NOTES TO THE FINANCIAL STATEMENTS

QUARTER II OF 2026

I. Operation characteristics of the Company

Agribank Securities Corporation ("Company") is a joint stock Company established in Vietnam.

1. Establishment and operation license of the Company

Agribank Securities Corporation ("Company") was established on the basis of equitization of Vietnam Bank for Agriculture and Rural Development Company Limited under the Establishment and Operation License No. 108/UBCK-GP dated July 10, 2009 of the State Securities Commission.

The Company's shares were officially registered for trading at the Ho Chi Minh Stock Exchange from December 10, 2009.

The Company's main activities include: securities brokerage, securities trading, securities investment consulting and securities underwriting.

2. Contact address of the Company

The Company's head office is located on 5th Floor - Green Diamond Building - No. 93 Lang Ha - Dong Da Ward - Hanoi City.

The Company also has 02 branches located in Da Nang City and Ho Chi Minh City as follows:

- Central Branch: Agribank Building - No. 228, 2/9 Street - Hoa Cuong Ward - Da Nang City.
- Southern Branch: 1st and 2nd Floor, Building 2 - No. 2A - Pho Duc Chinh Street - Ben Thanh Ward - Ho Chi Minh City.

3. Main features and operations of the Company

3.1. Charter capital:

The Company's charter capital as of December 31, 2025 according to adjusted license No. 31/GPDC-UBCK dated June 30, 2025 is VND 2,283,118,230.

3.2. Board of Directors

The members of the Board of Directors of the Company at the date of this report are as follows:

Full name	Position	Date of appointment/dismissal
Phan Van Tuan	Chairman of the BOD	Appointed on April 22, 2024
Nguyen Duc Thuan	Commissioner	Appointed on April 22, 2024
Nguyen Thi Hong Hanh	Commissioner	Appointed on April 22, 2024
Doan Ngoc Hoan	Commissioner	Appointed on April 22, 2024

3.3. Board of Control

The members of the Company's Board of Control at the date of this report are as follows:

Full name	Position	Date of appointment/dismissal
Le Huong Giang	Head of Board	Appointed on April 22, 2024
Nguyen Thi Hong Duong	Member	Appointed on April 22, 2024
Do Duc Tu	Member	Appointed on April 22, 2024

3.4. Board of General Directors

Members of the Board of General Directors of the Company at the date of the report

Full name	Position	Date of appointment/dismissal
Nguyen Hoang Tung	Deputy General Director in Charge of the Management Board	Appointed on April 01, 2026
Bui Duc Thang	Deputy General Director	Appointed on April 28, 2024
Nguyen Ngoc Lan	Deputy General Director	Appointed on August 30, 2024

3.5. Legal Representative

The Company's legal representative is Mr. Phan Van Tuan, Chairman of the Board of Directors.

Mr. Nguyen Hoang Tung - Deputy General Director was authorized by Mr. Phan Van Tuan to sign the financial report according to the authorization letter No. 325/QĐ - CT. HDQT of the Chairman of the Board of Directors dated 24 April 2026

3.6. Total number of employees and workers: 162.

II. Accounting period, currency used in accounting

1. Annual accounting period: From January 01 to December 31

2. Currency used in accounting: Vietnamese Dong

III. Applicable Accounting Standards and Regimes

1. Applicable accounting regimes:

- Circular No. 200/2014/TT-BTC dated December 22, 2014 of the Ministry of Finance on guiding the enterprise accounting regime.
- Circular 210/2014/TT-BTC dated December 30, 2014 of the Minister of Finance, on Accounting guidance applicable to Securities Companies.
- Circular No. 334/2016/TT-BTC dated December 27, 2016 of the Minister of Finance, on Amending, supplementing and replacing Appendix 02 and 04 of Circular No. 210/2014/TT-BTC dated December 30, 2014.

2. Statement on compliance with accounting standards and accounting regimes:

Ensure full compliance with Accounting Standards, Vietnamese Accounting System and Accounting Regimes applicable to Securities Companies.

3. Applicable accounting form: General journal

IV. Applicable accounting policies

1. Changes in accounting policies and notes

On November 20, 2015, the National Assembly approved the Accounting Law No. 88/2015/QH13 ("New Accounting Law"). The new Accounting Law provides for the application of the fair value principle, when determining the value after initial recognition, for certain types of assets and liabilities whose values fluctuate frequently according to market prices and can be re-determined reliably. The new Accounting Law takes effect from January 1, 2017.

