GENERAL REPORT TO THE AGM 2025
Part I
BUSINESS AND PRODUCTION RESULT IN 2024

I. Situation Overview

In 2024, the Company's business and production activities encountered the following main advantages and challenges:

1. Advantages

The reputation of the **Rabbit Battery** brand and the quality of its products continued to be maintained and improved. The Company's sales policy remained well-controlled, flexible, and reasonable, creating a strong competitive edge for its products in the market through an extensive distribution network of agents across the country.

The export market for batteries to **India** has been gradually recovering, contributing to an increase in battery export volume.

The Company's workforce is responsible, capable, and experienced. They work in unity and with dedication, creating a strong collective force that constantly strives to fulfill assigned tasks.

2. Challenges

The global and domestic economic situation remained difficult. Additionally, the impact of **Typhoon No. 3 (Yagi)** in Q3 caused significant human and material losses, leading to a decline in consumer demand for general goods, including batteries. This created difficulties for the Company in distributing products in its traditional markets.

Due to both subjective and objective reasons, the export volume of batteries did not meet the targeted goals.

Market competition has become increasingly intense among domestic battery manufacturers and with trading entities importing batteries legally as well as smuggling in low-cost batteries, all of which have negatively affected the Company's sales volume and business performance.

► With the above characteristics, the Company has proactively followed the Resolution of the General Meeting of Shareholders and the Resolutions of the Board of Directors to develop plans and effectively implement measures to perform tasks, the basic results achieved are as follows:

II. Business and Production Results in 2024

1. Production and Sales Volume (Unit: 1,000 pcs)

No	Indicator	Unit	Year 2024	Change vs 2023		Change vs AGM Resolution	
				Quantity	Rate %	Quantity	Rate %
1	Production Volume	kpcs	358.130	+ 20.027	+ 5,9		
2	Sales Volume	kpcs	361.608	+ 33.692	+ 10,3	- 24.824	- 6,4
3	Zinc pellet (ton) R6, R03	Ton	248,42	- 99,67	- 28,6		
4	Total revenue	Bil VND	456,806	+ 24,748	+ 5,7	- 26,774	- 5,5
5	Profit	Bil VND	73,186	+ 9,243	+ 14,5	+ 3,686	+ 5,3
6	Payment to the State Budget	Bil VND	37,61	+ 5,14	+ 15,8		

* Profit before tax ratio /Charter capital reached 100.89%.

III. Evaluation of the Results of Measures Implemented in 2024

Overall, the measures were implemented in accordance with the report presented at the 2023 Annual General Meeting of Shareholders. A summary of key actions is as follows:

1/ Organization of Production, Labor, Employment, Income, and Employee Policies

1.1/ Production Organization:

Production activities in 2024 met requirements, ensuring timely and adequate supply of products in terms of both quantity and quality for domestic and export markets at all times. This was achieved through a rational production setup aligned with equipment maintenance and repair schedules, balancing employment and income among production departments in response to changes in product consumption structure.

1.2/ Labor, employment and income of employees: The average number of employees in the year was 267 people, the average income of employees is VND 14.97 million /person/month. Compared to 2023, it increased by VND 2.33 million, equivalent to 18%; The company has applied the social responsibility management system according to European standards BSCI for employees, which is periodically evaluated annually; The Company complies with the rights, regimes and policies for employees according to: Labor Law, BSCI, Labor Regulations and Collective Labor Agreement, Salary Regulations, Emulation and Rewards (such as: Periodic health check-ups; Occupational disease check-ups; Vacation tours; visiting sick people, funerals; rewarding children of employees who pass university entrance exams and achieve the title of excellent students; subsidizing employees in difficult circumstances...), working conditions for employees are guaranteed in accordance with the provisions of the Law and the Company. Thanks to that, employees in the Company have peace of mind at work, are dedicated and committed to the Company.

