#### 4. Activities of the Company's Board of Directors

In 2025, the Board of Directors organized activities to implement the Resolution of the General Meeting of Shareholders in accordance with the Company's Charter, the Board of Directors' Working Regulations, the Corporate Internal regulations on governance, and legal provisions. Based on the production and business plan approved by the General Meeting of Shareholders on April 28, 2025, the Board of Directors directed the Company's General Director to carry out the following main tasks:

- Implement the 2025 production and business plan;
- Select an audit unit;
- Pay remuneration to the Board of Directors and Board of Supervisors in accordance with the Resolution of the General Meeting of Shareholders;

The specific results are as follows:

##### ***4.1. Results of the implementation of the production and business plan***

In 2025, the seafood processing and export industry continues to face many difficulties as input material prices fluctuate sharply due to the impacts of extreme weather, aquaculture diseases, and rising production costs. Major export markets such as the U.S., EU, and Japan maintain strict requirements on quality, food safety, and traceability, while the global economy grows slowly, with interest rates and exchange rates fluctuating alongside protectionist trade trends in some countries, negatively affecting export activities. Domestically, consumer demand shows signs of recovery but is not strong enough to offset the decline from international markets, causing Ut Xi Aquatic Products Processing Corporation to encounter numerous challenges in terms of markets, logistics, raw material supply, and the impacts of climate change. At the same time, the company faces obstacles in accessing loan capital to purchase raw materials, leading to limited production and supply capacity, resulting in business performance in 2025 falling short of expectations. This clearly reflects the common difficulties of Vietnam's seafood industry amid a volatile global economic context.

**The Company's business results in 2025 are as follows:**

Indicator	Unit	Plan Year 2025	Implemented Year 2025	Implemented/ Plan (%)
1. Production Output	Ton	3.350	1.596	47,62 %
2. Export Output	Ton	2.680	1.249	46,57 %
3. Domestic Consumption Output	Ton	700	396	56,57 %
4. Export Value	Million USD	25,01	12,36	49,44 %

## II. SUMMARY OF PRODUCTION AND BUSINESS RESULTS IN 2025

### 1. Assessment of the Economic Situation and Seafood Export Market in 2025

In 2025, the global economy continued to face inflationary pressures, high logistics costs, and a trend of trade protectionism in major markets such as the United States, the European Union, and Japan. In addition, natural disasters and domestic epidemics significantly affected aquaculture activities, reducing the supply of raw materials. Nevertheless, Vietnam’s seafood industry still recorded positive export growth, reaching over USD 11 billion, thanks to the recovery of demand in key markets and the shift toward deeply processed products that meet international standards.

This context demonstrates that the domestic seafood industry has maintained its position in the global market; however, the divergence among enterprises has become increasingly evident: those that adapt well to new requirements continue to grow, while those that have not yet transformed face considerable difficulties.

Against this backdrop, the actual situation at Ut Xi Aquatic Products Processing Corporation shows that its business results have not kept pace with the overall industry trend: both output and revenue declined sharply compared to the previous year, reaching only about 50–60% of the planned targets, while net profit after tax remained negative. This clearly reflects the challenges in maintaining production volume, expanding export markets, and adapting to new international market requirements.

### 2. 2025 Business Performance Results

#### - 2025 Business Performance Results

Indicator	Unit	Implemented year 2024	Implemented year 2025	+/- %
1. Production Output	Ton	3.282	1.596	-51,36 %

#### - 2025 Business Plan Implementation Status

Indicator	Unit	Plan year 2025	Implemented year 2025	Implemented / Plan (%)
1. Production Output	Ton	3.350	1.596	47,62 %
2. Export Volume	Ton	2.680	1.249	46,57 %
3. Domestic Sales Volume	Ton	700	396	56,57 %
4. Export Value	Million USD	25,01	12,36	49.44 %
5. Total Net Revenue from Sales and Service Provision	Billion VND	624,19	389,97	62.44 %
6. Export Sales Revenue	Billion VND	612,21	319,71	52.23 %
7. Service Provision and Domestic Sales Revenue	Billion VND	11,98	74,71	623.06 %
8. Profit After Tax	Billion VND	8,47	(1,66)	-

In 2025, the company recorded a sharp decline in output and revenue compared to 2024, with production volume down by more than 51%, export volume down by more than 41%, and total net revenue decreasing by 33%. Although operating costs were significantly reduced (down 35.36%), which helped narrow the net loss from VND -37.80 billion to VND -1.66 billion, the results still fell short of the planned targets. Specifically, production and export volumes reached only about 46–47% of the plan, net revenue achieved 62.44% of the plan, while net profit after tax failed to meet the profit target and continued to record a loss. These results clearly reflect the difficulties in maintaining production, expanding export markets, and improving business efficiency. They also indicate that the company needs to implement restructuring measures, focus on value-added products, and tap into the domestic market to improve its financial position in the coming years.

### III. 2026 PRODUCTION AND BUSINESS ACTIVITIES PLAN

#### 1. 2026 Market Forecast

➤ **Opportunities:** In 2026, Ut Xi Aquatic Products Processing Corporation will have many opportunities as demand for processed seafood continues to rise in major markets, coupled with advantages from free trade agreements that facilitate export expansion. In addition, the development of modern processing technology and logistics supports product quality improvement, while the domestic market's growing interest in clean and safe food creates further growth potential.

➤ **Challenges:** However, the company also faces numerous challenges such as fluctuations in input material prices, stringent quality requirements from import markets, and intense competition from both domestic and foreign enterprises. Moreover, exchange rate risks, high financial costs, and the trend of trade protectionism in certain key markets continue to put pressure on business performance.

#### 2. Business Plan 2026

## 4. Monitoring the implementation of the production and business plan

In 2025, the company recorded a sharp decline in output and revenue compared to 2024, with production output falling by more than 51%, export volume decreasing by over 41%, and total net revenue dropping by 33%. Although production and operating expenses were significantly reduced (down 35.36%), which helped narrow the post-tax loss from VND - 37.80 billion to VND -1.66 billion, the results still fell short of the planned targets. Specifically, production and export output reached only about 46–47% of the plan, net revenue achieved 62.44% of the plan, while profit after tax failed to meet the profit target and continued to record losses. These results clearly reflect the difficulties in maintaining output, expanding export markets, and improving business efficiency, while also indicating that the company needs to adopt solutions to restructure its operations, focus on value-added products, and tap into the domestic market to improve its financial situation in the coming years.