Accordingly, the revaluation at fair value for some financial assets is performed as follows:

- Financial assets held at fair value through profit or loss (FVTPL): are initially recognized at cost. After initial recognition, FVTPL financial assets are recognized at fair value. Any gains or losses arising from changes in the value of FVTPL financial assets are recognized in the income statement.

- Available-for-sale (AFS) financial assets: are initially recognized at cost. After initial recognition, AFS financial assets are recognized at fair value. Any gains or losses arising from changes in the value of AFS financial assets are recognized directly in equity (Other comprehensive income), through recognition in the statement of changes in equity, except for losses due to impairment of AFS financial assets which are recognized in the statement of profit or loss.

The Company has applied these changes in accounting policies and their impact on the Company on a prospective basis as the Accounting Law 2015 does not require retrospective application of these changes.

2. Cash and cash equivalents

Cash and cash equivalents include cash in hand, bank deposits of securities companies, short-term investments with a maturity of no more than three months from the date of purchase, highly liquid, easily convertible into known amounts of cash and subject to an insignificant risk of conversion into cash.

Investor deposits on securities transactions and deposit of issuing organizations is reflected in the indicators outside the financial statement.

3. Financial assets at fair value through profit or loss (FVTPL)

FVTPL financial assets are financial assets that satisfy one of the following conditions:

- a) Financial assets are classified as held for trading. Financial assets are classified as held for trading securities if:
 - Purchased or created primarily for the purpose of resale/repurchase in the short term;
 - Has evidence of trading in the instrument for short-term profit; or
 - Is a derivative financial instrument (except for a derivative financial instrument that is a financial guarantee contract or a designated and effective hedging instrument).
- b) At initial recognition, the Company classifies these financial assets as FVTPL financial assets. These financial assets would be more appropriately presented if classified as FVTPL financial assets for one of the following reasons:
 - Classification as FVTPL financial assets eliminates or significantly reduces inconsistencies in the recognition or measurement of financial assets on different bases; or
 - Financial assets are a group of financial assets that are managed and the performance of which is assessed on a fair value basis, consistent with the Company's risk management policy or investment strategy.

FVTPL financial assets are initially recognized at cost. After initial recognition, FVTPL financial assets are measured at fair value. Any gains or losses arising from changes in the value of these financial assets are recognized in the income statement.

The cost of acquiring FVTPL financial assets is recognized in the transaction costs of acquiring financial assets of the statement of comprehensive income as soon as it is incurred.

4. Held-to-maturity (HTM) financial assets

HTM financial assets are non-derivative financial assets with fixed or determinable payments and fixed maturity that the Company has the intention and ability to hold to maturity, other than:

- a) Financial assets that are initially recognized at fair value through profit or loss;
- b) Financial assets classified as available for sale;
- c) Financial assets that meet the definition of loans and receivables.

HTM financial assets are initially recognized at their purchase price plus (+) transaction costs that are directly attributable to the acquisition of the financial assets, such as brokerage fees, transaction fees, issuance agency fees and banking fees. After initial recognition, the value of HTM financial assets is determined at amortized cost using the effective interest method.

The amortized cost of an HTM financial asset is determined by the initial recognition value of the financial asset minus (-) principal repayments plus (+) or minus (-) cumulative amortizations calculated using the effective interest method of the difference between the initial recognition value and the maturity value, minus any reductions in provisions for impairment or Irrevocability (if any).

The effective interest method is a method of calculating the amortization cost of interest income or interest expense over the relevant period of a financial asset or a group of HTM financial assets.

The effective interest rate is the rate at which the estimated future cash flows that will be paid or received over the expected life of the financial instrument or, if appropriate, over a shorter period, are accurately discounted to the net present value of the financial asset or liability.

The initial value less (-) principal repayments is recorded and monitored by the Company in the HTM financial asset item. Cumulative amortizations under the effective interest method

are recorded in the accrual item. Provisions, if any, are determined and monitored in the item "Provisions for impairment of financial assets and collateral assets".

