RESPONSIBILITIES OF THE BOARD OF MANAGEMENT AND BOARD OF GENERAL DIRECTORS

The Board of Management and Board of General Directors of Thang Long Investment Group Joint Stock Company (hereinafter referred to as the “Company”) are responsible for preparing the consolidated financial statements which give a true and fair view of the consolidated financial position of the Company as at 30 June 2025, as well as the consolidated results of operations and consolidated cash flows of the Company for the year then ended. In preparing those financial statements, the Board of Management and Board of General Directors are required to:

- Select suitable accounting policies and then apply them consistently;
- Make judgments and estimates that are reasonable and prudent;
- State whether applicable accounting principles have been followed, subject to any material departures disclosed and explained in the consolidated financial statements;
- Prepare and present financial statements in compliance with accounting standards, accounting

policies and current relevant regulations;

- Prepare the consolidated financial statements on a going concern basis unless it is inappropriate to presume that the Company will continue in its business.

The Board of Management and Board of General Directors of the Company are responsible for ensuring that proper accounting records are kept, which disclose, with reasonable accuracy at any time, the consolidated financial position of the Company and for ensuring that the consolidated financial statements comply with Vietnamese Accounting Standards, Vietnamese Corporate Accounting System and other related legal regulations on the preparation and presentation of the consolidated financial statements. The Board of Management and Board of General Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

OTHER COMMITMENTS

The Board of Management and the Board of General Directors confirm that the Company has not violated its obligation to disclose information in accordance with the provisions of Circular No. 96/2020/TT-BTC dated 16 November 2020 of the Ministry of Finance on information disclosure on the securities market.

APPROVAL OF THE CONSOLIDATED FINANCIAL STATEMENTS

The Board of General Directors and the Board of Management have approved the accompanying consolidated financial statements. The consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Company as at 30 June 2025, as well as its consolidated financial performance and consolidated cash flows for the financial year then ended, in accordance with Vietnamese Accounting Standards, Vietnamese Corporate Accounting System and related legal regulations on the preparation and presentation of the consolidated financial statements.

For and on behalf of the Board of Management,

Legal representative
Nguyen Phuc Long

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**For the accounting period ended 30 June 2025***(These notes are an integral part of and should be read in conjunction with the consolidated financial statements)***I. BUSINESS HIGHLIGHTS****1 STRUCTURE OF OWNERSHIP**

Thang Long Investment Group Joint Stock Company operates under the initial Business Registration Certificate No. 0101164614 dated 27 July 2001, with the 32th amendment issued on 6 June 2025 by the Hanoi Department of Planning and Investment.

2 Business fields: Trade, services, real estate investment and financial investment

The Company's real estate investment and business activities include the development and operation of real estate products for sale, lease, and properties for resort tourism, entertainment, and outdoor sports.

In addition, TIG operates in the business of distributing construction materials for civil construction projects, traffic infrastructure, etc. and a number of other construction, tourism, commercial activities, service and communication activities according to Vietnamese Regulations.

4 Normal production and business cycle

The Company's normal production and business cycle is within 12 months, from 1 January to 31 December.

5 Characteristics of business activities in the period affecting the consolidated financial statements:

There are no significant characteristics in the Company's operations that affect the consolidated financial statements.

6 Business structure**6.1 As at 30 June 2025, the Company has the following subsidiaries:**

Companies	Place of Incorporation	Proportion of Ownership	Proportion of Voting	Main Business Activities
Thang Long Phu Tho Investment Joint Stock Company	Hanoi	94.3%	94.3%	Accommodation services; Real estate...
Sakura Real Estate Joint Stock Company	Hanoi	80%	80%	Real estate business
TLG International Company Limited	Hungary	100%	100%	Real estate business

RE-G Real Estate Utilization Company Limited	Hungary	100%	100%	Real estate business
--	---------	------	------	----------------------

The consolidated financial statements prepared by the Company ensure the comparability of information.

