Re: Explanation of the Consolidated Financial Statements for Q1/2025

Hanoi, April 25 2025

To: Hanoi Stock Exchange

BGI Group Joint Stock Company (Stock code: VC7) respectfully submits to the Hanoi Stock Exchange an explanation regarding the variance in consolidated business results between the financial statements for Q1/2025 and Q1/2024 as follows:

- Consolidated profit after corporate income tax for Q1/2025: VND 2,939,356,285
- Consolidated profit after corporate income tax for Q1/2024: VND 2,569,696,779

The consolidated profit after corporate income tax for Q1/2025 increased by over 10% compared to Q1/2024, mainly due to the consolidated gross profit from sales and service provision in this quarter rising by over 150% compared to the same period last year. This increase includes a contribution from the investment cooperation project: "Renovation of the residential area at lots CTR1 and CTR2, Zone A, An Van Duong New Urban Area, Hue City, Thua Thien Hue Province."

Sincerely,

GHÍ THỘI ĐỒNG QUẢN TRỊ

Hoàng Trọng Đức

Recipients:

- As above;

dated 22 December 2014 of the Ministry of Finance

CONSOLIDATED FINANCIAL STATEMENT NOTES

Q1, 2025

I. Business Activity Characteristics

1. Capital Ownership Form

BGI Group Joint Stock Company (formerly known as Construction Joint Stock Company No. 7) was originally established as Construction Company No. 7 by Decision No. 2065/QD-BXD dated December 19, 2001, issued by the Minister of Construction. The decision transformed Construction Company No. 7, a state-owned enterprise under the Vietnam Construction Import-Export Corporation, into a joint-stock company.

According to the Certificate of Business Registration for Joint Stock Companies, No. 0100105743, issued by the Hanoi Department of Planning and Investment on February 19, 2002, and amended for the 23rd time on December

- The company's headquarters is located on the 3rd floor of Vinaconex 7 Building, No. 61 Nguyen Van Giap Street, Nam Tu Liem District, Hanoi, Vietnam.
- The registered charter capital of the company is VND 960,908,700,000, equivalent to 96,090,870 shares, with a par value of VND 10,000 per share.

2. Business Fields

Construction and real estate.

3. Business Sectors

According to the Certificate of Business Registration for Joint Stock Companies, No. 0100105743, issued by the Hanoi Department of Planning and Investment on February 19, 2002, and amended for the 23rd time on December 26, 2023, the company operates in the following areas:

- Contracting for construction and installation of civil, industrial, postal, irrigation, and road transport projects across all levels, including airports, seaports, bridges, culverts, urban and industrial zone infrastructure projects, and 110 KV power lines and substations.
- Land leveling and treatment of weak foundations for construction projects related to water supply and drainage systems.
- Installation of technology and pressure pipelines, refrigeration systems.
- Interior decoration.
- Housing construction and development.
- Real estate.
- Production and trade of construction materials.
- Investment consulting and project implementation.
- Equipment rental, vehicle maintenance and repair, and trading of construction machinery.
- Import-export of goods.
- Production and trade of wooden products, export-import of handicrafts, agricultural, forestry, and aquatic products, and consumer goods.
- Production and sale of purified water.
- Manufacture, installation, and sale of concrete components, steel structures, technical systems for projects, and machinery and equipment (e.g., elevators, air conditioning, ventilation, fire prevention, water supply and drainage systems).
- Construction of hydropower and thermal power plants.

4. Typical Business Cycle

The company's business cycle aligns with the fiscal year, starting from January 1 and ending on December 31 annually.