5. Loans

Loans are non-derivative financial assets with fixed or determinable payments and are not quoted in an active market, except for:

- a) Those that the Company intends to sell immediately or in the near term, which are classified as held for trading, and those that the Company upon initial recognition designates as measured at fair value through profit or loss;
- b) Those that the Company upon initial recognition designates as available-for-sale; or
- c) Those for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration, and are classified as available-for-sale.

Loans are initially recognised at cost. After initial recognition, loans are measured at amortised cost using the effective interest method and are presented similarly to HTM financial assets.

6. Available-for-sale financial assets (AFS)

Available-for-sale financial assets are non-derivative financial assets that are identified as available for sale or are not classified as:

- a) Loans and receivables;
- b) Held to maturity investments;
- c) Financial assets are recorded at fair value through profit/loss.

AFS financial assets are initially recorded at cost, which is the purchase price plus transaction costs directly arising from the purchase of these financial assets. After initial recognition, AFS financial assets are recorded at fair value less provision (if any). The difference (increase or decrease) due to revaluation of AFS financial assets compared to the previous period is shown in the item "Revaluation difference of AFS financial assets" in the Other comprehensive

income section of the income statement and "*Revaluation difference of assets at fair value*" in the statement of financial position except for differences due to impairment of AFS financial assets.

7. Provision for impairment of financial assets

Financial assets are reviewed for impairment at the balance sheet date.

The Company assesses whether there is objective evidence that an individual financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is considered impaired if, and only if, there is objective evidence of impairment as a result of one or more events that have occurred subsequent to the initial recognition of the asset (an "impairment event" has occurred) and the effect of the impairment event on the expected future cash flows of the financial asset or group of financial assets can be estimated reliably.

Evidence of impairment may include signs that the debtor or group of debtors is experiencing significant financial distress, default or delinquency in payments of interest or principal, the possibility of bankruptcy or financial restructuring of the debtor, and observable data indicating a quantifiable deterioration in expected future cash flows, such as changes in repayment terms, financial position, or the likelihood of default.

Increases or decreases to the provision balance are recorded in the income statement in the item "*Provision expenses for financial assets, handling of bad debts and impairment losses of financial assets and borrowing costs of loans*".

a) Impairment provision of HTM financial assets

For HTM financial assets, the Company first assesses whether there is objective evidence of significant impairment of each significant HTM financial asset individually or collectively for non-significant HTM financial assets.

The impairment allowance is determined by the difference between the carrying amount and the estimated recoverable amount of the HTM financial asset.

b) Impairment provision for AFS financial assets

At the reporting date, the Company also assesses whether there is objective evidence that the AFS financial asset is impaired:

- In the case of equity instruments classified as available for sale, objective evidence includes a significant or sustained decline in the fair value of the investment below

its carrying amount. "Significant" refers to the assessment compared to the original cost of the investment and "prolonged" refers to the period during which the fair value is below the original cost. When there is evidence of impairment, the provision is determined based on the difference between the cost and the fair value at the time of assessment.

- In the case of debt instruments classified as available for sale, the assessment of impairment is performed based on the same criteria as for HTM investments. When there is evidence of impairment, the provision is determined based on the difference between the cost and the fair value at the time of assessment.
- When the provision for impairment is made, the gain/loss arising from the revaluation of the market value of the AFS financial asset previously recognized directly in equity (if any) will be transferred to the income statement.

c) Impairment provision of loans

Provision for loans is made based on the estimated loss, calculated as the difference between the market value of the securities used as collateral for the loan and the outstanding balance of that loan.

8. Determination of fair value

For financial assets whose fair value can be determined at market price, the market value will be determined according to the provisions of Circular No. 48/2019/TT-BTC as follows:

- The market value of securities listed on the Hanoi Stock Exchange and the Ho Chi Minh City Stock Exchange is the closing price on the most recent trading day up to the date of valuation of the securities.
- For securities of companies that are not listed on the stock market but have registered for trading on the Unlisted Public Companies Market (UPCom), the market value is determined as the average reference price in the 30 most recent consecutive trading days before the date of preparing the annual financial statements announced by the Stock Exchange.
- For listed securities that are canceled or suspended from trading or have been suspended from trading from the sixth trading day onwards, the actual securities price is the book value on the date of preparing the most recent financial situation report.

