Normal operating cycle

The Company's normal operating cycle is carried out within a period of no more than 12 months.

2. Accounting regime and policies applied at the Company

2.1. Accounting Period, accounting currency:

The Company's fiscal year applicable for the preparation of its Financial Statements starts on 1 January and ends on 31 December of the The currency used in accounting records is Vietnamese Dong (VND)

2.2. Accounting Standards and System

Accounting System

The Company applied the Vietnamese Enterprise Accounting System promulgated under Circular No. 200/2014/TT-BTC dated 22 December 2014, issued by the Ministry of Finance; Circular No. 53/2016/TT-BTC dated 21 March 2016 issued by the Ministry of Finance, amending and adding some articles of Circular No. 200/2014/TT-BTC.

Statements for the compliance with Accounting Standards and System

The company has applied the Vietnamese Accounting Standards and the guiding documents issued by the State. The financial statements are prepared and presented in accordance with all the regulations of each standard, circulars guiding the implementation of the standards, and the current accounting regime in use.

2.3. Financial instruments

Initial recognition

The Company's financial assets include cash and cash equivalents, accounts receivable from customers and other receivables, loans, and short-term and long-term investments. At the time of initial recognition, financial assets are determined at purchase cost/issuance cost plus any other costs directly attributable to the acquisition or issuance of those financial assets.

Financial liabilities

The Company's financial liabilities include loans, accounts payable to suppliers and other payables, and accrued expenses. At the time of initial recognition, financial liabilities are determined at the issuance cost plus any other costs directly attributable to the issuance of those financial liabilities.

Value after initial recognition

Currently, there are no regulations regarding the revaluation of financial instruments after initial recognition.

2.4. Cash and cash equivalents:

Cash includes cash on hand, demand deposits in banks, and monetary gold used for value storage purposes, excluding gold classified as inventory used as raw materials for product or goods production for sale.

Cash equivalents comprise short-term deposits and highly liquid investments with an original maturity of less than 3 months that are readily convertible to known amounts of cash and that are subject to an insignificant risk of changes in value.

2.5. Financial investments

Trading securities are recorded in the accounting books at cost, which includes the purchase price plus any purchase-related expenses (if any), such as brokerage fees, transaction costs, information service fees, taxes, charges, and banking fees. The cost of trading securities is determined based on the fair value of the payments at the time the transaction occurs.

Held-to-maturity investments include term bank deposits (including treasury bills and promissory notes), bonds, preferred shares that the issuer is obligated to repurchase at a specific future date, and loans held to maturity for the purpose of earning periodic interest, as well as other held-to-maturity investments.

The carrying value of investments in subsidiaries, joint ventures, and associates is determined at cost.

The carrying value of investments in equity instruments of other entities without control, joint control, or significant influence over the investee is determined at cost if the investment is made in cash, or at revalued value if the investment is made in non-monetary assets.

Dividends received in the form of shares are only recognized as the number of shares received, without recognizing an increase in the value of the investment or financial income.

Exchanged shares are valued at their fair value on the exchange date. The fair value of listed company shares is determined based on the closing price listed on the stock exchange. For unlisted shares traded on the UPCOM market, the fair value is based on the closing trading price on the UPCOM platform. For other unlisted shares, the fair value is determined based on the agreed price in the contract or the book value at the time of the exchange.

Impairment provisions for investments are made when the investee incurs a loss, except when the loss was anticipated by the parent company at the time of the investment decision. The impairment provision is reversed when the investee subsequently generates profits to offset the previously recognized losses. The reversal of the provision can only be made to the extent that it does not exceed the carrying value of the investment assuming no impairment provision had been recognized. The provision for long-term financial investments is made in accordance with the guidelines specified in Circular No. 48/2019/TT-BTC dated 8 August 2019, guiding the provision and handling of inventory impairment, investment losses, bad debts, and product, goods, service, and construction warranty provisions in enterprises, and Circular No. 24/2022/TT-BTC dated 7 April 2022, 'amending and supplementing Circular 48/2019/TT-BTC' issued by the Ministry of Finance.

2.6. Receivables:

Receivables are tracked in detail by maturity, debtor, type of foreign currency receivable, and other factors based on the company's management needs.

Provisions for doubtful debts are made for the following: overdue receivables as stated in economic contracts, loan agreements, contractual commitments, or debt commitments, and receivables that have not yet matured but are unlikely to be recovered. In this regard, provisions for overdue receivables are based on the original repayment terms of the contract, without considering any debt extensions between the parties. Provisions are also made for receivables that have not yet matured but where the debtor is in a state of bankruptcy, undergoing dissolution procedures, missing, or has absconded.

2.7. Inventories:

Inventories are valued according to their original prices. Where the net realizable value is lower than the original price, they must be vulued according to the net realizable value. The original price of inventories consists of the purchasing cost, processing cost and other directly related costs incurred for having the inventories stored in the present place and conditions.

The cost of inventories is determined in accordance with the weighted average method and và the actual. Inventory is accounted for using the perpetual inventory method.

