II. BUSINESS RESULTS AND IMPLEMENTATION OF THE GENERAL MEETING OF SHAREHOLDERS' RESOLUTIONS

During the 2020-2025 period, the world faced numerous difficulties and challenges, including the Covid-19 pandemic, geopolitical tensions, the Russia-Ukraine conflict, fighting in the Middle East, as well as natural disasters, droughts, storms, floods, and climate change. Many major economies maintained tight monetary policies and high interest rates. Global trade, consumption, and investment declined, while protectionist barriers and trade defense measures increased, all of which affected global import and export activities and altered consumer behavior.

In addition to the overall challenging market conditions, Vinatrans has been significantly impacted by a decline in revenue due to several major customers reducing or halting production, a decrease in goods output, and some warehouse spaces returned by customers that have not been leased to new tenants. The ownership of land and warehouse properties is tied up in legal procedures, and the lease contracts have not been renewed, preventing the company from proceeding with investments in construction, the development of smart warehouse systems, and the establishment of a modern goods distribution system.

Based on the Resolution of the General Meeting of Shareholders, the operational plan, and the market situation, the Board of Directors has issued directive solutions. With the coordination of the Board of Management and the collective efforts of the entire staff, the Company has successfully carried out its tasks and achieved the following results:

1. Business performance for the 2020-2025 term

Unit: Million VND

Criteria	Net revenue			Profit before tax		
	Plan	Actual	% of Actual/Plan	Plan	Actual	% of Actual/Plan
2020	154,000	182,864	118.7%	29,750	30,030	100.9%
2021	165,000	209,340	126.9%	31,500	34,894	110.8%
2022	175,000	197,393	112.8%	20,585	51,755	251.4%
2023	205,000	132,261	64.5%	38,000	20,063	52.8%
2024	130,600	158,025	121.0%	16,500	18,248	110.6%
Total	829,600	879,884	106.1%	136,335	154,990	113.7%

Net revenue and pre-tax profit for 2020, 2021, 2022, and 2024 all exceeded the planned targets, with pre-tax profit in 2022 reaching 251.4% of the assigned target.

In 2023, however, net revenue and pre-tax profit decreased sharply, failing to meet the plan. This was mainly due to the adjustment of increased/additional land rental fees for properties at 406 Nguyen Tat Thanh Office, 161 Nguyen Van Quy Warehouse - District 7, 102C Nguyen Van Cu - District 1, and 1531 Pham The Hien - District 8. Furthermore, the 2023 plan anticipated revenue from divestments of VND 9.1 billion, but the Company was unable to carry out divestments at two companies—Vinatrans Da Nang and VNT Logistics—resulting in no revenue, while divestment expenses were incurred.

2. Performance evaluation

2.1 Situation characteristics:

- In 2024, Vietnam's import and export activities achieved notable successes, reflecting the strong recovery of the economy after the pandemic and efforts to maintain growth amidst global economic fluctuations. The total import and export turnover of goods reached 786.29 billion USD, an increase of 15.4% compared to the previous year, with exports rising by 14.3% and imports increasing by 16.7%. The trade balance recorded a surplus of 24.77 billion USD.

- The support from the Government and improvements in the global supply chain have fueled strong growth in Vietnam's logistics industry in 2024. Trade promotion policies, international investment attraction, and the utilization of new-generation free trade agreements (FTAs) are being actively implemented.

- Vinatrans benefits from being a long-established brand in the freight forwarding industry, with a network of operations in key economic regions across the country, giving it a high reputation in the sector and the capability to meet customer requirements. However, in recent years, due to a lack of focus on development investments and infrastructure improvements for subsidiaries to enhance the parent company's transportation capacity, Vinatrans continues to rely on outsourced suppliers. The entry of large-scale international logistics companies with advanced technology has intensified competition. Meanwhile, the company faces numerous challenges in various areas: a cumbersome management model, suboptimal processes, a lack of flexibility in operations, and poor coordination between departments, resulting in low labor productivity; infrastructure investments have not been synchronized, the warehouse system does not meet standards, and transportation means fall short of meeting peak season demands; digital tools have not been fully leveraged to enhance productivity and optimize costs; core business operations have not generated sustainable profits; and investment efforts have not been clearly planned.

- By the end of 2024, the company introduced a new business line and has achieved positive initial results.

DIRECTION OF THE BOARD OF DIRECTORS' ACTIVITIES FOR 2025

I. Directions for the activities of the Board of Directors in 2025

The United Nations report on the World Economic Situation and Prospects for 2025, published on January 9, 2025, states that, despite falling inflation, improving labor market conditions, and general monetary easing, growth is expected to remain lower than pre-pandemic levels. Global economic growth is forecast to remain at 2.8% in 2025, unchanged from 2024.

The global economy in 2025 remains uncertain, with commodity prices potentially experiencing significant fluctuations. Competition between major powers will intensify, and the 4.0 industrial revolution and digital transformation will continue to develop strongly. Vietnam's economy is facing important opportunities as well as a number of challenges and issues.