II ACCOUNTING PERIOD AND CURRENCY

- 1 The Company's financial year begins on 1 January and ended on 31 December of the calendar year.
- 2 The currency used in accounting is the Vietnamese Dong (VND)

III ADOPTION OF ACCOUNTING STANDARDS AND SYSTEMS

1 Adoption of accounting systems

The Company applies the Vietnamese Enterprise Accounting System as promulgated under Circular No. 200/2014/TT-BTC dated 22 December 2014 issued by the Ministry of Finance providing guidance on the Corporate Accounting System.

2 Declaration of compliance with accounting standards and accounting system

The Company has applied Vietnamese Accounting Standards and documents guiding the Standards issued by the State. Financial statements are prepared and presented in accordance with the provisions of the standards, circulars guiding the implementation of standards and the current applicable Accounting System.

3. Basis of consolidated financial statements preparation

The consolidated financial statements include the financial statements of the parent company and its subsidiaries. Subsidiaries are entities controlled by the parent company. Control is achieved when the parent has the power to govern the financial and operating policies of an investee so as to obtain benefits from its activities.

The financial statements of subsidiaries are prepared for the same financial year as the Company's consolidated financial statements, using accounting policies consistent with those of the Company. When necessary, the financial statements of subsidiaries are adjusted to ensure consistency in the accounting policies applied by the Company and its subsidiaries.

The results of operations of subsidiaries acquired or disposed of during the year are included in the consolidated income statement from the date of acquisition or up to the date of disposal, respectively.

All intragroup balances, transactions, income, and expenses are eliminated in full during consolidation.

Non-controlling interests represent the portion of profit or loss and net assets not attributable to the Company's shareholders and are presented consolidatedly in the consolidated balance sheet and the consolidated income statement.

VI SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**1 Financial instruments**

Financial instruments are recorded according to the guidance in Circular 210/2009/TT-BTC dated 6 November 2009 of the Ministry of Finance - "Guidelines on International Accounting Standards on presentation of financial statements and disclosure of financial instruments".

Initial Recognition

At the date of initial recognition, financial assets are recorded at cost plus transaction costs that are directly attributable to the acquisition of the financial assets.

The company's financial assets include cash, investments, trade receivables, and other receivables.

At the date of initial recognition, financial liabilities are recorded at cost less transaction costs that are directly attributable to the issuance of the financial liability.

The company's financial liabilities include loans, trade payables, other payables, and accrued expenses.

Value after initial recognition

Currently, there are no regulations or guidelines on the revaluation of financial instruments after initial recognition.

2 Foreign currency transactions

Companies with economic transactions arising in foreign currencies shall record accounting book and prepare financial statements in a unified currency - Vietnamese Dong. The conversion of foreign currencies into Vietnamese Dong is based on:

- Actual transaction rate;
- Accounting exchange rate.
- In cases where foreign currencies are deposited into the cash fund or bank accounts, they shall be converted into Vietnamese Dong at the exchange rate on the transaction date or the buying rate announced by the Commercial Bank at the time of the transaction for accounting record purposes.
- In cases where foreign currencies are purchased for cash fund deposits, bank deposits, or settlement of foreign currency payables in Vietnamese Dong, they shall be converted into Vietnamese Dong at the applicable buying rate or payment rate.
- Monetary asset groups with economic transactions denominated in foreign currencies are converted into Vietnamese Dong and are concurrently monitored in detail by original currency and reflected in off-balance sheet items.

The actual foreign exchange differences arising during the period are recognized in financial income or financial expenses in the financial year.

At the time of preparing these financial statements in accordance with legal regulations, foreign currency balances are revalued at the actual transaction exchange rate, which is the buying rate of the commercial bank in which the Company regularly transacts as at the date of the financial statement preparation.

3 Cash and cash equivalents

Cash and cash equivalents include cash on hand, bank deposits, short-term investments, and highly liquid investments. Highly liquid investments are those that can be converted into a fixed amount of cash within no more than three months and carry minimal risk of fluctuations in their conversion value.