2/ Sales and Market Evaluation

2.1/ For traditional markets

Total consumption output in traditional markets increased by 6% compared to 2023, specifically:

a/ R20 batteries: Continuing the downward trend, in 2024 it decreased by 6.7% compared to 2023. The rate of decline is higher than in 2023 (in 2022 it decreased by 5.4%) due to consumption trends and fierce competition with similar products in the markets.

b/ R6 batteries: R6 battery consumption output decreased by 2.5% compared to 2023.

c/ R03 batteries: R03 battery consumption output increased by 50.5% compared to 2023 due to the impact of a number of objective and subjective reasons.

d/ Performance of the Ho Chi Minh City Branch:

Total revenue reached VND 11,478 billion (of which revenue from selling imported GP batteries reached VND 2.06 billion), an increase of VND 0.5 billion compared to 2023.

2.2/ For Export markets

a/ Local Export

Sales volume decreased by 34.5% compared to 2023, with R6 batteries down by 34.7% and R03 batteries down by 33.9%. However, due to the relatively small volume of indirect exports, accounting for just over 1% of the company's total output, this decline does not significantly impact the overall sales volume in 2024.

b/ Exports via GP and Kodak Customers

Compared to 2023, the output has recovered significantly, with total export volume via GP increasing by 47.4%, partly due to GP being designated as the export partner for Kodak-branded batteries from Q4 2024. However, compared to the initial plan for the year, it is still down by 9%.

On the other hand, the battery export project to India has achieved initial successes. From the beginning of Q3/2024, the Company has exported its first orders to the Indian market and has been received positively by customers in terms of product quality and price. Export volume to India accounts for a significant proportion of total exports through GP. This is an important foundation for the following years so that the company can promote the expansion of export volume.

Kodak products indirectly exported to the US market have been maintained and have experienced good growth. From Q4 2024, the customer actively appointed a member company of the GP Group as the importer of Kodak products, replacing the old partner, a Vietnamese trading company.

2.3/ For GP Brand Batteries Imported and Sold in the Vietnamese Market

The sales revenue of imported GP products increased by 31.7% compared to 2023, which is quite positive; however, it does not contribute significantly to the Company's overall revenue and performance.

3/ Quality Management, Environment, Occupational Safety and Health, Fire Prevention and Fighting

Implementing quality management well according to ISO 9001 standards, the product quality is guaranteed to meet the standards, the rate of scrap, the weight of zinc tubes meets the target and the use of basic material standards is in accordance with the regulations at the production units.

Regularly review and supplement equipment to improve working conditions and environment and ensure safety for workers.

During the year, absolute safety was ensured in all aspects, no occupational accidents or fire incidents occurred...

4/ Technical

4.1/ For the lead-free battery technology project: Completed the steps of research, trial production, and acceptance evaluation of lead-free battery products at the Company and at the Singapore Technical Center. From November 30, 2024, the Company has officially stopped using lead in battery production.

4.2/ During the year, the Company has researched and improved the product of R6 & R03 foil label batteries that are directly attached to single batteries without shrink film to improve the

quality of appearance and prevent leakage, reducing costs compared to the old foil label battery production technology.

5/ Investment: During the year, the Company has implemented investment items according to the Resolution of the General Meeting of Shareholders and additional investment according to the decision of the Board of Directors to promptly meet the requirements of the tasks.

5.1/ Investment items according to the Resolution of the General Meeting of Shareholders have been implemented, including:

- The domestic wastewater treatment system has been completed and is operating stably, ensuring the quality of water discharged into the environment according to the prescribed standards.
- The application for Environmental License has been basically completed, so at the end of December 2024, the Ministry of Natural Resources and Environment has established a working group to the Company to inspect and appraise the items...
- The water pipe system and fire pump have been completed and are operating stably.