5. Business Activities Characteristics During the Fiscal Year Affecting Financial Report

6. Corporate Structure

- List of Subsidiaries:

Company Name	Headquarters Address	Main Business Activities	Ownership Percentage	Voting Rights Percentage

Nguyen Van Giap Street, Cau Dien Ward, Nam Tu Liem District, Hanoi

Construction

89,90%

89,90%

- List of Joint Ventures and Associated Companies:

Company Name	Headquarters Address	Main Business Activities	Ownership Percentage	Voting Rights Percentage
IUC Group Joint Stock Company	Floor 3, Vinaconex 7 Building, No. 61 Nguyen Van Giap Street, Cau Dien Ward, Nam Tu Liem District, Hanoi	Construction, real estate	39,47%	39,47%
IUC Hoa Binh Hill Co., Ltd.	Subarea 3, Luong Son Town, Luong Son District, Hoa Binh Province	Real estate	30,00%	30,00%

7. Statement of Comparability of Information in the Financial Statements

The information, data, and figures presented in the Company's Financial Statements for the fiscal year ended June 30, 2021, are provided as comparative information, data, and figures.

II. Accounting Period and Currency Used in Accounting

1. Fiscal Year

The fiscal year starts on January 1 and ends on December 31 of each year.

2. Currency Used in Accounting

The currency used in accounting is the Vietnamese Dong (VND).

III. Applied Accounting Standards and Regulations

1. Applied Accounting Regulations

The Company applies the enterprise accounting regime in accordance with Circular 200/2014/TT-BTC dated December 22, 2014, and Circular 53/2016/TT-BTC dated March 21, 2016.

2. Statement of Compliance with Accounting Standards and Regulations

The Company has applied Vietnamese Accounting Standards (VAS) and related guidelines issued by the State. The financial statements are prepared and presented in full compliance with the provisions of each applicable standard, the implementation guidelines under the Circulars, and the current accounting regulations in effect.

IV. Accounting Policies Applied (in the case the company meets the going concern assumption)

4. Principles for Recognizing Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, bank deposits, and short-term investments with maturities of no more than three months. These are highly liquid investments that can be easily converted into a known amount of cash and are subject to insignificant risk of changes in value.

5. Accounting Principles for Financial Investments

a) Trading Securities

Trading securities are investments purchased with the intention of selling in the short term to earn profits from price fluctuations.

b) Held-to-Maturity Investments

Held-to-maturity investments include financial instruments that the Company intends and is able to hold until maturity. These investments primarily consist of fixed-term bank deposits.

c) Loans

Loans include amounts lent to third parties under agreed terms and conditions.

d) Investments in Subsidiaries, Joint Ventures, and Associates

Investments in Subsidiaries: Subsidiaries are entities controlled by the Company. Control is achieved when the Company has the ability to direct the financial and operational policies of the investee to benefit from its activities.

Investments in Associates: Associates are entities in which the Company has significant influence but does not have control or joint control over the investee's financial and operational policies. Significant influence is the power to participate in decision-making regarding the investee's policies but does not include control or joint control over those policies.

Initial recognition of investments in subsidiaries and associates is at cost, including purchase price or capital contributions and directly attributable investment costs. For non-cash asset contributions, the cost is recognized based on the fair value of the assets at the time of the transaction.

Dividends and profits generated after the purchase date of the investment are recognized as revenue. Dividends received in the form of shares are tracked for quantity increases only, without recognizing the value of the shares received.

e) Investments in Equity Instruments of Other Entities

These represent equity investments where the Company does not have control, joint control, or significant influence over the investee.

Initial recognition of these investments is at cost, including purchase price or capital contributions and directly attributable investment costs. Dividends and profits generated before the purchase date are deducted from the investment's value. Dividends and profits generated after the purchase date are recognized as revenue. Dividends received in the form of shares are tracked for quantity increases only, without recognizing the value of the shares received.

Provision for Impairment of Equity Investments in Other Entities

Provision is made when the investment's carrying amount is reduced compared to its cost.

For investments whose fair value cannot be determined at the reporting date, the provision is calculated based on the difference between the actual contributed capital of all parties in the investee and the actual equity of the investee, multiplied by the Company's ownership percentage relative to the total contributed capital of all parties in the investee.

Provision for impairment of investments in subsidiaries and associates is recognized when these entities incur losses. The provision is based on the difference between the actual contributed capital and the actual equity of the investee, multiplied by the Company's ownership percentage. If the subsidiary or associate is part of consolidated financial statements, the basis for provision calculation is the consolidated financial statement.