Method for determining the value of work-in-progress at the end of the period:

Work in progress production costs are accumulated as the main material costs for each type of unfinished product.

Apartments constructed for sale are recognized at costs directly related to the construction of the apartments, including borrowing costs.

The provision for inventory devaluation is made at the end of the period based on the difference between the original cost of inventory and its net realizable value, if the original cost is higher.

2.8. Construction in progress

Construction in progress includes the cumulative costs directly related to the construction of factories, office buildings, and real estate projects where the company is the investor, and these projects are not completed by the end of the accounting period.

2.9. Fixed assets, Finance leases as lessee và Investment properties

Implementing Circular 45/2013/TT-BTC dated 25 April 2013, and Circular 147/2016/TT-BTC amending and supplementing certain provisions of Circular 45 by the Ministry of Finance regarding the management, use, and depreciation of fixed assets. Tangible fixed assets and intangible fixed assets are recognized at cost. During usage, tangible and intangible fixed assets are recorded at original cost, accumulated depreciation, and the remaining value. Depreciation is calculated using the straight-line method. The estimated depreciation periods are as follows:

- Buildings and structures	06-50 years
- Machinery and equipment	06 – 15 years
- Motor vehicles	06 - 30 years
- Office equipment	03-08 years
- Others	04 – 25 years

The company's land use rights are depreciated as follows: depreciated using the straight-line method based on the land use period from 25 years to 50 years, with land use rights being indefinite.

Computer software is depreciated using the straight-line method over a period of 3 to 8 years.

2.10. Prepaid expenses

Costs incurred related to the results of business operations over multiple accounting periods are recorded as prepaid expenses to be gradually allocated to the business results in subsequent accounting periods.

The calculation and allocation of prepaid expenses into production and business costs for each accounting period are based on the nature and extent of each type of expense to select an appropriate allocation method and basis. Prepaid expenses are gradually allocated to production and business costs using the straight-line method..

2.11. The account payables

The account payables are monitored in detail by payable terms, payable parties, original currency, and other factors depending on the Company's management requirement.

2.12. Borrowings and finance lease liabilities

The value of the finance lease liability is the total amount payable, calculated as the present value of the minimum lease payments or the fair value of the leased asset.

Loans and finance lease liabilities are monitored by each lender, each loan agreement, and the repayment term of the loans and finance lease liabilities. In the case of foreign currency loans or liabilities, detailed tracking is done based on the original currency.

2.13. Borrowing cost

Borrowing costs are recognized as production and business expenses in the period when incurred, except for borrowing costs directly related to the construction or production of work-in-progress assets, which are capitalized as part of the asset's value (capitalized) when the conditions specified in Vietnam Accounting Standard No. 16 'Borrowing Costs' are met. In addition, for loans specifically used for the construction of fixed assets or investment properties, borrowing interest is capitalized even if the construction period is less than 12 months. In case of joint capital borrowings, which are used for the purpose of investment in construction or production of an uncompleted asset, the borrowing costs eligible for capitalization in each accounting period shall be determined according to the capitalization rate for weighted average accumulated costs incurred to the investment in construction or production of such asset. The capitalization rate shall be calculated according to the weighted average interest rate applicable to the enterprise's borrowings unrepaid in the period, except for particular borrowings for purpose of obtaining an uncompleted asset.

2.14. Accrued expenses

Amounts payable for goods and services received from suppliers or provided to customers during the reporting period but not yet paid, interest expenses on loans payable, etc... are recognized as production and business expenses of the reporting period.

The recognition of accrued expenses into production and business expenses for the period is carried out based on the matching principle between revenue and expenses incurred during the period. The accrued expenses will be settled with the actual expenses incurred. The difference between the accrued amount and the actual expenses will be reversed.

2.15. Provisions (for payables)

Provisions for liabilities can only be recognized when the following conditions are met:

- The enterprise has a present obligation (legal or constructive obligation) arising from a past event;
- A decrease in the economic benefits that may result in the requirement to settle the liability; and
- Be able to make a reliable estimate of the value of the liability.

The recognized value of a provision for liability is the best reasonable estimate of the amount that will be required to settle the present obligation at the end of the reporting period.

Only expenses related to the provision for liability initially recognized can be offset by that provision.

Provisions for liabilities are recognized as production and business expenses of the reporting period. The difference between the unused provision for liabilities from the previous period that is greater than the provision for liabilities recognized in the current period is reversed and deducted from the production and business expenses of the period, except for the difference greater than the provision for warranty liabilities related to construction works, which is reversed into other income in the period.

2.16. Unrealized revenues

Unearned revenue includes advance revenue such as: amounts paid by customers in advance for one or more accounting periods for asset leasing, interest received in advance for loans or the purchase of debt instruments, and other unearned revenues such as: the difference between the installment sale price and the immediate payment price, and revenue corresponding to the value of goods, services, or discounts to be granted to customers in traditional customer programs...