5.2/ Additional investment items according to the decision of the Board of Directors have been implemented, including:

- a) Two semi-automatic battery blister machines manufactured by the Company;
 - b) Finished products line of R6-650 pc/min;
 - c) Foil Labeling Machine R6 (Foil Labeling Machine R03 The Company has just invested in February 2025 and installed and completed acceptance in March 2025);
 - d) R6 zinc can punching machine;
 - d) Air compressor for production;
 - e) Pickup truck for sales and market of the Branch in Ho Chi Minh City.
- All items invested in step by step meet the requirements of the Law and the machinery and equipment after investment have contributed to increasing production capacity, meeting customer requirements and promoting good efficiency.

6/ Financial Situation: Healthy assurance, cash flow is fully controlled, no overdue debts arise. Good exploitation of reserve capital, thereby generating additional financial income of VND 2.3 billion from short-term bank deposit interest.

c/ Inventories increased by VND 5.4 billion due to the following basic factors:

+ The value of finished products in inventory at the end of the period decreased compared to the end of 2023 by VND 1.5 billion.

+ The company has a policy of increasing the reserve of some materials, leading to an increase in the value of inventory materials at the end of the year of VND 5.1 billion compared to the end of 2023.

+ Goods (imported GP batteries) increased by VND 1.9 billion compared to the end of 2023 due to the delay in orders in the fourth quarter of 2023 and arriving in Vietnam in January and February 2024. Inventory of imported GP batteries is around VND 3-4 billion.

Long-term assets: increased by VND 3.5 billion due to the following reasons:

a/ The difference in depreciation value and new investment reduced the remaining value of fixed assets by VND 1.2 billion

b/ Reversal of provision for losses of the joint venture company increased the value of long-term investment: VND 1.9 billion

c/ Construction in progress increased by VND 2.7 billion because machinery and equipment in the process of installation and trial run have not been recorded as fixed assets.

6.2/ Explanation of capital fluctuations: Total value of asset formation sources increased by VND 35 billion due to the following reasons:

Liabilities increased: VND 28.7 billion

a/ Trade Payables increased by VND 5 billion due to the implementation of contracts for purchasing raw materials and goods that have not yet reached the payment deadline.

b/ Dividends payable to shareholders according to Resolution 06/2024/NQ-HĐQT dated December 9, 2024: VND 14.5 billion

c/ Other short-term payables increased by VND 4.2 billion mainly due to deposits received for processing zinc pellets according to contract progress.

d/ Short-term Bank loans to serve production and business needs increased by VND 4.9 billion compared to the end of 2023

Owner's equity: increased by VND 6.3 billion

a/ Development investment fund increased by VND 13.7 billion due to the implementation of the 2024 Shareholders' Meeting Resolution.

b/ Undistributed profits decreased by VND 7.4 billion due to dividend payments in 2023 and 2024.

IV/ General assessment of 2024

The Board of Directors and the Board of Management regularly monitor and keep track of the monthly and quarterly production and business results... thereby issuing timely directions, measures, and decisions to organize the implementation of tasks in all areas of production and business operations in accordance with the provisions of the Law, the Company's Charter, and in line with the developments of the actual situation. Maintaining and developing the market, ensuring capital safety, and the interests of shareholders.

Although the 2024 production and business results decreased in output and revenue compared to the General Meeting of Shareholders' Resolution, the Company achieved many quite good results, notably including high profit growth, capital safety, and ensuring employment and income for employees.

Other work results: The Company complies with the provisions of the law and the Company's charter, creates favorable conditions for Party organizations, trade unions, and youth unions to operate, and is rated and classified by the corresponding higher-level organizations as completing tasks well.

Part 2

PRODUCTION AND BUSINESS PLAN FOR 2025

The world and regional economic situation is forecast to continue to develop rapidly, complicatedly, and unpredictably; Strategic competition is increasingly fierce; some countries are adjusting trade policies, especially tax policies, affecting import and export, global supply and demand; the world economy is still facing difficulties and slow recovery.

Domestically, difficulties, challenges and opportunities are intertwined, but difficulties and challenges are greater. The Government continues to maintain policies such as VAT exemption and reduction in the first 6 months of the year, interest rate reduction, and consumer demand stimulation to promote economic development.

