NOTES TO THE FINANCIAL STATEMENTS

Quarter 04/2025

1. GENERAL INFORMATION

Structure of ownership

Long An Water Supply Sewerage Joint Stock Company was equitized from a State-owned enterprise – Long An Water Supply One Member Limited Liability Company, pursuant to Decision No. 1429/QĐ-UBND dated April 24, 2013 of the People's Committee of Long An Province. The Company operates under Enterprise Registration Certificate No. 1100101500, initially issued on July 12, 2007 by the Department of Planning and Investment of Long An Province, and the 7th amended certificate issued on September 5, 2023.

The Company's charter capital is: 122,000,000,000 VND.

Operating industry and principal activities

- Testing the chemical, physical and microbiological indicators of water;
- Consulting, designing, and preparing cost estimates for projects to install water supply and drainage systems;
- Trading in bottled drinking water;
- Exploiting and supplying clean water (in the area of Tan An city and some industrial parks in the province); producing bottled drinking water;
- Trading in all kinds of water supply materials and equipment;
- Calibration, verification and testing of measuring instruments (cold water meters);
- Managing and installing water supply and drainage pipeline systems; constructing water supply and drainage systems;
- Production, transmission and distribution of electricity;
- Well drilling service;
- Collecting non-hazardous waste (collecting sludge from the water supply treatment process);
- Treating and disposing of non-hazardous waste (treating sludge from the water supply treatment process).

Normal production and business cycle

The Company's normal production and business cycle is carried out for a period not exceeding 12 months.

2. ACCOUNTING PERIOD, APPLIED ACCOUNTING STANDARDS AND REGIME

Accounting period

The Company's financial year begins on Jan 1 and ends on Dec 31 each year.

This Quarter 4 financial statement is prepared for the operating period from October 1, 2025 to December 31, 2025.

Applied Accounting System

The Company applied Vietnamese accounting standards, accounting regime for enterprises in accordance with Circular No. 200/2014/TT-BTC dated 22 December 2014, Circular No. 53/2016/TT-BTC dated 21 March 2016 and circulars guiding the implementation of accounting standards of the Ministry of Finance in the preparation and presentation of financial statements.

Declaration of compliance with accounting standard and accounting regime

The Chairman of the Board of Directors and the Board of General Directors ensures to comply with the requirements of Vietnamese accounting standards, accounting regime for enterprises in accordance with Circular No. 200/2014/TT-BTC dated 22 December 2014, Circular No. 53/2016/TT-BTC dated 21 March 2016 and circulars guiding the implementation of accounting standards of the Ministry of Finance in preparation of financial statements.

The accompanying quarterly financial statements are not intended to present the financial position, business results, and cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of financial statement preparation

The quarterly financial statements are prepared on an accrual basis of accounting (except for information related to cash flows).

The accompanying quarterly financial statements are presented in Vietnam Dong (VND), based on the historical cost principle and in accordance with Vietnam Accounting Standards, the Vietnam Enterprise Accounting System, and relevant legal regulations on the preparation and presentation of quarterly financial statements.

The following are the significant accounting policies applied by the Company in the preparation of the quarterly financial statements:

Accounting estimates

The preparation of the quarterly financial statements in compliance with Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System, and relevant legal regulations on the preparation and presentation of quarterly financial statements requires the Chairman of the Board of Directors and the Board of General Directors to make estimates and assumptions that affect the reported amounts of assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the accounting period. Although accounting estimates are made with all the knowledge of the Chairman of the Board of Directors and the Board of General Directors, actual results may differ from those estimates and assumptions.

Evaluation and recognition at fair value

The Law on Accounting, which took effect from Jan 01, 2017, includes regulations on Valuation and Recognition at fair value; however, there are no specific guidelines for this issue; accordingly, the Chairman of the Board of Directors and the Board of General Directors have considered and applied as follows:

- a) *Financial instruments are recognized and revalued at fair value based on historical cost less any provisions required to be made (if any) in accordance with current regulations.*
- b) *For assets and liabilities (except items a as mentioned above), the Company does not have a basis for reliably determining the value; therefore, the Company is recognizing them at historical cost.*

Financial instruments

Initial recognition

Financial assets: On the date of initial recognition, financial assets are recognized at historical cost plus transaction costs directly related to the acquisition of those financial assets. The Company's financial assets include cash, cash equivalents, accounts receivable from customers, other receivables, and financial investments.

