- Website: <http://thuydienquephong.com.vn>
- Stock symbol (if any): QPH

2. Formation and development process

Formation and development process:

Que Phong Hydropower Joint Stock Company was established on July 26, 2005 with an initial charter capital of 100 billion VND, formerly known as Ban Coc Hydropower Project Management under Hanoi Construction Corporation.

Que Phong Hydropower Plant Cluster includes the main works of Ban Coc Hydropower Plant, Sao Va Hydropower Plant, the 35/110KV power line connecting the hydropower plants to the National Grid and the 110kV Truong Banh Substation, the owner of which is Que Phong Hydropower Joint Stock Company (including major shareholders such as Hanoi Construction Corporation, Post and Telecommunication Finance Company Limited, Water Electrical Mechanical Installation and Construction Joint Stock Company, Lung Lo 2 Construction Joint Stock Company, BIDV). The project operates under the BOO (Build - Owner - Operation) form.

Started in late 2005, Ban Coc Hydropower Plant with a total investment of 427.5 billion VND, located in Chau Kim Commune, Que Phong District, Nghe An, was undertaken by 4 main contractors: Water Electrical Mechanical Installation and Construction Joint Stock Company, Viet Nam Industrial Construction Corporation; Lung Lo Construction Corporation (Ministry of National Defence), CMEC Company (China) in charge of equipment supply and installation. By the end of 2007, some construction items were completed and met the set targets; at the focal cluster item, 100% of the work volume was completed.

By the end of 2008, the energy line, tunnel at Ban Coc Plant of 3,100 m long and tunnel at Sao Va Hydropower Plant of 450 m long were completed. The Plant and discharge channel items were excavated and filled nearly 1 million m³ of soil and rock, tens of thousands of m³ of reinforced concrete to build the structure of the works. Nearly 3,000 tons of equipment was installed for 3/3 units of Ban Coc Hydropower Plant; 3/3 units of Sao Va Hydropower Plant and Truong Binh Substation. 80 km of double-circuit line of the 35/110 kV transmission line was completed, connecting from Ban Coc Plant and Sao Va Plant to Quy Hop to bring electricity to the National Grid.

Constructing all 5 projects at the same time, with priority given to the construction of projects that meet the earliest power generation schedule, with the efforts of the construction employees and staff of the construction units and the management and operation experience of the Company, the construction items of Ban Coc Hydropower Plant; Sao Va Hydropower Plant, the 35/110 kV Que Phong - Quy Hop transmission line and the 35/110 kV Truong Binh Substation all were completed. On July 12, 2009, the acceptance council and related parties decided to conduct a trial power generation from Ban Coc Hydropower Plant to the National Grid. On August 02, 2009, Ban Coc Hydropower Plant was officially started its commercial power generation.

On September 11, 2009, Que Phong Hydropower Joint Stock Company held the Inauguration Ceremony of Ban Coc Hydropower Plant in Chau Kim Commune, Que Phong District, Nghe An Province. This is the first commercial hydropower project in Nghe An.

In December 2009, the Company also completed the investment and construction process and began to put Sao Va Hydropower Plant into operation.

3. Business lines and areas

Business lines:

Pursuant to the Business Registration Certificate No. 2900687702 dated May 29, 2015, issued for the first registration on July 26, 2005 by the Department of Planning and Investment of Nghe An Province, the Company's main business lines include:

- Production, transmission and distribution of electricity (Production and trading of electricity);
- Production, trading of construction materials;

- Construction of power lines and substations up to 220 KV;
- Repair and maintenance of hydropower plants;
- Training of workers to operate hydropower plants;
- Hotel and travel business;
- Real estate business; Investment in construction of hydropower, civil, industrial, traffic and irrigation works;

Business areas:

- + Ban Coc Hydropower Plant: Chau Kim Commune, Que Phong District, Nghe An Province
 - + Sao Va Hydropower Plant: Hanh Dich Commune, Que Phong District, Nghe An Province
 - + 110kV Substation: Que Son Commune, Que Phong District, Nghe An Province
4. *Information on governance model, business organization and management apparatus*
- Governance model.
 - Management apparatus structure.
 - Chart

b. Chart explanation

The Company's operations comply with the Enterprise Law, other relevant Laws and the Company's Charter unanimously approved by the General Meeting of Shareholders.