It is forecasted that the output of battery orders exported through GP will not recover much and will not be stable compared to before. The plan to export batteries to India depends heavily on the Indian Government's policy through the License and that license is only valid for one year, the license renewal is very difficult..., at the same time, competition between domestic battery manufacturers and imported battery brands will continue to be fierce, more intense, with many negative impacts on the Company's production and business activities.

Clearly aware of the advantages, difficulties and challenges, the Company has identified the basic goals and solutions to complete the production and business plan for 2025, which are:

I/ Basic indicators of production and business

No	Index	Unit	2025	Increase/Decrease compared to 2024	
				Quantity	Rate (%)
A	Battery Volume	1000 pcs	377.500	+15.891	+ 4,4
B	Zinc pellets for VNGP	Ton	360	+ 112	+ 45,0
C	Total revenue	Billion VND	490,783	+ 33,977	+ 7,4
D	Profit before tax	-	54,119	- 19,067	- 26,1
E	Expected dividend	%	50		
F	Payment to the State Budget	Billion VND	According to current regulations of the State		

II/ Basic Costs for 2025

- Basically, norms remain unchanged compared to 2024.

- Prices of major materials account for a large proportion: Zinc according to monthly LME prices of suppliers; Manganese prices, Acetylene Black prices selected according to suppliers' quotes at the time of purchase.

- Estimated exchange rate: VND/ USD: VND 25,800; VND/ CNY: VND 3,550

- Other materials: Basically stable compared to 2024

2/ Auxiliary material without norms: Determined based on actual 2024 costs after excluding abnormal fluctuation factors.

3/ Fuel: Standard rates remain unchanged from 2024 and are adjusted to align with the 2024 production volume framework..

4/ Electricity: Electricity consumption standards remain unchanged from 2024, with an estimated average electricity cost increase of 2.5% for the entire year.

5/ Basic depreciation: Based on the remaining value of fixed assets and new investments.

6/ Major repair: Based on 2024 implementation and 2025 anticipated needs, adjusted and allocated in accordance with the 2025 production scale.

7/ Labor Costs:

7.1/Total number of laborers expected to be used according to the current number of laborers, based on the actual situation, if the output needs increase, consider recruiting additional appropriate laborers.

7.2/ Salaries: Maintain the total approved salary unit price from 2024.

7.3/ Social insurance and trade union fees: Implemented according to legal regulations and company policies..

8/ Selling expenses: Remain unchanged from the assigned 2024 standards.

9/ Other costs in cash : Implement according to the approved allocation plan for each content in accordance with regulations..

III/ Implementation Measures:

1/ Management, Production Organization, Labor, Employment, and Employee Income

Based on the target output approved by the General Meeting of Shareholders, the Company will develop a Production Plan and flexibly adjust the production plan to suit the actual situation of domestic consumption, export orders, and VNGP's zinc pellets orders.

Control materials and raw materials, and prepare and manufacture spare parts, molds, and machinery and equipment to meet the production plan , Machinery and equipment maintenance plan, ensuring all conditions are ready for production in terms of quantity, quality, and progress.

Balance and arrange reasonable labor use to ensure employment, income, and proper implementation of regimes and policies for employees in accordance with State regulations and the Company's regulations.

2/ Quality Management, Technical, Environmental, Training, Occupational Safety, and Fire Prevention and Fighting (FPF)

The ISO 9001 and BSCI management systems must be maintained and regularly audited for internal assessment. Ensure product quality in accordance with published standards and standards agreed upon with export customers.

Strengthen training and retraining to improve the quality of human resources to meet the timely requirements of the Company's stability and development.

Regularly conduct internal inspections and audits to identify risks and take preventive measures, while also implementing training, coaching, and practice plans for employees to maintain and ensure environmental protection, occupational safety, chemical safety, and FPF...

3/ Battery Sales for the Traditional Market

Based on approved sales costs, allocate resources reasonably in the direction of focusing on key products and markets to ensure product competitiveness to maintain the market, increase market share, and at the same time strengthen retail activities closely following the market to support agents to promote growth rate...