- For unlisted securities that have not registered for trading on the Unlisted Public Companies Market (UPCom), the actual securities price on the market is the average price of actual trading prices according to the quotations of three (3) securities companies that have traded at the time closest to the time of valuation of the securities.
- Securities that do not have reference prices from the above sources will be assessed at fair value based on a review of the financial situation and book value of the issuer at the date closest to the valuation date or a valuation upon request of the General Director.

The remaining securities will be recorded at their original cost.

9. Derecognition of financial assets

A financial asset (or a part of a group of similar financial assets) is derecognized when:

- The Company no longer has the right to collect cash from the financial assets; or
- The Company transfers the right to collect cash from the financial assets or simultaneously incurs an obligation to pay almost immediately all the cash received to a third party through a transfer contract and:
 - The Company transfers substantially all the risks and rewards associated with the asset, or
 - The Company does not transfer or retain substantially all the risks and rewards associated with the asset but has transferred control of the asset.

When the Company transfers its rights to receive cash flows from an asset or has entered into a transfer agreement with a third party but has not transferred substantially all the risks and rewards of the asset or has not transferred control of the asset, the asset is still recognized as an asset of the Company. In such cases, the Company also recognizes a corresponding liability. The transferred asset and the corresponding liability are recognized on a basis that reflects the rights and obligations that the Company retains.

Continuing participation that takes the form of a guarantee of transferred assets will be recorded at the lower of the original carrying amount of the assets and the maximum amount that the Company would be required to pay.

10. Reclassification of financial assets

- a) *Reclassification of non-FVTPL financial asset sales*

When selling financial assets that are not FVTPL financial assets, securities companies must reclassify financial assets from other types of assets related to FVTPL financial assets. The revaluation differences of AFS financial assets currently monitored in the item "Revaluation differences of assets at fair value" will be recorded in the corresponding revenue or expense account at the date of reclassification of AFS financial assets when sold.

b) Reclassification due to change in intention or ability to hold

Securities companies are allowed to reclassify financial assets into other appropriate financial asset groups due to changes in intentions or holding capacity, accordingly:

- Non-derivative FVTPL financial assets that are not required to be classified as FVTPL financial assets upon initial recognition may be reclassified to loans and receivables in certain special circumstances or to cash and cash equivalents if they meet the criteria for classification into such groups. Gains and losses recognized on revaluation of FVTPL financial assets before the reclassification date will not be reversed.
- If, due to a change in intention or ability to hold, the classification of an investment as held-to-maturity is no longer appropriate, the investment must be transferred to the AFS financial asset group and revalued at fair value. The difference between the carrying amount and fair value will be recorded in the income statement under the item "Revaluation differences of available-for-sale financial assets".

II. Accounts Receivable

The Company's receivables include receivables from the sale of financial assets, receivables and accrued dividends, interest on financial assets and other receivables. Receivables are initially recorded at cost and are always reflected at cost in the following period.

Receivables include receivables and accrued dividends and interest on investments, receivables from matured investments, commitments to buy and resell listed and unlisted securities, etc. Receivables are initially recorded at cost and are always reflected at cost in the following period.

Receivables are considered for risk provisions based on the age of the debt or the expected loss that may occur in the event that the debt has not yet reached its maturity date but the economic organization is bankrupt or undergoing dissolution procedures; the debtor is missing, absconding, being prosecuted, detained, tried by law enforcement agencies, serving a sentence or has died.

The arising provision expenses are recorded in the business performance report under the item "Other operating expenses" during the period.

The provision level for overdue receivables is calculated based on the net risk excluding the value of collateral according to the provision ratios as guided by Circular No. 48/2019/TT-BTC issued by the Ministry of Finance on August 8, 2019 below:

<i>Overdue time</i>	<i>Provision level</i>
From over six (6) months to under one (1) year	30%
From one (1) year to less than two (2) years	50%
From two (2) years to less than three (3) years	70%
Three (3) years or more	100%

12. Tangible fixed assets

Tangible fixed assets are stated at cost less accumulated depreciation. The cost of a fixed asset comprises its purchase price and any costs directly attributable to bringing the asset to its working condition for its intended use.

Expenses for the purchase, improvement and renewal of fixed assets are recorded as an increase in the cost of the asset. Maintenance and repair costs are recorded in the statement of comprehensive income when incurred.

When tangible fixed assets are sold or liquidated, any net gain or loss resulting from their disposal is recognized in the statement of comprehensive income.