4. Goodwill

Goodwill presented in the consolidated financial statements represents the excess of the purchase price over the Company's share in the fair value of the identifiable assets, liabilities, and contingent liabilities of a subsidiary, associate, or jointly controlled entity at the acquisition date. Goodwill is recognized as an intangible asset and is amortized on a straight-line basis over its estimated useful life, not exceeding 10 years.

Upon the disposal of a subsidiary, associate, or joint ventures controlled entity, the unamortized carrying amount of goodwill is included in the gain or loss on disposal of the respective entity.

5 Financial investments

5.1 Investment in Subsidiaries, Associates

For the purpose of these financial statements, investments in subsidiaries and associates are initially recognised at cost, which includes the purchase price and any directly attributable costs.

Provision for impairment of investments is made when the investee incurs a loss, except when the loss was anticipated by the Company when making the investment decision. Provision for impairment of investments is reversed when the investee subsequently makes profits to offset the losses for which the provision was made. The provision is reversed only to the extent that the carrying amount of the investment does not exceed its carrying amount that would have been determined if no provision had been made.

5.2 Trading securities

Trading securities are securities held by a company for trading purposes, i.e. purchased for resale. Trading securities are initially recorded at cost, which includes purchase price plus directly attributable costs. After initial recognition, securities are measured at cost less allowances for diminution in value of trading securities. A provision is created when the market value of trading securities is lower than their carrying amount. After this provision is created, if the market value of trading securities increases, the provision is reversed. The provision is reversed to the extent that the carrying amount of existing

securities does not exceed the carrying amount that would have been assumed if no provision had been recognized.

5.3 Held to maturity investments

Held to maturity investments include: Term deposits (including treasury bills and promissory notes), bonds, preferred shares that the issuer is required to repurchase at a certain time in the future, loans, etc. held to maturity for the purpose of earning periodic interest and other held to maturity investments.

5.4 Loan receivables

Loan receivables under contracts among parties but not traded or sold on the market like securities. Depending on each contract, loans under contracts can be recovered once at maturity or gradually recovered each period.

For loan receivables, if there is no provision for doubtful debts as prescribed by law, the accountant will assess the recovery ability. In case there is certain evidence that a part or the whole of the loan may not be recovered, the accountant will record the loss in financial expenses in the period. In case the loss cannot be reliably determined, the accountant will explain in the Financial Statements about the recovery ability of the loan.

5.5 Investment in other entities

Investments in other entities are initially recognized at cost, which includes the purchase price and any directly attributable expenses. After initial recognition, these investments are measured at cost less any provision for impairment. A provision for impairment is made when the investee incurs a loss, except where such a loss was anticipated by the Company at the time of investment. The provision for impairment is reversed when the investee subsequently generates profits sufficient to offset previously recognized losses for which the provision was made. The reversal of a provision shall not result in the carrying amount of the investment exceeding its original cost as if no provision had been recognized.

6 Receivables

The classification of receivables as trade receivables and other receivables is based on the following principles:

- a. Trade receivables comprise amounts receivable arising from transactions of a commercial nature, such as receivables from the sale of goods, provision of services, liquidation or disposal of assets (including fixed assets, investment properties, and financial investments) between the Company and buyers (independent parties, including receivables between the parent company and subsidiaries, joint ventures, and associates).
- b. Other receivables comprise amounts receivable not arising from commercial transactions and not related to the purchase or sale of goods or services, such as:

- Receivables generating financial income, such as receivables from lending interest, deposits, dividends, and distributed profits;
- Non-trade receivables such as asset lending, receivables from fines, compensations, or shortage of assets awaiting resolution, etc.

When preparing the financial statements, the Company classifies receivables as current or non-current based on their remaining maturity.

Provision for doubtful debts is established for each specific doubtful receivable in accordance with Circular No. 228/2009/TT-BTC issued by the Ministry of Finance on 7 December 2009.

The determination of receivables requiring provision for doubtful debts is based on the items classified as short-term and long-term receivables in the balance sheet.

Provision for doubtful debts is made for each specific receivable based on the overdue period of the debt or the estimated potential loss.