Increases or decreases in provisions for impairment of investments in subsidiaries, associates, or equity instruments of other entities are recognized in financial expenses at the reporting date.

5. Accounting Principles for Financial Investments

a) Trading Securities

Trading securities are investments purchased with the intention of selling in the short term to earn profits from price fluctuations.

b) Held-to-Maturity Investments

Held-to-maturity investments include financial instruments that the Company intends and is able to hold until maturity. These investments primarily consist of fixed-term bank deposits.

c) Loans

Loans include amounts lent to third parties under agreed terms and conditions.

d) Investments in Subsidiaries, Joint Ventures, and Associates

Investments in Subsidiaries: Subsidiaries are entities controlled by the Company. Control is achieved when the Company has the ability to direct the financial and operational policies of the investee to benefit from its activities. Investments in Associates: Associates are entities in which the Company has significant influence but does not have control or joint control over the investee's financial and operational policies. Significant influence is the power to participate in decision-making regarding the investee's policies but does not include control or joint control over those policies.

Initial recognition of investments in subsidiaries and associates is at cost, including purchase price or capital contributions and directly attributable investment costs. For non-cash asset contributions, the cost is recognized based on the fair value of the assets at the time of the transaction.

Dividends and profits generated after the purchase date of the investment are recognized as revenue. Dividends received in the form of shares are tracked for quantity increases only, without recognizing the value of the shares received.

e) Investments in Equity Instruments of Other Entities

These represent equity investments where the Company does not have control, joint control, or significant influence over the investee.

Initial recognition of these investments is at cost, including purchase price or capital contributions and directly attributable investment costs. Dividends and profits generated before the purchase date are deducted from the investment's value. Dividends and profits generated after the purchase date are recognized as revenue. Dividends received in the form of shares are tracked for quantity increases only, without recognizing the value of the shares received.

Provision for Impairment of Equity Investments in Other Entities

Provision is made when the investment's carrying amount is reduced compared to its cost.

For investments whose fair value cannot be determined at the reporting date, the provision is calculated based on the difference between the actual contributed capital of all parties in the investee and the actual equity of the investee, multiplied by the Company's ownership percentage relative to the total contributed capital of all parties in the investee.

Provision for impairment of investments in subsidiaries and associates is recognized when these entities incur losses. The provision is based on the difference between the actual contributed capital and the actual equity of the investee, multiplied by the Company's ownership percentage. If the subsidiary or associate is part of consolidated financial statements, the basis for provision calculation is the consolidated financial statement.

Increases or decreases in provisions for impairment of investments in subsidiaries, associates, or equity instruments of other entities are recognized in financial expenses at the reporting date.

6. Accounting Principles for Receivables

Receivables are not recorded at amounts higher than their recoverable value. Receivables are presented at their carrying amount, net of allowances for doubtful accounts.

Classification of receivables is carried out according to the following principles:

- Trade receivables represent amounts receivable from commercial transactions arising from buying and selling activities between the Company and independent buyers.
- Other receivables include amounts receivable that are non-commercial in nature and unrelated to buying and selling transactions.

An allowance for doubtful accounts is created for each doubtful receivable based on the overdue age of the debts or the estimated loss that may occur due to the debtor's inability to pay, such as liquidation, bankruptcy, or similar difficulties.

Increases or decreases in the balance of the allowance for doubtful accounts that need to be provided at the financial statement closing date are recognized as administrative expenses.

7. Inventory Recognition Principles

Principles for Inventory Recognition:

Inventory is recorded at cost. In cases where the net realizable value is lower than the cost, inventory is measured at net realizable value. The cost of inventory includes purchase costs, processing costs, and other directly related expenses incurred to bring the inventory to its current location and condition.

Method for Determining Inventory Value:

The value of inventory is determined using the weighted average method.

Inventory Accounting Method:

Inventory is accounted for using the perpetual inventory system.