Financial liabilities: On the date of initial recognition, financial liabilities are recognized at historical cost plus transaction costs directly related to the issuance of those financial liabilities. The Company's financial liabilities include accounts payable to suppliers, other payables, accrued expenses, and borrowings.

Revaluation after initial recognition

Currently, Circular No. 210/2009/TT-BTC issued by the Ministry of Finance on November 06, 2009 ("Circular 210") as well as current regulations do not provide specific guidance on determining the fair value of financial assets and financial liabilities.

Cash and cash equivalents

Cash and cash equivalents include cash on hand, demand deposits, and term deposits with a maturity of no more than 03 months.

Investments held to maturity

Investments held to maturity include investments that the Company has the intent and ability to hold until maturity date. Investments held to maturity are term bank deposits.

Investments held to maturity are recognized starting from the date of purchase and are initially valued at the purchase price and related costs of purchasing the investments. Interest income from investments held to maturity after the date of purchase is recognized in the Statement of Profit or Loss on an accrual basis. Interest earned before the Company holds it is deducted from the original price at the time of purchase.

Investments held to maturity are stated at cost less provision for doubtful debts.

Provision for doubtful debts of investments held to maturity is made in accordance with current regulations.

Accounts receivable

Accounts receivable are amounts recoverable from customers or other parties. Accounts receivable are presented at book value less provision for doubtful debts.

Provision for doubtful debts is made for receivables that are overdue, or receivables that the debtor is unlikely to be able to pay due to liquidation, bankruptcy or similar difficulties.

Inventories

Inventories are stated at the lower of cost and net realizable value. The cost of inventories includes the purchase price and other costs directly related to the purchase of inventories, direct materials costs, direct labor costs and production overhead costs, if any, to bring the inventories to their present location and condition. The issue price of inventories is determined using the weighted average method. Inventories are accounted for under the perpetual declaration method. Net realizable value is determined as the estimated selling price less the estimated costs to complete the product plus marketing, selling and distribution costs incurred.

The Company's provision for inventory devaluation is made in accordance with current regulations. Accordingly, the Company is allowed to make provision for devaluation of obsolete, damaged, and poor quality inventories and in cases where the cost of inventories is higher than the net realizable value at the end of the accounting period.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation.

The original cost of tangible fixed assets includes the purchase price and all other costs directly related to bringing the asset to a ready-to-use condition.

Tangible fixed assets are depreciated using the straight-line method based on the estimated useful life, specifically as follows:

	Number of depreciation years
Buildings and structures	05 - 50
Machinery and equipment	05 - 15
Vehicles, transmission lines	04 - 45
Management tools, equipment	05 - 10

Gains or losses arising from the disposal or sale of assets are the difference between proceeds from disposal and the carrying amount of the asset and are recognized in the statement of profit or loss.

Intangible fixed assets and amortization

Land use rights

Long-term land use rights (indefinite term) are initially recognized at purchase price.

Computer software

Computer software is initially recognized at purchase price and is amortized using the straight-line method based on the estimated useful life.

Other intangible fixed assets

Other intangible fixed assets are initially recognized at purchase price and are amortized using the straight-line method based on the estimated useful life.

Construction in progress

Assets in the process of construction for production, lease, management or other purposes are recorded at cost. This cost includes the necessary expenses to form the asset, including construction costs, equipment, other expenses, and related borrowing costs in accordance with the Company's accounting policies. These costs will be transferred to the original cost of fixed assets at a provisional price (if there is no approved settlement) when the assets are handed over for use.

According to the State's regulations on investment and construction management, depending on the management level, the settlement value of completed basic construction projects must be approved by competent authorities. Therefore, the final value of basic construction projects may change and depends on the settlement approved by competent authorities.

Prepaid expenses

Prepaid expenses include actual expenses incurred but related to the production and business results of many accounting periods. The Company's prepaid expenses are one-time asset repair costs with a large value that are allocated to expenses using the straight-line method over 03 years.

Accounts payable and accrued expenses

Accounts payable and accrued expenses are recognized for the amount to be paid in the future related to goods and services received. Accrued expenses are recognized based on reasonable estimates of the amount to be paid.