7 Inventories

Inventories are recognized at cost. Where the net realizable value is lower than cost, inventories are measured at net realizable value. The cost of inventories includes purchase costs, processing costs, and other directly attributable costs incurred in bringing the inventories to their present location and condition.

The cost of inventories issued is calculated using the first-in, first-out method.

Inventories are accounted for using the perpetual method.

Provision for inventory devaluation is made at the end of the year for the difference where the cost of inventories exceeds their net realizable value.

8 Tangible fixed assets and depreciation

Tangible and intangible fixed assets are initially recognized at historical cost. During the usage period, tangible and intangible fixed assets are recorded at historical cost, accumulated depreciation, and net book value.

The depreciation method applied: Fixed assets are depreciated on a straight-line method over their estimated useful lives, in accordance with Circular No. 45/2013/TT-BTC dated 25 April 2013 issued by the Ministry of Finance.

9. Investment Properties

Investment properties are recognized as assets when both of the following conditions are met:

- It is probable that future economic benefits associated with the property will flow to the Company; and
- The cost of the property can be measured reliably.

Investment properties do not include properties held for sale in the ordinary course of business, properties under construction for future sale, owner-occupied properties, or properties under construction intended for future use as investment properties.

The initial cost of an investment property comprises all costs (cash and cash equivalents) incurred by the enterprise or the fair value of other consideration given to acquire the investment property up to the time of purchase or completion of construction. Investment properties are initially recognized at historical cost. During the operating lease period, investment properties are carried at historical cost less accumulated depreciation and net book value.

Investment properties held under operating leases are depreciated and the depreciation expense is recognized in business expenses for the period (including periods of temporary vacancy). The Company estimates the useful life and determines the method of depreciation for investment properties.

Investment properties held for capital appreciation are not depreciated. In cases where there is clear evidence that the value of an investment property has declined below its market value and the impairment amount can be measured reliably, the Company reduces the carrying amount of the investment property and recognizes the impairment loss in cost of goods sold (similarly to the provision for inventory of real estate properties).

Transfers between owner-occupied property, investment property, and inventory are made only when there is a change in the purpose of use, such as:

- Transfer from investment property to owner-occupied property when the owner begins to use the property;
- Transfer from investment property to inventory when the owner begins development with the intention to sell;
- Transfer from owner-occupied property to investment property when the owner ceases own use and leases the property to another party under an operating lease;
- Transfer from inventory to investment property when the owner begins leasing the property to another party under an operating lease;
- Transfer from property under construction to investment property upon completion of construction and commencement of investment use.

10 Prepaid expenses

Prepaid expenses that are related solely to the current financial year's production and business activities are recorded as short-term prepaid expenses and fully allocated to production and business expenses within the same financial year.

The following expenses incurred during the financial year are recorded as long-term prepaid expenses to be gradually allocated to business results over multiple years:

- Expenses for tools and supplies; insurance expenses;
- Expenses for the repair of mining equipment; and other related expenses.

The calculation and allocation of long-term prepaid expenses to production and business expenses in each accounting period are based on the nature and magnitude of each type of

expense, in order to select a reasonable method and basis for allocation. Prepaid expenses are allocated on a straight-line method.

11 Liabilities

Classification of liabilities as trade payables and other payables is performed based on the following principles:

a. Trade Payables include amounts payable of a commercial nature arising from transactions of purchasing goods, services, and assets from suppliers (being independent entities from the buyer, including payables between the parent company and its subsidiaries, joint ventures, and associates).

b. Other Payables comprise amounts payable that are non-commercial and not related to the purchase, sale, or provision of goods and services, including:

- Payables related to financial expenses, such as interest payable on borrowings, dividends and profits payable, and investment operation expenses payable;
- Non-commercial payables such as liabilities arising from asset borrowings, fines and compensation payables, surplus assets pending resolution, and payables related to social insurance, health insurance, unemployment insurance, and trade union fees, etc.

