(Issued under Circular No. 200/2014/QD-BTC on December 22, 2014 of the Minister of Finance)

Model No.: B09-DN

NOTES TO THE FINIANCIAL STATEMENTS

3th quarter of 2025 (As of 30st Septemper 2025)

I - Characteristics of the company's operations

1. Form of capital ownership:

Song Da 7.02 Joint Stock Company was formerly a branch of Song Da 7 Construction Company in Hoa Binh, under Song Da Corporation. In 2004, it was converted into a joint stock company following Decision No. 1575/QD-BXD dated October 11, 2004, issued by the Ministry of Construction. In 2009, it merged with Nam Thi Hydropower Joint Stock Company in Lai Chau. The company operates under Business Registration Certificate No. 5400232452, initially issued by the Department of Planning and Investment of Hoa Binh Province on November 25, 2004, and subsequently amended for the 19th time on May 14, 2024, by the Department of Planning and Investment of Lai Chau Province.

The company's headquarters is located at: Ban Chu Va 12, Binh Lu Commune, Lai Chau Province, Vietnam.

The charter capital is 120,000,000,000 VND, of which:

| | Shareholder name | Capital contribution according to business registration | Capital contribution ratio (%) | Actual contributed capital as of Septemper 30, 2025 |
|-------------|---|---|--------------------------------|---|
| | - Song Da 7 Joint Stock Company | 41.774.060.000 | 34,8 | 41.774.060.000 |
| 14 | Song Da 7.04 Joint Stock Company | 40.800.000.000 | 34 | 40.800.000.000 |
| - | Cao Nguyen - Song Da 7 Hydropower Joint Stock Company | 19.200.000.000 | 16 | 19.200.000.000 |
| - | - Chu Va Hydropower Joint Stock Company | | 0 | 0 |
| ta <u>-</u> | Other shareholders | 18.225.940.000 | 15,2 | 18.225.940.000 |
| | Total: | 120.000.000.000 | 100 | 120.000.000.000 |

As of September 30, 2019, the company has merged its branches directly into the company headquarters and no longer has any affiliated units.

2. Business sectors:

The main business sectors of the company include construction and installation, industrial production, and investment in the construction of hydropower projects, etc.

3. Business activities:

The main activities of the company are: construction and investment in industrial, public, residential, and other construction projects; construction of irrigation, hydropower, and transportation projects; etc.

4. Characteristics of the company's operations in the financial year affecting the financial statements: None.

I. Accounting period and currency used in accounting:

The company's fiscal year begins on January 1 and ends on December 31 each year.

The currency used in accounting records is the Vietnamese Dong (VND).

III. Accounting standards and policies applied

1. Accounting system applied:

The company applies the Enterprise Accounting System issued under Circular No. 200/2014/TT-BTC dated December 22, 2014, by the Minister of Finance.

2. Statement of compliance with Vietnamese Accounting Standards and Accounting System

The company has applied Vietnamese Accounting Standards and related guidance documents issued by the State. The financial statements are prepared and presented in full compliance with the requirements of each standard, the guidance circulars, and the Accounting System.

3. Accounting form applied:

The company applies the General Journal accounting form and performs accounting using accounting software..

IV. Accounting policies applied

1. Principles for recognizing cash and cash equivalents:

Cash and cash equivalents include cash on hand, bank deposits, and short-term investments with maturities of no more than three months that are highly liquid, easily convertible to known amounts of cash, and subject to an insignificant risk of changes in value.

Exchange rate differences arise during the period and differences due to the revaluation of monetary items at the end of the year are recorded in financial income or financial expenses for the year.

Short-term investments with maturities of no more than three months, which are easily convertible to cash and carry an insignificant risk of changes in value from the purchase date to the reporting date, are recognized as cash equivalents.

2. Principles for recognizing inventories:

Inventories are recorded at cost. If the net realizable value is lower than the cost, they are measured at net realizable value. The cost of inventories includes purchase costs, processing costs, and other related costs.

The value of inventories is determined using the weighted average method.

Inventories are accounted for using the perpetual inventory system.

The value of work-in-progress for business and construction projects is determined based on the actual costs incurred up to the financial reporting date, after deducting the estimated cost of completed work and recognized revenue up to the reporting date.

Provisions for inventory devaluation are made at the year-end as the difference between the original cost of the inventories and their net realizable value if the latter is lower.

3. Principles for recognizing and depreciating fixed assets:

Tangible fixed assets and intangible fixed assets are recognized at their original cost. During use, tangible and intangible fixed assets are recorded at their historical cost, accumulated depreciation, and net book value.

Finance lease assets are recognized at their original cost, which is either the fair value or the present value of the minimum lease payments (excluding VAT) and any directly attributable initial costs related to the finance lease.

Depreciation is calculated using the straight-line method. The estimated useful life for depreciation is determined as follows:

- Buildings and structures:

20 - 30 years

- Machinery and equipment:

10 - 20 years

- Transportation and transmission vehicles:

5 - 10 years

- Office equipment and other assets.

3 - 8 years

Finance lease assets are depreciated in the same manner as the company's fixed assets. For finance lease assets that are not certain to be purchased, depreciation is calculated based on the lease term if the lease term is shorter than their useful life.