Provision for Inventory Write-Downs:

The provision for inventory write-downs is established at the year-end as the difference between the cost of inventory and its net realizable value, where the cost exceeds the net realizable value.

8. Principles of Recognition and Depreciation of Fixed Assets, Finance-Leased Assets, and Investment Properties

The recognition of tangible fixed assets and the depreciation of tangible fixed assets are carried out in accordance with Vietnam Accounting Standard No. 03 - Tangible Fixed Assets, Circular No. 200/2014/TT-BTC dated December 22, 2014, issued by the Ministry of Finance guiding the corporate accounting regime, Circular No. 45/2013/TT-BTC dated April 25, 2013, guiding the management, use, and depreciation of fixed assets, Circular No. 147/2016/TT-BTC dated October 13, 2016, amending and supplementing certain provisions of Circular No. 45/2013, and Circular No. 28/2017/TT-BTC dated April 12, 2017, amending and supplementing certain provisions of Circular Nos. 45/2013 and 147/2016/TT-BTC.

The company applies the straight-line depreciation method for tangible fixed assets. Tangible fixed assets are categorized based on groups of assets with similar characteristics and purposes of use in the company's business and production activities, including:

Type of Fixed Asset	Depreciation Period (Years)
 Buildings and structures 	05 - 30 years
 Machinery and equipment 	05 - 10 years
- Transportation vehicles	06 - 10 years
- Office equipment	03 - 05 years

Investment properties are recognized at historical cost. During the holding period for potential appreciation or operating lease purposes, investment properties are recorded at original cost, accumulated depreciation, and net book value. Investment properties are depreciated using the straight-line method over the estimated useful life as follows:

- Buildings and structures: 25 years.

11. Accounting Principles for Prepaid Expenses

Prepaid expenses directly related to the production and business activities of a single financial year or business cycle are recognized as short-term prepaid expenses and allocated to production and business expenses during the same financial year. Expenses incurred within a financial year but related to the production and business results of multiple accounting periods are recorded as long-term prepaid expenses to be gradually allocated to business results over subsequent accounting periods.

The calculation and allocation of long-term prepaid expenses to production and business expenses in each accounting period are based on the nature and extent of each expense type to select an appropriate allocation method and basis. Prepaid expenses are allocated to production and business expenses gradually using the straight-line method.

12. Accounting Principle for Payables

Payables are amounts owed to suppliers and other entities. Payables include amounts due to vendors and other payables. Payables should not be recognized at amounts lower than the obligation to pay.

The classification of payables is based on the following principles:

- Payables to Vendors: These are commercial payables arising from transactions related to the purchase of goods, services, or assets, where the seller is an independent entity from the buyer, including amounts owed between the parent company and its subsidiaries.
- Other Payables: These are non-commercial payables, not related to the purchase, sale, or provision of goods or services.

Payables are tracked in detail by entity and payment due date.

13. Recognition of Borrowings and Finance Lease Liabilities

Borrowings are recognized based on receipts, bank documents, agreements, and loan or finance lease contracts. Borrowings are tracked by entity and maturity.

14. Recognition and Capitalization of Borrowing Costs

Borrowing costs are recognized as expenses in the year they are incurred, unless they are capitalized in accordance with the Accounting Standard "Borrowing Costs." Accordingly, borrowing costs directly related to the purchase, construction, or production of assets that require a relatively long time to complete and be put into use or operation are added to the cost of the asset until the asset is ready for use or operation. Income generated from the temporary investment of borrowed funds is deducted from the cost of the related asset. For loans specifically used for the construction of fixed assets or investment properties, interest is capitalized even if the construction period is less than 12 months.

15. Principle of Recognizing Accrued Expenses

The Company's accrued expenses represent the cost of constructing the apartment project at 136 Ho Tung Mau, interest expenses, and other costs that have actually incurred during the reporting period but have not been paid due to the absence of invoices or insufficient supporting documents. These are recognized as production and business expenses in the reporting period. The interest expenses payable are determined based on the loan contract, loan agreement, and the actual loan period.