In line with the general situation, Vinatrans is also encountering challenges, such as internal industry competition. Large-scale domestic and international logistics companies are exerting competitive pressure on pricing and service quality. Additionally, changes in state management policies, fluctuations in fuel prices, and input costs due to new government regulations are impacting operating costs and profit margins.

The Company forecasts an opportunity to increase service revenue in 2025 through the expansion of international and domestic logistics services, as well as steel trading within the Vietnam Steel Corporation ecosystem. However, seizing this opportunity will require the Company to undergo significant reforms in its business strategy, organizational structure, governance, technology, and finance.

In this context, the Board of Directors has determined the operational direction for 2025 and has instructed the Board of Management to implement it, as follows:

1. Perform the Company's operational management functions within the scope, authority and duties of the Board of Directors, avoiding any overlap with the functions and duties of the Board of Management.

2. Closely monitor domestic and international market developments, proactively forecast market risk fluctuations; strengthen strategic planning, make close directive decisions, supervise and support the Board of Management to effectively implement the resolutions of the General Meeting of Shareholders and the Board of Directors to best achieve business goals.

3. Comply with relevant legal regulations, continue to develop and amend regulations, rules and procedures to perfect the Company's management system, and carry out corporate information disclosure in accordance with current regulations.

4. Evaluate the performance of the new business block model since the restructuring of departments (from 2022 to the present) and propose solutions for improvement, including adjustments to the organizational model, operational mechanisms, management methods, and business strategies.

5. Implement the plan to restructure Vinatrans' investment capital at enterprises after approval by the General Meeting of Shareholders.

6. Continue to implement the Fire Protection System Project for the warehouse area at 161 Nguyen Van Quy, District 7. Research and develop investment plans such as the vehicle investment project to increase transportation capacity, the modern warehouse system investment project at 161 Nguyen Van Quy, the project to build a modern office building at A8 Trung Son, the project to repair 102C Nguyen Van Cu after recovering land and houses from households.

7. Speed up the process of renewing land lease contracts for properties at 161 Nguyễn Văn Quy, District 7, 1650-1652 Phạm Thế Hiển, District 8, and the process of reclaiming the property at 102C Nguyễn Văn Cừ.

8. Collaborate with and leverage resources from partners—companies in which Vinatrans has invested—to develop customers, create new revenue streams, and especially utilize the resources of member units within the Vietnam Steel Corporation-JSC system.

9. Effectively manage receivables and optimize costs. Relocate the Company's office to a new location to reduce management expenses.

10. Effectively utilize business management software in operational and management tasks. Consider researching customer care management systems.

This report provides a summary of the Board of Directors' activities during the 2020-2025 term, the performance results for 2024, as well as the strategic direction for the 2025-2030 term and the operational plan for 2025.

Respectfully submit to the 2025 Annual General Meeting of Shareholders for consideration and approval.

- The company's core business operations were not profitable, with a significant decline in revenue.

- The restructuring and divestment process at enterprises was slower than planned.

During the past term, the Board of Directors and the Board of Management have assigned specific, clear, and appropriate responsibilities to each member. This has enabled timely and practical business planning, identification of existing issues, and the proposal of suitable policies and solutions to effectively address the company's challenges.

The Resolutions and Decisions of the Board of Directors, as well as the Decisions of the General Director, were issued promptly in compliance with legal regulations and the company's Charter. Evaluation: During the 2020-2025 term, the Board of Directors performed its duties with diligence and determination, focusing on strategic planning and making accurate, timely decisions aligned with the actual situation. This contributed to supporting the Board of Management in achieving the highest operational efficiency.

V. Recommendations:

- Continue to enhance the provision of logistics services to companies within the Vietnam Steel Corporation – JSC system. Alongside expanding the internal market, the company should maintain its current market share and develop external markets beyond the Vietnam Steel Corporation – JSC system, thereby gradually improving the efficiency of its core business operations.

- Strengthen efforts in debt collection. For overdue receivables, adopt flexible collection solutions depending on each case to maintain and support existing customers facing financial difficulties. If a customer shows high payment risk, immediately cease sales and service provision to that customer.

- For doubtful receivables, require customers to establish a clear repayment plan, closely monitor, and follow up on payments as scheduled. In cases where customers are uncooperative, delaying, or difficult to collect from, the company should complete the necessary documentation to take legal action in accordance with applicable laws and signed economic contract.

- In sales and service provision, conduct thorough customer assessments before granting credit limits for deferred payments. The company should minimize the approval of large unsecured credit sales and strengthen deferred sales backed by collateral (attention to receivables of Tay Do Steel Company Limited).

- Continue implementing effective measures to resolve the encroachment issue at the company's property located at 102C Nguyen Van Cu Street, Nguyen Cu Trinh Ward, District 1, Ho Chi Minh City.

- Upon reviewing affiliated companies where Vinatrans holds more than 20% of charter capital, the Board of Supervisors observed that Vinatrans' capital representatives at these entities are all part-time members. Therefore, the Board of

Supervisors recommends that the Board of Directors and the Board of Management consider discussions with partners on appointing at least one full-time capital representative at each entity, as stipulated in corporate charters, to improve the management of Vinatrans' investments in these companies.