Be flexible in building and applying sales policies to increase benefits for agents and their distributors, take measures to limit internal competition and cross-border sales on the basis of ensuring compliance with policies and regulations on sales costs. Ensure absolute safety of goods and prevent bad debts.

Continue to proactively seek and develop more domestic industrial customers.

Continue to promote direct sales to Laos and Cambodia to increase consumption output.

4/ Plan and Objectives for GP Imported Battery Sales in the Vietnamese Market

GP's sales team aims to achieve a 66% revenue growth for GP imported batteries compared to the same period in 2024.

5/ Export Market

For all export orders: Meet all customer requirements for quantity, quality, and delivery schedule, and absolutely prevent quality incidents.

For new export projects: Maximize customer requirements to the Company's best ability in terms of packaging specifications, product quality level, production conditions, schedule, and timely provision of competitive quotes, to seize all export opportunities for the Company

6/ Procurement of Materials

Comply with the current method of purchasing and selling materials through the Purchasing Council to carefully review and evaluate all aspects before approving suppliers and approving purchase prices and purchase quantities on the basis of reasonable balance according to the Production Plan and inventory.

Improve the quality of material price forecasts through various sources to make appropriate decisions in purchasing and reserving materials, contributing to improving production and business efficiency.

7. Capital Utilization

Maintain the implementation of outstanding debt limits of dealer and distributor customers according to regulations on the principle of ensuring capital safety.

Follow the delivery schedule and payment terms to urge both domestic and export payments; Effectively use the payment discount policy to ensure cash flow balance; Balance the use of export revenue to pay for imported goods; Use surplus money through savings at banks to increase capital efficiency.

Use capital reasonably and balance capital for investment plans for the year as well as for the future.

8/ Investment

Based on the requirements and tasks for 2025, it is necessary to continue new investments and upgrade existing items to meet the demands of production and business activities and other requirements (details in the submission documents)."

Part 3

- Comply with the accounting regime, record, keep books and documents, and make quarterly, six-month and annual financial statements within the prescribed time limit.
- Accounting standards and regimes: The Company applies the corporate accounting system promulgated according to Circular 200/2014/TT-BTC and Circular 53/2016/TT-BTC applying Vietnamese accounting standards. .
- To declare and pay taxes fully and on time as prescribed by law.
- The Company always monitors and updates new regimes and policies on taxes, insurance, etc. to apply promptly

3. Supervise the Financial Statemen in 2024.

The Company's 2024 financial statements have been performed by AASC Independent Auditing Company Limited, which reflects objectively, honestly and reasonably with the Company's financial position.

The Company prepares and presents the financial statements on the basis of compliance with Vietnamese accounting standards, corporate accounting regime and legal regulations relevant to the preparation of the financial statements for the year 2024.

The financial statements fully reflect detailed and general data as of December 31, 2024.

The figures presented in the balance sheet are objective and honest in all respects, the total assets are equal to the total capital at the end of the fiscal year.

Total capital is VND 208,399 billion, an increase of VND 35 billion compared to the same period in 2023 (of which the development investment fund increased by VND 13,77 billion, undistributed profit after tax decreased by VND 7,5 billion, other short-term liabilities increased by VND 18,9 billion, payables to sellers increased by VND 5,048 billion and bank debt increased by VND 5 billion).

Total assets increased by VND 35 billion (of which the historical costs of fixed assets increased by VND 2,78 billion in the year, inventories increased by VND 5,5 billion, savings deposits increased by VND 13 billion, cash equivalents increased by VND 10,56 billion, other short-term receivables increased by VND 1,66 billion, unfinished construction costs of VND 2,7 billion were the R6 battery packaging line being adjusted and completed, increasing fixed assets in the first quarter of 2025, long-term financial investment provisions in GP increased by VND 1,956 billion due to the reversal of provisions, other short-term assets increased by VND 545 million, fixed asset depreciation increased, reducing the value of tangible fixed assets by VND 3,690 billion)..

