B. Evaluation of performance results and factors affecting the completion of production and business tasks in 2024:

In 2024, the commercial electricity output of Muong Sang 2 Hydropower Plant is: 11.5 million kWh. Reaching 89% of the annual plan and reaching: 64.2% of the design capacity (17.92 million kWh), reaching 134% compared to the previous year.

In 2024, due to floods and landslides, the water channel was damaged, affecting the power plant and causing power interruptions. The Company has just overcome some technical problems at the Muong Sang 2 Hydropower Plant, so it cannot operate at full capacity and has to stop operations for repairs and upgrades. Moreover, the small reservoir capacity, not containing enough water to generate 5 hours of peak hours during the dry season, is also a cause of revenue decline. At the same time, unfavorable weather conditions have caused the total electricity output in 2024 to be low, reaching only 11.5 million kWh/year and achieving revenue of 11.26 billion VND.

For construction and trade revenue:

- Construction and trade business achieved low: Revenue reached: 1.4 billion VND, profit 301 million VND.

2- Evaluation of work aspects:

2.1- Work talent main :

In general, the financial work is facing many difficulties because the revenue is not enough to meet the needs of paying principal and interest as well as salary expenses, tax payments and other expenses of the company. However, during the year, the company has mobilized all resources and conditions to meet the capital needs for continuous production and business, not to owe salaries to employees, pay taxes to the State Budget and Social Insurance.

Strictly comply with the establishment and implementation of the financial reporting and statistics system in accordance with the Financial Regulations of the Company, the State and the Ministry of Finance.

Always care and each steps to increase income for workers attach with program degree, capacity, ability to respond application and level degree complete successful work belong to each rolling set.

During the year, the minimum number of workers in each department was kept stable to cut costs compared to previous years.

2.3- Work manage reason Technically art, substance quantity and occupational safety ; room on fire and room against storm flood:

PART TWO - BUSINESS PLAN FOR 2025

2025 is expected to be a difficult year for business due to unfavorable weather fluctuations; ENSO is forecast to be in a neutral state but still leaning towards the hot phase by about 55-60% in the first months of 2025. The risk of water shortages on rivers will continue, from December 2024 to April 2025, water levels on rivers tend to decrease gradually, water levels on rivers are lower than the average, so the risk of local water shortages may appear in some rivers and streams in Son La province. Therefore, the revenue from commercial electricity generation of Muong Sang 2 Hydropower Plant will be low.

On that basis, the Board of Directors of Song Da Investment and Construction Joint Stock Company sets out the 2025 production and business plan as follows:

A. Production and Business Plan targets for 2025 :