General Meeting of Shareholders:

The General Meeting of Shareholders (GMS) is the highest authority of the Company according to the Enterprise Law and the Company's Charter. The GMS is responsible for discussing and approving the Company's long-term and short-term development policies; approving annual financial statements; plans for profit distribution and use; dividend distribution, allocation and use of funds as proposed by the Board of Directors; electing and dismissing the Board of Directors and the Board of Supervisors; deciding on the type and number of shares to be issued; amending and supplementing the Charter; reorganizing and dissolving the Company.

Board of Directors (BOD):

Being the highest management body of Que Phong Hydropower Joint Stock Company, it has full authority to act on behalf of the Company to decide on all issues related to the Company's purposes and interests, except for those under the authority of the General Meeting of Shareholders without authorization. The BOD is responsible for deciding on the Company's strategy, medium-term development plan and annual business plan; developing production and business plans; deciding on the organizational structure and internal management regulations of the Company; proposing measures and making decisions to achieve the goals set by the General Meeting of Shareholders. The rights and obligations of the Board of Directors are stipulated by the Law and the Company's charter, internal regulations and the Resolutions of the General Meeting of Shareholders. The term of office of the Company's Board of Directors is 05 years and its members are 04 members, including the Chairman and other members:

Mr. Thai Phong Nha	- Chairman of the BOD
Mr. Le Thai Hung	- Member, General Director
Mr. Le Bat Hung	- Member
Mr. Phan Bang Viet	- Member

Board of Supervisors:

Being an agency under the General Meeting of Shareholders, elected by the General Meeting of Shareholders, the Board of Supervisors is responsible for checking the reasonableness, legality, honesty and level of diligence in the management and operation of business activities, organization of accounting, statistics and preparation of the financial statements of the Company. The Board of Supervisors operates independently from the Board of Directors and the Board of General Directors.

The Company's Board of Supervisors consists of 03 members. Including:

Mr. Dang Khanh Quyen	- Head of the Board of Supervisors
Ms. Do Thu Huong	- Member
Ms. Nguyen Thi Thanh Binh	- Member

Board of General Directors:

The General Director is the Company's legal representative, the executive, and has the highest decision-making right on all issues related to the Company's daily operations. The General Director is responsible to the Board of Directors for the implementation of assigned rights and duties. The Deputy General Director, Chief Accountant and Heads of functional departments are the assistants to the General Director and responsible to the General Director for their assigned work, proactively handling the work authorized and assigned by the General Director in accordance with the State's policies and the Company's Charter.

The Board of General Directors include:

Mr.: Le Thai Hung	- General Director
Mr.: Nguyen Khac Tiep	- Deputy General Director

Subsidiaries and affiliates:

Sao Va Hydropower Company Limited

Address: Muong Noc Commune, Que Phong District, Nghe An Province

Main business lines: Production, trading and transmission of electricity

Actually contributed charter capital: 15,627,000,000 VND

Ownership ratio: 100% of the capital contribution

5. Development orientation

- Build and develop the company to be increasingly strong, diversify its business lines, focus on the hydropower sector, improve business efficiency, create sustainable development to bring in high revenue and profit, focus on building and promoting corporate culture and the Company's brand

- Strive to become one of the leading units in Vietnam in the field of providing training, operation, installation, repair, testing and calibration services of hydropower plants.

- Continue to invest in upgrading and innovating technology, replace old machines and equipment with modern advanced equipment with high efficiency and reliability.

- Invest in the construction of small and medium-sized hydropower projects.

- Stabilize power generation operations:

Maintain and stabilize the operation of Ban Coc Hydropower Plant, Truong Binh Substation, 35/110 Kv Truong Binh - Quy Hop transmission line and Sao Va Hydropower Plant. Maintain and repair machines and equipment to ensure maximum operation as allowed by the reservoir water level, strive to generate electricity at 85% of the designed capacity or more. Not let major incidents affect machines and equipment, not let serious work accidents occur. Closely coordinate with the National Load Dispatch Centre and the Northern Region Load Dispatch Centre (A0, A1) to connect to the grid at full capacity.