The business results fully and accurately reflect the targets of revenue, expenses and profit in the financial year, cash flow in accordance with Vietnamese accounting standards and regulations.

4. Supervise the material and asset purchase.

The Company established a Material and Asset Purchasing Council to publicize the purchase and sale of materials and assets in a transparent and reasonable manner.

At the beginning of the year, the Material Purchasing Council approved suppliers, based on the professional departments' quality and price standards for the Council to review and evaluate and sign contracts with material suppliers for 2024.

After reviewing the list of suppliers, the Company mainly signed contracts to purchase and sell materials with traditional and reliable suppliers, choosing a reasonable payment method and currency to achieve the best efficiency.

Results: 100% of the main and auxiliary materials purchased for production are of guaranteed quality and reasonable price.

Every six months, the Company participates in the zinc ingot auction as prescribed with Thai Nguyen Nonferrous Metals Joint Stock Company to buy zinc ingots with the quantity according to the production plan and reasonable price to proactively produce during the period and prepare for 2025.

Based on the current status of machinery, equipment, and means of transport, during the year, the Company invested in increasing fixed assets with a total value of VND 2,780 billion, including: Semi-automatic blister machine, foil labeling machine, grinding machine, and a car equipped for the Branch. Sell off an expired car, which was damaged and operated inefficiently, worth VND 36,4 million.

5. Supervise the costs:

Based on the annual production and business plan, the Company makes detailed plans for each cost element for implementation.

The Company has set up the norms of materials, salary unit prices for each product stage, arranged the classification of labor, and set up reasonable labor schedules for each department and workshop.

Selling expenses, general & administrative expenses and other costs in cash... are also specified in detail.

To achieve the above plan, the Company organizes meetings with key staff, organizes Labor Conferences to deploy goals and implementation plans to each employee.

a) Regarding salary costs.

The salary deducted from the cost corresponding to the finished output in 2024 multiplied by the unit price of each type of product.

The total salary fund implemented in 2024: VND 45,644 billion (including battery production salary and zinc pellet processing salary sold to GP Battery Company Limited, Branch sales salary...) increased by VND 6,47 billion compared to 2023.

Due to the increase in salary unit price from January 1, 2024 and battery production output increased by 20,026 million pieces of all kinds compared to the same period in 2023 and salary of Ho Chi Minh City Branch is implemented according to new regulations.

The industrial meal expenses, allocated to production costs as per regulations at VND 2,327 billion, the total salary fund and industrial meal is VND 47,972 billion."

Regarding the employee's income, it is based on the salary source and the industrial meal source deducted from the cost to distribute to the employees according to the salary payment regulations approved by the labor contract and the collective labor agreement.

The total number of employees participating in the year is 267 people, the average income paid to employees is VND 14,97 million /person/month (including salary and industrial meals), an increase of 18% compared to the same period in 2023.

The balance of the salary fund as of December 31, 2024 is VND 6,95 billion, which is in accordance with regulations and is allowed to be retained at a maximum of no more than 17% of the total annual salary fund.

b) Main material costs.

The price of materials used in production in the first six months of the year decreased significantly due to the reduced inventory price at the end of 2023, while the majority of the last six months of the year increased from 1% to 20% compared to the same period in 2023. Such as zinc ingots increased by 20%, natural MnO₂ 5,6%, Acetylene Black 7,2%, Electrolytic MnO₂ 4,2%, ZnO 12,8%, tin bottom increased from 9,75% to 12,3%, carbon rod 5,9%, separator increased from 1% to 6,5% ... due to the increase in import prices this year compared to 2023, which is an objective reason due to price fluctuations in the market.

c) Auxiliary materials.