13. Intangible fixed assets

Intangible fixed assets are stated at cost less accumulated depreciation. The cost of an intangible fixed asset comprises its purchase price and any costs directly attributable to bringing the asset to its intended use.

Costs of improvements and renewals of intangible fixed assets are added to the cost of the asset and other costs are recognized in the statement of comprehensive income as they arise.

When intangible fixed assets are sold or liquidated, any net gain or loss resulting from their disposal is recognized in the statement of comprehensive income.

14. Depreciation and wear and tear

Depreciation and amortization of tangible fixed assets and intangible fixed assets are provided using the straight-line depreciation method over the estimated useful lives of the assets in accordance with Circular No. 45/2013/TT-BTC dated April 25, 2013 of the Ministry of Finance as follows:

Tangible fixed assets	Depreciation period
Machinery and equipment	3-8 years
Means of transport	3-6 years
Office equipment	3-4 years
Other tangible fixed assets	4 years
Intangible fixed assets	Depreciation period
Land use rights	No depreciation
Other intangible fixed assets	3-8 years

15. Property rental

Determining whether an arrangement is a lease is based on the substance of the arrangement at inception: whether the performance of the arrangement would depend on the use of a particular asset and whether the agreement includes a provision for the right to use the asset.

Rental payments under operating leases are recognized in the statement of comprehensive income on a straight-line basis over the term of the lease.

16. Prepaid expenses

Prepaid expenses include short-term or long-term prepaid expenses on the statement of financial position and are allocated over the period of prepayment of the expense corresponding to the economic benefits generated from these expenses.

The following types of expenses are recognized as long-term prepaid expenses for allocation to the statement of comprehensive income:

- Office rental expenses;
- Cost of using services with a term.

17. Purchase and resale contracts

Assets sold with a commitment to repurchase at a certain time in the future (purchase and resale contracts) are not deducted from the financial statements. The amount received under these purchase and resale contracts is recognized as a liability on the statement of financial position. The difference between the sale price and the repurchase price is treated as interest expense and is allocated on a straight-line basis to the statement of comprehensive income over the life of the repurchase agreement.

Assets purchased with a commitment to resell at a specified future date (resale agreements) are not recognised in the financial statements. The payments under these resale agreements are recognised as assets in the statement of financial position. The difference between the purchase

price and the resale price is treated as interest income and is allocated on a straight-line basis to the statement of comprehensive income over the life of the resale agreement.

For overdue commitments, the Company considers setting aside a risk provision based on the age of the overdue debt or based on the expected loss in accordance with Circular No. 48/2019/TT-BTC.

18. Borrowings

The Company's borrowings are disclosed and presented at the principal amounts outstanding at the end of the reporting period.

19. Payables and accruals

Other payables and accruals are recognized for amounts to be paid in the future for goods and services received, whether or not the Company has been billed by the supplier.

20. Employee Benefits

Retirement benefits

When retiring, the Company's employees will receive retirement benefits from the Social Insurance under the Ministry of Labor, War Invalids and Social Affairs. The Company contributes to this retirement benefit by paying social insurance for each employee at the rate of 18% of their monthly basic salary in accordance with Decision No. 959/QĐ-BHXH ("Decision 959"). From 1 June 2017, the above contribution rate is calculated at 17.5% of the employee's monthly basic salary in accordance with Decision No. 595/QĐ-BHXH dated 1 May 2017 replacing Decision 959.

In addition, the Company has no other obligations regarding the retirement benefits of its employees, other than the obligation to pay monthly Social Insurance.

Severance allowance payable

According to Article 48 of the Labor Code No. 10/2012/QH13 dated June 18, 2012, the Company is obliged to pay voluntary severance allowance equal to half a month's salary plus other allowances (if any) for each year of employment up to December 31, 2008 to employees who voluntarily resign.

Unemployment insurance

According to current regulations, the Company is obliged to pay unemployment insurance at a rate equal to 1% of the salary and wages fund for unemployment insurance of those participating in unemployment insurance and deduct 1% of the monthly salary and wages for

unemployment insurance of each employee to pay at the same time to the Unemployment Insurance Fund.

21. Owner's equity

Owner's contributed capital

Capital contributed from the issuance of shares is recorded in the charter capital account at par value.

