Pursuant to Circular No. 96/2020/TT-BTC dated November 16, 2020 of the Ministry of Finance on Circular guiding information disclosure on the stock market.

We would like to explain the 815% increase in profit after tax in business performance data on the separate financial statements of the fourth quarter of 2024 compared to the same period last year as follows:

Because the Company changed its business strategy to trade all construction materials, goods, etc. at the end of the year. Along with that, the construction situation is gradually warming up, so the demand for materials is increasing. Therefore, the Company has increased sales dramatically compared to the same period.

In addition, the Subsidiaries have been operating effectively, so they have shared profits and the Company has reversed provisions in the fourth quarter, so profits have increased.

Above are the explanatory contents on the business performance results in the Separate Financial Report of Quarter 4, 2024 of ILA Joint Stock Company.

Thank you very much./.