4. Principles for recognizing and depreciating investment properties:

Investment properties are recognized at cost. During the holding period, whether for capital appreciation or operating lease purposes, investment properties are recorded at their historical cost, accumulated depreciation, and net book value.

Investment properties are depreciated in the same manner as other fixed assets of the company.

5. Principles for recognizing financial investments:

Investments in subsidiaries and associates are accounted for using the cost method. Net profits distributed by subsidiaries and associates arising after the investment date are recognized in the income statement. Other distributions are recognized accordingly.

Provisions for investment devaluation are made at the year-end as the difference between the carrying amount of the investments recorded in the accounting books and their market value at the provision date.

6. Principles for recognizing and capitalizing borrowing costs:

Borrowing costs are recognized as production and business expenses in the period they are incurred, except for borrowing costs directly related to the investment, construction, or production of qualifying assets, which are included in the value of those assets (capitalized) when

Borrowing costs directly related to the investment, construction, or production of qualifying assets that are capitalized include loan interest, amortization of discounts or premiums on bond issuance, and other related expenses.

7. Principles for recognizing and allocating prepaid expenses:

Prepaid expenses related solely to the current financial year's production and business activities are recognized as short-term prepaid expenses and allocated to production and business costs within the financial year.

Expenses incurred during the financial year but recorded as long-term prepaid expenses to be gradually allocated to production and business results over multiple years include:

- Establishment costs
- Relocation and reorganization costs..
- Large-value tools and instruments used.
- Major repair costs for fixed assets that occur once and are significant.
- Other expenses related to business results across multiple accounting periods.

The calculation and allocation of long-term prepaid expenses to production and business costs for each accounting period are based on the nature and scale of each type of expense to select an appropriate allocation method and criteria. Prepaid expenses are gradually allocated to production and business costs.

8. Principles for recognizing accrued expenses:

Accrued expenses are recognized for actual costs that have not yet been incurred or have been incurred but lack sufficient supporting documentation, allocated in advance to production and business costs in the period. This ensures that when the actual costs arise, they do not cause sudden spikes in production and business expenses, in line with the matching principle between revenue and expenses. When such costs are incurred, any differences from the accrued amounts are adjusted by recording additional or reduced expenses corresponding to the variance.

9. Principles and methods for recognizing provisions for payables:

The recognized value of a provision for payables is the best reasonable estimate of the amount required to settle the present obligation as of the end of the annual or interim accounting period.

Only expenses related to the initially established provision for payables can be offset against that provision.

The difference between the unused provision for payables from the previous accounting period and the lower provision for payables established in the reporting period is reversed and recorded as a reduction in production and business expenses for the period, except for the excess difference in the provision for payables.

10. Principles for recognizing owner's equity:

Owner's equity is recognized based on the actual capital contributed by the owners.

Unappropriated retained earnings represent the profits from the company's operations after deducting (-) adjustments for retrospective changes in accounting policies and retrospective corrections of material errors from previous years.

Unappropriated retained earnings are distributed to investors based on their contribution ratio after being approved by the Board of Directors and after allocating provisions in accordance with the company's charter and the laws of Vietnam.

11. Principles and methods for recognizing revenue:

Sales revenue:

Sales revenue is recognized when the following conditions are simultaneously met:

- The majority of risks and rewards related to ownership of the product or goods have been transferred to the buyer
- The company no longer retains control over the goods as the owner or does not have the ability to control the goods.
- The revenue can be reliably measured.
- Công ty đã thu được hoặc sẽ thu được lợi ích kinh tế từ giao dịch bản hàng.
- The costs related to the sale transaction can be reliably determined.

Revenue from providing services:

Revenue from providing services is recognized when the results of the transaction can be reliably determined. In cases where the service is provided over multiple periods, revenue is recognized in each period based on the portion of the work completed as of the reporting date.

- The revenue can be reliably determined.
- There is a reasonable expectation of receiving economic benefits from the service transaction.
- The portion of the work completed as of the balance sheet date can be determined.
- The costs related to the transaction and the costs to complete the service transaction can be reliably determined.

Financial income:

Revenue arising from interest, royalties, dividends, profit sharing, and other financial income is recognized when both of the following conditions are met:

- There is a reasonable expectation of receiving economic benefits from the transaction.
- The revenue can be reliably determined.
- Dividends and profit-sharing are recognized when the company has the right to receive dividends or profit from its investments.

Revenue from construction contracts:

The portion of work completed in a construction contract, which serves as the basis for determining revenue, is calculated using the percentage method. This method compares the actual incurred costs of the completed work at a given time with the total estimated costs of the contract.

12. Principles and methods for recognizing financial expenses:

The expenses recognized as financial expenses include:

- Costs or losses related to financial investment activities;
- Borrowing costs and interest expenses;
- Losses due to foreign exchange rate fluctuations on foreign currency transactions;
- Provision for devaluation of securities investments.

These expenses are recognized based on the total amount incurred during the period and are not offset against financial income.

13. Principles and methods for recognizing current corporate income tax expenses and deferred corporate income tax expenses:

Current corporate income tax expense is determined based on taxable income and the applicable corporate income tax rate for the current year.

Deferred corporate income tax expense is determined based on the temporary differences deductible, taxable temporary differences, and the applicable corporate income tax rate.

14. Foreign exchange risk provisions:

15. Other accounting principles and methods:

Song Da 7 Joint Stock Company