Treasury shares

Equity instruments repurchased by the Company (treasury shares) are recorded at cost and deducted from equity. The Company does not recognize any gain/(loss) on the purchase, sale, issuance or cancellation of its own equity instruments.

Undistributed earnings

Undistributed earnings include realized and unrealized profits.

Unrealized earnings of the accounting period are the difference between the total value of revaluation gains and losses of financial assets recorded through profit/loss or other financial assets included in the profit and loss statement of the statement of business results in the list of financial assets of the Company.

Realized earnings of the accounting period are the difference between the total revenue and income and the total expenses included in the statement of business results of the Company, except for the gains and losses from revaluation of financial assets that have been recorded in unrealized earnings.

22. Revenue recognition

Revenue is recognized when it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, net of any trade discounts, rebates and sales returns. The following specific recognition criteria must also be met when recognizing revenue:

Revenue from securities brokerage

When the outcome of a contract can be reliably measured, revenue is recognized based on the stage of completion of the work. In cases where the outcome of a contract cannot be reliably measured, revenue is recognized only to the extent that the costs recognized are recoverable.

Income from securities trading

Income from securities trading is determined based on the difference between the selling price and the average cost of securities.

Securities repurchase and resale transactions

Revenue is recognized over the term of the securities repurchase and resale contract using the straight-line method.

Interest income

Revenue is recognized when interest accrues (taking into account the yield on the asset) unless collectibility is uncertain.

Dividends

Revenue is recognized when the Company's right to receive dividend payments is established, except for dividends received in shares which are only updated and tracked by the number of shares held and are not recognized as revenue.

Other income

Other income includes income from irregular activities, other than revenue-generating activities, including: net income from liquidation of fixed assets ("fixed assets"), sale of fixed assets; collection of fines from customers for breach of contract; collection of insurance compensation; collection of receivables that have been written off and included in previous period expenses; payables that have lost their owners are recorded as an increase in income; tax revenues that are reduced or refunded; and other revenues recognized as other income as prescribed in Vietnamese Accounting Standard No. 14 - Revenue and other income.

When the contract outcome can be reliably determined, revenue will be recognized based on the level of completion of the work.

If the contract outcome cannot be reliably determined, revenue will only be recognized at the recoverable level of the recorded costs.

23. Method of calculating the cost of self-trading securities sold

The Company applies the moving weighted average method to calculate the cost of self-trading securities and the specific method to calculate the cost of bonds.

24. Securities Company management costs

Securities Company management costs include general management costs such as salary costs and other staff costs for management department staff, office materials costs, labor tools, depreciation of fixed assets ... used for Company management.

These are actual expenses incurred (regardless of whether money has been spent or not) that are directly related to the Company's management activities during the period.

25. Corporate income tax

Current income tax

Income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Current income tax is recognized in the statement of comprehensive income, except when it relates to items recognized directly to equity, in which case the current income tax is also recognized directly in equity.

Current income tax assets and liabilities are offset when there is a legally enforceable right to set off current income tax assets against current income tax liabilities and when the Company intends to settle its current income tax assets and liabilities on a net basis.

Deferred income tax

Deferred income tax is determined on temporary differences at the balance sheet date between the tax base of assets and liabilities and their carrying amount for financial reporting purposes.

Deferred tax liability is recognized for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit (or loss).

Deferred tax asset should be recognized for all deductible temporary differences, carry-forwards of unused tax credits and unused tax losses, to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, carry-forwards of unused tax credits and unused tax losses can be utilized, except where the deferred tax asset arises from the initial recognition of an asset or liability in a transaction that, at the time of the transaction, affects neither accounting profit nor taxable profit (or tax loss).

The carrying amount of deferred tax assets should be reviewed at the end of the reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred tax asset to be utilized. Previously unrecognized deferred tax assets are reviewed at the end of the reporting period and recognized when it is probable that sufficient taxable profit will be available to utilize the unrecognized deferred tax assets.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates and tax laws that

have been enacted or substantively enacted by the balance sheet date. Deferred tax is recognized in comprehensive income, except when it relates to items recognized directly to equity, in which case the deferred tax is also recognized directly in equity. Deferred tax assets and liabilities are offset when the Company has a legally enforceable right to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority on the same taxable entity and the Company intends to settle its current tax assets and liabilities on a net basis.