Unearned revenue is transferred to Sales revenue and service provision revenue or Financial income based on the amount determined in accordance with each accounting period.

2.17. Owners' equity:

Capital is recorded according to the actual amounts invested by shareholders.

Other equity capital reflects business capital formed from additions derived from business performance results, donations, gifts, sponsorships, or asset revaluation (if permitted to record increases or decreases in owner's equity).

Undistributed profit after tax is the profit from the company's activities after deducting (-) adjustments due to retrospective application of changes in accounting policies and retrospective correction of material errors from previous years. Undistributed profit after tax may be distributed to investors based on their capital contribution ratio after approval by the Board of Directors and after allocating reserves in accordance with the Company's Charter and the regulations of Vietnamese law.

Dividends payable to shareholders are recognized as a liability on the Company's Balance Sheet after the announcement of dividend distribution by the Company's Board of Directors and the record date for dividend entitlement announced by the Vietnam Securities Depository.

2.18. Revenue:

Revenue from sale of goods

Revenue from the sale of goods shall be recognized when it satisfies all conditions below:

- The Company has transferred to the buyer the significant risks and reward of ownership of the goods;
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control
- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Company;
- Costs related to transactions can be determined.

Revenue from services

Revenue from services shall be recognized when it satisfies all conditions below:

- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Corporation;
- (c) Identify the completed work as at the balance sheet date;
- (d) Determine the costs incurred for the transaction as well as the cost to complete the transaction to provide that service.
- The portion of the service work completed is determined using the completed work evaluation method.

Financial income

Revenue from interest income, dividends, profits received, and other financial income should be recognized when it satisfies the two conditions below:

- The Company can obtain economic benefits from the above activities;
- When it is reliably measured.

Dividends and profits are recognized when the company is entitled to receive dividends or profits from its investments.

Revenue of construction

When the outcome of a construction contract can be reliably estimated and confirmed by the customer, revenue and related costs are recognized in proportion to the work completed and confirmed by the customer at the end of the accounting period. Increases or decreases in the construction volume, compensation claims, and other revenues are only recognized when agreed upon with the customer. When the outcome of a construction contract cannot be reliably estimated, revenue is only recognized in proportion to the costs incurred for the contract that are likely to be recovered. Costs of the contract are only recognized as expenses in the period when they are incurred.

2.19. Revenue deductions:

Sales revenue deductions arising during the year include: trade discount, sales allowances and Returned goods.

Trade discounts, sales returns, and allowances arising in the same period as the sale of products, goods, or services are adjusted to reduce the revenue of the period in which they occur. In cases where products, goods, or services have been sold in previous periods, and the revenue reductions arise in subsequent periods, the revenue is adjusted as follows: if the reduction occurs before the financial statements are issued, it is deducted from the revenue in the financial statements of the period the report is prepared (the previous period); and if the reduction occurs after the financial statements are issued, it is deducted from the revenue of the period in which the reduction occurs (the subsequent period).

2.20. Cost of goods sold:

Cost of goods sold reflects the cost value of products, goods, and services sold during the period.

2.21. Financial expenses:

Financial expenses reflect expenses incurred during the period, which mainly include:

- Expenses or losses related to financial investment activities;
- Borrowing costs;
- Short-term securities transfer losses and transaction expenses for selling securities;
- Provision for devaluation of trading securities, provision for loss of investments in other entities, loss of sale of foreign currencies, loss of foreign exchange rates,...

The above amounts are recognized based on the total incurred during the period, without offsetting against financial income.

2.22. Corporate income tax:

a) Deferred income tax assets và Deferred tax liabilities

Deferred income tax assets are determined based on the total deductible temporary differences and the deductible amounts carried forward to subsequent years for unused tax losses and tax incentives. Deferred income tax liabilities are determined based on taxable temporary differences.

Deferred income tax assets and deferred income tax liabilities are determined based on the current corporate income tax rate, according to the tax rates and tax laws in effect at the end of the reporting period.

b) Current corporate income tax expenses và Deferred corporate income tax expenses

Current income tax expense is determined based on taxable income for the year and the corporate income tax rate for the current year.

Deferred income tax expense is determined based on the amount of deductible temporary differences, taxable temporary differences, and the corporate income tax rate.

Do not offset current corporate income tax expense with deferred corporate income tax expense.

2.23. Related parties

A party is considered a related party of the Company in case that party is able to control the Company or to cause material effects on the financial decisions as well as the operations of the Company. Các bên liên quan của Công ty bao gồm:

- Enterprises that directly or indirectly, through one or more intermediaries, have the right to control the Company, are controlled by the Company, or share control with the Company, including parent companies, subsidiaries, and affiliates;
- Individuals who directly or indirectly hold voting rights in the Company and have significant influence over the Company, key management personnel of the Company, and close family members of these individuals;
- Enterprises in which the individuals mentioned above directly or indirectly hold a significant portion of the voting rights or have significant influence over the enterprise.

When considering the relationship of related parties, the nature of relationship is focused more than its legal form.
