- P_{pl} : Diluted share price on ex-dividend date
- P_t : GIC stock price on the trading day before the ex-rights trading date
- Pr_i : Additional issue price
- I_i : is the stock issuance ratio

Assuming that on the trading day before the ex-rights trading day, the market price of GIC shares is VND 15,000/share and the offering of shares to existing shareholders is carried out together with the issuance of shares to pay dividends in 2024. At that time, shareholders are entitled to purchase shares under the additional offering plan to existing shareholders at a ratio of 1:1 (equivalent to 100%) at a price of VND 10,000/share and the right to receive dividends in 2024 in shares (ratio 10%), then the diluted price of GIC shares is:
