“Regarding the fluctuation of profit after tax in Q2/2022, increase by 14,5% compared to Q2/2021”

Base on Circular No.96/2020/TT-BTC dated 16/11/2020 of the Ministry of Finance, which regulates the information disclosure on the stock market.

DOMESCO Medical Import-Export JSC (Stock code: DMC) would like to clarify the fluctuation of profit after tax in Q2/2022, which increased by 14,5% compared to Q2/2021:

1. Q2/2022 actual performance compared to Q2/2021

Unit: Billion Dong

Items	Q2-2022	Q2-2021	Variance	%
Net revenue	399.1	363.3	35.8	9,8%
Profit after tax	48.6	42.4	6.2	14,5%

2. Reasons:

Revenue increased by 9,8% and profit after tax increased by 14,5% in Q2/2022 compared to Q2/2021 for the following reasons:

- + After the Government applied the policy of safe coexistence with the pandemic, difficulties were gradually removed which created conditions for the resumption of production and business activities, the expansion of retail channels, medical examination and treatment activities at the hospital channels were restored thanks to the demand for examination and treatment of post-COVID-19 sequelae.
- + DOMESCO had a grasp of the ever-increasing demand of post-COVID-19-sequelae treatment, therefore, the Company set out to manufacture and market immunity booster products and post-COVID-19 health care products.
- + DOMESCO strengthened advertising to promote high-margin products, especially those that were produced by the Company itself.
- + The expansion of market coverage contributed to revenue and profit growth.

The above are the main reasons leading to an increase of 9,8% in net revenue and 14,5% increase in profit after tax compared to the same period in 2021.

DOMESCO Medical Import-Export JSC kindly reports to SSC, HOSE, and Shareholders to notify.

Best regards,