When preparing the financial statements, the accountant shall classify payables as either current or non-current based on their remaining maturity. Where there is evidence indicating that a loss is likely to occur with certainty, the accountant shall recognize a payable immediately in accordance with the Conservatism Principle.

12 Accrued expenses

Actual expenses that have not yet been incurred but are accrued in production and business costs during the period aim to ensure that, when the actual expenses arise, they do not cause sudden fluctuations in production and business costs, based on the matching principle between revenues and expenses. When these expenses are actually incurred, if there is a difference compared to the amounts previously accrued, the accountant shall record an adjustment to either increase or decrease the expenses corresponding to the variance.

13 Owners' equity

Owner's contributions are recognized based on the actual amount contributed by shareholders.

Equity funds are appropriated from the company's post-tax profits and, during the course of operations, are managed and utilized in accordance with the company's charter.

Undistributed profit after tax represents the profit generated from the company's activities after deducting (-) adjustments arising from the retrospective application of changes in accounting policies and the retrospective correction of material misstatements from previous years.

14 Revenue recognition

Revenue from sale of goods:

Revenue from sale of goods is recognized when all five (5) of the following conditions are met:

- The Company has transferred the majority of risks and rewards associated with ownership of the product or goods to the buyer;

- The Company no longer retains control over the goods as the owner or the ability to control the goods;
- Revenue can be reliably measured;
- The Company has received or is expected to receive economic benefits from the sales transaction; and
- The costs associated with the sales transaction can be reliably determined.

Revenue from Rendering of Services:

Revenue from rendering of services is recognized when the outcome of the transaction can be measured reliably. In cases where the rendering of services relates to multiple accounting periods, revenue is recognized during the period based on the stage of completion of the transaction at the balance sheet date. The outcome of a service transaction is deemed to be reliably measurable when all of the following conditions are satisfied:

- Revenue can be measured reliably;
- It is probable that economic benefits associated with the transaction will flow to the company;
- The stage of completion of the service at the balance sheet date can be reliably measured;
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

The stage of completion of the service rendered is determined using the work completion assessment method.

In cases where lease payments are received in advance for multiple periods, revenue is recognized based on the principle of allocating the prepaid lease income over the lease term. If the lease term covers more than 90% of the asset's useful life, the company may select to recognize the entire prepaid revenue at once, provided that all of the following conditions are simultaneously met:

- The lessee has no unilateral right to cancel the lease contract, and the lessor has no obligation to refund the prepaid lease amount under any circumstances or in any form;
- The prepaid amount is not less than 90% of the total expected lease payments under the contract over the entire lease term, and the lessee must settle the full lease amount within 12 months from the commencement date of the lease;
- Substantially all risks and rewards incidental to ownership of the leased asset have been transferred to the lessee;
- The lessor is able to reasonably estimate the cost of the leasing operation.

Enterprises that recognize revenue based on the total amount of prepaid lease income in this case must disclose in the financial statements the following:

- The difference in revenue and profit compared to the scenario where revenue would have been recognized progressively over the lease term;

The impact of recognizing revenue in the current period on the entity's cash-generating ability, and the risks of potential declines in revenue and profit in the future.

Finance Income

Finance income arising from interest, royalties, dividends, profit sharing, and other financial activities is recognized when both of the following conditions are satisfied:

- It is probable that economic benefits associated with the transaction will flow to the enterprise;
- The amount of revenue can be measured reliably.

Other Income

Other income reflects revenue earned outside the company's main production and business activities, including:

- Income from the sale or disposal of fixed assets;
- Income from sale and leaseback transactions;
- Taxes initially payable upon sales of goods or services but subsequently refunded or reduced (such as refunded export duties, refunded or reduced value-added tax (VAT), excise tax, environmental protection tax);
- Compensation received from third parties for asset losses (e.g., insurance compensation received, compensation for relocation of business premises, and other similar amounts);
- Penalty income collected from customers for breaches of contract;
- Other income not classified under the above categories.

15 Cost of Goods sold

The cost of goods sold reflects the carrying value of products, goods, and services sold during the period.

