II. BASIC OF PREPARATION OF FINANCIAL STATEMENTS AND ACCOUNTING PERIOD

The accompanying financial statements for the accounting period are presented in Vietnamese Dong (VND), prepared on a historical cost basis, and in accordance with Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System, and relevant legal regulations on the preparation and presentation of financial statements for the accounting period.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

These notes are an integral part of and should be read in conjunction with the accompanying Financial Statements

The accompanying financial statements for the accounting period are not intended to present the financial position, business results, and cash flows in accordance with generally accepted accounting principles and practices in countries other than Vietnam.

Accounting period

The Company's financial year begins on January 1 and ends on December 31 of the calendar year.

III. APPLICABLE ACCOUNTING STANDARDS AND REGULATIONS

Accounting regime applied

The Company applies the Vietnamese Enterprise Accounting Regime issued under Circular No. 200/2014/TT-BTC dated December 22, 2014 by the Ministry of Finance and Circular No. 53/2016/TT-BTC dated March 21, 2016 of the Ministry of Finance amending and supplementing a number of articles of Circular No. 200/2014/TT-BTC.

Statement of Compliance with Accounting Standards and Accounting Regime

The Company has applied the Vietnamese Accounting Standards and all relevant guidance documents issued by the competent authorities. The financial statements for the reporting period have been prepared and presented in full compliance with the provisions of each applicable standard, the relevant implementing circulars, and the prevailing enterprise accounting regime.

Applied accounting form

The Company applies a computerized accounting system using the Fast Business accounting software.

IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The preparation of financial statements for each accounting period complies with the Vietnamese Accounting Standards, the Enterprise Accounting Regime, and other relevant legal regulations.

Cash and cash equivalents

Cash and cash equivalents consist of cash on hand, non-term bank deposits, short-term investments (not exceeding 3 months) with high liquidity, easily convertible to cash, and minimal risk associated with value fluctuations.

Receivables

Receivables are amounts that can be recovered from customers or other entities. Receivables are presented at book value minus allowances for doubtful debts (if any).

Allowances for doubtful debts are established for receivables that are past due for six months or more, or receivables from parties who may have difficulty in payment due to liquidation, bankruptcy, or similar difficulties. The provision is based on the aging of overdue receivables or the estimated loss that may occur, as follows:

- For overdue receivables:
 - 30% of the value for receivables overdue from 6 months to less than 1 year
 - 50% of the value for receivables overdue from 1 year to less than 2 years
 - 70% of the value for receivables overdue from 2 years to less than 3 years
 - 100% of the value for receivables that are overdue for 3 years or more
- For receivables not yet overdue but deemed difficult to collect: provisions are based on estimated losses.

Changes in the balance of allowances for doubtful debts need to be recognized as an expense in the corporate management expenses on the date of the financial report.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

These notes are an integral part of and should be read in conjunction with the accompanying Financial Statements

Inventories

Inventory is determined based on the lower of cost and net realizable value. The cost of inventory includes direct material costs, direct labor costs, and overhead costs incurred to acquire inventory at its current location and condition. The cost of inventory is determined using the weighted average method and is accounted for using the periodic inventory system. The net realizable value is determined by estimated selling prices minus estimated costs to complete the product along with marketing, selling, and distribution costs.

The company establishes provisions for inventory impairment in accordance with current accounting regulations. Accordingly, the company is permitted to set up provisions for obsolete, damaged, or inferior quality inventory, and in cases where the cost of inventory exceeds the net realizable value at the date of the financial report.

Tangible fixed assets and depreciation

Tangible fixed assets are presented at cost less accumulated depreciation.

The cost of tangible fixed assets includes the purchase price and all other directly attributable costs related to placing the asset in a usable condition.

For fixed assets with a revaluation adjustment, depreciation is calculated using the new cost minus the accumulated depreciation, divided by the remaining useful life.

Any subsequent costs incurred after initial recognition of the tangible fixed asset are added to the asset's carrying amount if they are reasonably expected to increase future economic benefits from the use of the asset. Costs that do not meet this condition are recognized as expenses in the period incurred.

Tangible fixed assets are depreciated using the straight-line method based on their estimated useful lives. The depreciation periods are as follows:

	<u>Estimated useful life (year)</u>
Buildings and structures	05 - 45
Machinery and equipment	04 - 15
Transportation and transmission	06 - 10

Intangible fixed assets and amortization

Land use rights

Land use rights are presented at cost less accumulated depreciation, representing the value of the right to use 30,306.3 square meters of leased land in Ha Binh Phuong Industrial Cluster, Van Binh Commune, Thuong Tin District, Hanoi City for 45 years by the Company. Land use rights are allocated using the straight-line method over the term of the land lease.

Accounting Software

Accounting software is initially recognized at cost, including the purchase price and directly related costs incurred to put the asset into use as intended. Accounting software is depreciated using the straight-line method over a period of 3 years.

Construction in Progress

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

These notes are an integral part of and should be read in conjunction with the accompanying Financial Statements

Assets under construction for production, leasing, management, or any other purpose are recognized at cost. This cost includes service charges and interest expenses related to appropriate accounting policies of the Company. Depreciation for these assets is calculated similarly to other assets, starting from when the assets are ready for use.

Prepaid Expenses

Prepaid expenses are actual costs incurred but related to the results of business operations over multiple accounting periods. These include significant repair costs for fixed assets, one-time-use tools and equipment with substantial value, and the tools and equipment themselves participating in business activities over a financial year, considered capable of providing future economic benefits to the Company. These costs are capitalized as prepaid expenses and allocated to the Income Statement using the straight-line method according to current accounting regulations.