Ensure safety of the power grid corridors, coordinate operations with power transmission units in the region: Northern High Voltage Grid Management Company, Nghe An Power Company, B15, Nam Pong Hydropower Plant and some other units.

- Expand business lines;

- Search and invest in new hydropower projects with potential and socio-economic efficiency.

6. Risks:

Natural conditions are the biggest risk factor affecting the production activities of Ban Coc and Sao Va Hydropower Plants. The output and efficiency of hydropower plants depend mainly on water resources. In case of prolonged drought, decreased rainfall even during the rainy season, causing the water volume stored in the reservoir to be lower than the design capacity, it greatly affects the power output of the plants. In addition, other natural disasters such as flash floods and heavy rains can cause damage to roads and plant facilities, causing problems in power generation and increasing repair costs.

II. Operational situation during the year

1. Production and business situation

- Production and business performance during the year: Specify the achieved results during the year. Specify major changes and fluctuations in business strategy, revenue, profit, costs, market, products and supply sources, etc.

No.	Targets	Unit	Planned in 2024	Implemented in 2024	Notes
1	Net revenue from electricity sale before tax:	<i>Million VND</i>	116,841	97,319	

- Implementation status compared to the plan: Compare the results achieved during the year to the planned targets and the targets of the previous year. Specifically analyze the reasons for not achieving/achieving/exceeding the targets compared to the plan and the previous year.

In 2024, the world situation in general still faced many instabilities. Typically, the Russia-Ukraine conflict as well as other conflicts in many regions and inflation took place globally. For Vietnam, despite not being greatly affected by external impacts, in general, the economy still faced many difficulties and great challenges. Specifically, the achieved revenue of Ban Coc and Sao Va Plants: electricity generation output only reached 81,753,770 kWh, equal to 91.18% of the plan; Revenue from electricity sale reached 97,319 billion VND (excluding natural resource tax and forest environmental service fees and other revenue), reaching 83.39% of the plan; However, the pre-tax and post-tax profit targets were both higher than the plan by 31.84% and 20.44% respectively. This was a relatively favorable year in terms of weather for electricity production and trading enterprises in general and for Que Phong Power Joint Stock Company in particular. With efforts to overcome difficulties, along with the concern and support from shareholders and relevant agencies, Que Phong Power Joint Stock Company resolutely and effectively implemented stabilization measures, proactively carried out annual periodic maintenance with the Company's human resources, helping to save costs and implementation period compared to hiring external experts, etc.

2. Organization and human resources

Specify of the Board of Management:

The Board of General Directors includes:

Mr.: Le Thai Hung

- General Director

Number of employees and staff. Summary of policies and changes in policies for employees.

Number of employees and staff as of December 31, 2023: 30 people

Number of employees and staff as of December 31, 2024: 30 people

Regular employees only apply to those with regular jobs, jobs that require professional qualifications and in-depth experience and good training. The number of employees and technical jobs are relatively common and easy to find replacements. The company has switched to using social services or seasonal employees.

The company ensures the rights of employees according to the State regulations. Specifically:

Pay wages based on the volume, work quality, work efficiency and responsibility of each person based on expertise, technical skills, management experience and contributions to the completion of tasks in the Company.

Salary is paid based on the work performance and currently held position or title. When changing the position or title, salary shall change to suit the new position and title.

Linking salary distribution to management and reasonable use of employees of departments on the basis of using existing human resources to achieve the highest efficiency in production and business.

In addition to the above policies, other policies are applied in accordance with the Labor Law such as employees signing labor contracts, being paid according to the contents thereof, having the right to complain and dispute on the labor contracts, being given favorable conditions in work and study and being covered by social insurance, health insurance during work, etc.

Depending on the annual business situation, the Company has appropriate bonuses for employees. However, normally, on major public holidays, the Company only gives cash bonuses of 1,000,000 VND.