The accrual of production and business expenses is calculated meticulously and must be supported by reasonable evidence to ensure that the amount recognized in this account corresponds with the actual incurred expenses.

16. Principle and Method of Recognizing Provisions for Liabilities

This reflects the current provisions for liabilities, the situation of provision establishment, and usage of provisions for liabilities of the business. The recognized value of a provision for liabilities is the most reasonable estimate of the amount that will be paid to settle the current debt obligation at the end of the fiscal year or at the end of the interim period. Provisions are made at the time of preparing the Financial Statements. Provisions for warranty liabilities for construction projects are established for each project and are recorded at the end of the fiscal year or the end of the interim period.

17. Principle of Recognizing Unearned Revenue

This reflects the current amount of unearned revenue and the situation of increase or decrease in unearned revenue during the reporting period. Unearned revenue is the money received from customers for the sale of real estate that has not yet met the conditions for revenue recognition.

18. Principle of Recognizing Shareholders' Equity

- The principle of recognizing capital contributions from shareholders, surplus share capital, convertible bond options, and other capital from shareholders.

Shareholders' equity reflects the capital currently invested by the shareholders and the situation of increase or decrease in shareholders' investment. Shareholders' equity includes: - Initial and additional contributions from shareholders; - Contributions from equity funds, retained earnings, or post-tax profits from business operations. The company records the actual amount of capital contributed by shareholders, not based on commitments or receivables from shareholders. The company maintains detailed records of shareholders' equity by source (such as shareholders' contributions, surplus capital, other capital) and tracks it for each organization or individual participating in the capital contribution.

- Principle of Recognizing Asset Revaluation Differences.
- Principle of Recognizing Exchange Rate Differences.
- Principle of Recognizing Retained Earnings.

This reflects the business results (profit or loss) after corporate income tax and the distribution or handling of profits or losses by the company.

20. Principle and Method of Recognizing Revenue

- Sales Revenue: Sales of construction products, goods purchased for resale, and investment properties.
- Service Revenue: Performing tasks as agreed in contracts, either in one or multiple accounting periods, such as providing services or leasing fixed assets under operating lease terms.

- **Financial Revenue**: Reflects interest income from bank deposits, dividends, profit distributions; income from short-term and long-term securities trading; capital gains from the liquidation of joint venture capital, investments in affiliated companies, subsidiaries, and other investments.
- Revenue from Construction Contracts.
- Other Income: Reflects income from non-business operations, including: Income from the sale or liquidation of fixed assets; penalties received from customers for contract violations.

21. Principle of Accounting for Revenue Deductions

Reflects amounts deducted from sales revenue and service revenue arising during the period, including: Trade discounts, sales discounts, and returns of goods sold.

22. Principle of Accounting for Cost of Goods Sold

Reflects the cost value of products, goods, services, investment properties; the production cost of construction products sold during the period, costs related to investment property business activities; costs related to the sale or liquidation of investment properties.

23. Principle of Accounting for Financial Costs

Financial costs are expenses or losses related to financial investments and borrowing costs. These are recognized based on the total amounts incurred during the year, without offsetting them against financial revenue.

24. Principle of Accounting for Selling Expenses and General and Administrative Expenses
Selling expenses reflect actual costs incurred in the process of selling products, goods, or services, including promotional expenses, product advertising, sales commissions, warranty costs (excluding construction work), storage, packaging, transportation, etc.

General and administrative expenses include staff salaries (wages, allowances, etc.); social and health insurance, union fees, unemployment insurance for business management employees; office supplies, labor tools, depreciation of fixed assets used in business management; land rent, business license tax; provisions for bad debts; external services (electricity, water, phone, fax, property insurance, fire insurance...); other cash expenses (customer reception, client meetings...).

25. Principle and Method of Recognizing Current and Deferred Corporate Income Tax Expenses

Current corporate income tax expense is the amount of tax payable based on taxable income for the year and the applicable corporate income tax rate.

Quarterly, accountants calculate the amount of corporate income tax to be paid as current tax expense. Deferred corporate income tax expense is...