Prices of auxiliary materials are relatively stable, some increased, decreased slightly such as the label, the carton box, the display box. General boxes were stable and decreased slightly compared to the same period in 2023.

d) General & Administrative expenses increased by VND 2,659 billion compared to the same period in 2023, of which:

Land rent increased by VND195 million due to the State's price increase, other expenses in cash increased by VND 945 million, costs of purchased services increased by VND105 million, tax expenses not deductible from corporate income tax increased by VND 456 million due to tax inspection exclusion, guest reception costs increased by VND 15 million, supervision fees increased by VND107.5 million, gifts increased by 65 years of the company's establishment by VND120.45 million, Yagi anti-reporting duty and overcoming the consequences after the storm...VND 716 million.

e) Selling expenses increased by VND 1,63 billion compared to the same period in 2023, such as market support, transportation fuel, export brokerage, business trip expenses, customer reception, and other cash expenses.

f) Financial expenses decreased by VND 1,815 billion compared to the same period in 2023, mainly due to the reversal of financial investment provisions in GP Vietnam Co., Ltd. VND 1,956 billion, bank loan interest increased by VND 114 million, exchange rate difference increased by VND 646 million, payment discounts increased by VND 1,16 billion.

6. Capital Usage

Based on the inventory control data at the end of the period on December 31, 2024, the value of materials, goods, finished products, semi-finished products, spare

parts... in stock is VND 92.3 billion, an increase of 5.5 billion compared to the end of 2023 (of which zinc ingots are 518 tons with an inventory value of VND 38.7 billion, an increase of VND 4.34 billion compared to the end of 2023) due to the ending inventory price being 20% higher.

MnO₂ electrolyte inventory increased by 28,2 tons, Acetylene black inventory decreased by 16,3 tons... are materials stored for production in the beginning of 2025.

Zinc pellet inventory decreased by 122,6 VND million compared to the end of 2023.

Finished product inventory decreased by VND 1,5 billion, semi-finished product inventory is at a reasonable level.

Inventory of auxiliary materials increased by VND 695 million, inventory of spare parts increased by VND 320 million by the end of 2023, the Board of Management must review the storage.

Urge the collection of debts from agents in accordance with regulations, in order to increase working capital turnover to ensure production and business efficiency.

Manage and use capital reasonably in prescribed expenses, minimize other expenses in cash

Pay for goods to suppliers in accordance with the regulations stated in the contract, do not let suppliers and customers take over capital.

Always balance cash sources to proactively operate production and business. If there is idle money, deposit it in the bank. As a result, the interest on deposits in the year will be VND 2,34 billion, a decrease of VND 40 million compared to 2023.

7. Sales Performance.

The company builds a reasonable sales policy, finds all effective measures to increase output.

Mainly competitive prices, good product quality, attractive benefits for the dealer system.

The company builds and maintains a professional sales team, regularly supplies goods to dealers, assigns staff in charge of each area, and constantly takes care of the increasingly strong distribution system.

Regularly reconciles debts with customers, urges payment of goods relatively well.

The balance of receivables as of December 31, 2024 is VND 11,4 billion, an increase of VND 36 million compared to the same period in 2023.

During the year, total output increased by 33,7 million psc of all kinds, revenue increased by VND 24,74 billion compared to the same period in 2023.

8. Company's branch in HCM city.

The Branch operates according to the regulations issued by the Company. The Branch is responsible for organizing, managing and implementing the Branch's activities to promote the "Rabbit" battery brand and coordinate the consumption of GP batteries in Ho Chi Minh City and the Southern provinces.

Survey and search for potential customers in Cambodia for export.

The Branch builds its own selling price for each product type suitable for the market, regulates sales policies and customer targets.

Sales revenue must ensure that all costs are covered, including:

Cost of goods sold, selling expense and cover employee costs, rent, telephone, other costs in cash...

Implementation results in 2024:

Total number of batteries consumed reached 7,151 million pcs, an increase of 101 thousand pcs, equivalent to an increase of 1,4% over the same period in 2023, including:

Domestic finished battery consumption output was 6,914 million pcs of all kinds, an increase of 56 thousand pcs, equivalent to an increase of 1% over the same period in 2023.

GP Imported Batteries consumed 237 thousand packs of all kinds, an increase of 45 thousand packs of all kinds, equivalent to an increase of 1% over the same period in 2023.

Actual revenue reached VND 11.5 billion, an increase of VND 497 million compared to 2023. Profit reached -186 million VND. Reasons for the Branch implementing the new regulations The company does not subsidize management staff costs, rent, telephone, other expenses... as before, sales output does not meet the set target.

Accounts receivable at the end of the period 31/12/2024 is VND 735 million, a decrease of VND 17 million compared to the same period in 2023.

9. Profit allocation .

Based on the Resolution of the Annual General Meeting of Shareholders, the Board of Directors submits to the General Meeting of Shareholders the plan for profit distribution and allocation of funds as stipulated in the Company's Charter, the General Meeting of Shareholders participates in discussion and votes to approve as a basis for implementation.

Based on the 2024 business results, pre-tax profit reached VND 73,185 billion, minus corporate income tax of VND 14,927 billion, the remaining VND 58,258 billion, the Board of Directors will submit the profit distribution plan at the 2025 Annual General Meeting of Shareholders.

Based on the actual profit generated in 2024, based on the Company's Charter, the Resolution of the 2024 General Meeting of Shareholders, the Board of Directors plans to submit to the General Meeting of Shareholders a dividend of 50% on charter capital, with 50% already paid in advance in June 2024 and January 2025.

10. BOD's management over the business and operation.

During the year, the Company had advantages and difficulties intertwined:

- Advantages: "Rabbit" Battery products have a brand name in the market, with a distribution system for many years.

"Rabbit" Battery products are competitive enough with domestic batteries due to good price and quality factors.

- Difficulties: The price of main input materials increased in the last six months of the year, the exchange rate increased, leading to increased costs. Facing fierce competition in the market with similar products, R20 battery products are increasingly decreasing due to the appearance of solar chargers on the market.

With the advantages and difficulties as mentioned above, the Board of Directors always studies and grasps the fluctuations of the market economy, closely follows the Resolution of the General Meeting of Shareholders to implement tasks to achieve the highest results.

The Chairman of the Board of Directors always supervises and directs the Director, the Board of Management and other managers in operating the Company's business tasks.

The management and operation of production and business activities of the Board of Management always comply with the provisions of law, the Company's charter, and the resolutions of the shareholders' meeting.

The Board of Management always proactively operates the Company within the scope and authority assigned, and issues beyond its authority are consulted for direction from the Chairman of the Board of Directors.

Under the direction of the Board of Directors, the Board of Management researches and grasps market prices to sign contracts to purchase imported materials and domestic materials to ensure production progress.

The members of the Board of Directors always coordinate with each other to operate all production and business activities effectively, on the principle of complying with the law and the Company's charter.

The Board of Directors maintains a monthly meeting to evaluate and comment on the implementation of tasks of the previous month, to find out shortcomings and weaknesses to overcome.

The Board of Management, in performing the task of managing production and business together with the staff and employees in the Company, has strived to achieve and exceed the implementation targets compared to 2023 specifically:

- Production output increased by 20,026 million pieces of all kinds, an increase of 5,92% compared to the same period in 2023.

- Consumption output increased by 33,7 million pieces of all kinds, an increase of 10.27% compared to 2023

- Revenue increased by VND 24,748 billion compared to 2023, (mainly due to increased consumption output leading to an increase in battery sales revenue of VND 30,56 billion, equivalent to an increase of 5,7% compared to the same period in 2023), while other types of revenue decreased by VND 5,82 billion.

- Profit before tax increased by VND 9,242 billion compared to the same period in 2023, (mainly due to the decrease in the price of main materials used, especially the price of zinc ingots in the first six months of the year due to the low price of zinc inventory at the end of 2023) along with the factor of increased battery sales revenue, in addition to other income such as exchange rate difference and sales support GP.

Comment: In 2024, under the close direction of the Board of Directors, the Board of Management closely followed the Company's management tasks and exceeded all targets compared to 2023. The above results are the great contributions of the leaders and employees of the company.