The classification of payables as trade payables, accrued expenses, internal payables, and other payables is based on the following principles:

- Trade payables reflect payables of a commercial nature arising from transactions of purchasing goods, services, assets, and the seller is an independent entity from the Company.
- Accrued expenses reflect payables for goods and services received from the seller or provided to the buyer but not yet paid due to the absence of invoices or insufficient accounting records and documents, and production and business expenses that must be accrued in advance.
- Other payables reflect payables that are non-commercial and not related to transactions of buying, selling, or providing goods or services.

Recognition of owner's equity

Owner's invested capital is reflected as the actual contributed charter capital of shareholders; Additional capital annually from the Company's profits.

The distribution of the Company's profits is carried out according to the Resolution of the General Meeting of Shareholders, as stipulated in the Company's Financial Management Regulations.

Revenue recognition

Revenue is recognized when the Company is likely to receive economic benefits that can be reliably measured. Revenue is determined at the fair value of the amounts received or receivable after deducting trade discounts, sales allowances, and sales returns. The following specific recognition conditions must also be met when recognizing revenue:

Sales revenue is recognized when all five (5) of the following conditions are met simultaneously:

- (a) The Company has transferred the majority of risks and rewards associated with ownership of the product or goods to the buyer;
- (b) The Company no longer retains managerial control over the goods as the owner of the goods or the right to control the goods;
- (c) Revenue can be measured reliably;
- (d) The Company will receive economic benefits from the sales transaction; and
- (e) The costs associated with the sales transaction can be determined.

Revenue from service provision transactions is recognized when the outcome of that transaction can be reliably determined. If a service provision transaction involves multiple periods, revenue is recognized in the period based on the results of the portion of work completed as of the date of that period's Balance Sheet. The outcome of a service provision transaction is determined when all four (4) of the following conditions are met:

- (a) Revenue can be determined relatively reliably;
- (b) It is probable that economic benefits associated with the service provision transaction will flow to the entity;
- (c) The stage of completion of the transaction at the date of the Balance Sheet can be determined; and
- (d) The costs incurred for the transaction and the costs to complete the service provision transaction can be determined.

Interest on deposits is recognized on an accrual basis, determined based on the balance of deposit accounts and the applicable interest rates.

Borrowing costs

Borrowing costs are recognized as an expense in profit or loss in the period in which they are incurred.

Taxes

Corporate income tax represents the aggregate amount of current tax and deferred tax.

Current tax is calculated on the basis of the taxable profit for the year. Taxable profit differs from net profit as reported in the Statement of Profit or Loss because it excludes items of income or expense that are taxable or

deductible in other years (including carryforward tax losses, if any) and it further excludes items that are not taxable or deductible.

Deferred income tax is calculated based on temporary differences between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases, and is recognized using the Balance Sheet method. Deferred income tax liabilities are recognized for all taxable temporary differences, whereas deferred income tax assets are recognized only to the extent that it is probable that sufficient taxable profits will be available against which the deductible temporary differences can be utilized.

Deferred income tax is determined using tax rates that are expected to apply to the year when the asset is realized or the liability is settled. Deferred income tax is recognized in the Statement of Profit or Loss, except when it relates to items that are recognized directly in equity, in which case the deferred tax is also recognized in equity.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend to settle current tax liabilities and assets on a net basis.

According to Official Letter No. 759/CT-TTH dated Apr 14, 2016 of the Long An Tax Department, the Company's water supply and drainage business meets the conditions for enjoying the preferential policies for the development of socialized sectors. Therefore, income from the Company's activities in the socialized sector is entitled to the preferential corporate income tax rate in accordance with Circular No. 123/2012/TT-BTC. The Company is entitled to a preferential tax rate of 10% for activities in the socialized sector throughout its operating period, and this tax rate has been applied by the Company since Jan 1, 2016. Income from other business activities of the Company is subject to a corporate income tax rate of 20%.

The determination of the Company's income tax is based on current tax regulations. However, these regulations change over time, and the final determination of corporate income tax is subject to the results of inspections by the competent tax authorities.

Other taxes are applied according to the current tax laws in Vietnam.

Related party

Parties are considered related if one party has the ability to control or exert significant influence over the other in making decisions about financial and operating policies. Parties are also considered related parties if they are under common control or common significant influence.

In considering the relationship of related parties, the substance of the relationship is given more importance than the legal form.
