We would like to report to the Hanoi Stock Exchange regarding the parent company's First Half business results for 2025, which were higher compared to the same period in 2024, as follows:

The First Half profit in 2025 reached 88.02 billion VND, an increase of 43.30 billion VND compared to the same period in 2024. This increase was mainly due to the company receiving dividends from its subsidiary amounting to 34.027 billion VND. In addition, favorable weather conditions in early 2025 resulted in a higher water supply for power generation compared to the same period in 2024, leading to higher output, which in turn increased revenue and profit for the First Half of 2025 compared to the same period in 2024.

Sincerely thank you.