- 13th and 14th month salary and year-end bonuses

- Employees who have worked for 9 months or more shall receive one month's income.
- Employees who have worked for less than 9 months shall receive the time-based salary.
- Based on the Company's business performance and the employee's work performance during the year, in addition to receiving the 13th month salary, employees may also receive benefits based on the Company's business performance.
 - Severance pay
 - Severance pay: 1 month's basic salary for each year of working (according to the Labor Law, it is half month's basic salary)
 - Seniority allowance: in addition to the severance pay, if the employee has a seniority of 5 years or more, he/she shall receive an additional 2 or 4 months' salary depending on the type of labor contract.
 - Vacations: Every year, the Company organizes vacations of from 03 to 04 days for employees, and the Company shall cover 100% of the costs; employees shall receive full salary during the vacations.
 - Birthday: On the employee's birthday, the Company organizes a celebration and gives a souvenir or cash of 500,000 VND.
 - Trade union activities: Participate in Party activities (in case of being a Party member), Youth Union activities and Trade Union activities.
 - Sports activities:
 - Volleyball court (free)
 - Badminton court (free)
 - Table tennis (free)
 - Support those in hardship: Employees in difficult circumstances shall be considered and supported by the Company or the Trade Union Executive Committee.
 - Death benefits: Employees are supported in cash according to the collective labor agreement in the following cases:
 - Employee's death.
 - Employee's relatives' death.
 - Cases of the employee's family in special difficulties shall be specifically considered by the Company.

3. Project investment and implementation

a). Major investments: State major investments made during the year (including financial and project investments), and the status of major projects. In case where the company has offered securities to implement projects, it is necessary to clearly state the progress of these projects and analyze the reasons for achieving/not achieving the announced and committed progress).

b). Subsidiaries and affiliates:

4. Financial situation

e) Other securities: State other securities issuances made during the year. State the number and characteristics of other types of securities currently outstanding and unfulfilled commitments of the company to other individuals and organizations (including employees, staff and managers of the company) related to the issuance of securities.

III. Board of Management' Report and Evaluation:

1. Evaluation of production and business performance

- The company made annual production, business and investment plans; the figures are based on existing capabilities, and the planning work is close to reality.

- Revenue value in 2024 decreased slightly compared to 2023.

- Comply with the state regulations on investment project management, accounting regime, environmental protection, care for workers' lives and jobs. Ensure safety in production and transmission of electricity.

- The progress of the company: In operation, the Company was autonomous in operating, maintaining and repairing equipment without hiring foreign experts.

2. Financial situation

a) Asset situation

Analysis of asset situation, fluctuations in asset situation (analysis, evaluation of asset use efficiency, bad receivables and bad assets affecting business performance).

- The Company's assets are formed from investment in Ban Coc hydropower project, Sao Va hydropower project and are all put into production and business activities. There are no bad assets affecting production and business.

- The Company has no bad receivables.

- Liability situation: The current liabilities are mainly due to project investment, and there are no major fluctuations in liabilities.

- Analysis of bad liabilities, the impact of exchange rate differences on the company's production and business performance, the impact of interest rate differences: The Company does not have foreign loans, so there is no exchange rate difference that causes bad debts.

3. Improvements in organizational structure, policies, and management:

Implement streamlining of management apparatus, arrange work on a concurrent-position basis

4. Future development plan:

Presented above

5. *Explanation of the Board of Management regarding the auditor's opinion (if any) - (In case the auditor's opinion is not an unqualified opinion).*

IV. Board of Directors' Evaluation of the Company's performance

1. *Board of Directors' evaluation of the Company's performance:*

The company regularly monitored operations and proactively proposed timely and reasonable solutions to stabilize production and ensure the lives of employees.

2. *Board of Directors' evaluation of Company's Board of Management's performance:*

The Board of Management actively developed and implemented the plan to meet the set requirements.

3. *Plans and directions of the Board of Directors:*

Continue to search and invest in new, potential and effective hydropower projects.

V. Corporate governance:
