- Explaining the after-tax profit from corporate income tax in the income statement for Quarter 4, 2024 increased by more than 10% compared to the profit after corporate income tax in the same period last year as follows:
- The after-tax profit in the fourth quarter of 2023 is VND (18.002) billion.
- The after-tax profit in the fourth quarter of 2024 is VND 423.858 billion.
The after-tax profit in the fourth quarter of 2024 increased by VND 441.86 billion compared to the fourth quarter of 2023. The main reasons are: In the fourth quarter of 2024, financial costs decreased by VND 85.58 billion due to reduced interest expenses, profits from associated companies increased significantly by VND 162.4 billion, and management costs decreased by VND 14.1 billion. Although revenue saw a slight decline, the gross profit margin on total net revenue for the entire corporation in the fourth quarter of 2024 was 22.9%, compared to 11.5% in the same period of 2023, due to slight reductions in input costs and better performance from power plants compared to the same period last year, leading to a significant increase in profit this year.