Payables

The principle of determining amounts payable to vendors is based on contracts, warehouse receipts, and recorded based on invoices from the seller.

Prepayments to vendors are recorded based on payment vouchers, bank documents, and economic contracts.

Detailed tracking of accounts payable to suppliers is carried out, and at the end of the month, a reconciliation statement of accounts payable is sent to suppliers for confirmation.

Accrued expenses

Accrued expenses represent estimated costs for business operations in the accounting period but have not yet been incurred due to the lack of formal settlement with the supplier for goods or services provided.

Owner's equity

Owner's equity is recorded based on the actual contributed capital of the owner.

Capital surplus is recorded based on the difference between the increase resulting from the issuance of shares above par value and the difference between the increase and decrease compared to the purchase price when selling treasury shares.

The principle of recognizing undistributed profits is the profit (or loss) from the Company's business operations minus (-) adjustments due to the retroactive application of changes in accounting policies and adjustments to material errors of previous years.

The principle of establishing reserves, funds from after-tax profits is based on the resolution of the Annual General Meeting of Shareholders

Revenue and Other Income Recognition

Revenue from sales

Revenue from sales is recognized when all five (5) of the following conditions are met simultaneously

- Most of the risks and rewards incidental to ownership of the product or goods have been transferred to the buyer;
- The Company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods;
- The revenue can be measured reliably
- The Company has obtained or will receive economic benefits from the sales transaction;

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

These notes are an integral part of and should be read in conjunction with the accompanying Financial Statements

- The costs related to the sales transaction can be reliably identified;

Revenue from services

Revenue from service provision transactions is recognized when the outcome of the transaction is reliably determinable. In cases where service provision transactions span multiple periods, revenue is recognized in the period based on the results of the completed portion of the work as of the date of the Balance Sheet for that period. The outcome of the service provision transaction is determined when all four (4) of the following conditions are met:

- Revenue is reliably determinable;
- Economic benefits have been received or will be received from the service provision transaction
- The completed portion of the work as of the date of the Balance Sheet is determined
- The costs incurred for the transaction and the costs to complete the service provision transaction are identifiable

In the case of service provision spanning multiple accounting periods, revenue recognition for the service in each period is done using the percentage-of-completion method.

Financial income

Revenue arising from interest and other financial income is recognized when the following two (2) conditions are satisfied:

- There is a probability of economic benefits from the transaction;
- Revenue is reliably determinable.

Foreign currencies

Transactions denominated in foreign currency are translated at the exchange rates prevailing at the transaction dates. The balances of items denominated in foreign currencies at the end of the accounting period are translated at the rates prevailing on that date

The exchange rate differences arising during the period from foreign currency transactions are recognized in the Income Statement. Exchange rate differences arising from the revaluation of items denominated in foreign currencies at the reporting date, after offsetting increases and decreases, are recognized in financial income or financial expenses.

Borrowing costs

Borrowing costs are recognized as expenses in the period they are incurred unless capitalized in accordance with the Accounting Standard "Borrowing Costs". Accordingly, borrowing costs directly attributable to the acquisition, construction, or production of assets that require a relatively long period to complete for use or sale are added to the carrying amount of the assets until the assets are ready for use or sale. Income arising from the temporary investment of borrowed funds is deducted from the carrying amount of the related assets. For borrowings specifically obtained to finance the construction of fixed assets, investment properties, interest expenses are capitalized even if the construction period is less than 12 months.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

These notes are an integral part of and should be read in conjunction with the accompanying Financial Statements

Taxation

Value added tax

The company pays value added tax using the deduction method, with the following tax rates:

Business activities	Tax rate
- Export of pharmaceuticals	0%
- Sale of pharmaceuticals	5%
- Activities of selling functional foods and storage	10%

Corporate income tax

- Current Corporate Income Tax Expense

Current corporate income tax expense is determined based on the taxable income for the year and the applicable corporate income tax rate in the current financial year.

- Tax Incentive Policy

The Company is recognized as a science and technology enterprise under Certificate No. 44/DNKHCN, initially issued on July 19, 2018, by the Hanoi Department of Science and Technology. Accordingly, the Company is entitled to corporate income tax exemptions and reductions in accordance with Article 12 of Decree No. 13/2019/ND-CP dated February 1, 2019, of the Government on science and technology enterprises, provided that revenue from products derived from scientific and technological results accounts for at least 30% of the Company's total revenue. As a result, the Company is exempt from corporate income tax for 4 years and is entitled to a 50% reduction of the payable tax amount for the subsequent 9 years starting from 2018.

- Current Corporate Income Tax Rate

Corporate income tax is calculated at the applicable rate of 20% on taxable income, effective as of the end of the reporting period.

Other types of taxes are applied according to the current tax laws in Vietnam

Earnings per share

Earnings per share for common stock are calculated by dividing the profit or loss attributable to common shareholders by the weighted average number of outstanding common shares during the period. Diluted earnings per share take into account the potential dilution from other securities that could convert into common stock, such as convertible bonds and stock options.

Related parties

Parties are considered related if one party has the ability to control or significantly influence the other party in making financial and operating policy decisions.

Individuals, directly or indirectly through one or more intermediaries, who have control over the Company or are under common control with the Company

Affiliated parties and individuals who directly or indirectly hold voting rights in the Company and have significant influence over the Company

Key management personnel such as the General Director, members of the Company, close family members of these individuals or affiliated parties, or companies affiliated with these individuals are also considered related parties