Provision for inventory devaluation is included in the cost of goods sold based on the quantity of inventory on hand and the difference where the net realizable value is lower than the original cost of inventory.

In the case of inventory shortages or losses, the related value is charged directly to the cost of goods sold (after deducting any compensation received, if applicable).

Direct material costs consumed in excess of normal levels, abnormal labor costs, and unallocated fixed production overheads are also charged directly to the cost of goods sold (after deducting any compensation received, if applicable), even if the related products or goods have not yet been recognized as sold.

Import duties, special consumption tax, and environmental protection tax that have been included in the purchase cost of goods, if refunded upon the sale of goods, are recognized as a reduction in the cost of goods sold.

Cost items that are classified as non-deductible expenses for corporate income tax (CIT) purposes under the tax law, but are fully supported by invoices and documents and correctly recorded according to the Company's accounting regime, are not adjusted in accounting records but only adjusted in the CIT finalization to increase the CIT payable.

16 Financial expenses

Finance expenses reflect costs or losses related to financial investment activities, including borrowing and lending costs, expenses related to investments in joint ventures and associates, losses from the disposal of short-term securities, transaction costs from the sale of securities, provision for devaluation of trading securities, provision for losses on investments in other entities, losses from the sale of foreign currencies, and exchange rate losses.

Finance expenses that are classified as non-deductible for corporate income tax (CIT) purposes under the applicable tax laws, but are fully supported by appropriate invoices and documents and properly recorded under the Company's accounting regime, are not adjusted in the accounting books but are adjusted during the CIT finalization to increase the payable CIT amount.

17 Selling expenses and general administrative expenses

Selling expenses include: Actual expenses incurred during the process of selling products, goods, and providing services, such as expenses for offering and introducing products, product advertising, sales commissions, warranty costs for products and goods, preservation, packaging, transportation costs, etc.

General and administrative expenses include: Salaries and wages of administrative staff (salaries, wages, allowances, etc.); social insurance, health insurance, trade union fees, and unemployment insurance for administrative staff; costs of office materials, tools and supplies; depreciation of fixed assets used for administrative purposes; land rental, business license tax; provision for doubtful debts; outsourced services (electricity, water, telephone, fax, property and fire insurance, etc.); and other cash expenses (such as customer reception, client meetings, etc.).

18 Taxes

Current corporate income tax expense is determined based on taxable income and the applicable corporate income tax (CIT) rate for the current year.

Deferred corporate income tax expense is determined based on deductible temporary differences, taxable temporary differences, and the applicable CIT rate.

The applicable corporate income tax rate is 20%, pursuant to the Law amending and supplementing a number of articles of the Corporate Income Tax Regulation.

Financial Risk Management

Financial risks include market risk (comprising interest rate risk and price risk), credit risk, and liquidity risk. The Company does not implement hedging measures against these risks due to the lack of a market for purchasing such financial instruments.

Interest Rate Risk Management

The Company is exposed to interest rate risk arising from its signed interest-bearing borrowings. The Company is subject to interest rate risk on both floating-rate and fixed-rate borrowings. This risk is managed by maintaining a reasonable balance between fixed-rate and floating-rate borrowings.

Credit risk

Credit risk arises when customers or counterparties fail to meet their contractual obligations, resulting in financial losses for the Company. The Company has an appropriate credit policy in place and regularly monitors the situation to assess whether it is exposed to credit risk.

Liquidity risk

The objective of liquidity risk management is to ensure that sufficient funding is available to meet current and future financial obligations. Liquidity is also managed to maintain a surplus between maturing liabilities and maturing assets at a controllable level, based on the amount of capital the Company believes it can generate during the period. The Company's policy is to regularly monitor current and forecasted liquidity requirements to ensure that adequate cash reserves, bank deposits, and borrowings are maintained to meet both short-term and long-term liquidity requirements.

The table below provides a detailed analysis of the remaining contractual maturities of non-derivative financial liabilities, based on the agreed payment terms. The amounts disclosed in the table are the undiscounted cash flows of the financial liabilities, presented at the earliest date on which the Company is
