**CPC'S EXPLANATION OF THE REASONS FOR A PROFIT
DIFFERENCE OF MORE THAN 5% COMPARED TO PRE-
AUDIT FIGURES**

The reviewed semi-annual profit after tax of CPC in 2025 reached over 5.91 billion, representing an increase of 22.38% compared to the pre-audit figure.

CPC hereby presents the main reasons for the profit difference of more than 5% compared to the pre-audit figure as follow:

- The cost of goods sold for the first half of 2025 decreased by 1.49% compared to the pre-audit figure, contributing to the increase in profit compared to the same period as stated above.
- The administrative expenses for the first half of 2025 decreased by 4.40% compared to the pre-audit figure, also contributing to the increase in profit compared to the same period as stated above.

In the context of the overall economic difficulties, our Company will make any effort to reduce costs and make full use of all available resources to strive to enhance the competitiveness of the enterprises.
