate income tax represents the total of the current tax payable and deferred tax.

The current tax payable is calculated based on taxable income for the period. Taxable income differs from the net income presented in the Interim Income Statement because taxable income excludes items of income or expense that are taxable or deductible in other periods (including carryforward losses, if any), and also excludes items that are exempt from tax or non-deductible.

Deferred tax is calculated on the temporary differences between the book value and the tax base of assets and liabilities in the interim financial statements and is recognized using the balance sheet method. Deferred tax liabilities must be recognized for all temporary differences, while deferred tax assets are only recognized when it is probable that sufficient taxable income will be available in the future to offset the temporary differences.

Deferred tax is calculated using the tax rates expected to apply in the period when the asset is realized or the liability is settled. Deferred tax is recognized in the Income Statement, and only recognized directly in equity if it relates to items recognized directly in equity.

Deferred tax assets and deferred tax liabilities are offset when the Company has a legal right to offset current tax assets against current tax liabilities, and when the deferred tax assets and liabilities relate to income taxes levied by the same tax authority and the Company intends to settle them on a net basis.

The determination of the Company's income tax is based on the current tax regulations. However, these regulations may change over time, and the final determination of corporate income tax depends on the outcome of an audit by the relevant tax authorities.

Other taxes are applied in accordance with current tax laws in Vietnam.
